Congressional Record

PROCEEDINGS AND DEBATES OF THE 95th CONGRESS, FIRST SESSION

SENATE—*Tuesday, January 4, 1977*

The 4th day of January being the day prescribed by Public Law 94-494, 94th Congress, 2d session, for the meeting of the 1st session of the 95th Congress, the Senate assembled in its Chamber at the Capitol at 2 o'clock post meridian.

The VICE PRESIDENT. The Senate will come to order. The Chaplain will offer the prayer.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

God of our Fathers and our God, who has watched over this Nation from generation to generation and brought us to this place at this time, accept now the dedication of our hearts, our minds and our souls in the service of Thy higher kingdom. Help us to learn and to heed the lessons of history, of nature, and the world about us. Show us what we ought to do and how to do it. May new opportunities bring new insights and may new insights bring new life to the Nation. In all our labor help us to keep our honor bright and our hearts pure. Make our lives more eloquent than our speech. May the oath taken by some this day be to all of us a renewal of our convenant with Thee. And as we offer our allegiance to the Nation and its Constitution may we once more ascribe our highest loyalty to Thee, in whom we live and move and have our being. Amen.

And now, according to the custom of many years on opening day, let us pray together the prayer the Master taught us, saying:

Our Father, who art in heaven. Hallowed by Thy name. Thy kingdom come. Thy will be done; On Earth, as it is in heaven. Give us this day our daily bread. And forgive us our trespasses; As we forgive those who trespass against us. And lead us not into temptation; But deliver us from evil; For Thine is the kingdom, and the power, and the glory, forever. Amen.

CREDENTIALS—RESIGNATIONS AND APPOINTMENTS

The VICE PRESIDENT. The Chair lays before the Senate letters of resignation of six Senators and Certificates of Appointment of seven Senators to fill the vacancies caused by these resignations and one death.

Without objection, the reading will be waived, and the documents will be printed in the RECORD.

The documents ordered to be printed in the RECORD as follows:

U.S. SENATE,
Washington, D.C., December 21, 1976.

Hon. J. JAMES EXON,
Governor of Nebraska,
Lincoln, Nebr.

DEAR GOVERNOR: Submitted herewith is my resignation as a United States Senator from Nebraska, effective at the close of business on December 27, 1976.

This date was selected with two considerations in mind. It allows the continued discharge of my Senate responsibilities and yet permits time for you to appoint my successor, Mr. Zorinsky, to the office before his regular term would begin, thus securing for the people of our state the benefit of that seniority over other incoming Senators.

It is my understanding from Mr. Zorinsky that he has discussed with you the effective date of my resignation and the date indicated in this letter is satisfactory to both of you.

With kind personal regards,

Sincerely,

ROMAN L. HRUSKA,
U.S. Senator.

U.S. SENATE,
Washington, D.C., December 17, 1976.

Hon. FRANCIS R. VALEO,
Secretary, U.S. Senate,
Washington, D.C.

DEAR MR. VALEO: I hereby inform you of my resignation as a United States Senator from the State of Minnesota, effective with the beginning of business on Thursday, December 30, 1976.

I have enclosed copies of the letters of resignation I sent on this date to Vice President Nelson A. Rockefeller, President of the Senate, Senator James O. Eastland, President Pro Tempore of the Senate, and to Wendell R. Anderson, Governor of Minnesota.

With best wishes,

Sincerely,

WALTER F. MONDALE.

U.S. SENATE,
Washington, D.C., December 17, 1976.

Hon. NELSON A. ROCKEFELLER,
President, U.S. Senate,
Washington, D.C.

DEAR MR. PRESIDENT: I herewith tender my resignation as a Member of the United States Senate from Minnesota to become effective with the beginning of business on Thursday, December 30, 1976.

Respectfully,

WALTER F. MONDALE.

U.S. SENATE,
Washington, D.C., December 17, 1976.

Hon. JAMES O. EASTLAND,
President Pro Tempore, U.S. Senate, Washington, D.C.

DEAR MR. PRESIDENT: I herewith tender my resignation as a Member of the United States Senate from Minnesota to become effective with the beginning of business on Thursday, December 30, 1976.

Sincerely,

WALTER F. MONDALE.

U.S. SENATE,
Washington, D.C., December 17, 1976.

Hon. WENDELL R. ANDERSON,
Governor of Minnesota, State Capitol, St. Paul, Minn.

DEAR GOVERNOR ANDERSON: I hereby resign as a United States Senator from the State of Minnesota, effective with the beginning of business on Thursday, December 30, 1976.

In accordance with Senate rules, I have notified Senator James O. Eastland, President Pro Tempore of the Senate, of my resignation, and have enclosed a copy of my letter to him.

With best wishes,

Sincerely,

WALTER F. MONDALE.

U.S. SENATE,
Washington, D.C., December 15, 1976.

The VICE PRESIDENT
The U.S. Senate,
Washington, D.C.

MY DEAR MR. VICE PRESIDENT: Effective as of the close of business on Tuesday, December 28, 1976, I resign as United States Senator from the State of Rhode Island.

With warmest personal regards, I am,

Sincerely,

JOHN O. PASTORE.

U.S. SENATE,
Washington, D.C., December 17, 1976.

Hon. CHRISTOPHER S. BOND,
Governor of Missouri,
Jefferson City, Mo.

DEAR GOVERNOR BOND: This is to notify you that I am resigning as a United States Senator as of Monday noon, December 27, 1976.

With every good wish,

Sincerely,

STUART SYMINGTON.

U.S. SENATE,
Washington, D.C., December 17, 1976.

Hon. NELSON A. ROCKEFELLER,
President of the Senate,
The Capitol, Washington, D.C.

DEAR MR. PRESIDENT: This is to notify you that I am resigning as a United States Senator as of Monday, noon, December 27, 1976, and attached hereto is a copy of my letter to the Governor of Missouri.

With every good wish,

Sincerely,

STUART SYMINGTON.

DECEMBER 23, 1976.

The Hon. JAMES A. RHODES,
Governor, State of Ohio, State House,
Columbus, Ohio

DEAR GOVERNOR RHODES: After considering the matter carefully, I have determined that

I wish to resign my position as United States Senator from the State of Ohio, effective as of the close of business on December 28, 1976, and by this letter I am doing so.

May I take this occasion to thank you for the many courtesies you and your Administration have extended to me during my term of service.

Most sincerely,

ROBERT TAFT, Jr.

U.S. SENATE,
Washington, D.C., December 9, 1976.

The Hon. EDMUND G. BROWN, Jr.
Governor, State Capitol,

DEAR GOVERNOR BROWN: In the best interest of California, to provide my successor with added seniority, I hereby resign from the Senate of the United States effective at the close of business on January 1, 1977.

I would hope that you would exercise your authority under Rule 6.4 of the standing rules of the Senate and appoint Senator-elect S. I. Hayakawa to the Senate at that time for the remainder of my term.

Sincerely,

JOHN V. TUNNEY,
U.S. Senator.

STATE OF MINNESOTA,
EXECUTIVE DEPARTMENT.

CERTIFICATE OF APPOINTMENT

To the PRESIDENT OF THE SENATE OF THE UNITED STATES:

This is to certify that, pursuant to the power vested in me by the Constitution of the United States and the laws of the State of Minnesota, I, Rudy Perpich, the Governor of said State, do hereby appoint Wendell R. Anderson a Senator from said State, effective December 30, 1976, to represent said State in the Senate of the United States until the vacancy therein, caused by the resignation of Walter F. Mondale, is filled by election as provided by law.

Witness: His excellency, our governor, Rudy Perpich, and our seal hereto affixed at St. Paul this twenty-ninth day of December in the year of our Lord 1976.

By the Governor:

RUDY PERPICH, *Governor.*
JOAN ANDERSON GROWE,
Secretary of State.

STATE OF RHODE ISLAND,
PROVIDENCE PLANTATIONS.

CERTIFICATE OF APPOINTMENT

To the PRESIDENT OF THE SENATE OF THE UNITED STATES:

This is to certify that, pursuant to the power vested in me by the Constitution of the United States and the Constitution and General Laws of the State of Rhode Island, I, Philip W. Noel, the Governor of the State of Rhode Island and Providence Plantations, do hereby appoint John H. Chafee a Senator from said State to represent said State in the Senate of the United States for the vacancy therein caused by the resignation of John O. Pastore, effective December 29, 1976.

Witness: His Excellency our Governor, Philip W. Noel, and our seal hereto affixed at Providence this 29th day of December, in the year of our Lord, 1976.

By the Governor:

PHILIP W. NOEL,
Governor.
ROBERT F. BURNS,
Secretary of State.

STATE OF MISSOURI.

CERTIFICATE OF APPOINTMENT

To the PRESIDENT OF THE SENATE OF THE UNITED STATES:

This is to certify that, pursuant to the power vested in me by the Constitution of the United States and the laws of the State of Missouri, I, Christopher S. Bond, the Governor of said state, do hereby appoint John Claggett Danforth, a Senator from said state in the Senate of the United States, to fill the vacancy caused by the resignation of Stuart Symington, effective at noon, Eastern Standard Time, December 27, 1976, to hold said office for the unexpired term.

Witness: His Excellency, our Governor, Christopher S. Bond, our seal hereto affixed at Jefferson City, Missouri, this twenty-first day of December in the Year of our Lord, Nineteen Hundred and Seventy-Six.

By the Governor:

CHRISTOPHER S. BOND,
Governor.
JAMES C. KIRKPATRICK.
Secretary of State.

EXECUTIVE DEPARTMENT,
STATE OF CALIFORNIA.

CERTIFICATE OF APPOINTMENT

To the PRESIDENT OF THE SENATE OF THE UNITED STATES:

I, Edmund G. Brown Jr., Governor of California, pursuant to the power vested in me by the Constitution of the United States and the Constitution and laws of the State of California, do hereby appoint, effective the second day of January, 1977, S. I. Hayakawa, a Senator to represent the State of California in the Senate of the United States for the unexpired term ending at noon on the third day of January, 1977, caused by the resignation of Senator John V. Tunney.

In witness whereof, I have hereunto set my hand and caused the Great Seal of the State of California to be affixed hereto this 28th day of December, 1976.

EDMUND G. BROWN, Jr.,
Governor.
MARCH FONG EU,
Secretary of State.

STATE OF OHIO,
EXECUTIVE DEPARTMENT.

I, James A. Rhodes, Governor of the State of Ohio, do hereby appoint Howard M. Metzenbaum, Cleveland, Cuyahoga County, Ohio, as United States Senator representing the State of Ohio, for the unexpired term beginning December 29, 1976, vice Robert Taft, Jr., who resigned December 28, 1976.

In witness whereof, I have hereunto subscribed my name and caused the Great Seal of the State of Ohio to be affixed at Columbus, this 28th day of December, in the year of our Lord, one thousand nine hundred and seventy-six.

JAMES A. RHODES,
Governor.

STATE OF OHIO.

To all to whom these presents shall come, greeting: know ye, That Whereas Howard M. Metzenbaum of Cleveland, Cuyahoga County, has been duly appointed to the office of United States Senator, Representing Ohio.

Therefore, By virtue of the authority vested in the Governor by the Constitution, and in pursuance of a provision of the Statutes, I do hereby commission him, the said Howard M. Metzenbaum, to be United States Senator representing Ohio for an unexpired term beginning December 29, 1976, authorizing and empowering him to execute and discharge all and singular, the duties appertaining to said office, and to enjoy all the privileges and immunities thereof.

In testimony whereof, I have hereunto subscribed my name and caused the Great Seal of the State of Ohio to be affixed, at Columbus, this 28th day of December, in the year of our Lord, one thousand nine hundred and seventy-six.

JAMES A. RHODES,
Governor.
TED W. BROWN,
Secretary of State.

STATE OF NEBRASKA.

CERTIFICATE OF APPOINTMENT

To the PRESIDENT OF THE U.S. SENATE:

This is to certify that pursuant to the power vested in me by the Constitution of the United States and the laws of the State of Nebraska, I, J. James Exon, Governor of said State, do hereby appoint Edward Zorinsky to fill the vacancy caused by the resignation of Roman L. Hruska, effective at midnight, December 27, 1976, to hold said office for the unexpired term ending at noon on the third day of January, 1977.

Witness:

His Excellency, our Governor, J. James Exon, and our Seal hereto affixed at ten o'clock a.m., on the 23rd day of December, in the Year of our Lord One Thousand Nine Hundred and Seventy-Six.

I. JAMES EXON,
Governor.
ALLEN J. BEERMAN,
Secretary of State.

STATE OF MICHIGAN.

CERTIFICATE OF APPOINTMENT

To the PRESIDENT OF THE SENATE OF THE UNITED STATES:

This is to certify that, pursuant to the power vested in me by the Constitution of the United States and the laws of the State of Michigan, I, William G. Milliken, the governor of said State, do hereby appoint, effective December 30, 1976, Donald W. Riegle, Jr., a Senator from said State to represent said State in the Senate of the United States until the vacancy therein, caused by the death of Philip A. Hart, is filled by election as provided by law.

Witness: His Excellency our governor, William G. Milliken, and our seal hereto affixed at Lansing, Michigan, this thirtieth day of December, in the year of our Lord 1976.

WILLIAM G. MILLIKEN,
Governor.
RICHARD H. AUSTIN,
Secretary of State.

The VICE PRESIDENT. The Chair lays before the Senate the credentials of 33 Senators elected for 6-year terms beginning January 3, 1977. All certificates, the Chair is advised, are in the form suggested by the Senate, except the ones from California and Delaware, which use a different form but contain all the essential requirements of the form suggested by the Senate.

If there is no objection, the reading of the 33 certificates will be waived, and they will be printed in full in the RECORD.

There being no objection, the certificates were ordered to be printed in the RECORD as follows:

BY AUTHORITY OF THE STATE OF DELAWARE

To the PRESIDENT OF THE SENATE OF THE UNITED STATES:

Be it known, An election was held in the State of Delaware, on Tuesday, the 2nd day of November, in the year of our Lord one thousand nine hundred and seventy-six that being the Tuesday next after the first Monday in said month, in pursuance of the Constitution of the United States and the Laws of the State of Delaware, in that behalf, for the election of a Senator for the people of the said State, in the Senate of the United States.

Whereas, The official certificates or returns of the said election, held in the several counties of the said State, in due manner made out, signed and executed, have been delivered to me according to the laws of the said State, by the Superior Court of the said counties; and having examined said returns, and enumerated and ascertained the number of votes for each and every candidate or person voted for, for such Senator, I have found William V. Roth, Jr. to be the person highest in vote, and therefore duly elected Senator of and for the said State in the Senate of the United States for the Constitutional term to commence at noon on the third day of January in the year of our Lord one thousand nine hundred and seventy-seven.

I, Sherman W. Tribbitt, Governor, do, therefore, according to the form of the Act of the General Assembly of the said State and of the Act of Congress of the United States, in such case made and provided, declare the said William V. Roth, Jr. the person highest in vote at the election aforesaid, and therefore duly and legally elected Senator of and for the said State of Delaware in the Senate of the United States, for the Constitutional term to commence at noon on the third day of January in the year of our Lord one thousand nine hundred and seventy-seven.

Given under my hand and the Great Seal of the said State, in obedience to the said

Act of the General Assembly and of the said Act of Congress, at Dover, the 3rd day of December in the year of our Lord one thousand nine hundred and seventy-six and in the year of the Independence of the United States of America the two hundred and first.

By the Governor:

SHERMAN W. TRIBBITT,
ROBERT A. REED,
Secretary of State.

STATE ADMINISTRATIVE BOARD OF ELECTION LAWS,
Annapolis, Md.

This is to certify that the attached is a true and correct copy of Governor Mandel's Certification relative to the election of a United States Senator from the State of Maryland.

The same is taken from and compared with the original Certification which is now on file in this office.

In testimony whereof, I have hereunto set my hand and have caused to be affixed the official seal of the State Administrative Board of Election Laws, this 23rd day of November, 1976.

WILLARD A. MORRIS,
Administrator.

EXECUTIVE DEPARTMENT,
Annapolis, Md.

By the Governor:

BRENDAN T. BYRNE,
Governor.

———, ———,
Secretary of State.

CERTIFICATE OF ELECTION FOR 6-YEAR TERM

To the PRESIDENT OF THE SENATE OF THE UNITED STATES:

This is to certify that on the 2nd day of November, 1976, Edward Zorinsky was duly chosen by the qualified electors of the State of Nebraska a Senator from said State to represent said State in the Senate of the United States for the term of six years, beginning on the 3rd day of January, 1977.

Witness: His excellency our governor J. James Exon, and our seal hereto affixed at the State Capitol, Lincoln, Nebraska this 29th day of November, in the year of our Lord 1976.

By the Governor:

J. JAMES EXON,
Governor.
ALLEN J. BEERMANN,
Secretary of State.

The VICE PRESIDENT. If the one Senator-designate from the State of Minnesota and the 33 Senators-elect will now present themselves at the desk in groups of four as their names are called in alphabetical order, the Chair will administer the oath of office.

The clerk will call the names.

The legislative clerk called the names of Mr. ANDERSON, Mr. BENTSEN, Mr. BURDICK, and Mr. HARRY F. BYRD, JR.

These Senators, escorted by Mr. HUMPHREY, Mr. TOWER, Mr. YOUNG, and Mr. SCOTT, respectively, advanced to the desk of the Vice President; the oath prescribed by law was administered to them by the Vice President; and they severally subscribed to the oath in the official oath book.

[Applause, Senators rising.]

The legislative clerk called the names of Mr. ROBERT C. BYRD, Mr. CANNON, Mr. CHAFEE, and Mr. CHILES.

These Senators, escorted by Mr. RANDOLPH, Mr. LAXALT, Mr. PELL, and Mr. STONE, respectively, advanced to the desk of the Vice President; the oath prescribed by law was administered to them by the Vice President; and they severally subscribed to the oath in the official oath book.

[Applause, Senators rising.]

The legislative clerk called the names of Mr. DANFORTH, Mr. DECONCINI, Mr. HATCH, and Mr. HAYAKAWA.

The Senators, escorted by Mr. EAGLETON, Mr. GOLDWATER, Mr. GARN, and Mr. CRANSTON, respectively, advanced to the desk of the Vice President; the oath prescribed by law was administered to them by the Vice President; and they severally subscribed to the oath in the official oath book.

[Applause, Senators rising.]

The legislative clerk called the names of Mr. HEINZ, Mr. HUMPHREY, Mr. JACKSON, and Mr. KENNEDY.

The Senators, escorted by Mr. SCHWEIKER, Mr. ANDERSON, Mr. MAGNUSON, and Mr. BROOKE, respectively, advanced to the desk of the Vice President; the oath prescribed by law was administered to them by the Vice President; and they severally subscribed to the oath in the official oath book.

[Applause, Senators rising.]

The legislative clerk called the names of Mr. LUGAR, Mr. MATSUNAGA, Mr. MELCHER, and Mr. METZENBAUM.

The Senators, escorted by Mr. BAYH, Mr. INOUYE, Mr. METCALF, and Mr. GLENN, respectively, advanced to the desk of the Vice President; the oath prescribed by law was administered to them by the Vice President; and they severally subscribed to the oath in the official oath book.

[Applause, Senators rising.]

The legislative clerk called the names of Mr. MOYNIHAN, Mr. MUSKIE, Mr. PROXMIRE, and Mr. RIEGLE.

The Senators, escorted by Mr. JAVITS, Mr. HATHAWAY, Mr. NELSON, and Mr. GRIFFIN, respectively, advanced to the desk of the Vice President; the oath prescribed by law was administered to them by the Vice President; and they severally subscribed to the oath in the official oath book.

[Applause, Senators rising.]

The legislative clerk called the names of Mr. ROTH, Mr. SARBANES, Mr. SASSER, and Mr. SCHMITT.

These Senators, escorted by Mr. BIDEN, Mr. MATHIAS, Mr. BAKER, and Mr. DOMENICI, respectively, advanced to the desk of the Vice President; the oath prescribed by law was administered to them by the Vice President; and they severally subscribed to the oath in the official oath book.

[Applause, Senators rising.]

The legislative clerk called the names of Mr. STAFFORD, Mr. STENNIS, Mr. WALLOP, and Mr. WEICKER.

These Senators, escorted by Mr. LEAHY, Mr. EASTLAND, Mr. HANSEN, and Mr. RIBICOFF, respectively, advanced to the desk of the Vice President; the oath prescribed by law was administered to them by the Vice President; and they severally subscribed to the oath in the official oath book.

[Applause, Senators rising.]

The legislative clerk called the names of Mr. WILLIAMS and Mr. ZORINSKY.

These Senators, escorted by Mr. CASE and Mr. CURTIS, respectively, advanced to the desk of the Vice President; the oath prescribed by law was administered to them by the Vice President; and they severally subscribed to the oath in the official oath book.

[Applause, Senators rising.]

CALL OF THE ROLL

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll and the following Senators answered to their names:

[Quorum No. 1 Leg.]

Abourezk	Glenn	Metzenbaum
Allen	Goldwater	Morgan
Anderson	Gravel	Moynihan
Baker	Griffin	Muskie
Bartlett	Hansen	Nelson
Bayh	Hart	Nunn
Bellmon	Haskell	Packwood
Bentsen	Hatch	Pearson
Biden	Hatfield	Pell
Brooke	Hathaway	Proxmire
Bumpers	Hayakawa	Randolph
Burdick	Heinz	Ribicoff
Byrd, Harry F., Jr.	Helms	Riegle
	Hollings	Roth
Byrd, Robert C.	Huddleston	Sarbanes
Cannon	Humphrey	Sasser
Case	Inouye	Schmitt
Chafee	Jackson	Schweiker
Chiles	Javits	Scott
Church	Johnston	Sparkman
Clark	Kennedy	Stafford
Cranston	Laxalt	Stennis
Culver	Leahy	Stevens
Curtis	Long	Stevenson
Danforth	Lugar	Stone
DeConcini	Magnuson	Talmadge
Dole	Mathias	Thurmond
Domenici	Matsunaga	Tower
Durkin	McClellan	Wallop
Eagleton	McClure	Weicker
Eastland	McIntyre	Williams
Ford	Melcher	Young
Garn	Metcalf	Zorinsky

Mr. ROBERT C. BYRD. I announce that the Senator from South Dakota (Mr. MCGOVERN) is necessarily absent.

Mr. STEVENS. I announce that the Senator from Illinois (Mr. PERCY) is necessarily absent.

The VICE PRESIDENT. A quorum is present.

Mr. ROBERT C. BYRD. Mr. President, may we have order in the Senate?

The VICE PRESIDENT. May we have order in the Senate, please? Senators will please take their seats.

NOTIFICATION TO THE PRESIDENT

Mr. ROBERT C. BYRD. Mr. President, I send to the desk a resolution and ask for its immediate consideration.

The VICE PRESIDENT. Is there objection to the present consideration of the resolution?

There being no objection, the resolution (S. Res. 1) was considered and agreed to, as follows:

S. RES. 1

Resolved, That a committee consisting of two Senators be appointed by the Vice President to join such committee as may be appointed by the House of Representatives to wait upon the President of the United States and inform him that a quorum of each House is assembled and that the Congress is ready to receive any communication he may be pleased to make.

The VICE PRESIDENT. Pursuant to Senate Resolution 1, the Chair appoints the Senator from West Virginia (Mr. ROBERT C. BYRD) and the Senator from Tennessee (Mr. BAKER) as a committee to join the committee of the House of Representatives to wait upon the President of the United States and inform him that a quorum is assembled and that Congress is ready to receive any communication he may be pleased to make.

NOTIFICATION TO THE HOUSE

Mr. BAKER. Mr. President, I send to the desk a resolution and ask for its immediate consideration.

The VICE PRESIDENT. Is there objection to the present consideration of the resolution?

There being no objection, the resolution (S. Res. 2) was considered and agreed to, as follows:

Resolved, That the Secretary inform the House of Representatives that a quorum of the Senate is assembled and that the Senate is ready to proceed to business.

SENATE RESOLUTION 3—FIXING THE HOUR OF DAILY MEETING OF THE SENATE

Mr. CRANSTON. Mr. President, I send a resolution to the desk and ask for its immediate consideration.

The VICE PRESIDENT. The resolution will be stated by title.

The legislative clerk read as follows:

A resolution (S. Res. 3) fixing the hour of daily meeting of the Senate.

The resolution (S. Res. 3) was read, considered, and agreed to as follows:

S. RES. 3

Resolved, That the hour of daily meeting of the Senate be 12 o'clock meridian unless otherwise ordered.

SENATE CONCURRENT RESOLUTION 1—PROVIDING FOR THE COUNTING OF THE ELECTORAL VOTES FOR PRESIDENT AND VICE PRESIDENT OF THE UNITED STATES

Mr. CANNON. Mr. President, I submit a concurrent resolution and ask for its immediate consideration.

The VICE PRESIDENT. The concurrent resolution will be stated by title.

The legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 1) to provide for the counting on January 6, 1977, of the electoral votes for President and Vice President of the United States.

The concurrent resolution was considered and agreed to, as follows:

S. CON. RES. 1

Resolved by the Senate (the House of Representatives concurring), That the two Houses of Congress shall meet in the Hall of the House of Representatives on Thursday, the 6th day of January 1977, at 1 o'clock postmeridian, pursuant to the requirements of the Constitution and laws relating to the election of President and Vice President of the United States, and the President of the Senate shall be their Presiding Officer; that two tellers shall be previously appointed by the President of the Senate on the part of the Senate and two by the Speaker on the part of the House of Representatives, to whom shall be handed, as they are opened by the President of the Senate, all certificates and papers purporting to be certificates of the electoral votes, which certificates and papers shall be opened, presented, and acted upon in the alphabetical order of the States, beginning with the letter "A"; and said tellers, having then read the same in the presence and hearing of the two Houses, shall make a list of the votes as they shall appear from the said certificates; and the votes having been ascertained and counted in the manner and according to the rules by law

provided, the result of the same shall be delivered to the President of the Senate, who shall thereupon announce the state of the vote, which announcement shall be deemed a sufficient declaration of the persons, if any, elected President and Vice President of the United States, and, together with a list of the votes, be entered on the Journals of the two Houses.

The VICE PRESIDENT. In accordance with the provisions of Senate Concurrent Resolution 1, the Chair now appoints Mr. CANNON and Mr. HATFIELD as the tellers on the part of the Senate to count the electoral votes for President and Vice President of the United States on January 6, 1977.

COMMUNICATION PERTAINING TO ASCERTAINMENT OF ELECTORS FOR PRESIDENT AND VICE PRESIDENT

The VICE PRESIDENT. The Chair lays before the Senate a communication from the Administrator of the General Services Administration transmitting, pursuant to law, certified copies of the final ascertainment of electors for President and Vice President from the several States and the District of Columbia, which, with the accompanying papers, are ordered to lie on the table.

QUORUM CALL

Mr. CRANSTON. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, may we have order in the Senate?

The VICE PRESIDENT. The Senators will please take their seats.

May we have order in the Senate, please.

UNANIMOUS-CONSENT PROPOSALS

Mr. ROBERT C. BYRD. Mr. President, it would be my hope that there could be a period for the transaction of routine morning business only for the purpose of making statements today. It is my understanding that Senators on both sides of the aisle have statements they would like to make for the RECORD.

At the same time, there are some housekeeping resolutions, one of which will be introduced by Mr. STEVENSON, one of which I will introduce, on which we would hope we could get agreement to send both resolutions to the Committee on Rules, with a provision that they be reported back in certain due time.

Before attempting that approach, I will ask unanimous consent that there may be a period for the transaction of routine morning business following the referrals of the two housekeeping resolutions to which I have alluded, if such consent is granted, and that there then be a period for the transaction of morning business, with the understanding that such morning business would be constituted only of the making of statements; that there be no introductions of bills or resolutions today.

It would be my hope that after today, if the Stevenson resolution can be referred to the Rules Committee, and if the resolution which I intend to introduce can be referred to the Rules Committee, we could then, after morning business is completed, go over until Thursday, at which time the Senate will convene, and the Senators will meet with the Members of the House of Representatives in the Hall of the House of Representatives to count the electoral votes.

It would then be my hope we would go from Thursday over until Monday, on which day bills and resolutions could be introduced, and business could be transacted.

I have not put this in the form of a request just yet. If the Chair will just indulge me for a moment.

Mr. HATHAWAY. Mr. President, if the Senator from West Virginia will yield——

Mr. ROBERT C. BYRD. Yes.

Mr. HATHAWAY. I understand that the Senator from West Virginia is going to ask unanimous consent to allow introduction of certain resolutions dealing with amendments to the Standing Rules of the Senate. The Senator from Oregon and I, and maybe others, have resolutions similar to the one that is going to be proposed to be referred to the Rules Committee, with such time limitation as suggested by the Senator from West Virginia. Both the Senator from Oregon and I would like the opportunity to offer our resolution on rules changes and housekeeping changes, under the same circumstances, and we would like to do this today, before morning business, if that is possible. We understand, at least from the leadership's point of view, there is no objection on the part of either side.

Mr. ROBERT C. BYRD. May I say this: I have talked with the Republican leadership with respect to both resolutions that I mentioned. I hope there will not be any objection to sending them to the committee. This is the orderly procedure. Otherwise a problem might be created here in the Senate which would prevent our going over from today until Thursday and from Thursday until Monday.

As to the introduction of other resolutions, I do not know what the wishes of the Senate will be in that regard. I had hoped that the introduction of all bills and resolutions other than those I mentioned could be deferred until Monday.

Mr. BAKER addressed the Chair.

Mr. ROBERT C. BYRD. However, if the Senator wishes to attempt that, I hope he would wait until Mr. STEVENSON has offered his resolution and I have offered mine; then see what the will of the Senate is at that point, and then if he wishes to do the same he certainly has the right as a Senator to do that.

Mr. HATHAWAY. All right.

Mr. BAKER. Mr. President, I wonder if we might explore one other possibility. I understand Senator Hathaway has an amendment and Senator HATFIELD has four amendments all dealing with this same subject matter—the rules changes relating to the handling of matters after the invocation of cloture under rule XXII.

I wonder if the distinguished majority leader would consider including in the unanimous-consent request he is about to propose a referral to the Rules Committee of any such amendment relating to that rule under the same order.

Mr. ROBERT C. BYRD. That would be perfectly all right with me. But the distinguished chairman of the Committee on Rules and Administration is here. I do not know how he would respond to that.

I would much prefer proceeding as I have suggested, that we take up the resolution that will be introduced by Mr. STEVENSON, and ask that it be referred. It is entirely separate and apart from the others. I would then ask that my resolution be referred so that it would rest on its own bottom, so to speak, and then let Senator HATHAWAY and others make the same effort in their own behalf. If there are objections, it will not appear with my resolution. If there are no objections to those resolutions, they would go to the committee, and at such time as the committee conducted its studies with respect to my resolution, it could include theirs.

Mr. BAKER. Mr. President, if the Senator will yield further, I think we are both reaching for the same result. I certainly would not be adverse to a separate order on the distinguished majority leader's resolution, another on the resolution of the chairman of the committee, and a third order saying that any other resolutions dealing with the change of postcloture rule XXII matters would also be referred.

We would have three orders, with a catchall, so to speak, for the Hatfield resolutions—there are four of them—and any others that may address the same subject matter, but not beyond that subject matter.

Mr. ALLEN. Mr. President, reserving the right to object, what is the present request? Has the Senator made a request?

Mr. ROBERT C. BYRD. No; the Senator has not made a request at this moment.

Mr. President, I will yield now without losing my right to the floor, if it may be with the consent of the Senate, to the distinguished Senator from Illinois (Mr. STEVENSON).

The VICE PRESIDENT. Without objection, it is so ordered. The Senator from Illinois.

SENATE RESOLUTION 4—SUBMISSION OF THE COMMITTEE SYSTEM REORGANIZATION AMENDMENTS OF 1977

Mr. STEVENSON (for himself, Mr. PACKWOOD, Mr. DOMENICI, Mr. HANSEN, Mr. METCALF, Mr. NELSON, Mr. BELLMON, Mr. CRANSTON, Mr. DANFORTH, Mr. GRAVEL, Mr. HATFIELD, Mr. HATHAWAY, Mr. HAYAKAWA, Mr. LUGAR, Mr. SCHMITT, and Mr. WALLOP) submitted the following resolution, which was referred to the Com-

mittee on Rules and Administration, with instructions, by unanimous consent:

S. RES. 4

Resolved, That this resolution may be cited as the "Committee System Reorganization Amendments of 1977".

TITLE I—STANDING COMMITTEES: JURISDICTIONS AND SIZES

SEC. 101(a) XXV of the Standing Rules of the Senate is amended by striking out paragraphs 1, 2, and 3 and inserting in lieu thereof the following new paragraphs:

"1. The following standing committees shall be appointed at the commencement of each Congress, with leave to report by bill or otherwise on matters within their respective jurisdictions:

"(a)(1) Committee on Agriculture and Small Business, to which committee shall be referred all proposed legislation, messages, petitions, memorials, and other matters relating primarily to the following subjects:

"1. Agriculture and agricultural commodities.

"2. Inspection of livestock, meat, and agricultural products.

"3. Animal industry and diseases.

"4. Pests and pesticides.

"5. Agricultural extension services and experiment stations.

"6. Forestry.

"7. Agricultural economics and research.

"8. Home economics.

"9. Plant industry, soils, and agricultural engineering.

"10. Farm credit and farm security.

"11. Rural development, rural electrification, and watersheds.

"12. Agricultural production, marketing, and stabilization of prices.

"13. Crop insurance and soil conservation.

"14. Human nutrition.

"15. School nutrition programs.

"16. Food stamp programs.

"17. Small business.

"18. Food from fresh waters and the sea.

"19. Irrigation and reclamation.

"20. Land-use planning.

"21. Regional economic development.

"(2) Such committee shall also study and review, on a comprehensive basis, matters relating to food, nutrition, and hunger, both in the United States and in foreign countries, and all problems of American small business enterprises and all facts possible in relation thereto which would not only be of public interest, but which would also aid the Congress in enacting remedial legislation, and report thereon from time to time.

"(b) Committee on Appropriations, to which committee shall be referred all proposed legislation, messages, petitions, memorials, and other matters relating to the following subjects:

"1. Except as provided in subparagraph (e), appropriation of the revenue for the support of the Government.

"2. Rescission of appropriations contained in appropriation Acts (referred to in section 105 of title 1, United States Code).

"3. The amount of new spending authority described in section 401(c)(2) (A) and (B) of the Congressional Budget Act of 1974 provided in bills and resolutions referred to the committee under section 401(b)(2) of that Act (but subject to the provisions of section 401(b)(3) of that Act).

"4. New advance spending authority described in section 401(c)(2)(C) of the Congressional Budget Act of 1974 provided in bills and resolutions referred to the committee under section 401(b)(2) of that Act (but subject to the provisions of section 401(b)(3) of that Act).

"(c)(1) Committee on Armed Services, to which committee shall be referred all proposed legislation, messages, petitions, memorials, and other matters relating to the following subjects:

"1. The common defense.

"2. The Department of Defense, the Department of the Army, the Department of the Navy, and the Department of the Air Force, generally.

"3. Pay, promotion, retirement, and other benefits and privileges of members of the Armed Forces.

"4. Military research and development.

"5. Selective service system.

"6. Strategic and critical materials necessary for the common defense.

"7. Aeronautical and space activities peculiar to or primarily associated with the development of weapons systems or military operations.

"8. Panama Canal Zone government.

"9. Foreign military sales (joint).

"10. National security aspects of atomic energy.

"(2) Such committee shall also study and review, on a comprehensive basis, matters relating to the common defense policy of the United States, and report thereon from time to time.

"(d)(1) Committee on Banking, Housing, and Urban Affairs, to which committee shall be referred all proposed legislation, messages, petitions, memorials, and other matters relating to the following subjects:

"1. Banks, banking, and financial institutions.

"2. International finance, including international financial and monetary organizations.

"3. Financial aid to commerce and industry.

"4. Deposit insurance.

"5. Public and private housing (including veterans' housing).

"6. Federal monetary policy, including Federal Reserve System.

"7. Money and credit, including currency and coinage.

"8. Issuance and redemption of notes.

"9. Control of prices of commodities, rents, and services.

"10. Urban development (except for urban mass transit).

"11. Economic stabilization and defense production.

"12. Export controls.

"13. Export and foreign trade promotion.

"14. Nursing home construction.

"(2) Such committee shall also study and review, on a comprehensive basis, matters relating to international economic policy, defense production and national stockpiles, economic growth, urban affairs, and credit, and report thereon from time to time.

"(e)(1) Committee on the Budget, to which committee shall be referred all concurrent resolutions on the budget (as defined in section in section 3(a)(4) of the Congressional Budget Act (as defined in section 3(a)(4) of the Congressional Budget Act of 1974) and all other matters required to be referred to that committee under titles III and IV of that Act, and messages, petitions, memorials, and other matters relating thereto.

"(2) Such committee shall have the duty—

"(A) to report the matters required to be reported by it under titles III and IV of the Congressional Budget Act of 1974;

"(B) to make continuing studies of the effect on budget outlays of relevant existing and proposed legislation and to report the results of such studies to the Senate on a recurring basis;

"(C) to request and evaluate continuing studies of tax expenditures, to devise methods of coordinating tax expenditures, policies, and programs with direct budget outlays, and to report the results of such studies to the Senate on a recurring basis; and

"(D) to review, on a continuing basis, the conduct by the Congressional Budget Office of its functions and duties.

"(3) Such committee shall also study and review, on a comprehensive basis, matters relating to economic policy, public and private pension programs, priorities and economies in Government, the annual Economic Report of the President, and the budget data submitted by the President pursuant to section 605 of the Congressional Budget Act of 1974, and report thereon from time to time.

"(f)(1) Committee on Commerce, Science, and Transportation, to which committee shall be referred all proposed legislation, messages, petitions, memorials, and other matters relating to the following subjects:

"1. Interstate commerce.

"2. Transportation.

"3. Regulation of interstate common carriers, including railroad, buses, trucks, vessels, pipelines, and civil aviation.

"4. Merchant marine and navigation.

"5. Coast Guard.

"6. Inland waterways.

"7. Communications.

"8. Regulation of consumer products and services.

"9. Interoceanic canals.

"10. Standards and measurement.

"11. Construction and maintenance of highways, and highway safety.

"12. Urban mass transit.

"13. Scientific engineering and technology research and development.

"14. Nonmilitary aeronautical and space sciences.

"15. Science, engineering and technology policy.

"16. National Science Foundation.

"(2) Such committee shall also study and review, on a comprehensive basis, all matters relating to science and technology, transportation, communications, and consumer affairs, and report thereon from time to time.

"(g)(1) Committee on Energy and Natural Resources, to which committee shall be referred all proposed legislation, messages, petitions, memorials, and other matters relating to the following subjects:

"1. Energy policy.

"2. Energy regulation and conservation.

"3. Energy research and development.

"4. Solar energy systems.

"5. Nonmilitary development of nuclear energy.

"6. Naval petroleum reserves.

"7. Oil and gas production and distribution.

"8. Extraction of minerals from outer continental shelf lands.

"9. Energy related aspects of deepwater ports.

"10. Hydroelectric power.

"11. Coal production, distribution, and utilization.

"12. Public lands and forests, including farming and grazing thereon, and mineral extraction therefrom.

"13. National parks, recreation areas, wilderness areas, historical sites, military parks and battlefields, and preservation of prehistoric ruins and objects of interest on the public domain.

"14. Mining, mineral lands, mining claims, and mineral conservation.

"15. Mining education and research.

"16. Native American land management and trust responsibilities.

"(2) Such committee shall also study and review, on a comprehensive basis, matters relating to energy and resources development, and report thereon from time to time.

"(h)(1) Committee on Environment and Public Works, to which committee shall be referred all proposed legislation, messages, petitions, memorials, and other matters relating to the following subjects:

"1. Environmental policy.

"2. Environmental research and development.

"3. Oceans, weather, and atmospheric activities.

"4. Fisheries and wildlife.

"5. Coastal zone management.

"6. Outer Continental Shelf lands (except extraction of minerals therefrom).

"7. Ocean dumping.
"8. Solid waste disposal recycling.
"9. Toxic substances.
"10. Environmental effects of pesticides.
"11. Water resources.
"12. Flood control and improvements of rivers and harbors.
"13. Public works, bridges, and dams.
"14. Water pollution.
"15. Air pollution.
"16. Noise pollution.
"17. Nonmilitary environmental regulation and control of atomic energy.

"(2) Such committee shall also study and review, on a comprehensive basis, matters relating to environmental protection and resource utilization and conservation, and report thereon from time to time.

"(i) (1) Committee on Finance, to which committee shall be referred all proposed legislation, messages, petitions, memorials, and other matters relating to the following subjects:

"1. Except as provided in the Congressional Budget Act of 1974, revenue measures generally.
"2. Except as provided in the Congressional Budget Act of 1974, the bonded debt of the United States.
"3. The deposit of public moneys.
"4. Customs, collection districts, and ports of entry and delivery.
"5. Reciprocal trade agreements.
"6. Transportation of dutiable goods.
"7. Revenue measures relating to the insular possessions.
"8. Tariffs and import quotas, and matters related thereto.
"9. National social security.
"10. General revenue sharing.

"(2) Such committee shall also study and review on a comprehensive basis, and report thereon from time to time—

"(A) the operations and effects of the internal revenue laws; and

"(B) the revenue policy of the United States.

"(j) (1) Committee on Foreign Relations, to which committee shall be referred all proposed legislation, messages, petitions, memorials, and other matters relating to the following subjects:

"1. Relations of the United States with foreign nations generally.
"2. Treaties and executive agreements except reciprocal trade agreements.
"3. Boundaries of the United States.
"4. Protection of United States citizens abroad and expatriation.
"5. Intervention abroad and declarations of war.
"6. Foreign economic, military, technical, and humanitarian assistance.
"7. United Nations and its affiliated organizations.
"8. International conferences and congresses.
"9. Diplomatic service.
"10. Foreign military sales (joint).

"(2) Such committee shall also study and review, on a comprehensive basis, matters relating to the national security policy of the United States, and report thereon from time to time.

"(k) (1) Committee on Governmental Affairs, to which committee shall be referred all proposed legislation, messages, petitions, memorials, and other matters relating to the following subjects:

"1. Except as provided in the Congressional Budget Act of 1974, budget and accounting measures, other than appropriations.
"2. Organization and reorganization of the executive branch of the Government.
"3. Intergovernmental relations.
"4. Government information, including freedom of information.
"5. Municipal affairs of the District of Columbia, except appropriations therefor.
"6. Acquisition of land and buildings for embassies and legations in foreign countries.
"7. Insular possessions of the United States.
"8. Federal Civil Service.
"9. Status of officers and employees of the United States, including their classification, compensation and benefits.
"10. Postal service.
"11. Census and collection of statistics, including economic, social, and labor statistics.
"12. Archives of the United States.
"13. Public buildings and grounds.
"14. Federal buildings and parks within the District of Columbia.
"15. United States Capitol and congressional office buildings.
"16. Construction and maintenance of the Botanic Garden, the Library of Congress, and the Smithsonian Institution.

"(2) Such committee shall have the duty of—

"(A) receiving and examining reports of the Comptroller General of the United States and of submitting such recommendations to the Senate as it deems necessary or desirable in connection with the subject matter of such reports;

"(B) studying the efficiency, economy, and effectiveness of all agencies and departments of the Government;

"(C) evaluating the effects of laws enacted to reorganize the legislative and executive branches of the Government;

"(D) studying the intergovernmental relationships between the United States and the States and municipalities, and between the United States and international organizations of which the United States is a member.

"(l) (1) Committee on Human Resources, to which committee shall be referred all proposed legislation, messages, petitions, memorials, and other matters relating to the following subjects:

"1. Measures relating to education, labor, health and public welfare.
"2. Vocational education.
"3. Handicapped individuals.
"4. Equal employment opportunity.
"5. Occupational safety and health, including the welfare of miners.
"6. Private pension plans.
"7. Aging.
"8. Railway labor and retirement.
"9. Public health.
"10. Arts and humanities.
"11. Gallaudet College, Howard University, and Saint Elizabeth Hospital.
"12. Biomedical research and development.
"13. Student loans.
"14. Native American education, health, social services, and loan programs.
"15. Veterans' measures, except for housing.
"16. Agricultural colleges.
"17. Overseas education of civilian and military dependents.

"(2) Such committee shall also study and review, on a comprehensive basis, matters relating to health, education and training, aging and the problems of the elderly, income maintenance, and Native American affairs, and report thereon from time to time.

"(m) Committee on the Judiciary, to which committee shall be referred all proposed legislation, messages, petitions, memorials, and other matters relating to the following subjects:

"1. Judicial proceedings, civil and criminal, generally.
"2. Constitutional amendments.
"3. Federal courts and judges.
"4. Local courts in the territories and possessions.
"5. Revision and codification of the statutes of the United States.
"6. National penitentiaries.
"7. Protection of trade and commerce against unlawful restraints and monopolies.
"8. Holidays and celebrations.
"9. Bankruptcy, mutiny, espionage, and counterfeiting.
"10. State and territorial boundary lines.
"11. Meetings of Congress, attendance of Members, and their acceptance of incompatible offices.
"12. Civil liberties.
"13. Patents, copyrights, and trademarks.
"14. Patent Office.
"15. Immigration and naturalization.
"16. Apportionment of Representatives.
"17. Measures relating to claims against the United States.
"18. Interstate compacts generally.

"(n) (1) Committee on Rules, Administration, and Standards, to which committee shall be referred all proposed legislation, messages, petitions, memorials, and other matters relating to the following subjects:

"1. Matters relating to the payment of money out of the contingent fund of the Senate or creating a charge upon the same; except that any resolution relating to substantive matter within the jurisdiction of any other standing committee of the Senate shall be first referred to such committee.

"2. Except as provided in subparagraph (k), matters relating to the Library of Congress, the Government Printing Office, and the Senate Library; statuary and pictures; acceptance or purchase of works of art for the Capitol; the Botanic Gardens; management of the Library of Congress; purchase of books and manuscripts; erection of monuments to the memory of individuals.

"3. Except as provided in subparagraph (k), matters relating to the Smithsonian Institution and the incorporation of similar institutions.

"4. Matters relating to the election of the President, Vice President, or Members of Congress; corrupt practices; contested elections; credentials and qualifications; Federal elections generally; Presidential succession.

"5. Matters relating to parliamentary rules; floor and gallery rules; Senate Restaurant; administration of the Senate Office Buildings and of the Senate wing of the Capitol; assignment of office space; and services to the Senate.

"6. Matters relating to printing and correction of the Congressional Record.

"(2) Such committee also have the duty of assigning office space in the Senate wing of the Capitol and in the Senate Office Buildings.

"(3) It shall be the duty of such committee to—

"(A) receive complaints and investigate allegations of improper conduct which may reflect upon the Senate, violations of law, and violations of rules and regulations of the Senate, relating to the conduct and individuals in the performance of their duties as Members of the Senate, or as officers or employees of the Senate, and to make appropriate findings of fact and conclusions with respect thereto;

"(B) recommend to the Senate by report or resolution by a majority vote of the full committee disciplinary action to be taken with respect to such violations which the committee shall determine, after according to the individuals concerned due notice and opportunity for hearing, to have occurred;

"(C) recommend to the Senate, by report or resolution, such additional rules or regulations as the committee shall determine to be necessary or desirable to insure proper standards of conduct by Members of the Senate, and by officers or employees of the Senate, in the performance of their duties and the discharge of their responsibilities; and

"(D) report violations by a majority vote of the full committee of any law to the proper Federal and State authorities.

"(4) Such committee shall also—

"(A) make a continuing study of the organization and operation of the Congress of the United States and shall recommend improvements in such organization and operation with a view toward strengthening Congress, simplifying its operations, improving

its relationships with other branches of the United States Government, and enabling it better to meet its responsibilities under the Constitution of the United States; and

"(B) identify any court proceeding or action which, in the opinion of the Committee, is of vital interest to the Congress as a constitutionally established institution of the Federal Government and call such proceeding or action to the attention of the Senate.

"2. Each standing committee may study and review tax expenditures related to subject matters within its jurisdiction, and submit reports and its recommendations with respect thereto.

"3. Except as otherwise provided by paragraph 6 of this rule, during the period commencing on the effective date of the Committee System Reorganization Amendments of 1977 and ending on that date occurring during the first session of the Ninety-sixth Congress upon which the appointment of the majority and minority members of the standing committees is initially completed, the standing committees shall consist of the number of Senators set forth in the following table on the line on which the name of that committee appears:

Committee	*Members*
Agriculture and Small Business	16
Appropriations	25
Armed Services	16
Banking, Housing and Urban Affairs	15
Budget	16
Commerce, Science, and Transportation	18
Energy and Natural Resources	17
Environment and Public Works	15
Finance	16
Foreign Relations	15
Governmental Affairs	16
Human Resources	16
Judiciary	15
Rules, Administration, and Standards	9.

"(b) Not later than July 1, 1978, the Committee on Rules, Administration, and Standards shall report to the Senate a resolution amending paragraph 3 of rule XXV of the Standing Rules of the Senate which prescribes the number of members of the standing committees effective on that date occurring during the first session of the Ninety-sixth Congress upon which the appointment of the majority and minority members of the standing committees is initially completed.".

TITLE II—COMMITTEE ASSIGNMENTS; CHAIRMANSHIPS

SEC. 201. (a) Paragraph 6 of rule XXV of the Standing Rules of the Senate is amended to read as follows:

"6. (a) Except as otherwise provided by this paragraph—

"(1) each Senator shall serve on two and no more standing committees; and

"(2) each Senator may serve on only one select, special, or ad hoc committee of the Senate or joint committee of the Congress.

"(b)(1) Each Senator may serve on not more than two subcommittees of each standing committee of which he is a member.

"(2) Each Senator may serve on only one subcommittee of each select, special, or ad hoc committee of the Senate or joint committee of the Congress of which he is a member.

"(3) Notwithstanding subparagraphs (1) and (2), a Senator serving as chairman or ranking minority member of a standing, select, special, or ad hoc committee of the Senate or joint committee of the Congress may serve ex-officio as a member of any subcommittee of such committee or joint committee.

"(4) No standing, select, special, or ad hoc committee of the Senate may establish any sub-unit of that committee other than a subcommittee, unless the Senate by resolution has given permission therefor. For purposes of this subparagraph, any sub-unit of a joint committee shall be treated as a subcommittee.

"(c) By agreement entered into by the majority leader and the minority leader, the membership of one or more standing committees may be increased temporarily from time to time by such number or numbers as may be required to accord to the majority party a majority of the membership of all standing committees. When any such temporary increase is necessary to accord to the majority party a majority of the membership of all standing committees, members of the majority party in such number as may be required for that purpose may serve as members of three standing committees. No such temporary increase in the membership of any standing committee under this subparagraph shall be continued in effect after the need therefor has ended. No standing committee may be increased in membership under this subparagraph by more than two members in excess of the number prescribed for that committee by paragraph 3 of this rule.

"(d) Any Senator who by reason of his being chairman of a standing committee is required by law to serve on more than one joint committee of the Congress may serve on each such joint committee, but such Senator may not serve on any select, special, or ad hoc committee of the Senate.

"(e)(1) No Senator shall serve at any time as chairman of more than one standing, select, special, or ad hoc committee of the Senate or joint committee of the Congress.

"(2) No Senator shall serve at any time as chairman of more than one subcommittee of each standing, special, select, or ad hoc committee of the Senate or joint committee of the Congress of which he is a member.

"(f) Membership on the Committee on Rules, Administration, and Standards shall not be taken into account for purposes of subparagraph (a)(1), but a Senator serving on such committee and two other standing committees may not serve on any select, special, or ad hoc committee of the Senate, and may not serve on any joint committee of the Congress unless the Senate members thereof are required by law to be appointed from the Committee on Rules, Administration, and Standards.

"(g) Until that date occurring during the first session of the Ninety-sixth Congress upon which the appointment of the majority and minority members of the standing committees is initially completed—

"(1) membership on the Committee on the Budget shall not be taken into account for purposes of subparagraph (a)(1), but a Senator serving on such committee and two other standing committees may not serve on any committee referred to in subparagraph (a)(2)."

(b) Rule XVI of the Standing Rules of the Senate is amended by striking out paragraph 6.

(c)(1) Section 2 of Senate Resolution 400, Ninety-fourth Congress, is amended—

(A) by striking "paragraph 6(f)" in the last sentence of subsection (c) and inserting in lieu thereof "paragraph 6(c)(1)"; and

(B) by striking out subsection (d).

(2) On that date occurring during the first session of the Ninety-sixth Congress upon which the appointment of the majority and minority members of the standing committees is initially completed, Senate Resolution 400, Ninety-fourth Congress, is repealed.

(3) Not later than July 1, 1978, the Committee on Governmental Affairs shall report to the Senate a resolution concerning the disposition of the jurisdiction and functions of the Select Committee on Intelligence.

(d)(1) Not later than July 1, 1977, the appropriate standing committees shall report legislation terminating the statutory authority of the following joint committees of the Congress and transferring their functions to the appropriate standing committees of the Senate and the House of Representatives (to the extent such functions are not then vested in such standing committees) or other appropriate bodies:

(A) Joint Committee on Atomic Energy;

(B) Joint Committee on Congressional Operations;

(C) Joint Committee on Defense Production;

(D) Joint Economic Committee;

(E) Joint Committee on the Library;

(F) Joint Committee on Printing; and

(G) Joint Committee on Taxation.

No proposed legislation shall be referred in the Senate to any joint committee of the Congress and no proposed legislation reported by any such joint committee shall be received in the Senate.

(2) Not later than July 1, 1977, the appropriate standing committees shall report legislation establishing a Congressional Revenue Office, to be staffed initially by the staff of the Joint Committee on Taxation and to be primarily responsible to the Committee on Ways and Means and the Committee on Finance.

(3) Until the termination of the joint committees referred to in paragraph (1), vacancies occurring in the Senate membership of any such joint committee shall be filled, consistent with the provisions of paragraph 6 of rule XXV of the Standing Rules of the Senate, by the appointment of Senators who are members of the standing committees of the Senate which have jurisdiction over the subject matters with respect to which such joint committee exercises its functions. The preceding sentence shall not apply (but paragraph 6 of rule XXV of the Standing Rules of the Senate shall apply) to any joint committee the Senate members of which are required by law to be appointed from one or more specified standing committees of the Senate.

(c) Senate Resolution 58, Eighty-first Congress, and Senate Resolution 338, Eighty-eighth Congress, are repealed.

(f) It is the sense of the Senate that in appointing Senators to the standing committees pursuant to the Standing Rules of the Senate (as amended by this resolution) and in establishing seniority of Senators on such standing committees, first and full consideration should be given to those Senators who, on October 1, 1976, were serving as chairmen and ranking minority members of standing committees whose jurisdictions are transferred to, or consolidated in, other standing committees and as chairmen and ranking minority member of select or special committees and subcommittees of standing committees whose jurisdictions and functions are so transferred or consolidated.

TITLE III—MULTIPLE REFERRAL OF PROPOSED LEGISLATION; ESTABLISHMENT OF AD HOC COMMITTEES

SEC. 301. (a) Rule XXVI of the Standing Rules of the Senate is amended by adding at the end thereof the following new paragraph:

"3. (a) Except as provided in this paragraph and paragraph 4, in any case in which a controversy arises as to the jurisdiction of any committee of the Senate with respect to any proposed legislation, the question of jurisdiction shall be decided by the presiding officer of the Senate, without debate, in favor of that committee which has jurisdiction over the subject matter which predominates in such proposed legislation; but such decision shall be subject to an appeal.

"(b)(1) Upon motion by the Majority Leader or his designee made for himself and the Minority Leader or his designee, proposed legislation may be referred to two or more committees jointly or sequentially. Notice of

such motion and the proposed legislation to which it relates shall be printed in the Congressional Record. The motion shall be privileged, but it shall not be in order until the Congressional Record in which the notice is printed has been available to Senators for at least twenty-four hours. No amendment to any such motion shall be in order except amendments to any instructions contained therein. Debate on any such motion, and all amendments thereto and debatable motions and appeals in connection therewith, shall be limited to not more than two hours, the time to be equally divided between, and controlled by, the Majority Leader and the Minority Leader or their designees.

"(2) Proposed legislation which is referred to two or more committees jointly may be reported only by such committees jointly and only one report may accompany any proposed legislation so jointly reported.

"(3) A motion to refer any proposed legislation to two or more committees sequentially shall specify the order of referral.

"(4) Any motion under this subparagraph may specify the portion or portions of proposed legislation to be considered by the committees, or any of them, to which such proposed legislation is referred, and such committees or committee shall be limited, in the consideration of such proposed legislation, to the portion or portions so specified.

"(5) Any motion under this subparagraph may contain instructions with respect to the time allowed for consideration by the committees, or any of them, to which proposed legislation is referred and the discharge of such committees, or any of them, from further consideration of such proposed legislation.".

(b) Section 137 of the Legislative Reorganization Act of 1946 is repealed.

SEC. 302. Rule XXVI of the Standing Rules of the Senate (as amended by section 301 of this resolution) is amended by adding at the end thereof the following new paragraph:

"4. (a) A resolution submitted by the Majority Leader or his designee for himself and the Minority Leader or his designee which establishes an ad hoc committee to consider proposed legislation which falls within the jurisdiction of two or more committees of the Senate and which conforms to the requirements of this paragraph shall be privileged. Any such resolution shall—

"(1) specify the subject matter or matters over which the ad hoc committee shall have jurisdiction;

"(2) specify the number of members to serve on the ad hoc committee;

"(3) provide that the members of the ad hoc committee from the majority party shall be appointed by the Majority Leader, after consultation with the chairmen of the committees whose jurisdiction is involved (which committees shall be manned in the resolution);

"(4) provide that the members of the ad hoc committee from the minority party shall be appointed by the Minority Leader, after consultation with the ranking minority members of the committees whose jurisdiction is involved;

"(5) provide that the Majority Leader shall appoint the chairman of the ad hoc committee;

"(6) provide that the expenses of the ad hoc committee shall be paid out of the contingent fund of the Senate, and specify any limitation on the amount of such expenses; and

"(7) specify the period of existence of the ad hoc committee, which shall not extend beyond the end of the Congress in which it is established.

"(b)(1) A resolution described in subparagraph (a) shall not be referred to a committee but shall be placed on the calendar under the heading 'General Orders', and shall be printed in the Congressional Record. It shall be in order after the third day following the introduction of any such resolution, but not before, to move to proceed to its consideration. Debate on any such motion, and all debatable mations and appeals in connection therewith, shall be limited to not more than one hour, the time to be equally divided between, and controlled by the Majority Leader and the Minority Leader or their designees.

"(2) Debate on any such resolution, and all amendments thereto and debatable motions and appeals in connection therewith, shall be limited to not more than five hours, the time to be equally divided between, and controlled by, the Majority Leader and the Minority Leader or their designees.

"(c) Notwithstanding paragraph 1 of rule XXV and paragraph 3 of this rule, all proposed legislation relating to the subject matter or matters over which an ad hoc committee established pursuant to subparagraph (a) has jurisdiction (as specified in the resolution establishing that ad hoc committee) shall be referred to that ad hoc committee.

"(d) An ad hoc committee established pursuant to this paragraph shall have power to report proposed legislation and shall have the powers conferred upon standing committees by section 134(a) of the Legislative Reorganization Act of 1946. The provisions of section 133 of the Legislative Reorganization Act of 1946 shall apply to any such ad hoc committee. For purposes of the Standing Rules and other rules of the Senate (including provisions of the Legislative Reorganization Act of 1946 enacted as rules of the Senate), an ad hoc committee established pursuant to this paragraph shall be treated as a special committee of the Senate.

"(e) With the approval of the chairman and ranking minority member of the committee concerned, an ad hoc committee established pursuant to this paragraph may utilize the personnel, services, and facilities of any other committee of the Senate.

"(f) Beginning with the day on which a resolution described in subparagraph (a) is introduced and until such resolution is disposed of, any proposed legislation introduced which involves any of the subject matters specified in such resolution shall not be referred to a committee, but shall be printed in the Congressional Record of the day on which introduced.".

TITLE IV—SCHEDULING OF COMMITTEE MEETINGS

SEC. 401. (a) In consultation with the Majority Leader and the Minority Leader, the Committee on Rules, Administration, and Standards shall establish and maintain a computerized schedule of all meetings of committees of the Senate and subcommittees thereof, and of all meetings of joint committees of the Congress and subcommittees thereof. Such schedule shall be maintained on-line to terminals in the offices of all Senators, committees of the Senate, and permanent joint committees of the Congress, and shall be up-dated hourly.

(b) Each committee of the Senate, and each subcommittee thereof, shall notify the Committee on Rules, Administration, and Standards of each meeting of such committee or subcommittee, including the time period or periods (as prescribed in paragraph 9 of rule XXV of the Standing Rules of the Senate), the place, and the purpose of such meeting. The Senate members of any joint committee of the Congress or of a subcommittee thereof shall cause notice to be given to the Committee on Rules, Administration, and Standards of each meeting of such joint committee or subcommittee, including the time, place, and purposes of such meeting. Notice under this subsection shall be given immediately upon scheduling a meeting.

(c) Each committee of the Senate, and each subcommittee thereof, shall notify the Committee on Rules, Administration, and Standards immediately upon the cancellation of a meeting of such committee or subcommittee. The Senate members of any joint committee of the Congress or any subcommittee thereof shall cause notice to be given to the Committee on Rules, Administration and Standards immediately upon the cancellation of a meeting of such joint committee or subcommittee.

(d) For purposes of this section, the term "joint committee of the Congress" includes a committee of conference.

SEC. 402. (a) Subparagraph (a) of paragraph 7 of rule XXV of the Standing Rules of the Senate is amended to read as follows:

"(a) No committee of the Senate or any subcommittee thereof may meet, without special leave, after the conclusion of the first two hours after a meeting of the Senate has commenced and in no case after two o'clock postmeridian unless consent therefor has been obtained from the Majority Leader and the Minority Leader (or in the event of the absence of either of such Leaders, from his designee). The prohibition contained in the preceding sentence shall not apply to the Committee on Appropriations or the Committee on the Budget. The Senate members of any joint committee of the Congress (other than a committee of conference) may not, without special leave, attend any meeting of the joint committee or any subcommittee thereof after the conclusion of the first two hours after a meeting of the Senate has commenced and in no case after two o'clock postmeridian unless consent therefor has been obtained from the Majority Leader and the Minority Leader (or in the event of the absence of either of such Leaders, from his designee). The Majority Leader or his designee shall announce to the Senate whenever consent has been given under this subparagraph.".

(b) Rule XXV of the Standing Rules of the Senate is amended by adding at the end thereof the following new paragraph:

"9. Morning meetings of committees of the Senate and subcommittees thereof shall be scheduled for one or both of the periods prescribed in this paragraph. The first period shall end at eleven o'clock antemeridian. The second period shall begin at eleven o'clock antemeridian and end at two o'clock postmeridian.".

(c) Section 134(c) of the Legislative Reorganization Act of 1946 is repealed.

SEC. 403. (a) The Majority Leader shall, from time to time and as far in advance as is practicable, announce to the Senate those days on which he plans to have the Senate meet and the hour at which he plans to have the Senate meet on each day. In order to provide the maximum amount of time for meetings of committees, the Senate should meet only on as many days as are necessary for the proper conduct of its business and to comply with the Constitution of the United States, and should not meet on any day before the hour regularly prescribed for commencement of daily sessions unless the business of the Senate so requires.

(b) Paragraph 3 of rule VII of the Standing Rules of the Senate is amended by striking "until the hour of 1 o'clock has arrived" and inserting in lieu thereof "until the conclusion of one hour after the meeting of the Senate was commenced".

(c) Rule VIII of the Standing Rules of the Senate is amended by striking out "2 o'clock" in paragraphs 1 and 2 and inserting in lieu thereof "the conclusion of two hours after the meeting of the Senate was commenced".

(d) It is the sense of the Senate that, insofar as possible, rollcall votes should not be held before two o'clock post meridian of any day, and that, when it is necessary to hold a rollcall vote before 2 o'clock post meridian on a day, notice of such vote should be given at least 24 hours in advance.

TITLE V—CONTINUING REVIEW OF THE COMMITTEE SYSTEM

SEC. 501. (a) The Majority Leader and the Minority Leader shall review, on a continuing basis, the committee system of the Senate and the Standing Rules and other rules of the Senate related thereto.

(b) During the second regular session of each Congress, the Majority Leader and the Minority Leader shall submit to the Senate a report of the results of their review under subsection (a) during that Congress. Such report shall include their recommendations (if any) for changes in the committee system of the Senate and the Standing Rules and other rules of the Senate related thereto. The Majority Leader and the Minority Leader may submit, from time to time, such other reports and recommendations with respect to such committee system and rules as they deem appropriate.

(c) At the request of the Majority Leader or Minority Leader, the Committee on Rules, Administration, and Standards (with the approval of the chairman of such committee), the Secretary for the Majority, and the Secretary for the Minority shall provide such assistance as may be requested to assist them in carrying out their duties and responsibilities under this section.

TITLE VI—AMENDMENTS NOT WITHIN A COMMITTEE'S JURISDICTION

SEC. 601. The Standing Rules of the Senate are amended by adding at the end thereof the following new rule:

"RULE XLV—COMMITTEE AMENDMENTS NOT WITHIN ITS JURISDICTION

"It shall not be in order to consider any proposed committee amendment (other than a technical, clerical, or conforming amendment) which contains any matter not within the jurisdiction of the committee proposing such amendment.".

TITLE VII—COMMITTEE STAFFS

SEC. 701. For purposes of this title, the term—

(1) "effective date" means the effective date of title I;

(2) "eligible staff member" means an individual who is a member of the staff of an old committee, or of a subcommittee thereof, on the day prior to the effective date and had served continuously as a member of the staff of an old committee or a subcommittee thereof since October 1, 1976;

(3) "new commtitee" means a standing committee established by paragraph 1 of rule XXV of the Standing Rules of the Senate, as amended by section 101(a);

(4) "old committee" means a standing, select, or special committee of the Senate which is in existence on the day before the effective date; and

(5) "transition period" means, with respect to a new committee, the period beginning on the effective date and ending on whichever of the following first occurs:

(A) 10 days after the date on which the Senate agrees to the first resolution which is reported pursuant to section 133(g) of the Legislative Reorganization Act of 1946 and which authorizes expenditures out of the contingent fund of the Senate to be made by such committee (not including any resolution reported pursuant to section 704 (b)),

(B) the 90th day after the effective date, or

(C) July 1, 1977.

SEC. 702. On the effective date, the staffs of the new committees shall, except as provided in section 703, consist of the staffs of the old committees and their respective subcommittees, as set forth in the following table:

The staff of the new Committee on—	Shall consist of the staff of the old Committee (and its subcommittees) on—
Agriculture and Small Business	Agriculture and Forestry.
Appropriations	Appropriations.
Armed Services	Armed Services.
Banking, Housing and Urban Affairs	Banking, Housing and Urban Affairs.
Budget	Budget.
Commerce, Science, and Transportation	Commerce.
Energy and Natural Resources	Interior and Insular Affairs.
Environment and Public Works	Public Works.
Finance	Finance.
Foreign Relations	Foreign Relations.
Governmental Affairs	Government Operations.
Human Resources	Labor and Public Welfare.
Judiciary	Judiciary.
Rules, Administration, and Standards	Rules and Administration.

SEC. 703. (a) For purposes of this section, the term "consolidated committee" means the Committee on Aeronautical and Space Sciences, the Committee on the District of Columbia, the Committee on Post Office and Civil Service, the Committee on Veterans' Affairs, and the select and special committees of the Senate in existence on the day prior to the effective date.

(b) On the effective date, each eligible staff member of each consolidated committee is transferred to the new committee which has the jurisdiction or performs the functions previously vested in the consolidated committee. When two or more new committees have the jurisdiction or perform the functions previously vested in a consolidated committee, the determination of the eligible staff members of the consolidated committee transferred to the staff of each of the new committees shall be made, prior to the effective date, by the Committee on Rules and Administration in consultation with the chairman or acting chairman and ranking minority member of the consolidated committee.

(c) In any case in which a subcommittee of an old committee has a separate staff and is separately funded and, on the effective date, a new committee has the jurisdiction or performs the functions previously vested in the subcommittee, each eligible staff member of the subcommittee is transferred on the effective date to the staff of such new committee. When two or more new committees have the jurisdiction or perform the functions previously vested in the subcommittee, the determination of the eligible staff members of the subcommittee transferred to the staff of each of the new committees shall be made, prior to the effective date, by the Committee on Rules and Administration in consultation with the chairman or acting chairman and ranking minority member of the subcommittee. This subsection does not apply (and section 702 shall apply) in any case in which the staff of the new committee is the successor to the staff of the old committee and its subcommittees under section 702.

(d) During the transition period of a new committee, each eligible staff member transferred by subsections (b) and (c) to the staff of the new committee—

(1) shall receive compensation at a rate not less than the rate of compensation such staff member was receiving on January 4, 1977; and

(2) may not be removed, except for cause, as a member of the staff of the new committee.

SEC. 704. (a) If this resolution is not agreed to before January 30, 1977, the Committee on Rules and Administration shall, before February 28, 1977, report a resolution which—

(1) extends, through the day prior to the effective date, the authority of each select or special committee which otherwise expires on February 28, 1977; and

(2) authorizes expenditures out of the contingent fund of the Senate through such day by each old committee at the same rate as authorized for the year ending February 28, 1977.

(b) Before the effective date, the Committee on Rules and Administration shall report a resolution which authorizes expenditures out of the contingent fund of the Senate during the transition period by the new committees. The amount authorized for each new committee shall be sufficient to enable that committee to pay the compensation of the members of its staff, including those members transferred to its staff by section 703, during the transition period.

(c) Within 90 days after the effective date, but in any event not later than July 1, 1977, the Committee on Rules, Administration, and Standards shall report resolutions under section 133(g) of the Legislative Reorganization Act of 1946 authorizing expenditures out of the contingent fund of the Senate by new committees for that portion of the year ending February 28, 1978, remaining after the termination of the transition period.

SEC. 705. (a) For purposes of this section, the term "displaced staff member" means an eligible staff member who is certified by the chairman or the ranking minority member of a new committee as having been dismissed at the termination of such new committee's transition period (or as having resigned before such termination) solely because of the reorganization of the staff of such new committee.

(b) The chairman of each new committee (or the ranking minority member with respect to minority employees) shall certify to the Committee on Rules, Administration, and Standards, not later than 30 days after the close of the transition period of such committee, the names of the displaced staff members of such committee.

(c)(1) Subject to the provisions of subsection (d) and (e), each displaced staff member shall be entitled, upon application therefor to the Committee on Rules, Administration, and Standards, to receive a gross amount of severance pay equal to—

(A) one week's pay for each year (or portion thereof) of service as an officer or employee of the Federal Government, not exceeding ten years; plus

(B) two weeks' pay for each year of service (or portion thereof) as an officer or employee of the Federal Government in excess of ten years.

(2) For purposes of paragraph (1)—

(A) the pay of a displaced staff member is the pay (computed at a weekly rate) received by him at the time of his dismissal or resignation from the staff of a new committee, or, if higher, received by him on January 4, 1977; and

(B) in the case of service for a portion of a year, the severance pay for such service shall be proportionately reduced.

(d)(1) Except as otherwise provided by regulations prescribed under section 707, payments of severance pay to a displaced staff member under this section shall be made by the Secretary of the Senate on a monthly basis, and on the same dates as provided for employees of the Senate, until such dis-

placed staff member has been paid the gross amount to which he is entitled under subsection (c), reduced as provided by paragraph (2).

(2) On or before the first day of each month (or such later day as may be provided by regulations prescribed under section 707), a displaced staff member shall certify in writing to the Secretary of the Senate—

(A) whether or not he was employed or engaged in self-employment during the preceding month; and

(B) the amount (if any) of compensation received by him as an employee and the amount (if any) of net earnings from self-employment received by him during the preceding month.

The amount of severance pay to which a displaced staff member is otherwise entitled for any month shall be reduced by the sum of the amounts certified by him under subparagraph (B). If a displaced staff member fails to certify with respect to a month, no amount of severance pay shall be paid to him for such month and the gross amount of severance pay to which he is entitled under subsection (d) shall be reduced by the entire amount of severance pay which would otherwise have been paid to him for such month.

(e)(1) A displaced staff member shall be entitled to receive severance pay under this section for any month only if the Committee on Rules, Administration, and Standards is satisfied that the displaced staff member has made reasonable efforts during such month to obtain employment comparable to his employment as a member of a committee staff, but has been unable to do so.

(2) Payments of severance pay under this section shall be made from the contingent fund of the Senate upon vouchers approved by the chairman of the Committee on Rules, Administration, and Standards.

SEC. 706. (a) Until otherwise provided by law or resolution, each Senator shall, except as otherwise provided in this section, receive each fiscal year an amount equal to three times the amount referred to in section 105(e)(1) of the Legislative Branch Appropriation Act, 1968, as amended and modified. Such amount may be used by a Senator only to employ individuals for the purpose of assisting him in connection with his membership on committees of the Senate. Each Senator shall designate the committee with respect to which any individual is so employed to assist him.

(b) In the case of a Senator who is—

(1) the chairman or ranking minority member of a committee designated by him under subsection (a);

(2) the chairman or ranking minority member of any subcommittee of such committee that receives funding to employ staff assistance separately from the funding authority for staff of the committee; or

(3) authorized by the committee, a subcommittee thereof, or the chairman of the committee or subcommittee, as appropriate, to recommend or approve the appointment to the staff of such committee or subcommittee of one or more individuals for the purpose of assisting such Senator in his duties as a member of such commitee or subcommittee,

the amount to which such Senator is otherwise entitled under subsection (a) shall be reduced by an amount equal to the lesser of (A) an amount equal to the aggregate annual gross rates of compensation of all staff employees of that committee or subcommittee (i) whose appointment is made, approved, or recommended and (ii) whose continued employment is not disapproved by such Senator, if such employees are employed for the purpose of assisting such Senator in his duties as chairman, ranking minority member, or member of such committee or subcommittee thereof, as the case may be, or (B) the amount referred to in section 105(e)(1) of the Legislative Branch Appropriation Act, 1968, as amended and modified.

(c)(1) An employee appointed under this section shall be designated as such and certified by the Senator who appoints him to the chairmen and ranking minority members of the appropriate committee or committees as designated by such Senator and shall be accorded all privileges of a professional staff member (whether permanent or investigatory) of such committee or committees including access to all committee sessions and files, except that any such committee may restrict access to its sessions to one staff member per Senator at a time and require, if classified material is being handled or discussed, that any staff member possess the appropriate security clearance before being allowed access to such material or to discussion of it.

(2) If (A) a Senator's service on a committee terminates (other than by reason of his ceasing to be a Member of the Senate) or a Senator's status on a committee as the chairman or ranking minority member of such committee or a subcommittee thereof changes, and (B) the appointment of an employee appointed under this section and designated to such committee by such Senator would (but for this paragraph) thereby terminate, such employee shall, subject to the provisions of subsection (e), be continued as an employee appointed by such Senator under this section until whichever of the following first occurs: (1) the close of the tenth day following the day on which such Senator's service on such committee terminates or his status on such committee changes or (2) the effective date on which such Senator notifies the Secretary of the Senate, in writing, that such employee is no longer to be continued as an employee appointed under this section. An employee whose appointment is continued under this paragraph shall perform such duties as the Senator who appointed him may assign.

(d) An employee appointed under this section shall not receive compensation in excess of that provided for an employee under section 105(e)(1) of the Legislative Branch Appropriations Act, 1968, as amended and modified.

(e) The aggregate of payments of gross compensation made to employees under this section during each fiscal year shall not exceed at any time during such fiscal year one-twelfth of the total amount to which the Senator is entitled under this section (after application of the reductions required under subsection (b)) multiplied by the number of months (counting a fraction of a month as a month) elapsing from the first month in that fiscal year in which the Senator holds the office of Senator through the end of the current month for which the payment of gross compensation is to be made. In any fiscal year in which a Senator does not hold the office of Senator at least part of each month of that year, the aggregate amount available for gross compensation of employees under this section shall be the total amount to which the Senator is entitled under this section (after application of the reductions required under subsection (b)) divided by 12, and multiplied by the number of months the Senator holds such office during that fiscal year, counting any fraction of a month as a full month.

(f) The compensation of individuals appointed under this section shall be paid out of the contingent fund of the Senate.

(g) The preceding provisions of this section shall be suspended and have no force or effect during any period during which, by law enacted after the date on which this resolution is agreed to, funds are made available to Senators to employ individuals to assist them in connection with their membership on committees of the Senate.

(h) Senate Resolution 60, 94th Congress, is repealed.

(i)(1) Except as provided in this subsection—

(A) this section shall take effect on the first day of the month in which the effective date occurs; and

(B) a Senator shall not be entitled to receive any amount under section 108 of the Legislative Branch Appropriation Act, 1976, for any period on or after such first day, and any designation made by him under such section which is in effect on the day prior to such first day shall cease to be effective on such first day.

(2) The aggregate amount available to a Senator for gross compensation of employees appointed under this section during the fiscal year ending September 30, 1977, shall be the total amount to which the Senator is entitled under this section (after application of the reductions required by subsection (b)) divided by 12, and multiplied by the number of months remaining in such fiscal year on and after such first day.

(3) A Senator who, but for the provisions of paragraph (1), would be entitled to receive amounts under section 108 of the Legislative Branch Appropriations Act, 1976, may elect to continue to receive amounts under such section for the period beginning on such first day and ending on the day prior to the effective date. Such election shall be made at such time and in such manner as may be provided in regulations prescribed under section 707. In the case of a Senator who makes such an election—

(A) any designation made by him under such section 108, which is in effect on such first day shall remain in effect through the day prior to the effective date unless sooner revoked or changed by him; and

(B) the amount available to such Senator for gross compensation of employees appointed under this section for the month in which occurs the effective date shall be reduced by the amounts payable for the portion of such month prior to the effective date to employees appointed by him under such section 108.

SEC. 707. The Committee on Rules and Administration shall prescribe such rules and regulations as it determines necessary to carry out the provisions of sections 703 and 704 and, until the effective date, the provisions of section 706. The Committee on Rules, Administration, and Standards shall prescribe such rules and regulations as it determines necessary to carry out the provisions of section 705 and, on and after the effective date, the provisions of section 706.

TITLE VIII—MISCELLANEOUS

SEC. 801. Titles I through VI of this resolution and the amendments to the Standing Rules of the Senate made by such titles shall take effect on the thirtieth day after the day on which this resolution is agreed to.

SEC. 802. To the extent necessary to carry out the provisions of paragraph 1 of rule XXV of the Standing Rules of the Senate (as amended by title I of this resolution), all proposed legislation and nominations referred before the effective date of such title to the standing committees of the Senate shall be rereferred on such effective date to the appropriate standing committees.

SEC. 803. Any reference in any rule, resolution, or order of the Senate or in any law, regulation, or executive order to any standing committee of the Senate (as such committees were constituted before the effective date of title I of this resolution) shall, after such effective date, be considered as referring to the appropriate standing committee established by paragraph 1 of rule XXV of the Standing Rules of the Senate (as amended by title I of this resolution).

Mr. STEVENSON. Mr. President, I submit on behalf of myself, Senator PACKWOOD, and other Members, a resolution to amend the Standing Rules of the Senate and send it to the desk.

Mr. STENNIS. Mr. President, may we have order?

The PRESIDING OFFICER. (Mr. STONE). Is the Senator submitting the resolution at this time?

Mr. STEVENSON. That is what the Senator is doing.

The PRESIDING OFFICER. Does the Senator request immediate consideration?

Mr. STEVENSON. No; the Senator has not yet requested immediate consideration.

Mr. ROBERT C. BYRD. Mr. President, before the resolution is referred, I wish to propound the following unanimous-consent request.

Mr. STEVENSON. Mr. President, will the distinguished majority leader withhold for 1 minute?

Mr. ROBERT C. BYRD. Yes.

Mr. STEVENSON. Mr. President, this resolution is the culmination of many years of protest, thought, and hard work. It is the culmination of many months of serious work by the Select Committee To Study the Senate Committee System. This resolution, which I have introduced with the distinguished Senator from Oregon and other Members, proposes the most far-reaching reorganization of the Senate in its history, the first reorganization in some 30 years.

I will not take time to elaborate upon its contents which are well known to the Members, except to say that, if adopted, this resolution would rationalize the jurisdiction of Senate committees, cut back the number of committees and subcommittees, equalize the workload and the responsibilities of committees and Members, and enable the Senate to more effectively utilize all of its resources, including the precious time of its Members, and to act comprehensively on such complex questions as energy, the environment, the transportation and international economics.

If acted upon expeditiously, it will cause no interference with the orderly conduct of the Senate's business. On the contrary, it would make this a more effective, responsible, and democratic institution.

So it is my strong hope that the Rules Committee, to which it will be referred, and the Senate, as a whole, will act with dispatch, and for that reason that the Committee on Rules and Administration will report a resolution upon this subject no later than January 19, pursuant to a request which I understand will be made by the distinguished majority leader.

Mr. President, I commend the majority leader, also the chairman of the Committee on Rules and Administration, the Senator from Nevada (Mr. CANNON), Senator PACKWOOD, the former Senator, our colleague on the select committee, Mr. Brock, and all of my colleagues on that committee for their progressive leadership and strong commitment to the substance and the process of Senate reorganization.

The leaders on both sides and Senator GRIFFIN, the distinguished Senator from Michigan, as well as our distinguished majority leader, deserve the commendations and the gratitude of all of the Members for their help, and they certainly have mine.

Mr. NELSON and Mr. PACKWOOD addressed the Chair.

Mr. ROBERT C. BYRD. Mr. President, I have the floor.

The VICE PRESIDENT. The Senator from West Virginia has the floor.

Mr. ROBERT C. BYRD. I yield to the Senator from Wisconsin.

Mr. NELSON. I wish to comment for 2 minutes.

Mr. ROBERT C. BYRD. I yield without losing my right to the floor.

Mr. NELSON. Mr. President, as a member of the Stevenson committee I wish at this time to commend Senator STEVENSON, Senator Brock, and other members of that committee for the long and dedicated effort they put into the attempt to structure committee jurisdiction, committee assignments, and committee workload, in an enterprise that I think is very important to the Senate. I know how long and hard they worked on it. I know the pressure under which the whole committee worked, because a substantial amount of that work had to be performed in the past in the last 8 weeks before adjournment when we were meeting all day and on into many evenings.

I think it is perfectly obvious to anyone that if any individual drafted his own resolution it would be different from this. It represented some compromises, but I think it is a major important step in the right direction. I am sure that the Rules Committee will hear views and ideas that involve some modifications, but basically it is a substantial and important step in the right direction. The two cochairmen are entitled to the thanks of the Members for the long and hard hours and days they put into this effort.

Mr. PACKWOOD. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. I yield to the Senator from Oregon.

Mr. PACKWOOD. Mr. President, I am greatly pleased to introduce today with Senator STEVENSON and our other colleagues a resolution to reform the Senate committee system. Reform in the nature we are proposing has not been considered by the Senate since 1946. The time is obviously ripe for an updating and streamlining of our Senate committee structure and operation. The members of the Temporary Select Committee To Study the Senate Committee System, our colleagues, staff, representatives of various groups and organizations, and many citizens have all worked diligently over the last few months to make possible the introduction of this resolution.

Our work began on March 30, 1976, when the temporary select committee was created. Since then, the members of the select committee have met many times to discuss the various facets of congressional committee reform. From the very beginning, our top priorities have been a lessening of Senators scheduling conflicts and wasted time and review of the jurisdiction of Senate committees. The committee has published numerous reports and studies which have served as the foundation for our recommendations today.

Obviously, when you are dealing with over 3,000 Government programs and nearly 1,400 appropriation accounts and uncounted bureaus, commissions, boards and committees, the task of defining committee jurisdiction is extremely difficult. However, I believe that on the whole we have met the measure of a viable committee system in our recommendations.

If not more important is the emphasis the select committee has placed on reducing the scheduling conflicts and wasted time so many of us encounter due to the great number of assignments which we have. All the committees, subcommittees, and other positions we hold are simply too many for us to adequately adjust our own schedules and fulfill the demands required of us. Therefore, the select committee reduced the present 31 Senate committees to 15 and our plan calls for a nearly 50-percent reduction in the number of subcommittee assignments. Our plan provides a foundation for a committee system that allows each Member to give careful attention to a readily defined number of subject areas.

The work of the select committee has been based on careful analysis and research of committee jurisdictions, Government programs, committee and subcommittee workloads, committee staffing, nearly 100 interviews with committee staff and Senators concerning committee jurisdiction, testimony and written work of various individuals, and both the Senate and committee rules. For the first time, our committee has identified which Government programs are included within each committee's jurisdiction. This final step has provided the basic building block for the restructuring of our committee system.

Under our proposal, each Senator would be limited to two standing committee assignments and one assignment to a special, select, or ad hoc committee. A Senator would serve on no more than two subcommittees for each standing committee and one subcommittee for the special, select, or ad hoc committee.

The select committee has also recommended that the majority and minority leader have joint responsibility for the multiple referral of bills and for the establishment of ad hoc committees with legislative authority for issues of national importance. These ad hoc committees would automatically expire under our proposal within the Congress in which they were created. This would greatly help in halting the proliferation of additional committees.

The reduction of committees and subcommittees and the assignments for each Senator to those bodies will in itself reduce the scheduling conflicts we encounter. Yet, in addition to those structural changes a Senate scheduling service will be created to computerize the various committee and subcommittee meetings

during the week. To further reduce wasted time our proposal includes a sense of the Senate resolution that it postpone record votes until after the hour of 2 p.m. each legislative day.

On the whole, our recommendations would greatly improve the operation of the Senate. In my mind we have provided in this plan an opportunity for each Senator to serve on two major committees without the scheduling conflicts and loss of our time that characterize the present system. This select committee's recommendations deserve careful consideration by the Senate Rules Committee and eventually the full Senate. It is my sincere hope that we can complete our reform of the committee system over the next few weeks and that our work will create an efficient, streamlined, and updated Senate in which we can get on with the work of the Nation.

Mr. President, when the Rules Committee considers this and then hopefully it is referred to the Senate, I hope they will keep in mind as it is being considered that this recommendation is not a perfect piece of work but there are some compromises in it. If we had tried to realine committee jurisdictions perfectly we would not have been able to equalize the workload as well as we have done. Had we tried to make the workload exactly equal we could not have reached the accommodations on jurisdictional realinement that we did.

In addition, in the forefront of all of our minds was the problem of scheduling committee meetings, overlapping subcommittees, and being called to the floor to vote. All of these were factors in addition to studying the subject of committee jurisdiction.

I think Senator STEVENSON, myself, and others on the committee are receptive to suggested changes and suggested amendments. But I would hope that we would all restrain ourselves in efforts to recreate many of the committees that have been abolished in this resolution. If we want to shift jurisdiction from one committee to another that is fine. I will not quarrel too much with that. But this is a very delicately balanced report. Everyone has had to give up something. And if just a few people want to get back most of what they have given up, it is going to unravel and fail, and we will be right back where we were prior to the start of this commission. So I would simply ask restraint on all of our part in an effort to recreate the bailiwicks and jurisdictions that we all had, realizing if we try to do so and some of us succeed I think all of us will fail.

Mr. DOMENICI. Mr. President, will the Senator yield 3 minutes.

Mr. ROBERT C. BYRD. Yes; I yield to the distinguished Senator from New Mexico.

Mr. DOMENICI. Mr. President, I rise to commend the Senator from Illinois in his cochairmanship and Senator Bill Brock, who is no longer with us, who carried these hearings and this resolution through the end of last year, and I now commend the distinguished Senator from Oregon who will take the ranking lead on the Republican side.

I, too, as one of the members who worked on this proposal, know that it is not perfect. On the other hand, as we open a new session, we do not have clearly before us the problems of 6 months and 8 months ago, the end of the previous year, and the confusion with energy legislation which many committees and many subcommittees had.

I hope we will all think back as we find reason to argue with this, and that we truly consider that at some point in time this institution has to remodel and remold its committee jurisdiction system. The committee certainly knows that there can be some changes back and forth, but I think the variation of fewer standing committees and the idea of fewer subcommittees, which are engraved in very black ink in this proposal, for they are at the heart of it, ought to be considered by everyone as reform that would be good for all of us.

Many of us are very much concerned when we cannot go to the committee hearings that we are supposed to attend. Much of that is attributable to the proliferation of subcommittee hearings, often three and four on the same day. Granted that is partly management; but certainly when there are fewer duplications and the jurisdictions are better confined, as proposed here, it will be easier for all of us to do a better job.

When the division of work between four and five committees that properly belongs in one is not right before our eyes, I hope each of us will nevertheless approach the debate with that in mind, and with the idea of equal division of matters of jurisdiction and workload. As all of us can understand, changes will have to be made, but they would certainly be subject to review.

I commend the distinguished Senator from Illinois for his very practical approach to this matter, and I hope we will see the day in the next 2 or 3 weeks when the Senate will vote for the total reformation the Senator desires, with the rules changes that will be required.

STATEMENT SUBMITTED BY SENATOR HANSEN

Mr. HANSEN. Mr. President, the resolution submitted today by Senators STEVENSON and PACKWOOD offers the Members of the Senate the opportunity to make ourselves more efficient and effective as an institution. As a member of the Temporary Select Committee To Study the Senate Committee System, whose recommendations the resolution incorporates, I believe that the proposed reorganization will do much to reduce the wastage of Senators' time and efforts, to strike a blow for better government, and thereby to aid the American taxpayer who sustains what the Federal Government does.

All Senators, including our new colleagues, are familiar with the list of complaints that led the Senate to create the select committee last March:

The Senate's committees and subcommittees have proliferated, with an increase of more than 300 percent in the number of subcommittees since 1947.

Today the average Senator is spread thin over 18 committee and subcommittee assignments. Some Senators have more than 30 such assignments.

Lack of an effective Senate-wide scheduling system means that Senators frequently are expected in several meetings and hearings at the same time.

Rule XXV, which sets forth the jurisdictions of committees, was written in 1946. As a result, it does not meet today's needs. Committee jurisdictions are obsolete and overlapping, no more seriously than in the critical areas of energy and the environment.

Because of the jurisdictional situation, officials of the executive branch are called upon to testify by what surely must seem to them a maze of committees and subcommittees.

Fragmentation of jurisdictions and the hectic pace of the Senate mean that comprehensive policymaking by our committees is a near impossibility.

The situation has become so frantic that committees are hampered in their responsibilities to oversee the work of administrative departments and agencies and to foresee major issues before they develop into crises of the moment.

Workload is divided unequally among committees, and workload and leadership responsibilities are divided unevenly among Senators.

In my judgment, Mr. President, the reorganization package agreed to by the select committee will do much to alleviate such problems. It will reduce the number of committees on which Senators serve from 31 to 15 and cut the number of subcommittees from 174 to approximately 100. It will consolidate jurisdictions in many areas, notably energy, environmental protection, human resources, and governmental affairs. It will establish a computerized Senate scheduling service. It will limit the committee and subcommittee assignments of Senators to eight, rather than the current average of 18. It will make the workload of Senate committees more nearly equal. Overall, it will encourage comprehensive and coherent policymaking by the committees of the Senate. By empowering the floor leadership to refer bills by motion and establish ad hoc committees with legislative authority, it will encourage more efficient carrying out of the Senate's business.

Mr. President, I believe that this reorganization is supported by a wide consensus in this body. It will improve the quality of our lives as Senators. It will make the Senate a more effective institution in national policymaking. By so doing, it may help restore public confidence in the institutions of government, and those who carry out the business of governing. For these reasons, this reorganization package should command support among Senators of all persuasions. It is the recommendation of a bipartisan committee of six Republicans and six Democrats served by a nonpartisan staff.

There are some who believe that their particular interests are adversely affected by the proposed reorganization. I do not believe that the interests of veterans, or the elderly, or the young, or

any other group in our Nation will be poorly served by this reorganization. If I did, I would not support it. Making the Senate more effective will serve the interests of us all.

Mr. President, I think it is vital that this reorganization be voted on by the Senate before the present committee vacancies are filled on a permanent basis. Freshman Senators can be appointed on a temporary, ad hoc basis, and without any prejudice to the rights of others to committees appointed to existing vacancies. While the delay in filling committee vacancies on a permanent basis is a temporary inconvenience to some Senators, it should be understood that an attempt to make so-called temporary appointments—except as it relates to giving the 1977 freshmen class of Senators specific temporary niches—can be used to defeat the demonstrated need for reorganization. I hope this is not the case. Reorganization needs to be accomplished and I am satisfied that the majority of the freshmen Senators want to see it accomplished, too.

Mr. President, the reorganization package is not perfect, but it offers significant improvement. I wish that the select committee had had the time to study conference committees, and make recommendations about them. But we had an extensive mandate and were unable to investigate that issue and incorporate them with the structural proposals of the reorganization. I trust that we will be able to make some recommendations about the conference committees before our work is completed. In the meantime, I strongly support the resolution that Senators STEVENSON and PACKWOOD have introduced today. I urge all Senators to do likewise. I believe that reorganization is vital to the future of the Senate as an institution of Government.

Mr. President, another important area in need of serious study is in the area of conference committee reform.

As a conferee on dozens of bills, I have felt the frustration of coming out of conference knowing that the Senate position was not upheld as well as it should have been. The House conferees are better organized, better informed and seem to be able to uphold their Chamber's position on the most important provisions of a bill.

My staff and I have worked together on what seem to be the most severe problems facing the Senate in conference and as solutions to the problems, we have isolated the need for rules governing conference proceedings.

Accordingly, we have drafted four resolutions:

1. Requiring that a quorum consisting of a majority of the appointed Senate conferees be present in order to conduct business or vote;

2. Requiring conferees on the part of the Senate to be furnished with written texts of motions, or written explanations thereof prior to their consideration by a committee of conference;

3. Relating to the appointment of conferees on the part of the Senate on measures which have been considered by more than one committee; and

4. Requiring the formal substitution of conferees.

These reforms will help the Senate conferees better represent the strengths of the Senate position and improve the Senate position relative to that of the House in conference.

As a member of the Select Committee on Committees, I am very interested in committee reform. Yet reform of the committee system without reform of the conference committee is incomplete.

Because we are all conferees at one time or another, this issue affects us all and deserves our careful consideration.

This aspect of the legislative system is so important that it has often been called the Third House of Congress. Since few, if any, of the important bills ever pass both Houses in identical form and since the final shape of legislation must be determined in conference, the importance of conference committees should not be underestimated.

The 11 to 12 percent of all public laws enacted during recent Congresses have gone through conference. But numbers alone cannot provide a proper index of the importance of the central role that conference committees play in the legislative process. Submitted to these House-Senate negotiations are most of the important measures before Congress, including most appropriations bills.

Once a conference report reaches the floor it is almost impossible to defeat. A report is of the highest priority and may be brought up at any time except when the Journal is being read or when the Senate is dividing. As of August 30 of 1976, 182 conference reports had been filed in the 94th Congress and only 7 failed.

It is not in order to amend a conference report and it must be voted up or down in its entirety without debate. This, combined with the difficulty of reconvening or calling a new conference greatly enhances the power of the conferees—especially near the close of a session.

When a bill reaches the conference stage of the legislative process, it has generally passed through subcommittee, full committee, and achieved floor passage in both Houses. Often there have been hearings on the bill and much committee time has been devoted to its consideration. And then, when it reaches the conference table, in the space of a few minutes, conferees can change the most important provisions of the bill. A former U.S. Senator, Albert Gore, commented on conference committees:

It is here . . . that a few men can sit down and undo the most painstaking work of months of effort by several standing committees and the full membership of both houses.

Conference committees have the potential to waste the investment of valuable time, energy, and work of committee members.

This committee is considering reform of the committee system. The objectives include reform in jurisdictions, referrals, numbers and sizes, and limitations on assignments but reform of the conference committee system must accompany these other reforms. There is a saying that a chain is only as strong as its weakest link and I believe the conference committee to be the committee system's weakest link.

From my experience as a conferee on dozens of bills, I see the need for reform more clearly in the conference committee than anywhere else. Solving the problems of overlapping jurisdictions, bill referrals, and the like will help the Senate perform its general legislative duties more effectively but if we are not represented well in conference our effectiveness will be severely limited.

Comparing the representative from each Chamber it is easy to see that House conferees are usually far more orderly and organized. The Senate conferees, in contrast, come less prepared, if they come at all, and conduct business in an almost haphazard way; one might be hard pressed to realize that they are representing a common cause.

The difference between the two Houses in conference has not gone unrecognized. Richard Fenno who studied the House Ways and Means Committee commented on the difference in his book, "The Power of the Purse":

By general agreement, the House conferees are better prepared, better organized, better informed, more single-minded in their interest and employ a more belligerent bargaining style.

David Paretz, one of the few contemporary political scientists to study conference committees, also noted the disparity between the House and Senate conferees:

Burdened by more committees, more subcommittees, ordinarily larger constituencies, greater demands by the mass media, and other conference committee responsibilities, Senators are frequently less diligent in their attendance, less informed and less involved in a conference than Representatives.

No doubt that when this committee finishes its work and its recommendations are implemented in the Senate, many of these problems will be mitigated. However, due to the nature of the differences between the House and Senate conferees, I cannot hope that we will be able to come to conference on equal footing with the House unless we reform the conference committees themselves.

The Senate attendance at conference is markedly worse than that of the House. Typically in conference all of the appointed House Members end up facing only one or two Senators across a long green table. The House conference chairman, with a full contingent of conferees to support him, can become a very persuasive bargainer.

Poor Senate attendance gives the House a big advantage in conference. On a bill with many titles it is important to have the Senators present who have developed a particular expertise on a particular title. And it is not enough to have each Senator present only during the consideration of his particular title. Tradeoffs, bargains, and concessions have to be made, all of which require knowledge of the entire bill. An absent Senator can only entrust his proxy to a colleague who may not be as interested in his particular issue and its relevance to the bill as a whole.

A quorum requirement would go a

long way toward lessening these disadvantages in conference. At present, there is no such requirement and one Senator may conduct business in the name of his entire Chamber. If the conference committee is to function as a viable and representative institution then it requires participation and rules governing participation.

A third paragraph as an amendment to rule XXVII of the Standing Rules of the Senate would solve the problem. It would require that a majority of the appointed conferees be present in order to conduct business at any committee of conference.

The proposed amendment also provides for the suspension of the quorum requirement if agreed to by a majority of the Senate conferees. This would give conferees a degree of flexibility at conferences on unimportant bills with no major disagreements between the two Houses. These conferences serve only to hammer out the final language of a bill—often a tedious process which requires the presence of only one Senator.

A second problem with conferences is that the details of the legislation being considered are such that they make it impossible to avoid significant errors in judgment. Although this problem is not limited to the conference stage of the legislative process, it is more pronounced here than anywhere else. When amendments are being rapidly thrown back and forth across the conference table, it is difficult to be aware of the ramifications of a particular amendment.

Here again, the House has an edge in dealing with the problem. The average House Member who sits on only one or two committees is more likely to be expert in the subject under consideration and to have done the legislative work himself. Senators, by contrast, sit on three to five committees and sometimes are unaware of the specific provisions of a bill. When they propose amendments, they often do so in vague and very general wording with the result that the staff members, who must draft the language for the conference report, have little idea what the amendment's proponent had in mind.

House conferees usually present amendments in writing for all conferees to read, or at least dictate amendments from notes for all conferees to write down and think about before discussion and voting. If we could follow the House example, we could better avoid in judgment and improve our position relative to the House in conference. A requirement that Senate conferees have in writing, the proposed amendment in front of them for a certain time period, would serve this purpose. It would give the Senate conferees time to study the proposals in front of them and make intelligent decisions on behalf of the Senate.

The appointment of conferees from several standing committees causes yet another problem for the Senate conferees. Each conferee is limited, somewhat arbitrarily, to vote only on the particular title of a bill that comes out of his committee. It is often unclear exactly who has jurisdiction over what issues and when he is allowed to vote. Amendments added on the Senate floor and issues only addressed in the House bill compound the problem. It is difficult to fit a particular title of a bill under the jurisidiction of a few of the conferees without some kind of discussion and clarification.

This disorganization which often has disastrous effects for the Senate conferees, could easily be avoided by defining the role of each conferee before coming to conference. A formal agreement between the various committee chairmen and ranking minority members in consultation with the majority and minority leaders of the Senate would serve the purpose.

The Senate conferees would come to the conference table knowing exactly what their areas of jurisdiction are. There would be time to pepare for a particular issue and the initial confusion would disappear.

THE SUBSTITUTION OF CONFEREES

The fourth area of reform in conference pertains to the substitution of conferees. I have noticed, on several occasions, that Senators who are not duly appointed conferees will attend and even vote in the name of absent conferees. There are certainly times when Senators who are not members of the conference committee can and should be invited to attend and address themselves to an issue before the conference, but such participation should be formalized.

Senators who are not conference members, voting in the name of an absent Senator, will only increase the confusion on the Senate side of the bargaining table. Substitute Senators will have to be brought up to date on all of the proceedings which takes a lot of time and even then, they may still not be aware of the issues at stake. New participants in a conference are obviously at a disadvantage and their presence, without proper and complete briefing, may well weaken the Senate position.

This highly irregular practice also violates the entire intent of having the Senate appoint conferees to represent it at conference. It establishes the frightening precedent that, in the absence of a duly-appointed conferee, any other Senator may represent the Senate without its knowledge or acquiesence. The regular method of appointment, which was established to choose conferees who represent the strengths of the Senate position is easily circumvented by this procedure.

Accordingly, the fourth reform I propose will codify what is usually thought of as a standard Senate practice, that only Members who are duly appointed may participate as Senate conferees in committees of conference. First, it would prohibit a Senator who is not a duly appointed conferee from participating in or voting at any meeting of a conference. Second, it would provide that new Members may be appointed in place of Members already appointed as conferees if properly announced on the Senate floor when the Senate is in session and entered upon and printed in the Senate Calendar.

Formal restrictions on conference committee meetings, such as the rules I am proposing give rise to the possible influence of matters of procedure on the substance of legislation. The desirability of such influence deserves to be questioned, however, in light of the severe problems facing the Senate in conference, rules can only strengthen our position.

To spend as much time as we do in careful consideration of legislation and then to have so much effort overturned in conference does not make sense. It is important that we strengthen the weak link of our legislative process so that we will be able to better perform our legislative duties.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the resolution just submitted by the Senator from Illinois (Mr. STEVENSON) be referred to the Committee on Rules and Administration, with instructions that the committee report it or a resolution with the same general purpose to the Senate not later than January 19, 1977.

The PRESIDING OFFICER. Is there objection?

Mr. BAKER. Mr. President, reserving the right to object, to make sure I understand the request, it is that the resolution now before us be referred to the committee for no longer than until January 19, with the requirement that the Rules Committee report something back to the Senate on January 19th?

Mr. ROBERT C. BYRD. Exactlly.

Mr. BAKER. There is no implication in this resolution or in this request that would prevent the Senate from again referring it if it chose to do so?

Mr. ROBERT C. BYRD. That is true.

Mr. BAKER. No objection.

Mr. CANNON. Mr. President, if the Senator will yield, I would say, if the resolution is referred to the Committee on Rules and Administration, we will have hearings starting at 10 o'clock. We will not be able to meet on Thursday because of the counting of the electoral votes. We will then resume on Friday, and plan to go over to further hearings next week as may be necessary, in order that we complete the hearings and hear testimony from people and organizations that want to be heard, many of whom have already evidenced an interest.

So we will attempt to move just as expeditiously as we can, and report within that time frame if the matter is referred to us as the Senator suggests.

I thank the Senator for yielding.

The PRESIDING OFFICER. Is there objection to the request of the Senator from West Virginia?

Without objection, it is so ordered.

Mr. CANNON. Mr. President, I have just been advised, since I announced the hearings for 10 o'clock, that there has been a Democratic caucus called for 10 o'clock in the morning, so the hearings will start at 10:30 rather than at 10 o'clock.

Mr. ROBERT C. BYRD. I thank the distinguished Senator.

Mr. STEVENSON. Mr. President, if the Senator will yield, it was my understanding, when the hearings of the Rules Committee were mentioned as being at 10 o'clock, that the conference had been changed to 11.

Mr. ROBERT C. BYRD. The Senator is

correct. I misinformed the distinguished Senator from Nevada. The caucus is to begin at 11.

Mr. CANNON. Then, Mr. President, the hearings will begin at 10 o'clock in the morning, as scheduled.

SENATE RESOLUTION 5—SUBMISSION OF A RESOLUTION TO AMEND THE STANDING RULES OF THE SENATE

Mr. ROBERT C. BYRD submitted the following resolution, which was referred to the Committee on Rules and Administration, by unanimous consent:

S. RES. 5

Resolved, That Rule XXII be amended as follows:

SEC. 1. On line 2 of the last paragraph of section 2, strike out "one hour" and insert "one-half hour."

SEC. 2. Beginning at the end of lines 4 and 5 (as printed in "Senate Manual") of the last paragraph of section 2, strike out the words "and it" and insert in lieu thereof the following: "and after not to exceed 50 hours of consideration of the proposition on which cloture was invoked, the Senate shall proceed to vote on the final disposition thereof to the exclusion of all motions except a motion to table, amendments, and debate except for one quorum call on demand to establish the presence of a quorum just before the final vote begins. The total amount of time allotted above may be further reduced by the adoption of a motion without debate by a two-thirds affirmative vote of the Senators duly chosen and sworn, in which case the time allotted shall be equally divided and controlled by the Majority and Minority Leaders or their designees. It"

SEC. 3. Amend Rule III by striking out all after the words "unless by unanimous consent" and insert "or on motion decided without debate. Motions to correct the 'Journal' shall be privileged and proceeded with until disposed of and shall be confined to an accurate description of the proceedings of the preceding day."

SEC. 4. Amend Rule V to add at the end thereof a new section numbered 4, as follows:

"SEC. 4. Rulings by the Presiding Officer sustaining a point of order that no business has been transacted since the last quorum call shall not be subject to an appeal when that fact is supported by the minute book of the 'Journal' or the transcript of the proceedings of debate; this prohibition shall also apply to a ruling on a point of order made immediately following a yea and nay vote where the presence of a quorum was shown and no business has intervened."

SEC. 5. That Rule XV be amended by adding a new paragraph thereto as follows:

"3. The demand for the reading of an amendment when presented to the Senate for consideration, including House amendments, may be waived on motion decided without debate when the proposed amendment has been identified by the clerk and is available in printed form."

SEC. 6. That Rule XXVII be amended by adding at the end of paragraph 1, after "without debate.", the following: "The demand for the reading of a conference report when presented may be waived on motion decided without debate when the report is available in printed form."

Mr. ROBERT C. BYRD. Mr. President, I send a resolution to the desk which would have the effect of modifying the rules in such a way as to expedite the business of the Senate once cloture has been invoked.

This resolution would not in any way change the requirements for cloture: 60 Senators voting for the invocation of cloture would still be required. But once the Senate has expressed its intention by way of 60 Senators having voted for cloture, then it is my feeling that the Senate ought to be able to expedite its business on that measure or matter, without trampling on the rights of the minority, but at the same time allowing the majority of the Senate to work its will and reach a vote up or down on the matter.

This resolution would provide for a time limit of not to exceed 50 hours on a measure or matter once cloture has been invoked. At the expiration of that time, if it were all consumed, the Senate would vote on the matter, with only a motion to lay on the table being in order, and with no further debate being in order and no further amendments being in order. It would, therefore, be possible for Senators to debate the matter up to 50 hours and to offer amendments, get votes up or down on them, put in quorum calls, or do whatever they wish; but whatever quorum calls would be put in would be charged against the overall 50 hours. Each Senator would have one-half hour under my proposal, and I also provide for an additional motion, which would be nondebatable, which would allow for a further reduction of time below the 50 hours if such motion were to be supported by a constitutional two-thirds of the Members.

This would assure the minority that a majority would not run roughshod over a minority in attempting to further reduce the time. But if it became obvious, in the judgment of the Senate, that the further utilization of time was not in the interests of bringing about a legitimate modification of the proposal or the defeat of it, and if two-thirds of the Senators elected chose to support that motion, then the time would be reduced.

I would also provide for a nondebatable motion in the event objection was heard to dispensing with the reading of the Journal. I would also provide that the reading of an amendment or a conference report could be waived by a majority vote on a motion, not debatable, in the event that such amendment or conference report is available and is printed.

I think that I have given a summary of the proposals that I have included in this resolution, I have discussed this matter with Mr. CANNON; I have discussed it with Mr. ALLEN; I have discussed it with the distinguished Republican leader; and I believe that they are willing to pursue this course.

They may want to suggest a modification in my request, but until they hear it they cannot suggest a modification.

I would therefore ask unanimous consent, Mr. President, that this resolution be referred to the Committee on Rules and Administration, with instructions that the resolution be reported back, or that the committee report back a resolution on the same general subject matter, within, let us say, not to exceed 60 days.

Mr. BAKER. Mr. President, reserving the right to object, and I do not plan to object, the distinguished majority leader is entirely correct. We discussed this matter previously. I know of no objection on our side to proceeding. I reiterate I am speaking on procedure. There is much disagreement on the substance of the resolution. But as to the matter of referring this resolution to the Rules Committee with an order to report back this or some other resolution on this subject matter in not later than 60 days, I have no objection.

I wanted to clarify one point. That is that there are other resolutions on this same subject. The distinguished senior Senator from Oregon, for instance, has four resolutions that he wishes to be treated in a similar way. The Senator from Maine has a resolution.

It is my intention to make, or to respectfully request the majority leader to make, a third request: that any other resolutions dealing with this rule would be referred to the Rules Committee under the same or similar procedures.

I take it there is no difficulty with that procedure as far as the distinguished majority leader is concerned, but I wanted to make clear my intention in that respect.

Mr. CANNON. Will the Senator yield, Mr. President?

Mr. ROBERT C. BYRD. Yes.

Mr. CANNON. I would like to suggest that if the Rules Committee could be given a maximum of 90 days and a blanket coverage of all other resolutions on that same rule, then we could handle the job, I believe, and not be pressed quite so much. As the Senator knows, we are already pressed very much between now and the 19th. In addition, we have the inauguration to worry about. If we could consider all of these resolutions as long as they relate to rule XXII and report something back, but be given not to exceed 90 days from this date, I think it would be adequate and I would be willing to agree to not object to that kind of a request.

Mr. HATHAWAY. Will the Senator yield?

Mr. ROBERT C. BYRD. Mr. President, I was just going to state that there are other rules involved. For example, the motion to waive the reading of the Journal would impact on rule III. There are other rules involved may I say to my distinguished chairman.

Mr. CANNON. That makes my case stronger for 90 days on the other resolution. I would be willing to agree if the Senate would give us the 90 days to cover the other resolutions that have been talked about here, which I understand will be introduced today, and the resolution proposed by the majority leader. We will report back on those resolutions not later than 90 days.

Mr. ROBERT C. BYRD. I would be very happy to so modify my request.

Mr. ALLEN. Reserving the right to object, and it is not my purpose to object, I also have two amendments to the rules that I would like to have covered. They do not refer to rule XXII but they could just as easily have been applied to rule XXII. I would like to have the opportunity to introduce these resolutions and have them covered by this blanket con-

sideration. Would there be any objection to that approach?

Mr. ROBERT C. BYRD. There is no objection on my part.

Mr. BAKER. Mr. President, reserving the right to object, I have no objection on my part in that respect. I might point out in clarification that the four resolutions of the Senator from Oregon do deal with matters other than rule XXII. The third request, if it is made, should include rules beyond just rule XXII.

Mr. ALLEN. Reserving the right further to object, I want to commend the distinguished majority leader for the approach that he is taking here with respect to an amendment to rule XXII and other amendments to the Senate rules. It gives indication of the fact that the plan is to seek amendments of the Senate rules in accordance with the rules of the Senate. I recall very vividly 2 years ago the distinguished majority leader, then the assistant majority leader, fought very strongly for that principle, that the rules should be amended in accordance with the rules of the Senate. Apparently the distinguished majority leader now wishes to follow the course that he recommended 2 years ago but which was not followed. The rules were amended in a manner not sanctioned by the rules.

I am indeed pleased that the distinguished majority leader is willing to have his resolution go to the Rules Committee, where the resolution 2 years ago should have gone, to the Rules Committee, because the Rules Committee would have an opportunity to work on this resolution, possibly perfecting it to such an extent that there would be little opposition to it.

I have some proposals I would like to make to the Rules Committee that might remove my objections to the resolution. Two years ago amendments were not allowed here in the Chamber.

I commend the distinguished majority leader for requesting this resolution to go to the Rules Committee, that adequate time be given for consideration by the Rules Committee, and that everybody have an opportunity to have input into this effort to amend the rules. I think he is acting in a very statesmanlike fashion in following the rules of the Senate in seeking to amend the Senate rules.

I would like also to ask the distinguished majority leader, inasmuch as he seems willing to increase the time to 90 days maximum, if he would not also be willing to modify his request to provide for a minimum time in committee of 60 days, a maximum of 90 and a minimum of 60. Would there be any objection to that modification?

Mr. ROBERT C. BYRD. Not at all, Mr. President, I think it is a very worthwhile suggestion.

Mr. ALLEN. I thank the distinguished majority leader.

Mr. ROBERT C. BYRD. I ask unanimous consent, Mr. President, that the resolution which I am submitting, the resolution by Mr. HATHAWAY, the four resolutions by Mr. HATFIELD, and the two resolutions by Mr. ALLEN be referred to the Committee on Rules and Administration, with the understanding that these resolutions, or that a resolution on the subject matter, be referred back to the Senate within not to exceed 90 days, and with the further proviso that such may not be reported back to the Senate and entered upon the calendar prior to the expiration of 45 days——

Mr. ALLEN. I asked for 60 days——

Mr. ROBERT C. BYRD. I beg the Senator's pardon.

Mr. ALLEN (continuing). Sixty days, both dates to begin running as of today.

Mr. BAKER. Mr. President, reserving the right to object, and I will not object, I simply want to take this brief opportunity while this request is pending to also compliment the disinguished majority leader on choosing this technique for addressing this very difficult problem. I have been in the Senate only 10 years but I can recall on first days of sessions very, very difficult times on this subject. I think this is a far more prudent and orderly way to do it in view of the difficulties we have had with protracted debate over the years.

Mr. ROBERT C. BYRD. I thank the distinguished Senator, and I thank the distinguished Senator from Alabama.

Mr. HATHAWAY. Mr. President, I assume the days referred to are calendar days, the 60 days and 90 days?

Mr. ROBERT C. BYRD. Yes. I thank the Senator.

Mr. HATHAWAY. I thank the Senator for accommodating me.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

SENATE RESOLUTION 6, SENATE RESOLUTION 7, SENATE RESOLUTION 8, AND SENATE RESOLUTION 9—SUBMISSION OF RESOLUTIONS TO AMEND THE STANDING RULES OF THE SENATE

Mr. HATFIELD submitted the following resolutions which were referred to the Committee on Rules and Administration, by unanimous consent:

S. RES. 6

Resolved, That paragraph 2 of rule V of the Standing Rules of the Senate is amended—

(1) by striking out "If" and inserting in lieu thereof "(a) Except as provided in subparagraph (b), if"; and

(2) by adding at the end thereof the following new subparagraph:

"(b) Whenever the Senate is proceeding under paragraph 2 of rule XXII, if a question is raised by any Senator as to the presence of a quorum, the Presiding Officer shall count those Senators present. If he determines that a quorum is present he shall so announce, stating the number of Senators present. If he determines that a quorum is not present, he shall proceed under subparagraph (a).".

S. RES. 7

Resolved, That rule XXII of the Standing Rules of the Senate is amended by adding at the end thereof the following new paragraph:

"4. (a) At any time after a bill or resolution has been the pending business for three or more hours on each of two or more calendar days (whether or not such days are consecutive), it shall be in order to move that no amendment not germane to such bill or resolution shall be in order. One hour after the Senate meets on the first calendar day following the day on which any such motion is made, the Presiding Officer shall lay the motion before the Senate and direct that the Secretary call the roll. Upon the ascertainment that a quorum is present, the Senate shall immediately proceed to a yea-and-nay vote on such motion.

"(b) If such motion is agreed to by the affirmative vote of two-thirds of the Senators present and voting, no amendment not germane to such bill or resolution shall be in order. Points of order against amendments under this paragraph, and appeals from decisions of the Presiding Officer with respect thereto, shall be decided without debate.".

S. RES 8

Resolved, That the second sentence of the last paragraph of paragraph 2 of rule XXII of the Standing Rules of the Senate is amended to read as follows: "Except by unanimous consent, no amendment shall be in order after the vote to bring the debate to a close, unless the same has been presented and read prior to that time.".

S. RES. 9

Resolved, That paragraph 1 of rule III of the Standing Rules of the Senate is amended—

(1) by inserting "(a)" before "The" in the first sentence;

(2) by striking out "The" in the second sentence and inserting in lieu thereof "Except as provided in subparagraph (b), the"; and

(3) by adding at the end thereof the following new subparagraph:

"(b) Whenever the Senate is preceding under paragraph 2 of rule XXII, the reading of the Journal may be suspended by motion, and any motion to suspend the reading of the Journal shall be decided without debate.".

SENATE RESOLUTION 10—SUBMISSION OF A RESOLUTION TO AMEND THE STANDING RULES OF THE SENATE

Mr. HATHAWAY submitted the following resolution which was referred to the Committee on Rules and Administration by unanimous consent:

S. RES. 10

Resolved, That rule III of the Standing Rules of the Senate is amended by renumbering paragraph 2 as 3, and by inserting after paragraph 1 the following new paragraph:

"2. Notwithstanding the provisions of paragraph 1, at any time during the reading of the Journal or during the consideration of a motion to amend or correct the Journal, a motion to approve the Journal shall be in order. Such a motion may be amended, may not be tabled, and shall be decided without debate. No motion to reconsider the vote by which such a motion is agreed to or not agreed to shall be in order. If such a motion is agreed to, any further reading of the Journal shall be dispensed with and no motion to amend or correct the same shall be in order.".

(b) The first sentence of paragraph 1 of rule VII of the Standing Rules of the Senate is amended by inserting after "Journal is read" the following: "or approved pursuant to a motion made under paragraph 2 of rule III".

SEC. 2. (a) Paragraph 2 of rule V of the Standing Rules of the Senate is amended to read as follows:

"2. If, at any time during the daily sessions of the Senate, a question shall be raised by any Senator as to the presence of a quorum, the Presiding Officer shall count the number of Senators present. If he determines that a

quorum is present, he shall so announce to the Senate, stating the number of Senators present. If he determines that a quorum is not present, he shall forthwith direct the Secretary to call the roll and shall announce the result. All proceedings under this paragraph shall be without debate and shall not be suspended except by unanimous consent. No appeal from a decision of the Presiding Officer under this paragraph shall be in order.".

SEC. 3. The first paragraph of paragraph 2 of rule VII of the Standing Rules of the Senate is amended to read as follows:

"2. Senators having petitions, memorials, bills, or resolutions to present after the morning hour may deliver them to the Secretary of the Senate, endorsing upon them their names, and said petitions, memorials, bills, and resolutions shall, with the approval of the Presiding Officer, be entered on the Journal with the names of the Senators presenting them as having been read twice and referred to the appropriate committees, and the Secretary of the Senate shall furnish a transcript of such entries to the official reporter of debates for publication in the RECORD. In the case of a bill or resolution, if, on the first day on which the Senate meets following the day on which such bill or resolution was presented and on which the RECORD showing the presentation of such bill or resolution has ben published and made available to all Senators, any Senator objects to the application of the preceding sentence with respect to such bill or resolution, then such bill or resolution shall be considered as having been offered and objected to under paragraph 1 of rule XIV on the day on which such bill or resolution was presented.".

STREAMLINING SENATE FLOOR PROCEDURES

Mr. HATHAWAY. Mr. President, today I am submitting a resolution to amend the Standing Rules of the Senate to expedite the procedure for reading the Journal, for ascertaining the presence of a quorum, and for introducing bills and resolutions.

These are modest changes and in many respects follow procedures which work well in the House of Representatives.

These proposals would allow this body to operate more smoothly on a day-to-day basis but would preserve the substantive rights of all Senators which the rules were intended to protect.

The first section of this resolution would provide for the suspension of the reading of the Journal and any amendments or corrections thereto by nondebatable motion to approve the Journal, supported by majority vote.

The second section would allow the Presiding Officer to ascertain the presence of a quorum by counting, and the third would make explicit the ability of Senators to introduce bills and resolutions by leaving them with the Secretary.

It is my hope that these proposals may be considered early in this session. I have brought them to the attention of the Democratic caucus and shall also mention them in the course of my testimony before the Rules Committee regarding committee reorganization proposals.

If we successfully reorganize our committee structure into a more efficient one and at the same time streamline our floor procedures to handle the legislation generated by these committees on a more expeditious basis, we would be going a long way toward making the Senate a more effective and responsive body.

To reform the committee structure without also reforming floor procedures seems shortsighted. We must achieve both goals fully and adequately address the problems of the Nation and our constituents.

Mr. ALLEN. Will the Senator yield?

The PRESIDING OFFICER. Will the Senators send the resolutions referred to to the desk.

Mr. ALLEN. Will the Senator yield?

Mr. ROBERT C. BYRD. Yes.

Mr. ALLEN. Inasmuch as we are talking about the introductions of resolutions and permission is being granted for the introduction of resolutions, I have a resolution which has been prepared for introduction. It is cosponsored by the distinguished Senator from North Carolina (Mr. HELMS). It would have to do with expressing the sense of the Senate that no action be taken by the Chief Executive, whoever he might be, granting a blanket pardon to Vietnam-era draft dodgers. The distinguished majority leader has requested that no resolutions or bills other than these having to do with amending the Senate rules be permitted.

Of course, the distinguished Senator from North Carolina and the Senator from Alabama would accede to the request of the distinguished majority leader. I am wondering if we might have unanimous consent agreement that on Monday, it will be in order for the Senator from North Carolina and the Senator from Alabama to introduce this resolution.

Mr. ROBERT C. BYRD. Mr. President, by way of response to the distinguished Senator from Alabama—and I thank him for his cooperation in acceding to the suggestions that I have made earlier, that no bills and resolutions be entered today nor on Thursday over until Monday, with the exception of housekeeping resolutions.

There are two additional resolutions which will be offered by the distinguished Senator from Michigan (Mr. GRIFFIN) which deal with the unfortunate and untimely passing of our recently deceased colleague, PHILIP HART. With the exception of those two, I would like, then, to get unanimous consent on a request I propound at this time.

ORDER FOR ADJOURNMENT ON THURSDAY, JANUARY 6, 1977, UNTIL MONDAY, JANUARY 10, 1977

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business on Thursday of this week, it stand in adjournment over until 12 o'clock noon on Monday next.

The PRESIDING OFFICER. Without objection, it is so ordered.

STANDING ORDER FOR RECOGNITION OF THE MAJORITY AND MINORITY LEADERS EACH DAY

Mr. ROBERT C. BYRD. I ask unanimous consent that during the 95th Congress each day immediately following the prayer the majority and minority leaders be recognized for not to exceed 10 minutes each.

Mr. BAKER. Mr. President, reserving the right to object, I did not hear the request.

The PRESIDING OFFICER. The request is that each leader have 10 minutes to be recognized after the prayer each day during the session.

Mr. BAKER. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR PERIOD FOR TRANSACTION OF ROUTINE MORNING BUSINESS ON MONDAY, JANUARY 10, 1977

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that, immediately following the recognition of the two leaders on Monday next, under the standing order, there be a period for the transaction of routine morning business of not to exceed 1 hour, with statements limited therein to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ALLEN. If the Senator will yield, that would allow the introduction of the resolution of the Senator from Alabama, I understand.

Mr. ROBERT C. BYRD. Yes.

Mr. BAKER. Mr. President, if I may ask the Senator to yield for just a moment, if I understand the nature of the request in toto, other than the request for recognition of the leaders and the morning business, there is now pending, or the Chair has acted on, a request that no bills or resolutions be introduced before next Monday.

Mr. ROBERT C. BYRD. No, I have not propounded that.

Mr. BAKER. May I ask the distinguished majority leader if he could withhold that for just a moment, until I check with Members on our side?

Mr. ROBERT C. BYRD. Yes.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Will the Senator yield?

Mr. ROBERT C. BYRD. Yes.

Mr. BAKER. I had a request from the distinguished Senator from Arizona that may have had a bearing on the distinguished majority leader's request.

I cannot reach the Senator from Arizona. It is my understanding that his principal concern was that he not be precluded from putting statements in the RECORD or making statements that did not relate to the introduction of bills or resoluions. May I inquire of the majority leader if we have protected that right?

Mr. ROBERT C. BYRD. Does the Senator mean for today?

Mr. BAKER. Yes.

Mr. ROBERT C. BYRD. Yes, I have.

ORDER FOR RECEIPT OF STATEMENTS UNTIL 5 P.M. TODAY

Mr. ROBERT C. BYRD. I ask unanimous consent, Mr. President, that all Senators may have until 5 o'clock today to have statements printed in the RECORD.

Mr. BAKER. Mr. President, I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR ADJOURNMENT TODAY UNTIL 12:30 P.M. ON THURSDAY, JANUARY 6, 1977, FOR ELECTORAL VOTE COUNT

Mr. ROBERT C. BYRD. I ask unanimous consent that when the Senate completes its business today, it stand in adjournment until the hour of 12:30 p.m. on Thursday; that following the prayer on Thursday and at no later than 12:40 p.m. on Thursday, Senators march in a body to the Hall of the House of Representatives for the purpose of counting the electoral votes with respect to the last Presidential election; provided further that, upon the completion of the counting of the electoral votes in the Hall of the House of Representatives, the Senate stand in adjournment until the hour of 12 noon on Monday next.

Mr. ALLEN. Will the Senator yield?

The PRESIDING OFFICER. The Senator from Alabama is recognized.

Mr. ALLEN. Was this request granted?

The PRESIDING OFFICER. Not yet.

Mr. ALLEN. I will not object to that.

Mr. GRIFFIN. Will the majority leader yield?

Mr. ROBERT C. BYRD. Yes.

Mr. ALLEN. I asked the Senator to yield provided this other request had been agreed to.

Mr. ROBERT C. BYRD. May I yield first to the Senator from Alabama?

The PRESIDING OFFICER. Is there objection to the unanimous-consent request?

Mr. ALLEN. I have none.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Alabama is recognized.

ORDER OF BUSINESS

Mr. ALLEN. The majority leader indicated that he was going to ask today for a period for the transaction of routine morning business, with the business to be statements by Senators.

Mr. ROBERT C. BYRD. Yes.

Mr. ALLEN. Would there be any objection, under the letter and spirit of the request, to inserting into the RECORD—I ask unanimous consent to have printed in the RECORD the text of the resolution to which I referred, as to the pardon. It would not be a pending resolution but it would merely indicate what I plan to do on Monday.

Mr. ROBERT C. BYRD. By virtue of its appearing in the RECORD, it would not constitute an introduction?

Mr. ALLEN. Yes.

Mr. ROBERT C. BYRD. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. I ask unanimous consent that there now may be period for the transaction of routine morning business, for the purpose only of introduction of statements, not to extend beyond 1 hour, with limits on statements therein not to exceed 5 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

TRIBUTE TO SENATOR PHILIP A. HART

Mr. CRANSTON. Mr. President, a few short months ago, when this body last convened, I joined with many of my colleagues in rising to pay tribute to our retiring friend and colleague, Senator PHILIP A. HART, of Michigan.

We knew then—as he did—that his days on Earth were numbered. Still, the news of his passing on the day after Christmas saddened the holiday season for all of us.

But PHIL HART faced and met death as he lived his entire life—quietly and calmly, with dignity and courage, surrounded by those who loved him.

The Washington Star printed a particularly moving account of Senator HART's last Christmas, written by its fine staff writer Judy Flander—who happens to be married to my press secretary, Murray Flander. For those of my colleagues who did not see it, I ask unanimous consent that it be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

A MOST BEAUTIFUL LAST CHRISTMAS

(By Judy Flander)

For the family of Sen. Philip Hart, D-Mich., this Christmas, they say, was the most beautiful, the most meaningful they have ever had. Hart, 64, who had been stricken with cancer a year and a half ago, died in his Washington home yesterday at 1:03 p.m., his hand held tightly by his wife, Janey.

Throughout the day, as every day in the past couple of months, one or more of Hart's eight children were in his bedroom, accompanying him as far as they could go on his last journey. Clyde, 22, and Cammie, 28, were there as he died. "Cammie was consoling him," Clyde said. "She told him we loved him. We feel and hope he was aware."

The family is certain Hart was aware of them all on Christmas Day. Though he could no longer speak and had been receiving drugs for pain, he followed each of them with his eyes and, once in the evening, he smiled.

There had been gift-giving around the Christmas tree in the living room in the morning. It was a large gathering, including Cammie's husband, Peter Conserva, their son Philip, 3, and their infant daughter, Katie; Clyde's friend, Betsy Dayrell; Walter Hart, 26, and his friend, Lisa Groves; the Harts' other daughters, Laura, 19, and her friend Bob Cole, and May (Mary), 20, and Ann, 29; and sons, Michael, 24, and James, 25, and his friend Kimball Wheeler. And a few close family friends.

There was a small cowboy shirt for Philip Conserva, with a card, "From Granddad." Philip put on the shirt and ran in and gave Hart a big kiss. There was a turkey dinner, cooked by a family friend, and in the evening there were Christmas carols by The Northwest Quartet, a professional group.

The quartet was formed this fall when Kimball Wheeler left school in Brussels, Belgium, to join James, who with the other farflung Hart children had come home to be with his father during the senator's last days. The singers included Wheeler and Ann Hart, both mezzo sopranos, and Wayne Jones and Steve Cordle.

At about a quarter to seven Christmas evening, everyone assembled in Hart's room for the carols—"Coventry Carol," "Good King Wencelas" and "Ding Dong Merrily on High."

"We weren't sure how he'd react," Wheeler said. "We thought the noise might bother him." But it didn't. Hart smiled. "Everybody burst out crying but there was always someone to hold onto. It was a wonderful way to say goodbye." The singing was brief, over by seven.

"We had such a lovely Christmas," Janey Hart said. "He held my hand the whole time they were singing." Phil, she told him afterwards, "I love you. All is well. Laura is here. She passed her math exam (Laura is a premed at Brandeis University). If you understand me, squeeze my hand."

Philip Hart squeezed his wife's hand.

A family friend said, "He looked at his children. A tear came out of his eye and on his cheek. I remember Janey wiping it away. We all felt after that at peace. He knew everyone there loved him. He was not alone."

Yesterday Janey Hart was on the phone, notifying people and listening to condolences. Friends of Hart have been calling. Like most of them, President Gerald Ford asked Janey Hart, "Is there anything I can do?"

"Well, yes," she said. "There is just one thing I wish you would do and that is to give amnesty to the Vietnam protestors, deserters and draft evaders." It was, she said later, "the last thing Phil in his last weeks wished he could get through."

"Well," President Ford answered Mrs. Hart, "I'll give it another hard look."

During the day Janey Hart was also making arrangements. "It's almost a macabre scene now," she said. Hart was lying, wrapped in a sheet, in a pine coffin in their "garden-room"—a plant-filled, many-windowed room off the living and dining rooms. After Hart died, she said, "his sons picked him up and carried him down the hall and put him in the coffin."

Three weeks before, Mrs. Hart had called Father William Wendt, rector of St. Stephens of the Incarnation Episcopal Church, with whom she had been "arrested and convicted for trying to make peace" at a prayer-protest against the Vietnam war at the Pentagon in 1970.

She told him, "We'll be needing a coffin." Wendt, she knew, had a carpenter who made pine coffins averaging about $150 in price. When she had investigated the possibility of obtaining a pine coffin, she learned, "They only have them for Jewish funerals for about $800." Hart, she said, had always deplored "the absurdity" of high-priced funerals.

Used to visiting their father, the Hart children spent yesterday going in and out of the garden room where he lay in the open coffin. (Today, for an invitation-only wake, the coffin is closed.)

There they talked about "little things," James said, like the days when "we were running around playing Indians when we were supposed to be in bed."

Death is not disguised in the Hart house. Even little Philip knows what has happened. "Granddad is dead," he told Ann Hart. "Yes, I know," his young aunt replied. "He knew it was solemn," a family friend said, "but he knew it wasn't terrible. It wasn't terrible. It was sad, it was a shock, but it wasn't terrible."

This month, Rolling Stone magazine had a story on Phil Hart entitled, "The Saint of the Senate." It was a title he would have shrugged of, probably with amusement but possibly with a rare burst of anger. "He never wanted praise," Walter said. "He objected to it because people would try to canonize him. He did not think his selflessness, his giving heart, was extraordinary. We can't dismiss him as a saint and then dismiss our own responsibility for living because we're ordinary.

"His mind and his heart weren't at odds. Although he loved and worked for the ideal, he could accept and love reality, too."

Hart was a realist. One of his aides noted that he had felt his most significant contribution in the Senate was as floor manager of the Voting Rights Act of 1965. This was the act that struck down the literacy tests the South had as a requirement to qualify people to vote. Four years later he was reminding an audience, "We shouldn't forget when civil rights progress was getting a white man to say he wouldn't mind living next door to Ralph Bunche."

Michael remembers Hart's graciousness. "It was never a question of misunderstanding us even in more difficult moments. He was always trying to understand."

Clyde said that the most important thing he had learned from his father was that "the evolution of civilization is a task that takes great compassion and patience." Months ago, the Hart children told him they wished they could do something for him. He told them that he knew they loved him and that was enough. "It's been a tough time," Walter said. "But we've been really lucky.

"He was just a man, a good man. He was a happy man."

On Wednesday, Janey Hart, her children, and Mrs. Oner Lee, her housekeeper for 27 years, will take Hart's cremated remains on an Air Force plane to Mackinac Island, the family's Michigan home. There, after a final service conducted by the Rev. Joseph Francis, Hart will be buried in St. Anne's Catholic cemetery near the grave of his first child, a son who drowned when he was 2.

Philip Hart's death brought his grown children together for a brief intense time during which every member gained something while sustaining an enormous loss. Now they will begin to go their own ways again, several with companions of their own. In June Janey Hart is likely to be on her way across the Pacific, sailing with her friend Ann Bronfman in the Meander II. The sailboat has private quarters originally designed to accommodate Phil Hart, too. But he won't be coming along, except in memories.

Mr. CRANSTON. Mr. President, Sigmund Freud once noted that there was at least some reason to be hopeful about mankind's future—in words which could have described PHIL HART, and his lifetime of distinguished public service:

The voice of intellect is a soft one, but it does not rest until it has gained a hearing. Ultimately, after endlessly repeated rebuffs, it succeeds. This is one of the few points in which one may be optimistic about the future of mankind, but in itself it signifies not a little.

The quiet intelligence of PHILIP A. HART graced this Chamber from 1959—when he began the first of his three successive terms of Senate service, until September 30, 1976—when he bid us farewell. His tenure in the Senate followed 10 years of public service in Michigan, which culminated with his election and then reelection as Lieutenant Governor of that State.

Gentleness, noncontentiousness and courtliness characterized the Senator from Michigan—whose campaigns for office consisted of praising the character and integrity of his opponents, while expressing differences on the issues. In keeping with his own character, he said about those campaigns:

Since I have never had an ill-mannered opponent, my sense of restraint has never been put to any serious test.

And, on the Senate floor, PHIL HART usually tried to find merit in the positions of his opponents, even while perceiving with distress the consequences of their misguided views.

Yet, restraint of character never kept him from taking serious and bold positions: PHIL HART authored or cosponsored almost every major piece of consumer legislation enacted by Congress from the Drug Safety Act of 1962 to the Antitrust Parens Patriae Act of 1976, which marked a fitting end of his tireless crusade for more expeditious and effective enforcement of the antitrust laws.

He championed the causes of consumer protection and antitrust, of civil rights and civil liberties, and of environmental preservation and protection.

He was the foremost Senate voice for national no-fault insurance, for truth-in-packaging, and for truth-in-lending. And, he exposed monopolistic practices wherever he found them.

Nor did his gentle character signify any want of courage: his vigorous stands against antibusing legislation provide ample proof of that.

Now PHIL HART is dead of cancer at the age of 64, survived by his widow Janey, who has continued to demonstrate—even during her bereavement—her own political courage, selflessness, and dedication to the national interest.

It was a privilege to know PHIL and Janey Hart—they will be remembered here with pleasure and deep affection. I know my colleagues join me in extending condolences and deepest sympathy to Janey Hart, and to their remarkable family.

It is fitting that in commemorating the passing of this great statesman we be reminded of his inspirational words of September 30, 1976—the very last that PHIL HART spoke in the Senate Chamber—for they may inspire us to serve the Nation more wisely and well, and that is what PHIL HART would have wanted:

I leave as I arrived, understanding clearly the complexity of the world into which we were born and optimistic that if we give it our best shot, we will come close to the goals set for us 200 years ago.

DEFENSE PROFITS AND PRODUCTION—THE MYTH AND THE REALITY

Mr. GOLDWATER. Mr. President, over the past years we have heard a great barrage of nonsense concerning the so-called military industrial complex. In the process the liberal antidefense forces have done great damage to the American industrial system. One of the results of this dishonest outpouring has been the gradual creation of a core of about 40,000 "watchers" who look over the shoulder of Government contracting officers to make sure the Government gets what it ordered. And a result of this has been a serious shrinking of the profit margin a producer can expect from a defense contract.

Mr. President, I am sure it will come as a surprise to many liberals as well as to the American people to learn that the defense contractor today can expect a profit on Government work of about 4.7 percent. This compares with what the Federal Trade Commission says is the normal profit for all types of manufacturing of 6.7 percent.

What this all means is that American industry is now becoming disillusioned with defense work and some companies are actually refusing to bid on Pentagon contracts. Competition has shrunk to the point where between 50 and 70 percent of all defense contracts are now awarded in a "no competition" atmosphere.

Mr. President, this problem is so serious that I believe Members of the Senate should read carefully a recent position paper published by the Association of the U.S. Army entitled "Defense Profits and Production—The Myth and the Reality." I ask unanimous consent to have this paper printed in the RECORD.

There being no objection, the paper was ordered to be printed in the RECORD, as follows:

DEFENSE PROFITS AND PRODUCTION—THE MYTH AND THE REALITY

A few years ago there was a briefly popular play called, "What If They Gave a War and Nobody Came?" It was a farcical treatment of popular disillusionment with war.

Today a playwright who is an astute observer of the American scene might write an epic called, "What If They Wanted to Give a War But Nobody Would Make the Bullets?"

For after decades of assumed romance between the U.S. Department of Defense and the industries making up the other half of President Eisenhower's "military-industrial complex," the thrill seems to be gone. The fabulous "cost plus ten percent" contracts of World War II are not only gone, they are illegal. In fact, the Pentagon weapons buyers, under pressure from within as well as from Congress, have been driving a very hard bargain, both in price and in quality control.

A result of this tougher customer/producer relationship has been the gradual creation of a corps of about 40,000 "watchers" who look over the shoulders of government contracting officers and contractors alike to make sure the government gets what it ordered.

Another result is the shrinkage of the profit margin a producer can expect from a Defense contract. On an across-the-board basis, considering contracts with gross values in the billions as well as those worth only a few thousand dollars, the Defense contractor today can expect a profit of about 4.7 percent. The Federal Trade Commission says the normal profit for all types of manufacturing is 6.7 percent.

The two percent gap doesn't seem very large but it is enough to persuade many potential Defense contract bidders that they don't want to be bothered by the horde of inspectors and the paperwork snowstorm that have been part and parcel of a Defense contract.

It is a hard fact of life, too, that few of the critics of Defense spending consider the most fundamental difference between the United States and Soviet economies as they go through their annual comparison of Defense budgets. While they compare U.S. and Soviet expenditures on a dollar-for-dollar, dollar-for-rubles or percent of gross national product basis, they ignore the fact that Soviet industry has no need to show a profit.

Still another contributor to the overall problem is the "up and down" nature of military procurement over the past 20 years. Peaks of intense military buying to meet situations like the Vietnam war and unexpected demands in foreign military assistance have been separated by long valleys of forced economy. It has been next-to-impossible to keep military production lines going on a steady basis and many former producers of equipment for the armed forces have turned to more predictable civilian production.

The Defense Department must now often take hat in hand and beg producers to take military contracts. When the decision was made to renew production of the Army's standard M–60 main battle tank after stocks were depleted by aid to Israel, there was only one foundry with the capability to make the turret castings. Even that company was reluctant to take on a new Defense contract but finally agreed to do it when the government promised enough business to make it worthwhile and guaranteed to cover any necessary capital investments.

On a larger scale, when the Army began soliciting competitors for prototypes of the new XM–1 tank they managed to entice only two companies, General Motors and Chrysler—and this program could mean multi-billion dollar orders for the successful competitor. In this instance the system worked well, however, as both competitors produced outstanding prototypes and the Army had a difficult decision to make before choosing Chrysler.

Ideally, all government contracts should be awarded on the basis of competition among potential suppliers. If the system worked right the taxpayers would get a break by being able to choose the lowest price or the better of two mousetraps at the same price.

Unfortunately, the system is working so poorly that between 50 and 70 percent of all Department of Defense contracts are awarded in a "no competition" atmosphere.

One of the things the Defense Department is doing to correct this is to close the profit gap. A project called "Profit '76," begun on October 1, 1976, will permit contracting officers to negotiate profit objectives based on a number of considerations: the cost risk the contractor is assuming; the extent to which he is providing his own facilities and financing; his ability to increase productivity, and; the amount of effort he is making to promote foreign military sales. DOD will even bear its fair share of the interest the contractor must pay on money he borrows to provide production facilities. And, the Department is prepared to cut down on the number of "watchers" who will be checking the quality of his production. Most contractors, DOD says, can be trusted to turn out a product that meets specifications.

The Department's judgment in including foreign military sales effort among the profit-boosting criteria will undoubtedly be questioned. The very term "foreign military sales" radiates bad vibrations in Washington these days following a series of scandals surrounding weapons sales to a number of countries. But DOD is willing to bear the criticism because of the potential benefits to the overall procurement program. Whenever weapons and equipment can be produced for the United States and foreign governments on the same production line the unit price is driven down and the production line itself can be kept active for a longer time.

DOD doesn't care whether the foreign sale is made directly between the producers and the nation involved or through the Department's foreign sales program. It makes a big difference to the contractor though.

If he can make the sale himself the contractor can insist on a down payment of between 20 and 30 percent, thus providing working capital. Also, the customer will frequently want an extensive support package included in the contract to provide training in the use and maintenance of the equipment. If the order comes in through the DOD sales program, however, there is no down payment since the foreign country is buying the equipment from the U.S. government and not directly from the contractor. Under those circumstances it is usual for DOD to set up the training and maintenance programs.

Some might argue a case for squeezing Defense procurement profits even lower in the hope of making a sizeable reduction in the yearly military hardware budget. But it would take a magic, and improbable, stroke to wipe out the whole concept of profit as an incentive to risk time, effort and capital. It is, after all, a very fundamental part of our way of life.

So, the Department of Defense has sent briefing teams ranging throughout the country to sell the concept of Profit '76. At last report they have visited 13 cities and briefed more than 3,000 potential Defense contractors.

There is a problem, too, with finding enough manufacturers to provide the component parts of major items of equipment. For many years smaller companies rushed to get their share of subcontracts to supply parts for the prime contractors but the last few years have seen a steady decline in the number of firms willing to subcontract. The Defense Department attributes this to the gradual expansion of the civilian market and declining profits from Defense work while, at the same time, the Defense market has been slowly shrinking. Manufacturers naturally prefer to have a steady market for their products.

Defense procurement specialists hope to reverse this trend by allowing more flexibility in specifications for components and by encouraging greater use of commercial parts and multiple sources of supply in subcontracting procedures. They say this should broaden the competitive base and reduce procurement costs.

The problem is even bigger than the year-to-year process of keeping the military forces going. Defense Department planners are most worried about the likelihood that a sudden major emergency will find the industrial production base incapable of meeting expanded military needs.

Despite the United States' deserved reputation for being able to mass-produce everything from pins to precision instruments, few production facilities can make an overnight switch from mousetraps to tent pegs. The Nation's vast automotive assembly lines might be easily adapted to put together heavy-duty military trucks but many of the suppliers who would be called on to manufacture the parts for the trucks would have a difficult time tooling up to meet more stringent military specifications.

Unfortunately, no matter how much latitude the Pentagon might allow in substituting standard commercial components, there will always be a broad area of military requirements in which the commercial substitute simply will not work. Because men's lives depend on them, the major share of military equipment items, large and small, must have built-in reliability far exceeding their commercial counterparts.

The renewed production of M–60 tank turrets is a good example of a shrunken industrial base that not only obviates cost-saving competition but also forecasts grave danger in the events of a major mobilization. No manufacturer, least of all one requiring heavy investment in production equipment, wants to tie up his capital in tools needed to fill sporadic military orders.

Until World War II a major share of peacetime Defense production was accomplished by government-owned arsenals, weapons factories and shipyards. In the case of the Army, all of its once-famous arsenals, like Springfield, Frankford and Watervliet, have either been closed entirely or diverted to maintenance or research and development tasks. The Navy, which once forged its own heavy naval guns, built intricate torpedoes and even built many of its own ships, is now entirely out of business in those areas.

The arsenal/shipyard provided a production base and a core of management expertise that lent itself to quick expansion into civilian industry in a mobilization situation. It fell victim to claims of unfair competition with civilian manufacturers and to its inability to stay abreast of improved manufacturing techniques through continuous investment in capital facilities.

Now the Navy is faced with such industry reluctance to get involved with shipbuilding it is seeking authority to build some submarines and smaller surface vessels in its own maintenance yards. Private shipbuilders estimate that the ships would cost 18 to 124 percent more if built in the government-owned shipyards but they show no improved inclination to take on the job themselves.

In recent testimony before the Joint Congressional Committee on Defense Production, Jacques Gansler, Deputy Assistant Secretary of Defense for Material Acquisition, described the need to react to either a short, high-intensity war or one of longer duration. He outlined some of the things that must be done to prepare for these eventualities.

In the case of the short, high-intensity war, he said, the armed services must be able to rely on pre-stocked reserves of supplies and equipment until civilian industry can shift to Defense production.

For a war that builds up gradually, perhaps after a prolonged period of tension, the services should be able to rely on increased production from existing assembly lines for about a year while other sources are converting to Defense production. He calls the ability to meet these situations a "surge production capability."

"Of critical importance to this surge response," Gansler told the Committee, "is the preplanning and resolve necessary for its success. Here we are looking at reduced production lead times through the pre-stocking of long-lead time parts and components, the elimination of manufacturing bottlenecks and the modernization of plants and equipment. *As an element of assuring success in this endeavor, we are considering holding each defense system program manager responsible for incorporating surge production planning into his program.*" (Emphasis added.)

Hopefully, the improved profit structure offered by the Department of Defense will lure more potential producers into competition for Defense contrasts, bringing all the benefits of cost-savings and making a major contribution to expansion of the emergency production base.

At the same time, however, the Department and the Congress must continue to press for additional funds to support realistic pre-stockage of equipment and supplies while concurrently planning—and funding—a surge production capability.

If it becomes necessary to "give a war" sometime in the future we must be assured that there are enough caterers prepared to supply everything from shoelaces to bombs.

REMEDY FOR THE U.S. SHOE INDUSTRY

Mr. HATHAWAY. Mr. President, the nonrubber domestic footwear industry has been encouraged by the recent unanimous finding of the U.S. International Trade Commission that our domestic industry is being injured by foreign imports.

I urged the ITC to come up with the right remedy so as to rescue the American shoe industry from drowning in the rising flood of footwear imports when I testified before it on December 7.

I expect the ITC to render its ruling on remedy on January 6. The remedy chosen may well decide the fate of thousands of shoe workers and dozens of communities in New England and in the some 30 States in other sections of the country where shoes are now produced.

More than 70,000 jobs have been wiped out by shoe imports since 1968 as at least 300 domestic footwear factories were forced to close. If we hope to preserve the 167,000 jobs remaining in this industry, the ITC must recommend to the President a remedy that is commensurate with its second unanimous finding of injury within a year.

A suitable remedy would be quotas placed on shoe imports based on import averages for the 3 years 1973, 1974, and 1975. The American Footwear Industries Association, the United Shoe Workers of America, and the Boot and Shoe Workers Union requested such quota relief from the ITC.

And as the European Common Market shoe producers noted at the ITC hearing, this base period with its high level of imports represents a major concession on the part of the American industry and labor unions.

After the administration rejected the remedy requested by management and labor last April, there was a tremendous spurt in imported shoes. Import penetration of the American market exceeded 50 percent in August—the first time ever in American history that our own shoe factories sold to a minority of the market.

For 1976, around 400 million pairs of foreign shoes will have been sold in the United States.

Unless quotas are imposed promptly, we shall see the steady erosion of more and more jobs as imports continue to rise.

I ask unanimous consent that a copy of my testimony delivered on December 7 before the ITC be printed in the RECORD as background on this matter.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

TESTIMONY OF SENATOR WILLIAM D. HATHAWAY BEFORE THE U.S. INTERNATIONAL TRADE COMMISSION, WASHINGTON, D.C., DECEMBER 7, 1976

Mr. Chairman and Members of the Commission; Good morning. The domestic non-rubber footwear industry in the United States has been very badly used by our government in the recent past and it is a privilege and a pleasure for me to appear before you today to do what I can to aid and encourage a redress of this deserving industry's serious and legitimate grievances.

Make no mistake about it, we should not find it necessary to be here today because had your earlier recommendations reached comprehending minds instead of naive internationalists, the administration would have implemented effective and meaningful relief.

Instead of assembling today to consider this problem again, we would instead be watching the improved position of the domestic footwear industry.

The owner of a small shoe factory in Lewiston, Maine told me recently that the worst thing, of all of his problems, is that no one cares. That means more than self pity—how else is a shoe manufacturer to react to last Spring's indifferent decision to his plight? What will happen if we do not make the correct decision for the shoe industry now? It is easy—and correct—to say that it will die.

But let us consider for a moment the details of that death. Without relief from the effects of cheap imported shoes, our domestic manufacturers will be unable to obtain capital for operations and for development because capital will go elsewhere. Similarly, research into new and more efficient ways of making shoes will cease. Related manufacturing—tanners, die makers, last factories—will lose their sources of business. Rubber and textile manufacturers who supply special materials to the footwear industry will cease to do so. Skilled workers will lose their jobs and find that their assets—those hard-earned skills—are of no value to anyone.

All of this has started already. You can find evidence that the whole structure which I have just outlined is about to come crashing down and has started to do so already.

Time is very short, however, and we must act now or there will be nothing left to save in this industry. That is where we are, and that is what will happen if we fail to provide meaningful relief against imports. This means relief adequate to the degree of injury being suffered by the industry.

Now I do not need to tell this commission that domestic footwear manufacturers are suffering injury, for you unanimously reached that conclusion within the past year. And the situation is even worse now.

The last eight years have seen the loss of nearly 300 shoe factories in the United States. As many as 10,000 jobs were lost nationally in the month of July, 1976, and in August imports of shoes exceeded 50 percent penetration of our market for the first time.

Maine and other New England states have been particularly hard hit by the import invasion. In Maine, 19 shoe plants closed down between 1968 and 1975 with a nearly 55 percent drop in production and the loss of almost 11,000 jobs through the first nine months of 1976. New Hampshire has lost 24 plants, 56 percent of its shoe production and 8,500 jobs. Massachusetts has lost 60 plants, 56 percent of its production and 17,000 jobs. Many of the 36,500 jobs lost in these three states may never be regained and without relief thousands more jobs will disappear.

These problems are good cause for granting relief. The Commission, of course, will be told by opponents that relief to the industry will penalize the consumer. But let us remember that shoe workers, tanners, and all their suppliers are consumers, too. And when they are not working, their unemployment and those quiet factories cost us and all other consumers dearly in the loss to the economy, of tax collections, and in diminished spending power. We don't need to suffer these costs.

And we should well ask who is enriched in this process. It is not the foreign workers—those women and children working at hours and wages not seen in our country for a half century or more. Rather, I suspect that it is the trading companies, the Mitsubishis, and the Mitsuis, and the Sumatomos who gain the lion's share of the vast profits which our Amercian market can provide them.

The Trade Act of 1974 was an important step towards the relief which our shoe manufacturers need. I supported the legislation which became the Trade Act because it did raise the hope of help to our industry.

In December of 1974, just prior to passage of the Act, I requested and received the Administration's promise to—and this is a quote—"give immediate attention to devising some suitable form of arrangement with the governments of other nations whose exports to us are the significant causes of disruption to our footwear industry. The purpose of such arrangements would, of course, be to reduce or eliminate the disruptive effects of imports." End of quote.

Members of the Commission, this promise to reduce or eliminate disruptive imports is a promise still to be fulfilled. Many people await the help the shoe industry needs. It is not quite too late for the industry; but we are at a very critical moment now. Further indecision, or another failure of vision and judgment such as the one suffered already this year, will set in motion forces, such as the flight of capital, which could run rapidly and, in geometric increments, the shoe industry in the United States would be cut in one wrenching motion out of the economic body of this country and be thrown upon the dust heap of history. The trip downhill could be very swift. There is little margin for error or procrastination now.

If we are inclined to allow our shoe industry to be destroyed, we should first remember that it is a part of the whole which would be dying, and in its death there resides a threat to the rest of the structure.

Shoes are made from the skins of animals raised by our ranchers; or from synthetic materials produced by the rubber and chemical industries; or with textiles made out of natural fibers grown by our farmers.

The glues, the nails and all the other findings come from still other factories. All of this, plus the skilled labor directly employed in the manufacture of footwear is at stake in this hearing today.

The United States International Trade Commission has the power to aid this great industry by recommending quotas on imports. I urge you to help to fulfill some long-deferred promises to the American footwear industry and all who depend upon it.

Thank you.

POLIO IMMUNIZATION PROGRAM

Mr. JAVITS. Mr. President, on September 23, 1976, the Health Subcommittee of the Labor and Public Welfare Committee, of which I am ranking minority member, conducted hearings on the Federal Government's responsibility for the supply of critically important vaccines and the need to develop a national vaccine policy.

Such a national policy was necessary with respect to the issues surrounding informed consent and immunization; the problems of vaccine manufacture and production; the problems associated with liability and indemnification; a review of the processes of research and development with a view toward future identification of vaccine preparations available for general use; the role of and responsibility for professional and public education on vaccine utilization as a disease prevention strategy, and the use of public information techniques to acquaint health professionals and the public with these matters. As part of a national vaccine policy it was also clear that special policies with regard to specific diseases, such as poliomyelitis, would need to be developed.

The first witness at the hearings was Dr. Jonas Salk, an historic figure and Nobel Prize winner in this particular field. His thoughtful views on the issues provide an important scientific basis upon which policy decisions may be made.

I commend his testimony to the attention of my colleagues and ask unanimous

consent that the full text of his prepared statement before the Health Subcommittee of the Labor and Public Welfare Committee be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

TESTIMONY BEFORE SUBCOMMITTEE ON HEALTH, COMMITTEE ON LABOR AND PUBLIC WELFARE, U.S. SENATE, BY JONAS SALK

I want to thank you for inviting me to this hearing. As you may know, I have for many years been concerned about our poliomyelitis immunization policy. I have expressed this on numerous prior occasions, but nearly always in a technical context in scientific publications, or before scientific audiences or official health policy committees. Now I welcome the opportunity to express these views in the public forum which this Committee provides, and to help clarify a matter of current public concern.

The statement which I prepared several days ago was based on the assumption that this hearing was to be held primarily because of two questions: one about availability of polio vaccine and the other about liability in the event of vaccine-caused disease. Yesterday's announcement of the signing of a contract by the Center for Disease Control for the purchase of polio vaccine eliminates the immediate concern about supply as well as concern on the part of the manufacturer regarding its liability. However, it refocuses the unresolved question as to where responsibility and liability now lie in the event of vaccine-caused disease. Do they now lie with the government, with the physician, with the clinic, or with the patient?

I claim no expertise in liability matters. But I believe such questions should not be decided—or even intelligently discussed—in isolation from the underlying scientific issues, a full understanding of which may not only be relevant but indispensable to any judicious solution. It is the scientific issues to which I will address myself.

The question asked prior to yesterday's announcement was: How might we solve the sudden shortage of polio vaccine that is normally available through public health clinics? Let me say that this shortage did not pose an immediate threat to public health. Now the liability question becomes the principle problem. To find a solution to it requires that we understand its cause. This will require a brief review. However, first let me clarify a few points about this problem.

The polio vaccine which was being withheld is the oral live poliovirus vaccine. It appears that it was not being made available because the manufacturer understandably does not want to be liable for damages resulting from the small but inherent risk associated with its use. Several suggestions had been made for dealing with this immediate problem—for example:

1. That liability for this risk should be assumed by the federal government, as was recently done for the proposed swine influenza virus immunization program. However, there is a great difference between the influenza and polio vaccines. The influenza vaccine is made from killed viruses and therefore has no risk of causing the disease. The oral polio vaccine, however, is made of live viruses, and has a small but definite danger of causing polio.

2. That liability of the manufacturer for this risk can be avoided by requiring recipients of the vaccine or their guardians to sign a consent form stating that they have been fully informed. However, this requires that the existence of alternatives be explained as well as the relative risk associated with receiving, or not receiving vaccine. A consent form which I have seen does *not* explain the alternatives.

What *are* the alternatives?

As you know, in the early 1950's, a polio vaccine was developed using *killed* viruses. Prior to its acceptance and licensing for use in 1955, it was subjected to a scientifically controlled field trial for safety and effectiveness. By 1961, its use resulted in more than a 95% decrease in incidence of polio even though far less than 95% of the population had been immunized.

You will also recall, in 1961–1962, another polio vaccine was introduced which could be given orally, and was made from attenuated but still live viruses. This vaccine was licensed in the U.S. *without any prior scientifically controlled field trial,* as had been carried out with the killed virus vaccine, and largely on the basis of wide-scale application in the USSR. As noted in a 1961 Report to the House of Delegates of the American Medical Association, "Although the field trials in the USSR were vast in scope, the experience reported from these trials as it concerns post-vaccination poliomyelitis is not capable of being examined in as great detail as one would wish it to be.

However, the available Soviet reports of such trials revealed to evidence of the occurrence of poliomyelitis attributable to the vaccination." In retrospect, it is clear that such cases had occurred but were not so interpreted.

In 1961, the American Medical Association called for and promoted a changeover from the use of the killed to the live polio-virus vaccine. It also spearheaded mass reimmunization with the oral vaccine. Subsequently, the Advisory Committee on Immunization Practices of the USPHS, and the Committee on Infectious Diseases of the American Academy of Pediatrics recommended their preference for the use of the live virus vaccine. These recommendations were based upon the following hypotheses:

1. That the live virus in the vaccine was *completely safe* and would *not revert* to a dangerous form;

2. That the live virus vaccine would "spread immunity," by causing *harmless* infection in contacts of those who had been vaccinated with the live virus;

3. That *only the live virus vaccine would produce the so-called "herd effect"* thus further protecting unvaccinated members of the population by decreasing the spread of wild viruses. It was claimed that this *could not be accomplished with the killed virus vaccine;*

4. That the live virus vaccine produced *longer-lasting immunity* than did the killed virus vaccine.

It is now 1976, and data are available from more than 21 years of experience with the killed virus vaccine and more than 14 years with the live. We can now reexamine the 1961 hypotheses upon which was based the proposed switch from the use of a killed to a live poliovirus vaccine in the U.S. The data now indicate that:

1. Contrary to beliefs in 1961, the oral live polio vaccine has been shown to be not completely safe, since there is a small but definite, inherent risk of its causing polio in recipients of the vaccine and their contacts. More than 140 such cases have thus far accumulated in the United States, and in the last several years, the live vaccine has been the principal if not the sole cause of domestically arising cases of polio. In other words, it may be said that, at the present time, the risk of acquiring polio from the live virus vaccine is greater than from naturally occurring viruses.

2. Contrary to beliefs held in 1961, the "spread of immunity" by infection of contacts is not always harmless and contributes to the public risk associated with the use of the live virus vaccine. It is now clear that if the killed virus vaccine had not already been administered there would have been many more cases of poliomyelitis resulting from use of the live virus vaccine.

3. Contrary to beliefs held in 1961, it has been shown that the killed poliovirus vaccine is effective in eradicating the disease, and in eliminating wild poliovirus from the community. It has also been shown that the so-called "intestinal immunity," or "natural immunity," produced by the live virus vaccine is not important for a herd effect, and that, in fact, the killed vaccine does produce a herd effect and widespread community protection. This has been demonstrated in countries where only killed virus has been used as you will hear from Dr. Penttinen.

4. Contrary to beliefs held in 1961, that the killed vaccine produces immunity of short duration and requires booster doses every 2–3 years, data available in 1976 demonstrate that booster doses of killed virus vaccine are not required any more than are booster doses of the live virus vaccine.

The following arguments in support of the routine use in the U.S. of a live poliovirus vaccine have been made:

1. That a vaccine given orally is more acceptable to the public than a vaccine given by injection. However, by 1961 a higher proportion of children had received three doses of killed virus vaccine by injection than has even now been achieved with the oral vaccine. Furthermore, more children have received three injections of diphtheria, tetanus and pertussis vaccine than have received three feedings of the oral polio vaccine.

Moreover, killed polio vaccine can be admixed with the vaccine for diphtheria, tetanus and pertussis, in any combination, as is done in some countries. Thus the ideal of a single vaccine for this group of childhood diseases, including polio, is a practical reality in certain other countries. The advantage for polio immunization is that DTP vaccine is already in routine use for all children.

2. That the cost per dose of the oral vaccine is less. I am not a merchandising expert but it seems evident that when looking at cost one has to consider volume of demand, additional cost of shipping and storage in the frozen state, and the final cost to the patient in terms of number and cost of office visits as well as insurance and liability burdens which are also passed on to the consumer. These also apply to government-operated clinics, which are the public consumer.

3. That if a choice of the live or killed poliovirus vaccine were offered, the public would be inclined toward the safer killed vaccine, and this would subject the country to virus invasion through immigrants or travelers especially across the Mexican border. However, as I have already noted, the killed vaccine induces the herd effect and does provide community protection. I published such evidence prior to the time of the initial policy decision to favor the live vaccine. I repeat it now. And I call attention to the accumulated evidence in the scientific literature.

I concur that the live virus vaccine would be more suitable than the killed virus vaccine for use in suppressing an outbreak should any arise in communities with low vaccination rates. However, I regard a killed poliovirus vaccine as more suitable for routine immunization because of differences in risk.

The ultimate goal in the control of any infectious diseases is the prevention of outbreaks. This can be accomplished by sufficiently widespread use of the safest as well as the most effective vaccines that we are able to create.

Surely, by taking advantage of our knowledge of the anatomy of viruses and of the structure and function of their genetic and somatic constituents, we should be able to improve upon our present methods of immunization toward eliminating risk rather than having to improve upon methods of compensation for vaccine damage.

For your further information and for clari-

fication, I have included some of the data upon which the points I have made are based.

Implied in this discussion is the fundamental ethical question: Who has the right to decide which of two vaccines to use when it has been established scientifically that one of them carries an inherent risk of causing paralytic polio and the other does not?

What is of equal significance is that the risk of acquiring the vaccine-induced disease is now greater than the natural disease.

Who, therefore, is to make the decision as to whether or not to be vaccinated, if only the vaccine that carries a risk is made available?

UTILIZATION OF KILLED POLIOVIRUS VACCINE IN FINLAND

Poliomyelitis Vaccination (Salk)

Vaccination is started when the child is 6 months old. Two polio vaccination doses are then injected at one-month intervals or also combined polio-DT vaccine can be used, as mentioned above. Booster doses are given at the earliest one year after the last vaccination which takes the child to the latter half of the second year of life. It is endeavoured to give a booster dose at the age of 6–7 years when starting school, and about 5–6 years later when leaving school. Boys obtain a further booster dose in the army.

In our country, changing over to the use of live attenuated vaccine (Sabin) has been much discussed. Since, however, Finland has been free from polio since the year 1964, and in connection with the use of Sabin vaccine several polio cases have occurred in many countries, we have been restraining the use of this method.

NUMBER OF CASES OF VACCINE-ASSOCIATED PARALYTIC POLIO FOR KNOWN RECIPIENTS AND CONTACTS, UNITED STATES, 1961–73

	1961–64	1965–73	1961–73

1965–73	230	20	.087	[2]46	.200

[1] Sources of distribution data: State health departments and PHS regional offices before June 1962 and CDC subsequently.
[2] Includes 2 cases for which type of vaccine administered to recipient is unknown during 1972 when TOPV was the only vaccine of significant distribution.
*Doses of vaccine.

Community contact cases as well as close contact cases occur that are attributable to virus of OPV origin. This suggests the possibility that all sporadic cases in the U.S. (other than those due to imported wild viruses) are of similar origin whether antigenic and RTC characteristics are compatible or not. Note ages of cases in close contacts and community contacts.

TABLE 9.—PARALYTIC DISEASE IN CLOSE CONTACTS OF VACCINE RECIPIENTS, 1972

State	Age	Sex	Prior immunization	Contact: Relationship	Contact: Vaccine administered	Interval: Administered to onset	PT's isolate type	Antigenic and RCT [1] characteristic	4-fold AB change	Residual disability
Texas	35	M	0	Son	TOPV	51 days	3	Non-vaccine ±/−	1, 2, 3	Death.

36 yr	Severe.

[1] Case observed in a 56 yr. old man returning from Mexico.
[2] Immunodeficient.

VACCINATION AGAINST POLIOMYELITIS: VACCINE-ASSOCIATED CASES

Seven million doses of live poliomyelitis vaccine were distributed from 1965 to 1972. As most children were primarily vaccinated it is judged that about 300,000 children were vaccinated each year. The age groups recommended for vaccination were 6–12-month, 7-year and 14-year cohorts.

Since the introduction of live vaccine and up to 1972, 11 cases of paralytic poliomyelitis have been traced. Four cases were caused by wild polio viruses and seven cases associated with vaccination. During the last six years only vaccine-associated cases have occurred, except for one case where the infection by wild virus evidently was acquired abroad.

Of the seven vaccine-associated cases five were adults and two children. The adults had severe disease with extensive paralyses. Most interesting is the fact that five or six cases were contact vaccine-associated. All three polio virus types were involved, but four cases were caused by Type II, two cases by Type I and only one case by Type III.

In conclusion the rate of vaccine-associated cases is rather high, one per million distributed doses, i.e. approximately one case per 300,000 vaccinated children. It should be stressed that the trivalent live poliomyelitis vaccines employed were the same as those used in the UK and USA. The reason for the high incidence may be that the tracing of cases is more easy in a small and homogenous population.

COMPARISON OF UTILIZATION RATES OF DTP AND OPV IN THE UNITED STATES (1974) (SHOWING A HIGHER RATE FOR 3 DOSES OF DTP GIVEN BY INJECTION AS COMPARED WITH 3 DOSES OF OPV GIVEN BY MOUTH)

[In percent]

Age group	Number of DTP doses ≥4	Number of DTP doses ≥3	Number of OPV doses, ≥3
1	2	32	21
1	17	65	54
2	35	72	60
3	42	76	66
4	48	81	71
1 to 4	36	74	63
5 to 9	65	85	74
10 to 13	68	86	(10–14) 70 (15–19) 60
Total (0 to 13)	54	79	(0–19) 65

Effects of killed virus vaccine in preventing disease as well as in interrupting circulation of wild virus in Sweden and Finland, confirms that intestinal infection with live virus vaccine is not essential for eradication of wild virus from a population.

Killed Virus Vaccine

"Since 1963 there has been no domestic case in Sweden, and the circulation of the virus . . . so far as can be established, has been interrupted. We have found in the past few years a few positive isolations in a mass investigation of sewage, but since the beginning of the 1960s we have not been able to isolate the virus from people . . . There is very little circulation, if any, in the community of wild virus." Dr. Holger Lundbeck, *Sweden* (1973).

"In Sweden and Finland, we have not only eradicated poliomyelitis but have also eradicated the live virus." Professor Pekka Halonen, *Finland* (1973).

From: International Symposium on Vaccination against Communicable Diseases, Monaco 1973; Symp. Series Immunobiol. Standard, vol. 22, pp. 319–320.

THE ISSUES FACING OUR SOCIETY

Mr. MATHIAS. Mr. President, I have used the time since the close of the 94th Congress on October 2, 1976, to discuss with the people of Maryland—and with citizens across the Nation—the issues facing our society.

I have learned much from these discussions. I learned that our people have come away from our Bicentennial Year with renewed faith in this country and its Constitution. I learned that Americans remain unshaken in their belief that our society can indeed offer a better life to us and our children. And I learned that Americans today are inspired by the same sense of justice that has animated our progress from the beginning.

Two hundred years ago, the founders of this Republic proposed an agenda for our political life:

To form a more perfect union, establish justice, insure domestic tranquility, provide for the common defence, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity.

If we are to fulfill these purposes—and thereby create a true constitutional community—we must dedicate ourselves to completing the agenda the founders of this Nation set for us.

The American people know there are no easy answers. They know that we live in an imperfect world where each generation will have to address new, as well as many old, problems.

But I also learned that Americans today, like their forebears, want to set to work on the agenda facing the country. They want to apply their faith and hope, and their sense of justice, to the issues before us.

Today, in the first week of our third century as a nation and on the first day of a new Congress, is a propitious time to make a new beginning. To that end and inspired by my intensive discussions and study over the past several months, I have prepared a series of bills that I will introduce on the first day bills are received at the desk. I announced these bills and described their main features in a statement I released to the public on December 22, 1976. I ask unanimous consent that the text of that statement, as well as the commentary made in the press on these initiatives, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MATHIAS LEGISLATIVE STATEMENT

(By Senator CHARLES MCC. MATHIAS, Jr.)

The only road back for the Republican Party is the high road. To stay on the high road means to stick to the hard surface—and to avoid the side tracks that have bogged the Party down for forty years of declining membersip and influence. It means keeping our eyes on the stars and our feet in the middle of the road.

That route should lead us directly to the concerns of the American people and the basic needs of soicety today, from jobs and housing to meeting the energy challenge, from small business relief to controlling crime by controlling repeat offenders and making the penal system more effective. The Republican Party can be useful to the people of America by facing the problems of the country and helping to solve them. When the people again see that the Repuplican Party is a useful institution, they will want to use it and to employ Republicans at the highest levels of national leadership.

On the other hand, I doubt that continued bickering between the factions within the Republican Party will stir much interest in the general public or attract many new recruits among the intelligent and skeptical younger generation. Nor do I think that many voters, Republican or otherwise, will be galvanized into action by hearing repeatedly that the old Republican stable full of windblown nags are ready to run again in 1978 or 1980. What will interest people is not the employment prospects of Republican politicians, but what Republicans can do for the country now and throughout 1977.

It is sometimes overlooked that the Founders of the Republic long ago proposed an agenda for political parties and for individual citizens: ". . . to form a more perfect Union, establish Justice, insure domestic tranquility, provide for the common defense, promote the general welfare, and secure the blessings of liberty. . ." There is much work yet to be done on the agenda, and if we attend to it, the people will respond to, and support us.

To this end, I have been drafting a series of legislative proposals that address the concerns of the people of the United States. They seek solutions to problems that hurt all of us, but elude simple answer. I am today releasing a list of these bills which I shall introduce on the first day of the new session of Congress.

One of the reasons I am making the texts of the bills available to the public and to my colleagues is to seek help in having them enacted into law. I hope that Republicans will co-sponsor them as positive and rational programs consistent with our traditions. I hope that Democrats will support them as reasonable and effective measures to deal with stubborn, long term problems. Most of all, I hope that citizens across the country will find in them a source of hope and confidence that there are still no problems too big for America.

For a hundred years the idea that moved the Republican Party was "freedom"—the simple basic concept that all Americans should be free and equal before the law. The public perceived that we had flagged in our interest in freedom even before we ourselves had noticed it. Now the time has come to return to the source of inspiration, for inspiration is sorely needed today. Liberty and freedom are challenged today by forces as strong as the slavers' chains and much more subtle.

These bills have been drafted with a view to imprinting on the statute books the concept of liberty as we apply ancient principles to modern problems. It is a job for all Republicans and a goal for all Americans.

MAIN FEATURES OF MATHIAS LEGISLATIVE INITIATIVES

On the first day of the 95th Congress, January 4, 1977, I will introduce a legislative package dealing with major issues facing the country—the economy, crime and civil liberties, education, energy, welfare reform, home ownership and the elderly. Set out below is a summary of the main features of these bills.

THE ECONOMY

Senate Bill No. 1 (S. 1), The Employment Resources Act of 1977, represents a comprehensive approach to the problems of unemployment, inflation, and economic growth.

S. 1, The Employment Resources Act, is a practical and realistic alternative to the Humphrey-Hawkins Bill. Too much talk has been devoted to criticizing that bill. Not enough energy has been devoted to preparing an alternative. We need full employment. America must provide the opportunity for a productive job for every person able and willing to work. To do otherwise is to diminish the lives and aspirations of all our people—and to default on the Constitution's promise "to establish Justice" and "promote the general Welfare."

But we must work towards full employment in a sound way. S. 1 does not create an elaborate central planning system. S. 1 does establish a process by which Congress, the President, and the Federal Reserve can fashion the fiscal and monetary policies that will enable our free enterprise system to offer full employment without overheating the economy.

S. 1 is based on the proposals and final report of a distinguished group of 75 Americans participating in the American Assembly on Manpower Goals for American Democracy, held at Arden House, Harriman, New York, May 20–23, 1976.

S. 1 concentrates on goals and mechanisms for developing the economy and restraining inflation; S. 1 is also designed to create jobs for young adults from low-income families where jobless rates have been exceptionally high. S. 1 establishes a new National Youth Services Program and expands the Young Adult Conservation Corps.

SUMMARY OF SPECIFIC PROVISIONS IN S. 1 AND S. 7

S. 1 calls for a full employment economy. The bill sets forth as federal policy a reduc-

tion of the unemployment rate by 1.5% per year, with the short-range goal of a 5% unemployment rate by 1978. In addition, S. 1:

Declares that inflation is a major national problem and requires the President to develop anti-inflationary techniques on a standby basis.

Requires the President to design and carry out fiscal and monetary policies to assure that the unemployment rate does not exceed 5% by the end of 1978. The bill requires the President to set forth in his annual economic report the fiscal, tax and monetary policies necessary to reach this goal.

Requires the Federal Reserve Board to report annually to the President and the Congress its intended policies and the extent to which they support the employment and anti-inflationary policies of the Act. The Board must justify any substantial variation from the policies in the President's economic report.

Creates a National Occupational Assessment Center to identify new employment opportunities created by technology and production trends. With more and more Americans entering the job market, particularly women and young people, imaginative approaches are needed to insure that enough jobs are available. The Center will help us to identify new ways to match people with jobs and to see if new approaches, such as job sharing and flexible work weeks, can increase the number of jobs. In addition, the Act creates the post of Assistant Secretary of Labor for Veterans' Affairs to manage employment and training programs for veterans.

S. 1 is also designed to cut the particularly high unemployment rate among youths, 16 to 24 years. According to official Bureau of Labor Statistics' figures, in the 2nd quarter of 1976, the unemployment rate for white teenagers was 16.5% while black teenage unemployment stood at 40%. A National Urban League Report showed black teenage unemployment at 63.8% for the 2nd quarter. "Justice" and "domestic tranquility" will be empty promises until we take strong action to attack these intolerably high jobless rates.

In brief, S. 1 would employ youths to do productive work on urban and environmental projects. The Act:

(1) Creates a National Youth Service Program under which public and private organizations, under contract with the Department of Labor, will employ youths from low-income families in local community projects to meet the need for housing and neighborhood rehabilitation, health care, crime prevention, and park and street maintenance;

(2) Expands the Young Adult Conservation Corps from a summer to a year-round program to employ youths in environmental projects on federal and state lands. In its first year, the Corps would employ 100,000 young people.

To improve the long-term job prospects of youths in the National Youth Service Program, S. 1 also provides, on a trial basis, for an innovative approach to job training. S. 1 authorizes the Secretary of Labor to make payments to employers in the Program who train youths in skills that will lead to permanent employment. Similar mechanisms are used in Western European countries and have been highly successful. In some Common Market countries the government pays employers $100 for every month they employ a youth in the first six months after school, and give approved training in skills beyond the initial job. Without undermining the minimum wage the bill gives employers an incentive to hire young workers and give them the skills they need for permanent jobs.

CRIME, JUSTICE AND CIVIL RIGHTS

The first purpose of government set forth in the Constitution is "to establish Justice". The Constitution further provides that government "insure domestic tranquility" and "secure the blessings of Liberty". The Legislation I propose in the fields of crime, justice and civil rights are designed to fulfill these purposes.

S. 14, The Bill of Rights Procedures Act, establishes a statutory foundation for the Fourth Amendment's protections against unreasonable searches and seizures. Endorsed by the House Republican Task Force on Privacy, the AFL–CIO, and the American Bankers Association, the Act protects the privacy of citizens' bank, telephone and credit card records. Under present law, government investigators do not need a warrant to examine these records. To gain access to these records, investigators would be required to obtain (1) the written consent of the individual, or (2) a subpoena, which could be challenged in Court, or (3) a judicial warrant. The Bill of Rights Procedures Act affirms our Constitutional right to individual privacy against governmental surveillance.

S. 28, The Repeat Offender Prosecution and Prison Improvement Act, and S. 35, The Civil Rights Improvement Act, are innovative approaches to the problem of justice in our society.

S. 28 would provide federal grants to states and cities to aid in the prosecution of persons charged two or more times with violent crime, such as robbery and burglary. Experience and studies show that a relatively small number of persons are responsible for a large proportion of violent crime. A recent study of 10,000 persons by University of Pennsylvania researcher Martin Wolfgang reveals that about 650 chronic offenders were responsible for ⅓ of the arrests and ⅔ of the crime committed by the group over a 5-year period. Successful pilot programs in Baltimore, Washington, D.C., and New Orleans and other cities have demonstrated that the crime rate can be cut by speedy prosecution and certain (not necessarily long) punishment for repeat offenders.

S. 28 would also establish a new relationship between the federal government and the states to modernize and upgrade our prison system. The federal government would build 5 regional prisons on federal land, such as under-used military bases. States would be able to lease bed-space in these federal prisons on a per diem basis. With federal standards and increased space, the inhumane conditions in overcrowded state prisons would be alleviated. In my State of Maryland, 6,700 prisoners occupy a prison system built to house 4,886—a capacity 40% less than the present number of prisoners.

S. 35, The Civil Rights Improvement Act, is designed to correct the trend of recent Supreme Court decisions limiting access to the federal courts for persons seeking relief under the Civil Rights Act. (Section 1983 of Title 42, U.S. Code.)

As Justice Brennan recently wrote in a dissenting opinion:

"A series of decisions have shaped the doctrine of jurisdiction, justiciability and remedy so as to increasingly bar the Courthouse door . . . The victims . . . are most often the litigants in need of judicial protection of their rights: the poor, the underprivileged, the deprived minorities." (Address by Justice William J. Brennan, Jr., before the New Jersey State Bar Association, May 22, 1976.)

Rights that cannot be enforced are worthless. The result is to breed disbelief in the basic fairness of our system of government.

Examples of recent decisions which S. 42 would correct are (1) *Rizzo* v. *Goode* (1976), where the Court refused to grant victims of unconstitutional police misconduct an injunction requiring police superiors to insure that such misconduct did not happen again; (2) *Paul* v. *Davis* (1976), where the Court held that a person whose picture was circulated on a police antishoplifting leaflet was not protected against the resulting defamation by the Fourteenth Amendment, and (3) *Imbler* v. *Pachtman* (1976), where the Court ruled that a prosecutor is immune from Section 1983 suits, even when he knowingly fails to disclose evidence favorable to the defendant.

S. 35 would also strengthen the Civil Rights Act by removing the immunity presently enjoyed by states, municipalities and governmental agencies. Since individuals, the only persons now liable under Section 1983, are often unable to pay the full cost of a verdict, the innocent victim must bear the burden of his injury. This is manifestly unfair, not only to the victim, but also to the individual defendant (e.g., a policeman) whose superiors' failure to train and supervise may have been responsible for the violation.

To remedy this situation, The Civil Rights Improvement Act would, in summary:

(1) Provide that Section 1983 liability will attach to supervisors and governmental units in limited circumstances where (a) the supervising officer authorized, approved, directed or encouraged the action, or (b) failed to remedy a pervasive pattern of unconstitutional or unlawful conduct by subordinates, or (c) a subordinate committed a particularly gross or egregious violation of one's Constitutional rights.

(2) Provide that the right to enjoy one's reputation is protected by the due process clause of the 14th Amendement.

(3) Provide a limited exception to prosecutorial immunity when the prosecutor unconstitutionally withholds or suppresses exculpatory evidence.

(4) Provide that the doctrines of Absention and Exhaustion of Remedies do not apply to Section 1983 suits.

(5) Provide that Sections 1983 and 1343 (the federal jurisdictional statute) are coextensive, so that one can always invoke Section 1343 to obtain federal jurisdiction whenever a Section 1983 suit is filed.

(6) Provide that federal courts will generally not be barred from hearing Section 1983 suits previously litigated in state courts, but limit the type of relief available in such situation to the modification or overturning of a criminal conviction or a damage award.

(7) Prescribe the circumstances under which a federal court should defer hearing a Section 1983 suit when the party bringing the suit is a party to a criminal proceeding or a civil suit brought by the state and arising out of the same situation.

WELFARE REFORM

S. 21, An Act to Create a National Commission on the Reform of Income Maintenance Programs would lay the groundwork for reform of our welfare system.

Along with Senators Javits and Brooke, I introduced this bill toward the end of the 94th Congress. Since that time, the bill has been endorsed by the U.S. Conference of Mayors and the National Association of Counties. The bill is designed to get the facts about all our income maintenance programs—facts which we do not have today—and to develop reform proposals free of the kind of emotionalism that has made "welfare" a favorite punching bag of political campaigners.

There is no consensus today in the Congress or among the American people on how welfare should be reformed. My bill would begin the process of developing that consensus. The 18-member, bipartisan Commission that would be created by this bill would have one year to recommend measures to reform all federal income maintenance programs. By looking at the full spectrum of such programs—comprising a $28 billion system—the Commission should enable us to make sound reforms in this expensive and important function of government.

S. 42, The Early Childhood Education Assistance Act, is designed to extend the public

education system to four-year olds—the age when immense strides in learning can be made. And, with this early start, expensive problems of school failure, truancy, and dropouts can be headed off. The bill would take advantage of the empty school rooms and excess teachers facing local school districts in many parts of the nation.

The bill would provide $500 million yearly to state and local school boards on the basis of 90% federal, 10% state the first year, with decreasing federal percentages until a 50–50 match is reached in the fifth year.

SMALL BUSINESS

S. 49, the Small Business Administrative Review Act, would provide small businessmen and women a forum, modeled on the U.S. Tax Court's Small Claims Branch, in which to contest fines and citations issued by federal agencies. The forum would be limited to hearing small claims of $2,500 or less. The bill is designed to give a "day in court to the little person".

ENERGY

S. 56, The Domestic Petroleum Production Act, and S. 63, The Nuclear Waste Management Act are specific initiatives aimed at the energy challenge.

S. 56 provides an incentive for the construction of oil refineries in the U.S. This would have two effects: (1) it would lessen our dependence on foreign refining capacity (the United States now depends on foreign refineries for 40% of its residual fuel oil) and (2) it would create new jobs for construction and refinery workers. The bill would amend the U.S. Tariff Schedules to impose gradually escalating rates of duty on petroleum products refined abroad. Revenue from the increased duty would be distributed to the states which consume such products.

The Nuclear Waste Management Act addresses the critical problem of safe disposal of nuclear waste. There may be 800–900 nuclear power plants by the year 2000 which will have generated 60 million gallons of liquid high-level waste. An M.I.T. study by Mason Willrich has concluded that the "existing organization for radioactive waste management will be unworkable if left unchanged." The Willrich study pinpointed the most serious problem as one of "bifurcated responsibility for an essentially integrated series of waste management operations." To remedy this, S. 63 would create an independent, self-financing government agency, the "Radioactive Waste Authority" in which all nuclear waste management functions would be concentrated. The Authority would own and control all radioactive waste facilities, governmental and commercial. It would finance its operations by charging fees for radioactive waste disposal. The Nuclear Regulatory Commission would continue to regulate waste management operations and ERDA would retain its responsibility for research and development of waste technologies.

HOME OWNERSHIP

S. 70, The Home Buyers' Assistance Act, would help the growing number of families being squeezed out of the homebuying market. The bill would authorize the Federal Home Loan Bank Board and other federal financial supervisory agencies to permit federally chartered savings institutions, such as banks and savings and loan associations to offer a variety of mortgage instruments. This would enable potential homebuyers to better match their monthly payments to their income.

S. 70 contains a number of consumer protection features, including a requirement that conventional level payment mortgages also be offered to a buyer, advance disclosure of terms, prohibitions on prepayment penalties, and a guarantee that the mortgage could remain with the home and be assumed by a new buyer. Among the possible new types of mortgages which would be offered under the Act are: graduated payment mortgages, deferred interest mortgages, and reverse annuity mortgages (to assist elderly persons on fixed incomes).

THE ELDERLY—AMENDMENTS TO THE SOCIAL SECURITY ACT

Through amendments to the Social Security Act, two provisions which have been particularly discriminatory would be modified.

The Social Security Act discourages beneficiaries in some situations for marrying. A woman who receives benefits because she is a widow loses a good part of them if she remarries. A woman under sixty years of age who receives disability payments loses them if she marries. My amendments would maintain the level of benefits for any individual regardless of marriage.

In addition, the Social Security Act discourages elderly Americans from working by limiting to $3,000 the amount that can be earned before benefits are reduced. My amendment would raise this limit from $3,000 to $5,000.

CITIES

In addition to the above bills, I am preparing an Urban Resources and Management Act to aid our financially troubled cities.

Key provisions of this bill include:

Changes in the formula for bloc grants under the Community Development Act and the Economic Development Act to insure that older cities are not shortchanged.

Tax incentives to encourage business to locate or remain in urban areas.

Federal insurance of state and local bonds for economic development.

Creation of a Transportation Trust Fund, using funds from the Highway Trust Fund, for urban transportation projects.

A new federal leasing and contract policy to require acceptance of bids no more than 10% higher than low bid if bidder is in an urban area with high unemployment.

SENATOR MATHIAS UNVEILS JOBS, RIGHTS BILLS

(By Douglas Watson)

Declaring that Republicans need to do less in-fighting and more to solve the nation's problems, Sen. Charles McC. Mathias Jr. (R-Md.) yesterday unveiled a dozen bills addressing unemployment, energy, civil rights, civil liberties and a variety of other issues that he will introduce in Congress.

Maryland's senior senator and maverick member of the GOP warned that voters won't "be galvanized into action by hearing repeatedly that the old Republican stable full of windblown nags are ready to run again in 1978 or 1980.

"What will interest people is not the employment prospects of Republican politicians, but what Republicans can do for the country," Mathias told a press conference.

In outlining his large package of proposed legislation, Mathias declared, "When the people again see that the Republican Party is a useful institution, they will want to use it and to employ Republicans at the highest levels of national leadership."

Asked whether his unusual presession calling for action in so many legislative areas indicates that he continues to be interested in running for President, something Mathias flirted with last year, the Maryland Republican said only, "I've got a four-year contract with the people of Maryland and I intend to honor that contract."

Mathias' Senate term will expire in 1981 when President-elect Carter's term does.

Because his progressive-to-moderate positions have put him very much in the minority of the Republican party and had even caused him to consider running as an independent, Mathias has felt the GOP backlash. Last summer Maryland Republicans denied Mathias, the party's highest elected official, a seat on the platform committee at the Republican National Convention.

Currently there is talk that Republican right-wingers may seek to punish Mathias for his independence by seeking to prevent him from becoming the ranking minority member of the Senate Judiciary Committee, but there have been no open moves in that direction.

Mathias said he isn't going to let concern about offending more conservative Republicans prevent him from taking a lead in proposing legislation. "It seems to me that unless somebody gets roused up, then nothing's going to happen," the 54-year-old Marylander said.

Mathias again deplored the impact former California Gov. Ronald Reagan has had on the Republican party, saying, "We were pushed and shoved into a position (in the 1976 presidential campaign) that ultimately led to a very shattering defeat."

But Mathias also criticized "continued bickering between the factions within the Republican Party," which he said is in danger because "the two-party system is out of balance and it can't work when it's this far out of balance."

In the 95th Congress convening Jan. 4, Mathias is introducing Senate Bill No. 1, an Employment Resources Act that would require the President to adopt fiscal and monetary policies aimed at reducing unemployment to 5 per cent by 1978. Mathias also is introducing a bill to create a "National Youth Service Program" to employ jobless teenagers.

Other Mathias bills would provide incentives for the construction of oil refineries within the United States and would establish a "Radioactive Waste Authority" to assure safe disposal of nuclear wastes.

Mathias also has drafted legislation aimed at protecting privacy by requiring government investigators to obtain warrants before examining individuals' bank, credit or telephone records.

Other bills call for construction of five regional prisons in which states could lease space to ease their overcrowded penitentiaries, and the broadening of the Civil Rights Act in the face of recent Supreme Court decisions narrowing its applicability.

Mathias further is sponsoring bills to make it easier for would-be home buyers to obtain mortgages; to provide small businessmen a new forum in which to contest actions by federal agencies, and to offer federal grants to school systems so public education can be made available to 4-year-old children.

[From the Baltimore Sun]

MATHIAS UNVEILS PROPOSALS IN BID TO LEAD GOP LIBERALS

(By Barry C. Rascovar)

WASHINGTON.—Senator Charles McC. Mathias, Jr. (R., Md.) made a pitch yesterday for leadership of the moderate wing of the Republican party during a press conference in which he called for new GOP candidates to replace the "wind-blown nags" of yesteryear.

The meeting with reporters had been called ostensibly to present an all-encompassing legislative package that Mr. Mathias will introduce next month. However, the Maryland senator spent much of the time calling for more progressive, middle-of-the-road leadership from the GOP.

And while he denied that the legislative package might be a precursor for his own bid for the presidency in 1980, Mr. Mathias maintained he had a "responsibility to restore the Republican party to the confidence of the American people.

"The two-party system is out of balance and it can't function when it's this far out of balance," Mr. Mathias said.

He cited his package of bills—ranging from

jobs programs, disposal of nuclear wastes, individual privacy rights and welfare reform—as a way to demonstrate the "Republican party can be useful to the people of America by facing the problems of the country and helping to solve them."

In a formal statement delivered under the glare of television lights, Mr. Mathias repeated his attacks on the conservative element of the GOP that had excluded him and nearly all other liberal Republicans from significant roles at the party's Kansas City Convention.

He derided the "continued bickering between factions within the Republican party," and scoffed at suggestions that voters "will be galvanized into action by hearing repeatedly that the old Republican stable full of wind-blown nags are ready to run again in 1978 or 1980.

"What will interest people," Mr. Mathias continued, "is not the employment prospects of Republican politicians, but what Republicans can do for the country now and throughout 1977."

When the Marylander was asked if former California Gov. Ronald Reagan was one of the "wind-blown nags" he was referring to, Mr. Mathias said: "Yes, I think that's an example."

The proposals in Mr. Mathias' legislative running as an independent presidential candidate this year, said he feels the GOP "still is capable of positive leadership. The party has been led down a number of side paths in recent years and we have got to stop that."

He maintained that, had President Ford not been forced by the Reagan challenge to abandon his middle-of-the-road stance, the Republicans would have won the November 2 election.

The proposals in Mr. Mathias' legislative package included:

A scaled-down version of the Democrats' Humphrey-Hawkins full employment bill calling for a reduction of unemployment to 5 per cent by 1978. The cost of this proposal over the next three years would be $8.3 billion.

A bill designed to cut unemployment among youths by utilizing youths to work on local community projects and environmental projects.

A measure to make it more difficult for government investigators to examine a person's bank, telephone or credit card records.

A bill to authorize construction of five new regional federal prisons in which the states could lease space. Mr. Mathias noted that this was needed especially in Maryland, where 6,700 prisoners are housed in facilities built for 4,886.

A bill to guarantee the safe disposal of nuclear waste.

Amendments to the Social Security Act allowing married couples to maintain their individual levels of benefits and increasing the amount that can be earned, before benefits are reduced, from $3,000 to $5,000.

Mr. Mathias, who is angling to become the Senior Republican member of the Senate Judiciary Committee, said he could not predict if senior conservative Senate Republicans would be "aroused" by his statements and his legislative package.

"Unless somebody gets roused up, there's not going to be much on the Republican side of the aisle to get roused up about," he concluded.

[From the Baltimore Sun, Dec. 26, 1976]

THE WIDE MATHIAS UMBRELLA

Senator Charles Mathias has taken a useful step toward bringing the Republican party back to the ideological center where lies its best hope for revival and prosperity. He is reacting to the GOP drift to the right—exemplified in the Ford-Reagan nomination contest—that promises only further shriveling of the party. Indeed the Senator's own political experience offers a good illustration of what's happening as the GOP abandons the moderates. His centrist-liberal brand of Republicanism brought him two Senate terms in a state overwhelmingly Democratic. Yet in a national election year he was virtually ignored by his own party, nationally and locally. He even thought aloud about leaving the party. Now that the Democrats are taking over the White House the GOP forum is the Congress where Republicans are very much in the minority. Remaining in his party Senator Mathias has offered himself as an alternative to the party's musty leadership and produced a legislative program broad enough to cover much of the political spectrum.

The Mathias legislative package ranges from an attacking unemployment with minimal government spending to promoting home ownership, encouraging national energy self-reliance, managing nuclear waste disposal, financing early childhood education, buttressing constitutional guarantees of privacy, strengthening citizen protection against government abuse of civil rights, reversing the Supreme Court's restriction of access to the federal courts, providing cities and states with federal money to prosecute career criminals, relieving state prison overcrowding, and establishing a federal commission to lay the groundwork for welfare reform.

Singly, each of the Mathias bills offers a response to a critical national problem. In some cases, clear alternatives to Democratic proposals are proposed. For example, Mr. Mathias calls for an attack on unemployment considerably less grandiose than the Democrats' Humphrey-Hawkins bill. Mr. Mathias would provide federal funds for training and employment of youth. But on a broader basis he would establish closer liaison between the President and the Federal Reserve Board so they can fashion fiscal and monetary policies together to fight inflation and reduce the unemployment rate.

Taken together, the bills constitute a wide umbrella that can accommodate Republicans of all persuasions. What Mr. Mathias now needs is the help of other Republicans. He has offered them a constructive vehicle for attacking serious national problems and rebuilding their beleaguered party as a responsible alternative to the Democrats while personally taking what might be the first steps toward a presidential campaign in 1980.

[From the News American, Baltimore, Dec. 24, 1976]

MATHIAS DESCRIBES BILLS HE WANTS ENACTED; BLASTS GOP

(By Rich Hollander)

Sen. Charles McC. Mathias Jr. opened the congressional session with a shopping list of bills he will seek to have enacted when the Senate convenes in January.

While most of the bills would relate in some way to Baltimore, a package called an "Urban Resources and Management Act" has the greatest potential local impact.

At the beginning of a Capitol news conference Mathias delivered a stinging criticism of the Republican leadership.

He blasted what he called "the old Republican stable full of wind-blown nags ready to run in 1978 or 1980.

"When the people again see that the Republican Party is a useful institution, they will want to use it and to employ Republicans at the highest levels of national leadership," Mathias said.

The sharp rebuke of the GOP establishment coupled with the introduction of bills obviously national in scope inspired several questions on Mathias' political ambitions.

"As far as I'm concerned," said Mathias, "I have a four-year contract with the people of Maryland and I'm going to honor that contract."

Maryland's senior senator went on to repeat his thesis that "the two party system is out of balance and can't work if it remains this far out of balance."

Earlier this year Mathias toyed with the thought of running for president, but eventually gave his endorsement to incumbent Gerald Ford.

By calling a major news conference and inviting representatives from the networks and national media, Mathias seemed to be positioning himself for future leadership.

Former GOP presidential hopeful Ronald Reagan was the only politician Mathias singled out as an "example of a posture which ultimately led to a very shattering defeat."

Despite his strong remarks about a fellow Republican, Mathias made it evident he has no intention of leaving the party.

Turning to cities, Mathias said he favored a new formula for allocating federal funds which would be aimed to benefit older Eastern cities like Baltimore.

In addition, Mathias proposed diverting revenues from the highway trust fund into a new fund to be used on urban mass transit.

Other bonuses to cities stemming from the Mathias legislation include business tax incentives to firms remaining in the cities and federal insurance of urban economic development bonds sold by state and local governments.

Mathias said it was imperative that the nation seek "transportation alternatives to the automobile."

Other areas within Mathias' legislative package are employment, criminal justice, welfare reform energy, education, home ownership and the elderly.

Calling his bill "a practical and realistic alternative to the Humphrey-Hawkins bill," Mathias said he hopes to place a 5 per cent ceiling on unemployment.

The most costly portion of the bill would employ young persons 16 to 24-year-olds on urban and environmental projects.

Mathias defended the $2.1 billion annual price tag on the bill, saying it would stimulate the economy.

In the criminal justice portion of the legislation, Mathias is endeavoring to clamp down on illegal governmental surveillance; aid states prosecuting repeat criminal offenders and modernize the prison system with the federal government leasing bed space in its facilities to states on a per-diem basis.

Without favoring a specific program, Mathias has introduced a bill creating a bipartisan commission to study the $28 billion a year welfare system.

Another bill entitled the "Early Childhood Education Assistance Act" would provide $500 million yearly to local school boards to extend public education to four-year-olds.

In an attempt to decrease U.S. dependency on foreign oil, Mathias has also sponsored legislation to give tax incentives to companies constructing domestic refineries.

In another energy-related bill, Mathias would create a "Radioactive Waste Authority" to deal with what he called "the critical problem of safe disposal of nuclear waste."

For the homeowner, Mathias has proposed a bill authorizing the Federal Home Loan Bank Board to permit federally chartered savings institutions to offer a wider variety of mortgage instruments.

Finally, Mathias would amend the Social Security Act to change the existing statute which, in his opinion, discourages beneficiaries from remarrying.

Mathias termed his extensive legislative package "positive and rational programs consistent with our traditions." He said he hoped it would receive support from both parties.

[From the Baltimore Afro-American, Dec. 25, 1976]

MATHIAS PRESCRIBES PILL FOR REPUBLICAN "ILLNESS"

(By Elmer W. Lammi)

Sen. Charles Mathias Jr. (R-Md.) offered his prescription Wednesday for a Republican resurgence: a middle-of-the-road approach to problems and new candidates to replace the "windblown nags" of yesteryear.

The GOP should "keep its feet in the middle of the road" and "avoid the side tracks that have bogged the party down for 40 years of declining membership and influence," Mathias told a news conference.

He also offered a package of bills that was so all-encompassing reporters speculated it might be a platform for launching his own presidential campaign in 1980.

"No," he replied when asked about that possibility. "I've got a four-year contract with the people of Maryland, and I want to keep that contract."

The Maryland Republican said he would introduce a dozen bills—of which he said six "won't cost anything"—as soon as Congress convenes.

The bills include one calling upon the President and the Federal reserve board to work with congress in drawing up a federal policy aimed at reducing the unemployment rate by 1.5 per cent a year.

Another bill would set up a youth employment program—including federal subsidies to private employers who hire young people.

Other bills in the package deal with crime and civil liberties, education, energy, welfare reform, home ownership and the elderly.

[From the Baltimore Evening Sun, Dec. 23, 1976]

. . . FOR MATHIAS SETS SAIL AT DAWN

Senator Mathias may have been right last Spring, he may be right now. Gerald Ford could have been preparing for a new term today had he, as Mr. Mathias advised him, turned his back on the Republican right-wing and presented himself to American voters, instead, as a moderate progressive moving slowly but surely along the middle of the road. Well, he didn't, probably because he couldn't. At the party's Kansas City convention, Ronald Reagan—not Gerald Ford—turned out to be the GOP darling. The result was, the President was obliged to absorb unwanted Reagan-wing thrusts—the gratuitous insult to Henry Kissinger, the imposition of the gross Robert Dole as running-mate—simply to hold restless delegates in line and to preserve his own political balance. He may have lost the election in November, for it was the very narrow, by the way he won the nomination in August.

Today, Mr. Mathias is back at it again, hitting out at the "wind-blown nags" of the party's yesteryear, meaning the Goldwaters and the Reagans, the Nixons and Agnews and the Fords. He does not offer a list of fresher names to take their places in 1980 but the hint is hard to miss. Mr. Mathias would like to see somebody run like, well, like Mr. Mathias. Indeed, wasn't it Mr. Mathias who undertook early last summer to explore the presidential possibilities then open to himself?

If that is the Mathias objective, it is not altogether quixotic. Party loyalties of the old-fashioned sort are fading fast among American voters: a Republican who, Mathias-like, tends to defy his own Republican leaders could stir definite interest among the Democratic voting majorities who, by 1980, may be disenchanted with the Jimmy Carter administration. Meantime, Mr. Mathias aims for greater personal eclat in the Senate and even for a share of the leadership of the minority party which, as he correctly points out, just now suffers a painful shortage of leadership. He must make the voice of the new Republican party rising from November's ashes ring with the accents of his own Frederick, Md.

The obstacles, like the opportunities, are also present. Kansas City showed where the dominant weight of the party rests nationally: it is no longer in the East, no longer even the Midwest. The West, and the more reactionary corners of it at that, is the new heartland of Republicanism. Mr. Reagan is one more "wind-blown" nag, all right, but when he speaks the now-controlling elements of the party pay close attention. Probably the Reagan insurgency last summer blunted and stained the Ford campaign beyond retrieval. In 1980, if not Mr. Reagan himself, some Reagan-like figure seems certain to rise up and try to spoil a Mathias candidacy too.

A truly independent candidacy, free of both party's strings, is what Mr. Mathias probably prefers. The time for that may come, but hardly by 1980. The Mathias future still seems confined within his own shrinking, increasingly resentful Republicans.

[From the Washington Star, Dec. 22, 1976]

MATHIAS TO GOP: AVOID BICKERING, TAKE "HIGH ROAD"

(By Martha Angle)

Sen. Charles McC. Mathias Jr., R-Md., today urged the Republican party to stop factional bickering and return to the "high road" of politics with programs designed to meet the basic needs of the American people.

The liberal maverick from Maryland unveiled a package of a dozen bills running the gamut from unemployment and welfare reform to civil rights which he said he will introduce when Congress returns next month.

Mathias said he will ask other Republicans to join him in pressing for enactment of the legislative package, which he called "positive and rational programs consistent with our traditions."

"The only road back for the Republican party is the high road," Mathias said. "To stay on the high road means to stick to the hard surface—and to avoid the sidetracks that have bogged the party down for 40 years of declining membership and influence."

Mathias, who has repeatedly criticized the GOP's drift to the right in recent years, said it would be a mistake for the country if the existing political parties turn into conservative and liberal groupings.

"It might be easier for the politicians, but I don't think it would be good for the country," he said.

He also warned that few voters are likely to be "galvanized into action by hearing repeatedly that the old Republican stable full of wind-blown nags are ready to run again in 1978 or 1980."

Asked whether he considered former California Gov. Ronald Reagan one of those "windblown nags" who has helped lead the GOP astray, Mathias conceded Reagan was indeed "an example" of what he had in mind.

FAIR ELECTION LAWS

Mr. GOLDWATER. Mr. President, there has been a lot of discussion about the pros and cons of the fair election laws passed by the last Congress, and I think we have all formed opinions bearing, to some degree, of course, but, nevertheless, opinions. I said at the time of passage that the act was extremely unfair because it gave the unions of this country almost unlimited authority to spend any amount of money that they cared to in a way that, of course, corporations are not allowed to. There is a memorandum from COPE which is the political arm of the AFL–CIO, explaining some of the things they did during this last campaign, and also attached is a report on what people in authority feel this costs. It always amuses me to hear Common Cause and other similar organizations raise so much need about what corporations and private individuals do, but any amount of millions that the unions want to spend to influence an election is all right. I wonder who is in bed with whom? I ask unanimous consent that this memo and its attachment be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MEMO FROM COPE

The AFL–CIO MEMO FROM COPE had some interesting reading in their November 22nd issue.

Following is a summary of a report by National COPE to the AFL–CIO Executive Council meeting convened one week after the election. It provides a capsule account of the value of the labor movement's efforts on behalf of the endorsed presidential ticket.

Over-all registration nationally—Approximately 70 percent.

Union member registration—80 percent, according to preliminary reports from State AFL–CIO Councils, COPE helped produce nearly six million new registrations of members and families, and through nonpartisan registration groups.

Over-all vote nationally—53.3 percent of eligible voters.

Union member vote—approximately 65 State and Local Councils.

Union member vote for Carter—70 percent, according to key ward and precinct figures (see below) higher in many areas, particularly the industrial states.

In the south while minority of whites voted for Carter according to CBS poll, a majority of white union members did.

From the material in the following paragraphs we estimated the costs to give an idea of unions' "in kind" support:

ESTIMATED FIGURES NOT IN COPE REPORT

Manpower—more than 120,000 COPE volunteers. Estimated 120,000 volunteers giving 16 hours at $3 per hour, $5,760,000.

Phone banks—more than 20,000 phones in thousands of phone banks. Placed more than 10 million calls during register-and-vote campaigns. We estimate installation and 2 month charge at $54 each, $1,080,000; Allowing 220 calls free per phone cost of estimated overage calls based on 5,600,000 at .07c, $392,000.

Get-out-the-vote effort—In addition to precinct operation and phone banks, major in-plant effort by stewards and other local union officials. Unestimated cost.

Minorities operation—Randolph Institute operations registered three-quarters of a million blacks. Estimated $1 per registrant, $750,000.

Materials—more than 80 million pieces (leaflets and posters, labor press coverage, letters directly to members from international union presidents and hundreds of local union officers) to union members from all levels of labor movement (National COPE, international unions, state and local councils and local unions). More than 700 prints of COPE films were distributed. Meany broadcasts over NBC and Mutual networks supplemented by sponsorship of them in hundreds of communities by local councils and local unions. Estimated average cost per piece 25c (includes mailing of some), $20,000,000; 700 prints of COPE films at $30 per film, $21,000; Production cost (estimated) $50,000; Network & local radio, $300,000.

Total of $28,353,000.

These estimates are only minimum guesses. Keep in mind this was basically for the

Presidential race. We also believe these are minimum figures.

U.S. DEFENSE NEEDS—A LOOK AHEAD

Mr. GOLDWATER. Mr. President, we hear a lot of discussion these days about future U.S. defense needs. One of the factors fueling this debate is President-elect Carter's contention that he can cut $5 to $7 billion from the Pentagon budget at a time when the Soviet arms program is reaching a new and dangerous peak.

This is shaping up today as one of the greatest issues of our time. Indeed, the security of the United States as well as that of the entire free world may well be at stake. Recently the officials of the Association of the United States Army prepared an excellent paper on the subject of U.S. defense needs. Because of its extreme importance I ask that it be printed in the RECORD.

There being no objection, the paper was ordered to be printed in the RECORD, as follows:

U.S. DEFENSE NEEDS—A LOOK AHEAD

The worst threat to our well-being remains what it has been ever since World War II—a clash between U.S. and Soviet armed forces. U.S. policy must address the threats to peace as well as the more likely economic opportunities. *Setting National Priorities.* The Brookings Institution, 1976.

The election is over. Waves of rhetoric that were smashing against the seawall of public consciousness have subsided into ripples. Promises of expanded social programs, reduced unemployment and that perennial will-of-the-wisp, the balanced budget, must now be considered in the harsh light of practical politics and economics. Two of the factors that must enter into that consideration are foreign policy and national defense, both of which have very limited fields of maneuver.

No matter which basic political philosophy shapes one's attitudes, one's solutions to problems in these areas will work in similar ways to support our national interests. The principal reason is that the problems which impact most heavily on both foreign policy and national security are externally created and beyond our easy control. There is not a whole lot we can do to influence the continued malevolence and expanding ambitions of the Soviet Union. Overpopulation, a worldwide shortage of foodstuffs, dwindling energy resources, the exploitation of resources from the seas, and nuclear proliferation all make for a full checklist of problems that contribute directly to global tensions and unrest. Add to those the burgeoning discontent in many of the emerging nations, the flaming hatreds of centuries-old protagonists in the Mid-East, racism in Africa, the remaining vestiges of colonialism through parts of the world, and it becomes readily apparent why we cannot call the tune on what we require diplomatically and defensively to protect our very vital national interests.

So that we might maintain a clear perspective as we address the broad spectrum of issues confronting us, it is useful to review some of our basic foreign policy defense requirements lest they be neglected. What are the stresses and strains from outside our shores which we cannot escape?

As the comparative maps indicate, the flowing tide of communism during the period when we have had atomic weapons is a reality, not a right-wing rallying cry. The annexation of some 15 nations to the Communist fold in the last 30 years does not reflect the final outcome of political struggles in some countries of Western Europe, the littoral of Mediterranean, Africa and Latin America. So we are dealing with ongoing momentum that cannot be described fairly as in the best interests of the United States.

The philosophy of communism prospers in a climate of want and unrest—and there are too many fertile fields in much of the world today that provide these ingredients. Burgeoning population growth is outstripping our ability to provide foodstuffs needed to sustain life in much of the world. We are at the critical point where there is a direct correlation between a major natural disaster be it drought, floods or wind which impacts on harvests and a rise in starvation in other parts of the globe. Worldwide efforts to correct this tragic situation require stability, peace and cooperation to a degree the world has yet to attain.

In his new book "Precarious Security," General Maxwell D. Taylor spotlights the problem. "By modern demographic methods, the growth of national populations can be estimated with fair accuracy to the end of the century, even though, in the meantime, governments may do their best to reduce the national growth rate. According to such calculations, by the year 2000 the world population will at least double with the greatest densities concentrated in countries least prepared to support them—South Asia, China, Indonesia, Africa, the Middle East, and tropical Latin America.

"By the end of the century, in South Asia, where starvation is frequent today in a population of 770 million, there will be about 1.4 billion people struggling for survival. China, which currently must often import large quantities of grain to feed 820 million, must find food for more than a billion to escape mass starvation. Indonesia, faced with the problem of accommodating over 230 million by the year 2000, will envy the vast open spaces of neighboring Australia, which by that time will be sustaining only about 20 million. Brazil, with over 200 million at the end of the century, will tower over its neighbors Argentina, Chile, and Uruguay, whose combined populations total only about a fourth of Brazil's. Some 3 million Israelis are today encircled by 70 million hostile Arab neighbors who will double in number by the year 2000, while Israel adds perhaps 2 million. Mexican "wetbacks" now pour illegally into our southwestern states at an annual rate believed to be over 800,000. What will be the extent of the invasion at the end of the century when the population of Mexico will have nearly doubled or by 2025 when it may approximate that of the United States?

"Such considerations justify a conviction that population growth and population-related problems will be a dominant, pernicious factor in the future development of nations and their relations with one another. The consequences will endanger not just American security but that of the world community."

Our own interdependence with the rest of the world is reflected in the adjacent box which lists 35 strategic materials which we must import to maintain our own physical survival. Three of these materials are vital and irreplaceable—chromium, platinum group, and aluminum. These are not materials for munitions alone but are essential to keep the wheels of U.S. industry turning. Many of those imports come from countries which are not close allies—and from some, like Africa for instance, where our diplomatic track record is abysmal. We have been unable, for example, to come to any sort of easy or comfortable terms with the raw-material-producing countries south of the industrial democracies.

Mineral, percent imported, and major foreign sources:

Manganese, 100%, Brazil, Gabon, S. Africa, Zaire.

Cobalt, 98%, Zaire, Finland, Norway, Canada.

Titanium, 97%, Australia, India.

Chromium, 91%, USSR, S. Africa, Turkey, Philippines.

Aluminum, 88%, Jamaica, Surinam, Dom. Rep.

Tantalum, 83%, Australia, Canada, Zaire, Brazil.

Platinum Group, 86%, USSR, S. Africa, Canada.

Tin, 86%, Malaysia, Thailand, Bolivia.

Fluorine, 86%, Mexico, Spain, Italy.

Nickel, 80%, Canada, Norway, USSR.

Tungsten, 60%, Canada, Bolivia, Peru, Mexico.

Germanium-Indium, 60%, USSR, Canada, Japan.

Beryllium, 50%, Brazil, S. Africa, Uganda.

Zirconium, 50%, Australia, Canada, S. Africa.

Barium, 40%, Ireland, Peru, Mexico.

Iron, 23%, Canada, Venezuela, Liberia, Brazil.

Lead, 21%, Canada, Peru, Australia, Mexico.

Copper, 18%, Canada, Peru, Chile, S. Africa.

Trade, fuel, and a whole range of intercourse with many nations are essential to the economic survival of our country. One cannot visualize the prospects for peace being enhanced by our growing vulnerability to raw materials cartels. It will take energetic and imaginative diplomacy—adequate supported by a credible defense—to guide us through this highly intricate and delicate area. This is a good place to emphasize how closely meshed foreign policy and a credible defense posture really are. Frederick the Great said it best, "Diplomacy without armaments is like music without instruments."

Part of the difficulty that contributes to unrest and the inability to make greater progress in peaceful endeavors is the instability of many national governments. In the last 15 months, the head of government has changed 44 times in 35 countries. Italy, for example, has finally seated its 39th government in 33 years. Included among the changes of government in the last three years have been 17 successful coups. Such instability makes much of our efforts of international negotiation almost impossible but, even worse, provides a constant threat of outbreaks by arms.

The bedrock of our foreign policy and principal focus of our national interest continues to lie with our NATO alliance in Europe. With all its stresses and strains NATO has served the cause of world peace and prosperity well for a quarter of a century. We have reduced our military participation substantially and would only tempt fate by cutting further. Ever since the Treaty of Rome in 1957 there have been great efforts to establish a European economic and political community which would integrate the nations of Europe into a viable political entity. Progress toward an early solution to the many problems involved has been slow indeed. It would be difficult to forecast the day when our strong military presence in NATO can be safely terminated.

It would take a considerable amount of space to review the imminent dangers that arise from the civil war in Lebanon and the tinderbox of Africa. In our own backyard there is real cause for concern about a peaceful solution in Panama. It will take a high degree of diplomatic and political skill to extricate ourselves from this dilemma in a way that will not alienate our important neighbors to the South and at the same time protect our interests. Each of these situations has all the ingredients for potential trouble of a nature serious enough to warrant the availability of credible U.S. deterrent forces.

We cannot overlook either the dangers arising from terrorist incidents. Forty-nine

nations have had at least one terrorist incident occur on their soil in the past three years.

Across the globe in the Far East, our prosperity is inextricably linked to the economy of the Pacific basin. Last year our trade with Asian nations exceeded our trade with Europe. Asian raw materials fuel our factories; Asian manufacturers serve our consumers; Asian markets offer outlets for our exports and investment opportunities for our business community. It is essential that we widen and strengthen our relationships in this important region of the world where we have already fought three wars in the last 30 years in an effort to secure peace.

The Pacific doctrine for the United States enunciated last year seeks to buttress our non-Communist allies and at the same time increase our cooperation and communication with the leadership of Red China as well.

This Pacific doctrine has had a favorable reception and it is still the considered view of most students of the area that most Asian nations, to include mainland China, want the U.S. to remain in the Pacific as a stabilizing force.

The U.S. projects a diminishing military profile in the Far East. With the withdrawal of all of our personnel from Thailand, we have no other troops in Southeast Asia. In the Western Pacific, including Japan, Okinawa, the Philippines, and South Korea, we have about 100,000 personnel. Additionally, manning the naval forces at sea in that area, we have another 24,000. In the absence of conflict, these forces would appear to be strong enough to support our country's Pacific doctrine.

Japan continues as our most important partner in the Far East. It occupies a unique status. In addition to being our largest foreign trading partner, it also is the largest for Russia and China.

Japan represents a commitment that we could not disown and also represents one of the greatest successes in American postwar foreign policy. Her growing trade with China similarly offers the best hope of bringing China more quickly into an active role in the international community.

Across the Sea of Japan, the quiet of the Korean Peninsula has been marred recently by the insane murders at Panmunjon and there is little likelihood of an early reconciliation between the North and South. Averting a Korean war remains a high priority for the United States in the coming decade. The best way to do this is to continue to maintain a situation in which neither government sees a chance of victory. Yet, there are those who believe that the time has come for the U.S. military to begin to look at ways we can reduce further our forces in Korea which now include only a corps headquarters, one division with supporting troops, air defense forces, and aviation. In our view, such a withdrawal now would be risky. Ongoing modernization of South Korean armed forces will require several more years to put them on a par with the North. Whatever we do needs to be done in close consultation with Japan.

The Communist leadership in Hanoi has continued consolidating its hold on all of Vietnam and will remain preoccupied for a time yet in getting the country reorganized and in some sort of shape to become more self-supporting. However, Hanoi has already started looking outward and will be a factor of growing importance in far-eastern stability.

Now as to the matter of defense. We must define the bounds of our defense requirements. Simply stated, the proposition of "How Much Defense Do We Need" should include at least the following:

We need enough, with our allies, to deter warfare at all levels and to defend our national interests should deterrence fail;

We need enough to maintain U.S. technological superiority over the Soviet Union; and

Above all, we need enough to provide the credible strength upon which further peace negotiations can be pursued.

A recent poll conducted for the non-partisan Potomac Associates by the Gallup organization shows a renewed surge of public concern for the military strength of the United States and for the way our country is viewed by others. The poll showed that the category of "Keeping our military and defense forces strong" got an aggregate score of 81. The same item had been scored at 84 in a pre-Vietnam 1964 poll and had fallen to 74 in 1974. "Maintaining respect for the U.S. in other countries" scored 78 in the recent poll, compared to 81 in 1964 and 73 in 1974.

When we look at how much defense we need—we also have to look at what kind—especially in these days of strategic nuclear equivalency. Without getting bogged down in an unfruitful numbers game, most thoughtful observers agree that given the present strategic nuclear arsenals of the Soviet Union and the United States, the least likely form of conflict for the immediate future would be a major nuclear war. This will continue to be true so long as our nuclear arsenal remains viable, modern and credible. This is one area where our investments in strategic weaponry—although costly—have provided insurance that all can understand and for which most are willing to pay. Of greater concern is the growing list of countries developing a nuclear capability. They especially, have to believe our strategic arsenal is credible as well as the Soviets.

Since 1945, there have been literally hundreds of situations of violence somewhere in the world. The U.S. has been involved in only 7 or 8.

So it is fair to say that we have not gone around the world looking for places we could intervene with our armed forces. The interesting point is that all of these armed conflicts have occurred during a time when we have had an overwhelming nuclear capability—and yet all were fought with conventional weapons. Think too of today's potential trouble spots—Korea, Mideast, Africa, Cyprus, Lebanon, Panama, to name the most obvious. If we were to become involved in any of these, it would certainly be a conventional conflict.

So we have to be especially careful that our conventional forces are capable of supporting adequately our national objectives. This means an Army and Marine Corps adequately manned and equipped to respond affirmatively and effectively to this wide spectrum of potential troubles. This means a modern Navy to transport and support any necessary projection of land forces to distant lands—a Navy that can keep the sea lanes open. This means an Air Force sufficiently strong to provide air supremacy, support for the ground battle and the very rapid movement of men and equipment that would be required.

In today's climate where we quest for quick and easy solutions, there will be those who will advance as new the thought that land forces really aren't all that essential, especially when people costs are up.

A very realistic principle of conflict is that wars are fought for the control of land areas and the people who inhabit them. Although land, sea, and air forces are complementary, Army forces possess capabilities which set them apart. The Army can direct and support full-time and comprehensive control over the land, over its resources, and over its people. In peacetime, this power is the basis of the stability, law, and order essential to a free society. In wartime it is the ultimate decisive act of occupying and securing of those land areas necessary to the achievement of our national objectives. This is particularly true in the limited war situation where there is an overriding requirement on the ground for forces that can occupy and continuously control the people in the contested area. Only Army forces can execute and support a requirement of this type for any period of time.

In its deterrent role, the political impact conveyed by military force is as important as the sheer destructive power it can wield. In the era of nuclear stalemate, the role of the Army has taken on even greater importance. It emerges as the really significant balance of employable power and has profound effect on the military relations between powers.

We have serious shortfalls across the board in our conventional forces—in equipment, munitions, and planes. It will take sizeable defense budgets over a period of years to provide the credible deterrence and backbone our national policy requires. There is no political legerdemain that can soften this fact.

When the discussion gets down to costs, it is especially important that we work from a factual perspective. It is popular on the campaign trail to talk about reordering priorities which to many politicians means taking money from defense for other programs. This is exactly what we have been doing for most of the last 22 years. The Advisory Commission on Intergovernmental Relations has just published a study, "Significant Features of Fiscal Federation—1976 Edition." It contains some interesting realities which will shape the policy choices all levels of government will be making in the next decade.

One table, for example, shows the extraordinary shift from defense to domestic spending in the past 22 years. In 1954, at the end of the Korean War, the federal defense budget was $47.1 billion. The same year $49.9 billion was spent for all domestic programs in the federal, state, and local budgets. So the two were substantially equal. This year, domestic expenditures have risen to seventy-eight percent of the government pie, while defense has shrunk to twenty-two percent. To put it another way, half of the past two decades' rapid growth in domestic spending has been financed by taxes and deficits and half by a shift from defense to civilian programs. So it's obvious that the priority reordering has already taken place and further shifts are not feasible if we are to have a credible defense.

There are those who feel that the military tend to view international events in militaristic terms. Although this increased sensitivity is undoubtedly for the best, as one of our colleagues so aptly put it: "No matter how much we adjust our focus or examine our lenses, we are still confronted with some of the same blindingly apparent conclusions about the world in which we live. Both the history of the Twentieth Century and the daily newspaper contain ample evidence that the international system is now, and will be for the foreseeable future, characterized by conflict and military competition. Our wishes to the contrary, a cold and rational examination of the world in which we live provides eloquent testimony to the fact that the maintenance of military force is still a national necessity and that peace is a consequence of military strength."

We look to the day for example when we may see some change in Soviet goals—when their outward projection of power is abated—but that is not now. As a matter of fact, Soviet military drive is at a higher point now than in the past.

It is not the purpose of this paper to discuss in detail specifically how much is enough for national defense or what the force structure should be to meet minimum U.S. needs. The point is that current strengths and force structure are barely ade-

quate in today's world, provided they are at full strength and fully equipped.

Political planners must recognize this point if U.S. security is to be preserved. The dynamics of the world situation, beyond the control of the politicians or the military leaders is dictating what the U.S. must have militarily if our national interests are to be protected.

It is imperative that our adversaries as well as our friends and allies continue to recognize our country as a viable fulcrum in world power on the side of peace. They must see as we do that the Age of America is not declining. John F. Kennedy enunciated a goal that is worth remembering. What we really want, he said "is a peaceful world, that is fairly safe for diversity."

These are thoughts that we should keep before us as we move forward.

A final quote from the Brookings Institution report, Setting National Priorities:

"Lord Acton spoke of the 'remote and ideal object' that captivates the imagination by its splendor and the reason by its simplicity, and thus evokes an energy that cannot be commanded by lesser and more proximate goals. Our remote and ideal object is to achieve a community of developed nations in which Western Europe, Japan and the United States will arrange their defenses to deter war in the main areas of political confrontation, will harmonize their political policies to lessen the prospect of conflict and proliferation, and will coordinate their economic policies to promote steady noninflationary growth in the industrial world and improve economic opportunities for developing countries. It should be our purpose to see the Soviet Union, the Eastern European countries, and many developing nations eventually drawn into this community's constructive business."

PROPOSED ARMS SALES

Mr. SPARKMAN. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sale shall be sent to the chairman of the Foreign Relations Committee.

In keeping with my intention to see that such information is made available to the full Senate, I ask unanimous consent to have printed in the RECORD at this point the several notifications I received during adjournment.

In addition, I also received a Presidential Determination on military sales to Turkey which also represents a 36(b) Letter of Offer, which I also ask unanimous consent to have printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DEFENSE SECURITY ASSISTANCE AGENCY DEPUTY ASSISTANT SECRETARY (SECURITY ASSISTANCE), OASD/SA

Washington, D.C., Dec. 7, 1976.

In reply refer to: I-9025/76

Hon. JOHN J. SPARKMAN

Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 77-1, concerning the Department of the Army's proposed Letter of Offer to Korea for ammunition estimated to cost $15.6 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

H. M. FISH,
Lieutenant General, USAF.

TRANSMITTAL NO. 77-1

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act.

(i) Prospective Purchaser: Korea.

(ii) Total Estimated Value: $15.6 million.

(iii) Description of Articles or Services Offered: Annual buy of conventional training ammunition ranging from .22 caliber to 155mm.

(iv) Military Department: Army.

(v) Sales Commission, Fee, etc. Paid, Offered or Agreed to be Paid: None.

(vi) Date Report Delivered to Congress: 7 Dec. 1976.

This proposed sale will not have any adverse impact on U.S. readiness or procurement programs. These items will be provided from procurement and production capacity in excess of U.S. Army requirements.

This proposed sale is for major articles and is appropriately handled as an FMS case.

This ammunition will provide ammunition for Korea's annual training requirements.

The purchaser will pay all costs for this proposed sale plus an administrative service charge to handle as an FMS case. This sale will have a positive net effect on U.S. balance of payments.

DEFENSE SECURITY ASSISTANCE AGENCY AND DEPUTY ASSISTANT SECRETARY (SECURITY ASSISTANCE), OASD/ISA

Washington, D.C., December 8, 1976.

In reply refer to:
I-10106/76

Hon. JOHN J. SPARKMAN,

Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmital No. 77-2, concerning the Department of the Army's proposed Letter of Offer to Germany for tank conversion kits estimated to cost $37.7 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

H. M. FISH,
Lieutenant General, USAF.

TRANSMITTAL NO. 77-2

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act.

(i) Prospective Purchaser: Germany.

(ii) Total Estimated Value: $37.7 million.

(iii) Description of Articles or Services Offered: Six-hundred and fifty (650) tank conversion kits to convert 650 German-owned tanks from M-48A2 90mm guns to 105mm guns.

(iv) Military Department: Army.

(v) Sales Commission, Fee, etc. Paid, Offered or Agreed to be Paid: None.

(vi) Date Report Delivered to Congress: 08 Dec. 1976.

DEFENSE SECURITY ASSISTANCE AGENCY AND DEPUTY ASSISTANT SECRETARY (SECURITY ASSISTANCE), OASD/ISA

Washington, D.C., December 8, 1976.

In reply refer to:
I-10107/76

Hon. JOHN J. SPARKMAN,

Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 77-3, concerning the Department of the Army's proposed Letter of Offer to Germany for air defense systems estimated to cost $59.5 million. Shortly after this letter is delivered to your office we plan to notify the news media.

Sincerely,

H. M. FISH,
Lieutenant General, USAF.

TRANSMITTAL NO. 77-3

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act.

(i) Prospective Purchaser: Germany.

(ii) Total Estimated Value: $59.5 million.

(iii) Description of Articles or Services Offered: One (1) Air Defense Control Coordination System, (4 console) AN/TSQ-73, ten (10) Air Defense Control Coordination Systems, (2 console), AN/TSQ-73, repair parts, test equipment, and installation and checking system.

(iv) Military Department: Army.

(v) Sales Commission, Fee, etc. Paid, Offered or Agreed to be Paid: None.

(vi) Date Report Delivered to Congress: December 8, 1976.

DEFENSE SECURITY ASSISTANCE AGENCY AND DEPUTY ASSISTANT SECRETARY (SECURITY ASSISTANCE), OASD/ISA

Washington, D.C., December 8, 1976.

In reply refer to:
I-11072/76

Hon. JOHN J. SPARKMAN,

Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 77-4, concerning the Department of the Navy's proposed Letter of Offer to Germany for SEASPARROW program estimated to cost $13.0 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

H. M. FISH,
Lieutenant General, USAF.

TRANSMITTAL NO. 77-4

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act.

(i) Prospective Purchaser: Germany.

(ii) Total Estimated Value: $13.0 million.

(iii) Description of Articles or Services Offered: Germany is participating in NATO SEASPARROW surface missile system: six (6) launchers, thirteen (13) transmitters and organizational spare parts for SEASPARROW program.

(iv) Military Department: Navy.

(v) Sales Commission, Fee, etc. Paid, Offered or Agreed to be Paid: None.

(vi) Date Report Delivered to Congress: December 8, 1976.

DEFENSE SECURITY ASSISTANCE AGENCY AND DEPUTY ASSISTANT SECRETARY (SECURITY ASSISTANCE), OASD/ISA

Washington, D.C., December 8, 1976.

In reply refer to: I-11206/76

Hon. JOHN J. SPARKMAN,

Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 77-5, concerning the Department of the Air Force's proposed Letter of Offer to Germany for computer systems estimated to cost $45.0 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

H. M. FISH,
Lieutenant General, USAF.

TRANSMITTAL NO. 77–5

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act.

(i) Prospective Purchaser: Germany.

(ii) Total Estimated Value: $45.0 million.

(iii) Description of Articles or Services Offered: Two-hundred ten (210) LRU–1 computer systems for use with the German F–4 aircraft.

(iv) Military Department: Air Force.

(v) Sales Commission, Fee etc. Paid, Offered or Agreed to be Paid: [Deleted.] (e) The information contained in paragraph (v) consist of proprietary data within the meaning of 18 U.S.C. 1905, and accordingly may not be disclosed except pursuant to the provisions of the Code.

(vi) Date Report Delivered to Congress: 08 Dec. 1976.

DEFENSE SECURITY ASSISTANCE AGENCY AND DEPUTY ASSISTANT SECRETARY (SECURITY ASSISTANCE) OASD/ISA,

Washington, D.C., December 17, 1976.

In reply refer to: I–12015/76.

Hon. JOHN J. SPARKMAN,

Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 77–6, concerning the Department of the Navy's proposed Letter of Offer to Germany for torpedoes estimated to cost $26 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

H. M. FISH,
Lieutenant General, USAF.

TRANSMITTAL NO. 77–6

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act.

(i) Prospective Purchaser: Germany.

(ii) Total Estimated Value: $26.0 million.

(iii) Description of Articles or Services Offered: Two-hundred and four (204) MK–46 torpedoes.

(iv) Military Department: Navy.

(v) Sales Commission, Fee, etc. Paid, Offered or Agreed to be Paid: None.

(vi) Date Report Delivered to Congress: December 17, 1976.

This proposed sale will not impact on U.S. readiness or procurement programs. The torpedoes involved in this proposed sale will come from new procurement.

This proposed sale is for a military weapon that is not available through direct negotiations with the contractor.

The acquisition of these weapons will increase Germany's defensive capability.

The purchaser will pay all costs for the torpedoes plus an administrative service charge for handling as an FMS case. This sale will have a positive net effect on the U.S. balance of payments.

THE WHITE HOUSE,

Washington, D.C., November 18, 1976.

Hon. JOHN J. SPARKMAN,

Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: I wish to inform you that I have exercised my authority under Section 620(x) of the Foreign Assistance Act of 1961, as amended, to permit during the fiscal year 1977 the sale to Turkey, and related financing, under the Arms Export Control Act of long lead time items for the forty F–4 aircraft described in my determination of August 27.

This letter also serves as formal notification of proposed letters of offer for the sale in accordance with Section 36(b) of the Arms Export Control Act, as amended. The letters of offer will be issued by the United States Air Force thirty days after your receipt of this letter. At that time, the Department of Defense will issue a guaranty for a loan in the principal amount of $69.6 million, the full amount of the sale.

A copy of my determiation and a copy of the justification for this action are enclosed.

Sincerely,

GERALD R. FORD.

THE WHITE HOUSE,

Washington, D.C., November 19, 1976.

[Presidential Determination No. 77–8]

MEMORANDUM FOR THE SECRETARY OF STATE

Subject: Determination under Section 620 (x) of the Foreign Assistance Act of 1961, as amended, to Permit the Sale of Certain Specified Defense Articles to the Government of Turkey.

Pursuant to the authority vested in me by Section 620(x) of the Foreign Assistance Act of 1961, as amended, (the Act), I hereby:

(a) Determine that purchase by the Government of Turkey of long lead-time items in the amount of $69.6 million for the procurement of 40 F/RF–4E aircraft is necessary to enable Turkey to fulfill her defense responsibilities as a member of the North Atlantic Treaty Organization, and

(b) Suspend the provisions of Section 620 (x) of the Act and of Section 3(c) of the Arms Export Control Act, as amended, for the fiscal year 1977 in order that the aforementioned defense articles may be sold to Turkey and the Turkish procurement of said articles may be financed under the authority of the Arms Export Control Act, as amended, within the limitations specified in Section 620(x) of the Act.

This determination supplements Presidential Determination No. TQ–3 of August 27, 1976 (41 FR 37561), which authorized the sale and financing of the initial long lead-time items for the procurement of the above-described aircraft.

This determination shall be published in the Federal Register.

GERALD R. FORD.

JUSTIFICATION OF PRESIDENTIAL DETERMINATION TO PERMIT FOREIGN MILITARY SALES AND FINANCING FOR TURKEY

Section 620(x) of the Foreign Assistance Act of 1961, as amended, (the FAA) suspended, prior to its amendment by the Arms Export Control Act of 1976, all grant military assistance (MAP), as well as foreign military sales to Turkey. However, the amended Section 620(x) permits the President to suspend the provisions of that section and Section 3(c) of the Arms Export Control Act with respect to cash sales, credits and guaranties under the latter Act. As amended, Section 620(x) permits, during FY 1977, the sale and financing under the Arms Export Control Act of such defense articles and services valued at not to exceed $125 million as the President determines "are necessary to enable Turkey to fulfill her defense responsibilities as a member of the North Atlantic Treaty Organization."

This determination to permit foreign military sales and financing for Turkey is a necessary follow-on to a previous Presidential Determination made on August 27 under the provisions of Section 620(x) of the FAA. That determination permitted Turkey to purchase and to finance under foreign military sales procedures, long lead-time items necessary to the eventual procurement of 40 F/RF–4E aircraft. The present determination allows the production of these same aircraft to proceed on schedule.

The United States Air Force now requires, by November 30, an additional payment by Turkey in the amount of $69.6 million for the purchase of parts and payments to the manufacturer to keep production of the F/RF–4E aircraft on schedule. This is a routine payment which does not accelerate production or increase the number of aircraft.

Turkey is a loyal member of NATO and an enthusiastic participant in the NATO military structure. Because of its strategically important geographic position, Turkey's military forces serve as a barrier to potential Soviet expansion into the Eastern Mediterranean; and Turkey affords a base in the event of conflict with the Warsaw Pact. Virtually all of Turkey's air forces are formally committed to the integrated alliance military structure. However, because of the restrictions on United States military assistance and sales to Turkey, the operational effectiveness of Turkish air forces and the air defense capabilities of the NATO alliance have been seriously impaired.

The purchase by Turkey of new F–RF–4E aircraft was recommended by NATO planning authorities to replace obsolete Turkish aircraft.

Turkey continues to experience a balance of payments deficit and a falling foreign exchange reserve. Turkish ability to purchase required defense articles from domestic resources is seriously reduced. Accordingly, in order that Turkey may make the required payment of $69.6 million toward the purchase of the F/RF–4E aircraft, financing for the payment will be provided under the Arms Export Control Act through the issuance of a loan guaranty. The repayment obligation of this guaranteed loan is within Turkey's financial capacity.

THE AIR FORCE DECISION ON THE B–1—A WISE CHOICE

Mr. GOLDWATER. Mr. President, the key element necessary for nuclear deterrence is a strong, reliable strategic offensive force. We have such a force today in our strategic Triad, a combination of land based intercontinental ballistic missiles, sea based submarine launched ballistic missiles, and strategic bombers. This Triad poses unique problems to any potential aggressor that make it impossible for an enemy to launch a disarming first strike on our forces.

Our bomber forces play an essential role in maintaining our strategic posture with the Triad. They are a highly visible force, and provide a combination of weapon yields and delivery accuracy which make it difficult for a potential enemy to assure protection of even his most valued areas. As you know, currently the backbone of this bomber force is the B–52. It is definitely a very versatile aircraft, but it cannot last forever. A product of early 1950 technology, and designed for high altitude bombing, the last B–52 was completed in 1962. Updates and modifications have extended the capability of the B–52, but continued modification is not cost effective in light of the increasing Soviet threat projected for the 1980's and the inherent difficulties arising from the basic aircraft's size, shape, and performance characteristics.

Realizing the need to respond to potential future changes in the threat environment, the Air Force began studies in the early 1960's on the required capabilities for a new bomber. The B–1 is the result of those studies and over 6 years of design and test—including the most extensive production test program for any military aircraft. Let me just list some of

the key accomplishments of this test program:

Over 23,000 wind tunnel test hours, using 17 different wind tunnels;

More than 680 structural component tests, including major section static tests to 150 percent of design load and fatigue tests to more than two lifetimes.

Over 13,000 operating hours of engine testing, including over 1,650 flight hours. Engine Product Verification, that is testing the production design against specific operating conditions, has been successfully completed.

Over 400 hours of flight testing, including over 150 hours of flight testing of the offensive avionics in the third B–1 aircraft have been completed.

The test program was structured to demonstrate the critical items of B–1 performance. The primary mission of the B–1 involves high speed-low level penetration. The B–1 has flown at .85 Mach at 200 feet, not once, but several times. The B–1 is fully compatible with the existing KC–135 tanker fleet. Aerial refuelings with KC–135 are a common occurrence on test missions. The B–1 has conducted weapons separation tests using the Short Range Attack Missile—SRAM—presently carried by our B–52's, and the Mark 82 conventional bomb. All of these tests have shown that the B–1 can perform its designed mission.

Since 1973, the B–1 program has been structured for production contract award in November 1976, with certain goals established for that point in time. Many of these goals I have already mentioned, such as the demonstrated low level performance. Each of these goals has been met. The entire program was extensively reviewed by the staff of the Secretary of Defense in preparation for the production contract award decision. In addition, Secretary of the Air Force Reed chartered two independent groups of recognized experts to review the B–1. One group examined the need for the B–1, comparing it with a variety of alternatives including modifying existing B–52's and a standoff cruise missile launch aircraft. This group determined that the B–1 was the most cost effective alternative to provide a strategic bomber into the 1990's.

The second independent group examined the technical accomplishments of the B–1 program. This group concluded that the Department of Defense could make a production decision with confidence from a technical point of view.

As I noted earlier, the B–1 production decision was scheduled for late 1976 since 1973. Starting a production program of the size of this one is a very complex process, involving detailed planning, coordination of prime and subcontractor efforts, hiring of people, and so on. The Congress provided funds in fiscal year 1976 and the transition quarter to smooth the change from development to production and we provided funds in fiscal year 1977 to begin production, although the amount the Air Force can spend until the first of February next year is controlled. This decision on the part of the Department of Defense to begin expenditure of these fiscal year 1977 funds was made because its time had come.

The testing has been accomplished and reviewed, the contractor planning has been done, the contracts were negotiated, and the military need was apparent. Secretary Reed has noted that a delay until February 1, 1977, could add up to $500 million to the cost of the B–1 program—certainly an unnecessary cost increase, and one appropriately avoided.

The strategic bomber force of the United States requires modernization to cope with the increasing Soviet threat and to maintain strategic force sufficiency in the 1980's and beyond. The B–1 was designed to provide this needed modernization and has been shown to be the most cost effective alternative for this role.

CONTROLLING THE SPREAD OF NUCLEAR WEAPONS: SOME HOPEFUL SIGNS

Mr. CRANSTON. Mr. President, one of the most important matters we must deal with in this Congress is nuclear proliferation. Over the past several weeks there have been some hopeful signs that the industrial nations of the world are finally awakening to the danger of the rapid spread of nuclear weapons that is inherent in their peaceful nuclear export programs.

Following on the heels of strong statements by President-elect Carter and President Ford on the need to curb the spread of sensitive nuclear equipment and material, the French, West Germans, Russians, and the Canadians each have announced new policies that hold the first real promise of effective proliferation control.

The new U.S. policy, announced on October 28 by President Ford after considerable prodding by Mr. Carter, takes a go-slow approach to the reprocessing of plutonium from the spent fuel of power reactors and urges other supplier countries to forego exporting reprocessing plants for at least 3 years.

Plutonium, once separated from spent fuel, is atom bomb material, of which only about 10 pounds is needed to produce the equivalent of the weapon that destroyed Nagasaki. By the end of the century, spent fuel from the world's reactors will contain enough plutonium for 10 million bombs, and two-thirds of it will be located outside the United States. It is clear, therefore, why the new U.S. policy also calls for the storage of spent fuel in international depositories outside the reach of individual nations, as well as for a delay in the separation and recycling of plutonium as reactor fuel until the proliferation danger can be fully considered.

On December 16, the French responded to apparent U.S. pressure by announcing that as a matter of policy they will not enter into any new agreements to export reprocessing plants. However, France refused to renege on a commitment to sell such a plant to Pakistan, although a high French official is quoted as stating privately that "France would now be only too happy if the Pakistanis decided to call the deal off." A Pakistani cancellation now seems likely, but under the dubious incentive of a U.S. offer to sell Pakistan 100 A–7 fighter-bombers.

I ask unanimous consent that two articles describing the French policy decision, "French Consider Nuclear Shift," from the Washington Post of December 16, and "Paris Will Embargo Atomic-Fuel Plants," from the New York Times of December 17, be printed in the RECORD at the end of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

[See exhibit 1.]

Mr. CRANSTON. Mr. President, less than a week after the French announcement, West Germany followed suit with a statement by the Foreign Ministry barring future exports of nuclear technology that can be used for weapons production. But also following the French example, the Germans refused to cancel a contract to export plutonium reprocessing and uranuim enrichment plants to Brazil. It has been reported, however, that Chancellor Schmidt is trying to find a graceful way for Brazil to cancel at least the reprocessing plant. The United States is understood to be pressuring Brazil as well, and I hope very much that we will be successful.

I ask unanimous consent that an article describing the German decision, "Bonn Indicates It Will Curtail Nuclear Exports," from the Washington Post of December 21, be printed in the RECORD at the conclusion of my remarks, as well as a December 23 Washington Post editorial, "Action Against Nuclear Spread."

The PRESIDING OFFICER. Without objection, it is so ordered.

[See exhibit 2.]

Mr. CRANSTON. Mr. President, the most stringent nuclear-export controls of all were announced December 22 by the Canadian Government. Canada announced that, effective immediately, it would not export any nuclear equipment or material to any nation that has not ratified the Nuclear Non-Proliferation Treaty—NPT—or alternatively has agreed to place all of its commercial nuclear activities under safeguards of the International Atomic Energy Agency—IAEA. Canada said it went ahead with this policy on its own after it became clear that other suppliers would not agree to adopt it as a common policy at the suppliers conference in London.

I ask unanimous consent that an article describing the Canadian action, "Canadians Tighten Atom Export Curbs," from the New York Times of December 23, be printed in the RECORD at the end of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

[See exhibit 3.]

Mr. CRANSTON. Mr. President, the Canadian policy should be adopted by the United States and the other suppliers because it would bar any nation from utilizing peaceful nuclear assistance in unsafeguarded facilities to make nuclear weapons. The Canadian policy includes a commitment to cut off nuclear assistance to any nonnuclear weapons state that sets off a nuclear explosion—a step Canada took regarding India after India's nuclear test of 1974. Regrettably, the United States did not follow suit

even though India used our heavy water as well as a Canadian reactor in producing the plutonium for its explosion.

President-elect Carter, soon after he takes office, would be wise to consult with the Canadians and the other suppliers in an effort to establish a common policy that follows the Canadian guidelines. But the United States should be prepared to adopt such a strict policy unilaterally, if necessary.

There may be an opportunity to reach a strong suppliers agreement in light of a recent proposal by the Soviet Union at the suppliers conference. The Russians proposed that all nuclear exports be conditioned on an agreement by customer countries to place all of their nuclear activities under IAEA safeguards. Unfortunately, the Russians have undermined their own policy initiative by agreeing to export heavy water to India, which operates unsafeguarded nuclear facilities, following a Canadian cutoff of heavy water prompted by the Indian nuclear test. Hopefully, the United States and Canada can persuade the Soviet Union to delay the heavy-water export in an effort to win greater cooperation from the Indians.

I ask unanimous consent that two articles dealing with the Soviet actions, "Soviet Arms Limit Bid Rebuffed," from the London Observer of November 21, and "Soviets Agree to Sell India Heavy Water for Reactors," from the Washington Post of December 8, be printed in the RECORD at the close of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

[See exhibit 4.]

Mr. CRANSTON. Mr. President, some of these latest developments provide hopeful signs that stricter controls will be placed on worldwide nuclear development. But much remains to be done, particularly with respect to spent fuel and the plutonium it contains. I believe our new President will move quickly and forcefully in this critical area.

(EXHIBIT 1)

FRENCH CONSIDER NUCLEAR SHIFT—MAY CANCEL PAKISTAN, IRAQ SALES

(By Jim Hoagland)

PARIS, DEC. 15.—French plans to sell controversial nuclear technology to Pakistan and Iraq are being reconsidered and are likely to be cancelled, informed French sources said today.

President Valery Giscard d'Estaing, who is reportedly impressed by the tough stand taken on nuclear proliferation by President-elect Jimmy Carter during the election campaign, is also weighing a total ban on the export of nuclear reprocessing facilities, according to the sources.

This would represent a major shift in French policy and would remove one of the few remaining points of friction between Paris and Washington. Strong diplomatic efforts by the Ford administration on the nuclear issue have played a role in the shift that is in the making here, the sources indicated.

In a related development, reports reaching here from Tripoli, Libya, say that President Muammar Qaddafi won Soviet agreement to supply Libya with a nuclear electricity generating plant and other "technical cooperation" during his visit this month to Moscow.

France agreed in March to sell Libya a 600-megawatt nuclear reactor. It was not immediately clear if the reported Libyan deal with the Soviets, who have replaced France as Quaddafi's main source of weapons for the extensive military buildup he is undertaking, will replace or supplement the French reactor.

Despite Qaddafi's volatile and belligerent temperament, diplomatic sources expressed no immediate concern about the reported agreement. Electricity generating reactors are not considered to be dangerous technology, and the sources pointed out that the Soviet Union has tightly controlled its nuclear knowhow in the past.

[Libya suddenly ratified the Non-Proliferation Treaty in May, 1975, shortly before the Soviets agreed to sell nuclear equipment to that country, U.S. sources in Washington said. Libya's adherence to the treaty as well as conditions of sale believed imposed by the Soviet Union will require that virtually all Libyan nuclear facilities be open to international inspection, officials said. Under the treaty, Libya is also required to foreswear any weapons development.]

The Soviets recently agreed to supply India with 200 tons, or about a six-year supply, of heavy water for its nuclear power program. The agreement was made after the United States and Canada refused to supply the heavy water because India would not provide assurances that it would not explode a second atomic bomb. Conditions of the Indian-Soviet agreement are not known, but U.S. experts said they believed India agreed not to divert from the plant to be supplied with Soviet heavy French water any plutonium for weapons usage.

The shift on nuclear exports is also in part entangled in domestic politics. The Iraqi, Libyan and Pakistani agreements were all made by former Prime Minister Jacques Chirac, who quit in an angry dispute with President Giscard last August, Chirac has now taken charge of the Gaullist party and is a potential political rival to the president.

There are increasing indications in the French press and diplomatic circles that the presidential staff is blaming Chirac for being too hasty in making atomic agreements for commercial gain, and suggesting that Giscard has developed a new sensitivity to the dangers of such exports since becoming personally involved.

France agreed earlier this year to sell Pakistan a nuclear reactor and a reprocessing plant, which extracts from spent fuel plutonium, the raw material for an atomic bomb. The deal is worth $550 million to French industry.

Now Pakistan, which was told by the Ford administration that it faced a statutory cutoff in American military and economic aid if it went ahead with the deal, is reportedly close to cancelling the contract.

French officials say they are prepared to honor the contract for the reprocessing plant. They also leave the impression that they would be satisfied if Pakistan called off the deal. Giscard then would not have to back down in public from the strong stand Chirac took for the government last August when he vowed the deal would go forward despite American objections.

Sources here indicate that Pakistan has decided that it would not be able to use the reprocessing plant to build an atomic weapon, and that it would be uneconomic to use it for peaceful purposes. They did not elaborate.

Iraq had asked France to supply it with 900-megawatt nuclear reactor and research laboratory, French sources said. A review of the research laboratory plans, which would have resembled Osiris-type research reactor already supplied by the Soviet Union to Iraq, has raised concern here because of the type of uranium the Iraqis propose to use, the sources indicated.

France is negotiating a much more lucrative sale of two 925-megawatt nuclear reactors to Iran, which came to the brink of war with Iraq in 1975 and which still distrusts that Arab neighboring state. Iranian opposition to the sale to Iraq would also probably cool French enthusiasm.

The proposed ban on the export of reprocessing facilities will be discussed Thursday at a meeting of Giscard's nuclear review council, formed after the dispute between Secretary of State Henry A. Kissinger and Chirac over the Pakistan deal.

A key factor in a decision to end reprocessing exports is expected to be the willingness of other nuclear exporters to forgo such sales. West Germany has signed a contract to sell a reprocessing plant to Brazil and has shown no signs so far of changing policy.

PARIS WILL EMBARGO ATOMIC-FUEL PLANTS

(By Clyde H. Farnsworth)

PARIS, December 16.—The French Government announced today that it would ban further exports of nuclear fuel-reprocessing plants, which have the potential to produce plutonium for use in weapons.

"Faithful to its peaceful and humanitarian traditions, France, does not intend to contribute to the terrible threat of nuclear arms proliferation," said the Government's Nuclear Export Council, which is headed by President Valéry Giscard d'Estaing.

It was established in September in a policy shift that signaled greater willingness to cooperate with other exporters of nuclear technology in checking the weapons spread.

France had been criticized, mainly by the United States and Canada, for signaling a contract last spring with Pakistan for a reprocessing plant. Although that arrangement was not canceled by today's decision, the chances that France will actually provide the facility were viewed as much reduced.

GESTURE TO JIMMY CARTER SEEN

A Presidential spokesman, Jean-Pierre Lecat, said "signed contracts remain signed," but another high official added privately, "France would now be only too happy if the Pakistanis decided to call the deal off."

While the French decision to sign no more contracts for fuel-processing plants followed pressure from the Ford Administration, it was also seen as a gesture to Jimmy Carter.

During the election campaign, Mr. Carter had urged increased international efforts to check the spread of nuclear weapons, and he recently said at a news conference in Plains, Ga.:

"My hope is that the sale of plutonium processing plants by both France and West Germany might be abrogated. I think there's a good chance this might be successful."

He added that attempts would be pursued "through normal diplomatic channels and normal diplomatic persuasion."

West Germany has been criticized for a contract signed with Brazil to build an entire nuclear industry, including reprocessing and enrichment plants. France was to deliver a reprocessing plant to South Korea, but after American pressure, the South Koreans said a year ago that the contract had been postponed.

Today's decision in France appears to make West Germany more vulnerable to strictures about ignoring the dangers of a nuclear spread. At a moment of increasing commercial competition and threats to jobs because of faltering economic recovery, both European nations face internal problems in renouncing nuclear contracts that mean profits and employment.

The French action does not affect the sale of nuclear power plants, which both France and West Germany have been selling throughout the world.

France tended to ignore the censure of nonaligned countries last summer for making agreements with South Africa for the delivery of arms and nuclear power stations.

POWER-PLANT EXPORTS TO CONTINUE

Today's statement said France would continue to export power stations and it promised that France would guarantee the delivery of nuclear fuel supplies. This would make it unnecessary for purchasers to obtain their own reprocessing plants from which nuclear weapons can be made.

The communiqué also said the French Government was prepared to discuss with other nuclear exporters, as well as with purchaser nations, most of which now are in the third world, ways to avoid stimulating the spread of weapons through commercial competition.

Two years ago, France became one of the founding members of the nuclear supplier conference, a group that has met periodically in London to try to establish rules to arrest the weapons spread. The group was organized after India had exploded a nuclear device manufactured with equipment and materials supplied for peaceful purposes by Canada and the United States.

The supplier conference, which has been boycotted only by China among the nuclear technology nations, is made up of the United States, the Soviet Union, Britain, France, Canada, West Germany, Japan, Sweden, Belgium, the Netherlands, Italy, East Germany and most recently Czechoslovakia and Poland. Switzerland has sent observers to the meetings.

While France has joined the work of the conference, it refuses, as does China, to sign a 1968 treaty that is designed to prevent the spread of nuclear weapons.

A French nuclear official, commenting on future prospects, said the outlook was for some kind of international control of fuel-reprocessing facilities and stocks of plutonium, but only after long and probably difficult negotiations.

(EXHIBIT 2)

BONN INDICATES IT WILL CURTAIL NUCLEAR EXPORTS

(By Michael Getler)

BONN, WEST GERMANY, Dec. 20—The West German Foreign Ministry indicated today that in the future West Germany would refrain from exporting nuclear technology that could possibly be used in the production of nuclear weapons.

The apparent West German decision, which follows a similar step by France last week, does not affect Bonn's existing contract with Brazil, the Foreign Ministry's press spokesman said.

It is the contract with Brazil that is extremely controversial, however, because it includes a complete cycle of nuclear technology, including reprocessing of nuclear wastes. It is this technique that can produce plutonium, a necessary ingredient in nuclear weapons.

Foreign Ministry spokesman Klaus Terfloth's remarks suggested that West Germany, with the exception of the Brazilian deal, would go along in the future with the position taken by France to halt the export of technology that could allow purchasers to build nuclear weapons.

Both France and West Germany had been under heavy pressure from President Ford and President-elect Jimmy Carter to cancel their controversial agreements with Pakistan and Brazil, respectively.

France announced last week that it would ban the sale of nuclear reprocessing plants in the future, although a spokesman for President Valery Giscard d'Estaing said "signed contracts remain signed" and that the deal with Pakistan involving a reprocessing plant is still on.

Terfloth said that the French position corresponds to recent discussions in London among countries that export nuclear technology, adding that West Germany is a member of the nuclear export group. Participants in the London talks include the United States, the Soviet Union, Britain, Canada, Japan, France, and West Germany.

Terfloth said that France has now announced officially what has been the policy of members of this club for some time. Results of these discussions are "already reflected in our policy," he said.

The ministry spokesman's comments were made in response to reporters' questions, and while they appeared to signal a shift in West German policy after the Brazilian deal, it was not clear whether Bonn would adhere to such restraints in all future cases.

There has been no formal West German policy statement on the subject.

West Germany is a country that is highly dependent on exports for its economic vitality, with about 25 per cent of its gross national product involving export trade. The prospective sale to Brazil of $4 billion in nuclear power plants and technology is the country's largest single export deal ever.

The West German government has become increasingly concerned, however, about pressure that it expects from the United States under the new Carter administration on nuclear exports.

There was a widespread view in Bonn this week that pressure would increase substantially in the aftermath of the French decision.

ACTION AGAINST NUCLEAR SPREAD

International concern over the spread of nuclear weapons seems to be, well, spreading. The other day France announced a formal nuclear-export policy designed to prevent the sale of technology that would allow a buyer, if tempted, to move on from producing power to making a bomb. And on Monday West Germany indicated—granted, in an elliptical manner that requires clarification—that it was weighing a similar policy. The significance of these steps lies in the fact that, among nuclear suppliers, France and Germany are the two governments under the heaviest commercial pressure to sell those components of the nuclear-fuel cycle that would permit the building of nuclear weapons. Other would-be suppliers, including the United States, have their commercial impulses under tighter control.

There is, however, a hitch. So far France has refused to cancel the sale of a reprocessing plant to Pakistan, and Germany stands on its determination to sell a multi-billion-dollar soup-to-nuts nuclear industry to Brazil. As suppliers, they take the view that they don't wish to deprive friendly Third World states of the technology that the latter feel is essential to their development.

But not all is bleak. Pakistan wants to buy 110 American A–7 light bombers in a three-quarter-billion-dollars deal that would be financed by Saudi Arabia. The American position is that, if Pakistan bought the French reprocessing plant, it could not expect to acquire the A–7s. The plane deal has its own liabilities in terms of its effect on the balance of conventional forces in the Asian subcontinent. As it happens, Jimmy Carter has spoken out forcefully against large conventional-arms sales as well as against nuclear-technology sales that could encourage proliferation. It would help a great deal if France were to apply to Pakistan the nuclear-export considerations it intends to apply to others. France promises to guarantee a reliable fuel supply so that a buyer of its reactors will not feel compelled to acquire its own reprocessing or enrichment facilities. These last are what is subject to abuse.

Brazil has signed contracts with Germany for a multi-billion-dollar package including uranium mining, eight reactors, a pilot enrichment plant and reprocessing facilities. The Brazilians regard themselves as destined to be the world's next great power, and they do not take kindly to suggestions that they practice nuclear restraint. We would not assume, nonetheless, that they cannot envisage alternative ways of demonstrating their capacity for world leadership, especially if their legitimate energy requirements were met by means that did not involve the proliferation risks involved in enrichment and reprocessing facilities. With a new administration coming to power in Washington, Brazil might well respond to an invitation to join in a nuclear-policy review.

(EXHIBIT 3)

CANADIANS TIGHTEN ATOM EXPORT CURBS

(By Robert Trumbull)

OTTAWA, Dec. 22.—The Canadian Government today tightened its already tough restrictions on supplying nuclear reactors and fuel to other countries to prevent the use of such items in weapons development.

The new rules were described by Foreign Minister Donald C. Jamieson as "the most stringent conditions in the world" for nuclear exchanges. They will deny Canadian nuclear technology to countries that refuse to sign the treaty to halt nuclear proliferation unless, Mr. Jamieson said, they "otherwise accept international safeguards on their entire nuclear programs."

Previous restrictions, announced a year ago, demanded safeguards only on items supplied by Canada, leaving the receiving countries free to experiment with weapons technology using material obtained from other sources.

"Under the new policy," Mr. Jamieson explained at a news conference, "the totality of a nuclear effort is covered." In other words, Canada will withhold nuclear supplies from any country that moves toward a weapons capability with machines or material obtained from any nation, or even from its own resources.

The ban will apply automatically when a nuclear device is exploded by any country that does not already possess nuclear weapons, Mr. Jamieson declared.

The Foreign Minister said that Canada would attempt to persuade other countries producing nuclear materials to join in a collective treaty containing the same restrictions. He said that he had communicated the new Canadian program to the top foreign policy aides of other nuclear-exporting countries, including Secretary of State Henry A. Kissinger.

"We are charting a course which we hope will serve as a compelling example to other nuclear suppliers," he said in a statement announcing the step in the House of Commons. At his news conference, Mr. Jamieson said that Canada had decided to impose the new conditions alone when it became clear that there was little likelihood of a general agreement this year.

(EXHIBIT 4)

SOVIET ARMS LIMIT BID REBUFFED

(Nigel Hawkes and David Martin)

A move by the Soviet Union to strengthen the safeguards under which nuclear technology is bought and sold on the international market has apparently been rebuffed by other members of the "London Club" of nuclear-exporting countries.

The proposal was presented to the meeting of the club in London earlier this month but won unconditional support from only one other participant, Canada.

The other nuclear exporting countries, including Britain, are believed not to have argued against the Soviet proposal but to have

suggested that discussion of it be deferred until next March.

The Soviet proposal would have extended the "guidelines" under which members of the club agree to sell nuclear technology. States which do not already have nuclear weapons would in future receive nuclear supplies from members of the club only if they accept the safeguards of the International Atomic Energy Agency, based in Vienna, on all their peaceful nuclear activities.

Implementation of the Soviet proposal would mean that by accepting a single item on the London clubs "trigger list" of critically important nuclear materials and devices, a recipient country would then be obliged to open all its installments to international inspection.

The proposal is important, because it is known to have the support of Dr. Sigyard Eklund, Director-General of the IAEA, and is believed by experts to be the most powerful weapon the nuclear exporting countries could employ against proliferation.

At the club's recent meeting, the United States is believed to have supported the Soviet proposal in principle, but to have deferred a decision on it for the next meeting in March, on the grounds that a new Administration under President Carter will by then have taken office. Britain is said to have argued for a more cautious, step-by-step approach, and other countries, including France, Japan and West Germany, expressed various reservations.

The secrecy of the London Club, which began as the "Group of 7" in the summer of 1975, is gradually beginning to crumble. The initial meetings, attended by the seven original members (UK, USA, USSR, France, West Germany, Japan and Canada) have now expanded to include Belgium, Czechoslovakia, East Germany, Holland, Poland, Italy and Sweden. At the most recent meeting, Switzerland was present as an observer.

A document obtained by the Observer last week lists the guidelines under which the club operates, and the "trigger list" of sensitive materials covered by the agreement.

The guidelines cover five major points. First, they insist that items on the trigger list can be transferred to non-nuclear-weapon States only "upon formal governmental assurances from recipients explicitly excluding uses which would result in any nuclear explosive device." This rules out both bombs and the so-called "peaceful nuclear explosions" (PNEs).

Secondly, the guidelines insist that nuclear materials must be "placed under effective physical protection to prevent unauthorised use and handling." This is intended to prevent sabotage or theft of nuclear materials by terrorist groups.

Thirdly, the guidelines cover the transfer of technology, including reprocessing, enrichment, and heavy-water production—all techniques useful in the production of nuclear weapons. A special control is imposed on enrichment technology; the recipient nation is obliged to agree that the technology will not be used to design plants capable of enriching uranium sufficiently to manufacture a bomb. A limit of 20 per cent enrichment—ample for nuclear reactors, but not enriched enough for bombs—is laid down in the guidelines.

Finally, the guidelines prohibit the retransfer of nuclear materials to third parties, a rule intended to prevent recipient countries from passing on their knowledge to other non-nuclear States. Such retransfer cannot be carried out without the approval of the original supplier.

The 'trigger list' of the London club, also in the hands of The Observer, is intended to be a comprehensive list of all materials which could be used for the production of bombs. It includes nuclear reactors capable of producing more than 100 grams of plutonium a year, reactor pressure vessels, reactor fuel charging and discharging machines, reactor control rods, pressure tubes and primary coolant pumps. Somewhat surprisingly, it also includes zirconium tubes, which can be used as fuel cladding in reactors.

Under enrichment, the trigger list includes every technology so far devised for enriching uranium—gas diffusion, gas centrifuge, the jet nozzle and the vortex type.

Although agreement has been reached on the guidelines and the trigger list, there are signs that some of the newer members of the club are unhappy about the way decisions are made. At this month's meeting, there was criticism of the dominance of the nuclear weapon States in the club, and the super-Powers were warned to take more notice of the interests of the non-weapon States. In particular, American attempts to alter or prevent contracts between France and Pakistan and West Germany and Brazil met with resentment.

SOVIETS AGREE TO SELL INDIA HEAVY WATER FOR REACTORS

(By Don Oberdorfer)

The Soviet Union has agreed to sell 200 tons of heavy water for use in India's nuclear program following Canada's refusal on nonproliferation grounds to supply the material.

The decision, which became known when India reported the transaction to the International Atomic Energy Agency, is a rare case of Soviet willingness to supply sensitive nuclear materials to a country with a nuclear bomb-making capability. As such it is causing concern among some U.S. officials and senior members of President-elect Jimmy Carter's incoming team.

Soviet cooperation is vital to the plans for international action to curb the spread of nuclear weapons, and until now the Russians have been more cautious than the United States and other Western countries in their nuclear exports.

In a meeting last month of the semi-secret "London club" of nuclear exporting nations, the Soviets proposed to tighten controls in an important way on atomic sales to nonweapons states. Several European countries are reported to have reservations about the far-reaching Soviet proposal. The United States asked that a decision be put off until the next supplier country meeting, which will take place after the Carter administration comes to power Jan. 20.

The decision to sell the heavy water to India appears to some experts to be inconsistent with the generally tough Soviet stand. These experts suggest that in this case, Russia placed a higher value on its bilateral relations with a friendly country than on its nonproliferation objectives.

Soviet officials have indicated that the heavy water is intended for use in the Canadian-supplied Rajasthan Atomic Power Plant II (RAPP II), and that international inspection and safeguards will be required as well as a pledge from India that the material will not be used to make atomic weapons. In view of this, some U.S. experts believe the Soviet sale to India—while it is unusual—does not contradict Russia's nonproliferation stand.

Heavy water, a substance rarely found in nature, is necessary to control nuclear reactions in certain types of atomic reactors. U.S. heavy water, sold directly to India in 1955 and supplied later in other shipments through Canada, is believed to have been used by India in producing the material for its May, 1974, nuclear explosion.

India now produces a small amount of heavy water in its own plants, but not enough to fuel a major installation such as the Rajasthan power reactor. The 200 metric tons to be sold by Russia is believed to be just about enough to "load" and resupply the RAPP II reactor, which will provide power to a large area of northwest India near the border with Pakistan.

Canada halted its nuclear sales to and other cooperation with India after the 1974 explosion. It made the cutoff permanent this May after two years of unsuccessful negotiations on antibomb assurances. Among other things, Canada wanted India to place all its nuclear facilities—including those which had been used to make the explosive device—under international inspection by the IAEA. This India refused to do.

The Soviet proposal at last month's London meeting would require a nonweapons state to open all its atomic facilities to international safeguards as a condition of purchases from the nuclear supplier states. According to State Department officials, the United States favors such a plan in principle if other countries agree to abide by it.

At present, Israel and South Africa as well as India operate some nuclear facilities which are outside international safeguards. However, all three countries are on the U.S. government's approved list for continued nuclear cooperation.

The license for a U.S. shipment of enriched uranium fuel to India is being held up by the Nuclear Regulatory Commission pending the outcome of U.S.-Indian discussions on India's return to the United States of irradiated reactor material which could be used to make atomic weapons. U.S. officials said that while the Indians have shown a cooperative attitude, the two sides are far apart on financial and logistical arrangements.

During his campaign for the presidency, Carter placed heavy stress on stronger action to stop the spread of nuclear weapons. In a Sept. 25 speech, he declared he would make no new commitments for the sale of nuclear technology or fuel to countries which refuse to place their nuclear facilities under IAEA safeguards.

Carter also stressed the need to negotiate with the Soviet Union and other nuclear powers on nonproliferation and disarmament issues.

EVERETT McKINLEY DIRKSEN

Mr. BAKER. Mr. President, Everett McKinley Dirksen, late a Senator of Illinois, was born on January 4, 81 years ago today. Senator Dirksen was a distinguished Republican leader of the Senate as well as a great son of Illinois. I knew him long and well, and time has not diminished my respect and affection for him.

Mrs. Dirksen recently sent me a column by Larry Leonard which seems to capture much of the sense of the Dirksen aura, and I ask unanimous consent that it may be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

EV DIRKSEN SAW WHERE PEKIN WAS

(By Larry Leonard)

He came from Pekin, which tells you quite a bit if you understand where Pekin is.

Most say it's 10 miles south of Peoria, but then Peoria is one of Illinois' largest cities so it's understandable that many would have that point of view. However, Sen. Everett McKinley Dirksen always thought of it as being north of New Salem . . . and for our purposes that's the viewpoint that counts.

Remember Dirksen, the senator from Illinois who used to speak about marigolds and the need for prayers in public schools and other issues outside the main stream

of political concern? He was an orator of the classical school, won a Grammy award for a record titled "Gallant Men" and people used to be more impressed with the way he said something than what he said.

A conservative, he initially supported Robert Taft for President, always was against closed union shop and wasted a lot of effort trying to legislate away several Supreme Court decisions. But then, he came from a small river town, his father named all the sons after great Republicans and so what do you expect?

You don't expect his lifetime voting record to read like it does. For example, which Republican senate leader was instrumental in passage of President Kennedy's Nuclear Test Ban Treaty? Who was the guiding hand for much of President Johnson's Great Society legislation? Same answer as the first. And try this for a parlay. Whose influence insured passage of the 1964 Civil Rights Act, 1965 Voting Rights Act and 1968 Open Housing Act? Right again.

So how does all this fit together? Was he just another politician who seized any opportunity that came along? He once said, "America has a dynamic economy and sometimes you have to change your position." How does that sound for being inconsistent?

Well, consider that business of where he came from. Abraham Lincoln was a very real factor in the boyhood of young Dirksen. Everett McKinley was born in Pekin just before the turn of the century to very frugal, hard-working German immigrant parents.

He grew up in a world of very good guys and very bad guys and, in spite of any pictures you might have seen, Ev always knew that Lincoln wore a white hat. And he knew that young Lincoln had grown up just down the road a ways. He knew that Lincoln the lawyer had practiced in Pekin, that as a state representative he had represented Tazewell County and as a candidate he had come to Pekin to gain his party's nomination for congress.

Pekin of the early 1900s was a town that personally remembered Lincoln. And it was Lincoln the emancipator, the storyteller, the martyr.

Mrs. Dirksen's son never was much interested in being a martyr. But he did pretty well at telling stories. He understood the value of using a story to make a point and, in his prime, there were few better.

He believed his career might run parallel to his predecessor and even imagined that his family had been much poorer than it was. He wanted to be president. He made his bid in 1943. His party chose Gov. Thomas Dewey but the nation never forgot Dirksen from Illinois. He was a national figure from then on.

But an emancipator in the 1960s? That's a little strong, isn't it? OK, but we're talking about a man who saw his home town, which was a river city where the boats unloaded cargo and crew, and the miners came on Saturday night as "Sweet Auburn, loveliest village of the plain."

And while there unquestionably were many reasons for his decisions, the fact that he lived north of New Salem certainly was one of them.

HABRE-DE-VENTURE LOST IN TRAGIC FIRE

Mr. MATHIAS. Mr. President, on New Year's Day one of the architectural glories of Colonial Maryland—Habre-de-Venture—was virtually destroyed by fire.

Habre-de-Venture's owner, Mrs. Peter Vischer, and the estate's caretaker, Mr. Alfred Lemko, both were severely burned in the fire but, mercifully, they have survived and will recover. The tragedy of the loss of this unique example of Maryland tidewater architecture is, of course, tempered by the knowledge that there was no concurrent loss of human life. But the destruction of this historic house leaves Maryland and the Nation incalculably poorer.

Habre-de-Venture was built in 1771 by Thomas Stone, one of the four Marylanders who signed the Declaration of Independence. When Stone built Habre-de-Venture on an inland farm near Port Tobacco in Charles County, he incorporated a earlier brick structure which was already standing on the farm. It was this structure, built in 1742, and the central section of the house which were destroyed. The two wings which gave the house its unique crescent shape still stand, only slightly damaged.

I first saw Habre-de-Venture some 30 years ago and I saw it last on the Fourth of July when I visited the grave of Thomas Stone as part of a bicentennial pilgrimage to lay wreaths on the graves of all of the Maryland signers of the Declaration of Independence.

Habre-de-Venture was even more beautiful on that last visit than it had been on the first.

Over the years Habre-de-Venture had been meticulously restored and maintained by its owners. In addition, Helen and Peter Vischer had replanted the gardens and so refurbished the grounds that they had come to rival even the house itself. Habre-de-Venture was magnificent in every respect.

The celebration of our bicentennial has quickened us to the richness of our past and to its importance in our understanding of ourselves as a Nation. We have learned that it is at least in part through the dusty pages of old manuscripts and through the doors and designs of our historic houses, that we can reconstruct and reclaim our past and the ideals that ennobled the founding of our Nation. In losing Habre-de-Venture, we have lost a particularly lovely chapter of that past.

With the hope that Habre-de-Venture will rise from its ashes, I ask unanimous consent that the description of it contained in The National Survey of Historic Sites and Buildings be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

HABRE-DE-VENTURE, MARYLAND

Location: Charles County, on the west side of Rose Hill Road, which connects Md. 6 and Md. 225, about 1 mile north of Port Tobacco.

In 1771 Thomas Stone built this plantation house near the busy riverport town of Port Tobacco, Md. He lived in it during his most politically active years, and on his death in 1787 was buried in the adjacent family graveyard.

A Georgian structure of brick and frame, Habre-de-Venture consists of five parts: a central house connected to two wings by two covered passageways, or "hyphens." The hyphens and wings extend southward to form a semicircle. The main building is a 1½-story structure over an elevated basement. It has a dormered gambrel roof flanked by external end chimneys. The brick walls are laid in Flemish bond with glazed headers. Center doors and full-length, one-story porches are located at the front and rear of the house.

A center hall, with stairs set against its west wall, divides the central unit into dining and living rooms. In 1928 the Baltimore Museum of Art removed the elaborate handcarved paneling in the living room; it was subsequently replaced with a replica. The fireplace wall in the dining room protrudes out into the room, and the flue curves back to the wall and up to the ceiling.

To the west of the central house is the kitchen wing, a low, two-story, gable-roofed structure with brick ends and frame sides. Its second story, added about 1820, contains two bedrooms. The connecting hyphen, originally gabled roof and one story in height and containing a breakfast room, was increased to 1½ stories by the addition of a gambrel roof with dormers to provide bathrooms for the second floor of the main house. The east wing, a gambrel-roofed, low, 1½-story frame structure that has one room on each floor, served as Stone's law office. A one-story gabled brick hyphen connects it to the main house.

Except for the alternations mentioned above, Habre-de-Venture has changed but slightly through the years. In excellent condition and carefully restored, it now serves as a private residence and is not shown publicly.

SENATE RESOLUTION 13—ELECTION OF JOSEPH STANLEY KIMMITT AS SECRETARY OF THE SENATE

Mr. ROBERT C. BYRD. Mr. President, I send to the desk a resolution and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated.

The assistant legislative clerk read as follows:

Resolved, That Joseph Stanley Kimmitt, of Montana, be, and he is hereby, elected Secretary of the Senate, beginning April 1, 1977.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 13) was agreed to.

SENATE RESOLUTION 14—ELECTION OF JAMES H. DUFFY AS SECRETARY FOR THE MAJORITY OF THE SENATE

Mr. ROBERT C. BYRD. Mr. President, I send to the desk a resolution and ask that it be stated.

The PRESIDING OFFICER. The resolution will be stated.

The assistant legislative clerk read as follows:

Resolved, That James H. Duffy, of Rhode Island, be and he is hereby, elected Secretary for the Majority of the Senate, beginning April 1, 1977.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 14) was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I yield the floor.

SENATE RESOLUTION 15—DEATH OF SENATOR PHILIP A. HART

Mr. ROBERT C. BYRD. Mr. President, I yield the floor.

Mr. GRIFFIN. Mr. President, on another date, I shall have remarks concerning the death of our late colleague, Senator PHILIP HART. For the moment, I send to the desk two resolutions and ask for their immediate consideration: First is a resolution concerning the notice of the death.

The PRESIDING OFFICER. The resolution will be stated.

The assistant legislative clerk read as follows:

Resolved, That the Senate has heard with profound sorrow and deep regret the announcement of the death of Hon. Philip A. Hart, late a Senator from the State of Michigan.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

Resolved, That as a further mark of respect to the memory of the deceased, the Senate, at the conclusion of its business today, do adjourn.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The resolution (S. Res. 15) was agreed to.

SENATE RESOLUTION 16—A RESOLUTION RELATIVE TO THE EXPENSES INCURRED BY THE COMMITTEE APPOINTED TO ARRANGE FOR AND ATTEND THE FUNERAL OF THE HONORABLE PHILIP A. HART, LATE A SENATOR FROM THE STATE OF MICHIGAN

Mr. GRIFFIN. Mr. President, I send another resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated.

The assistant legislative clerk read as follows:

A resolution (S. Res. 16) relative to the expenses incurred by the committee appointed to arrange for and attend the funeral of the honorable Philip A. Hart, late a Senator from the State of Michigan.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the resolution (S. Res. 16) was considered and agreed to, as follows:

Resolved, That the Secretary of the Senate is hereby authorized and directed to pay from the contingent fund of the Senate the actual and necessary expenses incurred by the Committee appointed to arrange for and attend the funeral of the Honorable Philip A. Hart, late a Senator from the State of Michigan, on vouchers to be approved by the Chairman of the Committee on Rules and Administration.

AUTHORIZATION FOR RECEIPT OF BILLS, JOINT RESOLUTIONS, AND SIMPLE RESOLUTIONS

Mr. INOUYE. Mr. President, I ask unanimous consent that during the 95th Congress Senators be allowed to bring to the desk bills, joint resolutions, and simple resolutions.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZATION FOR RECEIPT OF REPORTS AT THE DESK FROM SENATORS

Mr. BAKER. Mr. President, I ask unanimous consent that during the 95th Congress it be in order for the proper members of the staff to receive reports at the desk when presented by a Senator at any time during the day of the session of the Senate.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER RELATING TO PRINTING OF CONFERENCE REPORTS AND ACCOMPANYING STATEMENTS

Mr. MELCHER. Mr. President, I ask unanimous consent that, notwithstanding the provisions of the Legislative Reorganization Act, conference reports and statements accompanying them not be printed as Senate reports when the House of Representatives acts first on such reports, or conference reports and statements have been printed as a House report, unless specific request is made in the Senate in each instance to have such a report printed.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZATION FOR COMMITTEE ON APPROPRIATIONS TO FILE REPORTS

Mr. INOUYE. Mr. President, I ask unanimous consent that the Committee on Appropriations be, and it is hereby, authorized during the 95th Congress to file reports during adjournments or recesses of the Senate on appropriation bills, including joint resolutions, together with any accompanying notices of motions to suspend rule XVI, pursuant to rule XL, for the purpose of offering certain amendments to such bills or joint resolutions, which proposed amendments shall be printed. I also ask unanimous consent that the committee be authorized to sit during the sessions of the Senate during the 95th Congress.

The PRESIDING OFFICER. Without objection, it is so ordered.

REPORT OF JOINT COMMITTEE ON NOTIFICATION TO THE PRESIDENT

Mr. ROBERT C. BYRD. Mr. President, the distinguished Republican leader and I, in fulfillment of our mission for the Senate, contacted the President of the United States and informed him that a quorum of the Senate was present and ready to do business and we requested his wishes in such regard in behalf of the Republican leader and majority leader, on behalf of the Senate.

He stated that at the moment he merely wished to congratulate the Senate and Members of the Senate, and that it was his hope that he would be able to deliver the state of the Union message on the 12th day of January at 9 o'clock p.m.

He indicated that he would, of course, seek clearance with the leadership of the House with respect to such date and time. I am not at this point in a position to state whether or not he has been able to talk with the House leadership in that regard and get that clearance.

For the record, this was his expressed desire to the Senator from Tennessee (Mr. BAKER) and to me, and Mr. BAKER, of course, will respond on his own in connection with this mission that we were asked to perform.

Mr. BAKER. Mr. President, the President of the United States wished to convey his appreciation to Members of the Senate, particularly to the leadership of the Senate, for their cooperation in the past.

He has expressed his desire to meet and to address a joint session of the Congress which the distinguished majority leader has indicated.

I am privileged to participate in this first official act beyond the activities of the Senate itself in the notification of the President.

May I take just a brief second to say that I look forward to serving with my distinguished friend from West Virginia in our combined effort to lead the Senate in this session.

Mr. ROBERT C. BYRD. Mr. President, I thank my friend and I look forward to serving with him and with our colleagues on both sides of the aisle.

MESSAGE FROM THE PRESIDENT

A message from the President of the United States was communciated to the Senate by Mr. Marks, one of his secretaries.

PERSONAL AND BUSINESS TAX REDUCTIONS IN 1977—MESSAGE FROM THE PRESIDENT—PM 1

The VICE PRESIDENT laid before the Senate the following message from the President of the United States which was referred to the Committee on Finance:

To the Congress of the United States:

In October 1975, I presented to the Congress a program of tax cuts and spending restraints that would have reduced the burden of government for all taxpayers. It would have given the American people more freedom to spend their incomes as they choose rather than as Washington chooses for them. However, Congress decided otherwise—to increase

spending far more than I wanted and to cut taxes far less than I wanted.

My forthcoming 1978 Budget will provide a detailed blueprint for Federal spending. Today, as I promised, I am outlining my proposals for personal and business tax reductions in 1977. First, I again urge a permanent increase in the personal exemption from $750 to $1,000 to replace the system of temporary tax credits that have so greatly complicated the individual income tax return. I am also recommending an increase in the low income allowance and a series of permanent tax rate reductions. In total, my proposals provide income tax relief for individuals of approximately $10 billion in 1977. The tax reductions of 1975 and 1976 focused tax relief on the lower income taxpayer. However, it is high time to focus substantial tax relief on middle income taxpayers. The tax relief I seek will cut the 1977 income taxes of a typical family with four with an income of $15,000 by $227.

In the long run, inflation and real economic growth constantly push taxpayers into higher and higher tax brackets if tax law remains unchanged. Some believe that these additional tax receipts should be spent on new Federal programs. I do not. Instead, I believe that the Congress should periodically counteract the growing burden imposed by the tax system by providing offsetting tax cuts while continuing to restrain the rate of growth of Federal spending.

The creation of good permanent jobs for our expanding labor force requires a higher level of private investment. I am, therefore, recommending again a permanent reduction in the corporate income tax from 48 to 46 percent. This would reduce business tax liabilities by $2.5 billion in 1977.

I also urge making permanent the 10 percent investment tax credit and the surtax exemption provisions of the Tax Reform Act of 1976. In the longer run we must eliminate the double taxation of dividend payments. I am, therefore, renewing my proposal to integrate corporate and personal income taxes gradually over a period of years beginning in 1978. All of these changes in the tax laws will increase the funds available, directly and indirectly, for new and better plants, machinery, stores and equipment.

I am again recommending accelerated depreciation for new plants and equipment installed in rural and urban labor market areas where unemployment is 7 percent or higher. I am firmly convinced that this is a far better way to help create jobs in those areas that have lagged behind in the economy recovery than adding layer upon layer of new hastily conceived spending programs.

A year ago, in my 1977 Budget, I noted that the old age, survivors and disability trust funds would be depleted in the early 1980's unless some action was taken. Therefore, much as I didn't like doing it, I felt compelled to recommend payroll tax rate increases beginning January 1, 1977. The employee share of this increase would have amounted to less than one dollar per week for taxpayers at the top end of the pay scale and a few cents per week for those at the bottom. Congress failed to act on this proposal. Partly because of the delay, a higher tax increase is now necessary if the social security system is to remain intact. Because current law already prescribes a four-tenths of one percent increase in the tax rate in 1978, I do not believe that a very large additional increase is appropriate in that year. I am therefore proposing an additional two-tenths of one percent rate increase in 1978 supplemented by a six-tenths of one percent rate increase in 1979 and a three-tenths of one percent rate increase in 1980. These increases will restore the fiscal integrity of the Social Security Trust Funds in the short run and, together with my proposals for correcting the inflation adjustment for future benefits for currently employed workers, will greatly reduce the long-run deficit faced by the social security system.

I have in the past urged several other changes in our tax laws which are both necessary and desirable. These will be proposed again in my budget, but need not be discussed in detail at this time. These include a tax credit for home insulation, exempting charitable contributions from the burden of the minimum tax, increasing the railroad retirement tax in a manner consistent with the recommended Social Security tax increases, and providing State and local governments with an option to issue taxable bonds subsidized in part by the Federal government.

I am also recommending repeal of the earned income credit and the provision for funding Employee Stock Ownership Plans through additional investment tax credits. The earned income credit is not integrated with the rest of our welfare system and makes future reform of that system even more difficult. The Employee Stock Ownership Plan provides a very large taxpayer subsidy to employers who wish to purchase stock in their firm for their employees. I do not believe that this is an equitable approach to the encouragement of stock ownership.

I urge that the Congress take prompt action on all of the above tax proposals.

GERALD R. FORD.

THE WHITE HOUSE, *January 4, 1977.*

S. RES. 11 AND S. RES. 12—SUBMISSION OF RESOLUTIONS TO AMEND THE STANDING RULES OF THE SENATE

Mr. ALLEN. Mr. President, I send to the desk the two resolutions having to do with amending the rules, and I ask unanimous consent it be in order to offer these resolutions at this time and that they be printed in the RECORD.

The PRESIDING OFFICER. The request is to file and receive these resolutions?

Mr. ALLEN. No. Consent has already been given that the Senator from Alabama could offer these resolutions. I am merely offering them in accordance with the unanimous consent.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, and I shall not object, the Senator is alluding to the resolutions that have to do with the proposed changes in the rules?

Mr. ALLEN. Proposed changes in the rules, yes.

Mr. ROBERT C. BYRD. I thank the Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROMOTING GOOD GOVERNMENT BY PUBLIC DISCLOSURE OF INCOME AND NET WORTH

Mr. ALLEN. Mr. President, in both the 93d and 94th Congresses, the Senate approved legislation requiring financial disclosure. In neither Congress did the House act on disclosure legislation, although several disclosure bills were introduced by House Members. Over the years several Senators, including especially my distinguished colleague, the senior Senator from New Jersey, have been in the forefront in seeking better government by mandatory disclosure of income and net worth by government officials. Progress has been made, yet regrettably, Mr. President, much remains to be done.

I am confident that we all approved the initiative of the President-elect in developing a plan to eliminate conflicts of interest and to require public financial disclosure by members of the executive branch. The President-elect is to be particularly commended for his decision to apply those standards first to himself so that others serving in his administration can be guided both by the requirements imposed and by the example set. Also following his good example, I believe the Senate too should take early action to require public disclosure by its Members and by certain of its employees—without needlessly awaiting enactment of legislation requiring approval in both houses. I am, therefore, today in accordance with rule XL of the Standing Rules of the Senate giving notice to the Senate that I intend to introduce a resolution to amend rule XLIV of the Standing Rules to require disclosure of income and net worth by all candidates for the Senate and Senators and by all Senate employees compensated at a rate in excess of $25,000 a year.

As Senators know, rule XLIV now requires that candidates for the Senate, Senators, and employees compensated at a rate in excess of $15,000 file certain financial information with the Comptroller General of the United States. However, the information filed is not available to the public and serves no useful purpose except in those unusual cases in which an individual's conduct is already called into question. The beneficial aspects inherent in full public disclosure are thus not obtained.

My resolution would make available through the Secretary of the Senate to the public a full statement of assets and liabilities of each person covered and would require public disclosure of the amounts and sources of all income received. I have used a rate of compensation of $25,000 per annum rather than the $15,000 figure used previously in present rule XLIV because I believe employees who affect policy and who ought to disclose publicly are generally compensated now—in light of the inflation which has occurred since the adoption of rule XLIV in 1968—at a rate equal

to or in excess of $25,000. But even with the inflation we have witnessed over past years, I believe the cut-off figure of $15,000 remains appropriate for filing information in confidence with the Comptroller General although inappropriate for the public disclosure I now propose. Hence I do not propose to change the present requirements of rule XLIV in that regard.

Mr. President, by adopting my resolution, I do not believe the Senate will have fully discharged its continuing duty to seek open and honest government. I am joing with Senators CASE, WEICKER, PROXMIRE, and others in introducing a bill which would require public financial disclosure of all members of the Federal Government compensated at a rate in excess of $25,000 per annum. Similar disclosure would be required of all candidates for elective federal office. Notwithstanding my resolution which would affect the Senate only, I also very strongly urge enactment of the measure proposed by Senator CASE, and I intend to work to that end.

But, Mr. President, we can take decisive action now to put our own house in order, and I do not believe we should delay further. If we are successful in securing legislation covering all branches of Government, we can thereafter make appropriate amendment to our own disclosure rule, but we ought not to make the prospect of such legislation an excuse for failing to look after our own affairs.

Mr. President, let us go ahead now and make the necessary changes. The matter is fully within our power, and further delay serves no good purpose and may well be interpreted as reluctance to face the issue.

S. RES. 11

Resolved, That Rule XLIV of the Standing Rules of the Senate is amended by adding at the end thereof the following new paragraph:

"6. Each person referred to in paragraph 1 hereof, except those who are compensated at a rate less than $25,000 a year, shall file annually with the Secretary of the Senate on or before May 15 of each year a full and complete report of net worth as of the end of the preceding calendar year, such report to consist of a statement of assets (and of their reasonable market value) owned by him, or jointly by him and his spouse, and of liabilities owed by him, or jointly by him and his spouse, together with a full and complete statement of income for the preceding calendar year, such statement of income to consist of a list of the identity of each source of income and a list of the amount paid by each source of income to him, or jointly to him and his spouse, during the preceding calendar year, except that in lieu of such statement of income, each such person may file with the Secretary of the Senate a copy of his Federal income tax report for such calendar year. The report required by this paragraph shall be in such form and shall contain such additional information as the Secretary of the Senate may prescribe in order to meet the provisions of this paragraph. Notwithstanding any provision of law to the contrary, pursuant to the power vested in the Senate by the Constitution of the United States, all reports filed under this paragraph shall be maintained by the Secretary of the Senate as public records, open to inspection by members of the public, and copies of such reports shall be furnished to members of the public upon request at a reasonable fee. Any report filed under this paragraph shall be retained by the Secretary of the Senate for a period of five years and shall be certified as being correct by the person making the same on his oath properly notarized. This paragraph shall become effective on March 1, 1977.

PROHIBITING PREPARED TEXT AND STAFF ASSISTANTS IN THE SENATE CHAMBER

Mr. ALLEN. Mr. President, I have been privileged to serve for 8 years a Member of the U.S. Senate, and during that period I have devoted a great deal of my time and thought to procedures followed by the Senate during the conduct of business in the Senate Chamber.

Mr. President, I am not satisfied that the Senate truly functions as the deliberative body envisioned by the authors of the Constitution of the United States. Too often I have been impressed by the apparent lack of attention given by Senators to particular items of legislation which have been more or less rammed through the Senate assembly-line fashion with little actual examination by Senators voting passage. Platoons of aides flock into the Senate Chamber when legislation of interest to them is under consideration, yet numbers of Senators are entirely absent. Frankly, Mr. President, sometimes it seems to me—and I am sure to spectators in the gallery—that the activities of the U.S. Senate are being orchestrated and directed by staff assistants rather than by Senators themselves.

Time and again only a handful of Members are on the floor when the Senate makes far-reaching and momentous decisions touching on the lives of every citizen of the country. Senators who have sponsored legislation arrive immediately prior to its final passage, having taken little or no part in its debate, and hurridly read statements prepared for them and thrust into their hands by waiting aides. Other Senators insert in the RECORD massive amounts of material bearing on legislation, and indeed forming the legislative history of bills before the Senate, without so much as having glanced at its content prior to its being delivered up to the Clerk for printing.

I propose to bring this sorry state of affairs to a halt by amending rule XIX to prohibit the use of prepared text in the Senate Chamber and to make the floor of the Senate off limits to staff. Why should we not be free and willing to discuss among ourselves matters before us? Do we not better serve by discussing our ideas one with another than by conferring continuously with staff?

Mr. President, I believe we were meant to give careful attention to every bill coming before us, and I believe the legislative process envisages a shaping and molding of legislation in a parliamentary body during debate and discussion by all the Members of that body. I do not believe the legislative process ought to consist of massive amounts of printed material prepared by armies of staff assistants, reviewed partially by a small number of Senators in committee, and thereafter rubber-stamped by the body at large.

The Senate of the United States has a critical role to play in shaping and forming legislative expressions of the will of the people of the United States. That role is not carried out by relegating to staff virtually all those deliberative functions which should be carried out by Senators themselves—here together in this Chamber.

Mr. President, we are the chosen representatives of the 50 States. We are assembled in Congress to deliberate as a body. Such deliberation can occur only in the Senate Chamber and only with the participation of all or nearly all of the Members of the Senate. Out of such deliberation informed votes and intelligent decisions are rendered. Without such deliberation the Senate as an institution becomes merely a collection of committees and committee staffs observing only grudgingly the formality of full Senate action on the projects of those staffs and committees.

Mr. President, the committees of the Senate and the Senate staff certainly have an important function in the operations of the Senate, but, Mr. President, let us not lose sight of the chief strength of the Senate and the characteristic which distinguishes it from the House of Representatives and indeed from other legislative bodies throughout the world—I mean, Mr. President, simply the free ability of each Member to express his thoughts fully and to hear expressed fully the thoughts, ideas, and opinions of his colleagues in open discussion in the Senate Chamber where all may participate. Only out of such free and full discussion can the body properly arrive at its collective judgment rendered dispassionately, since only during such discussion and in free and wide ranging debate are the strengths and weaknesses of our thoughts exposed and explored.

So, Mr. President, let us today take action to guarantee that Senators do themselves take part in debate here in the Senate Chamber—and that they do themselves understand legislation coming before this body—and that they do themseves contribute fully to the shaping and forming of the ideas of this body free from the pervasive influence of employees hired to assist rather than to direct. The solution I propose is simple and ought to receive the support of all Senators interested in good and efficient government and in performing conscientiously their full duty as Members incorporate of this great deliberative body.

The Senate is not, Mr. President, 100 Senators; the Senate is rather this room given life by those who from time to time gather together and are privileged to speak in it.

S. RES. 12

Resolved, That Rule XIX is amended by adding at the end thereof the following new paragraphs:

"9. In speaking on the floor of the Senate no Senator shall speak from a prepared script or from prepared written, printed, or typed remarks, nor may he insert in the Congressional Record any prepared remarks to be shown as delivered by him on the floor.

"10. No Senator may, in the Senate Chamber, make use of any legislative assistant or other person on his staff or on the staff of any committee on which he serves, for advice, information, or other assistance, in the performance of his duties.".

NO BLANKET PARDON FOR DRAFT EVADERS

Mr. ALLEN. Mr. President, the Constitution, in article II, section 2, vests in the President "the power to grant reprieves and pardons of offenses against the United States." The power to grant pardons given to the Chief Executive is unlimited and unqualified, not subject to any action of either the Senate or the House of Representatives. The authors of the Constitution after debate and deliberation placed no limits on the power of the President to grant pardons in order to allow him the fullest possible discretion and freedom of action in dealing with situations demanding immediate or plenary action.

The President's right to grant an unconditional pardon to Vietnam draft violators or even to military deserters is thus fundamental to our system of government, and in offering my resolution I do not wish in any way to imply a challenge to the President's authority to grant pardons as he sees fit wholly within his own discretion. However, Mr. President, an even more fundamental right—or, perhaps, duty—is ours as representatives of the 50 States; that duty is to offer to the President in appropriate instances our considered judgment as to the effect of actions he contemplates.

Senators should, therefore, clearly understand that my resolution does not question the constitutional authority of a President to proclaim a general amnesty or blanket pardon; it merely expresses the considered judgment of the Senate that in these circumstances an unconditional blanket pardon would be a grave mistake.

This resolution affords each of us the opportunity to go on record against the contemplated action of the President-elect that we might thereby convince him that his proposal, if carried out, would be a grievous error without historical precedent and dangerous to the future security of the Nation. Conversely, if any Senator favors the contemplated pardon, his vote against the resolution will put his stand on record.

Mr. President, having just completed our Bicentennial Year, we are all even more mindful than in other times that American freedom and our constitutional system of law were purchased 200 years ago at very high cost in the War for Independence. Since that initial victory, Americans have been required to make periodic payments for the continuation of our freedom in numerous and bloody wars. But, Mr. President, unlike the laws of virtually any other nation in the world, in every conflict, our Constitution and laws have allowed for debate and lawful opposition and have even permitted lawful alternatives to combat for those deemed to be morally motivated in their opposition to it. Vietnam was no different. The men drafted into our Armed Forces and those who volunteered for service were no more willing or anxious to see and suffer the horrors of combat or to die than had been any of their predecessors in past conflicts—but they obeyed the law.

Three million young men served in Vietnam; 300,000 were wounded in action; and more than 50,000 died there—the majority in each category having been drafted into service. Many hundreds, as prisoners of a criminal enemy, suffered because they too, preserving their honor inviolate, obeyed the laws of the United States.

Who here can now say how many countless times the sickening fear of violent death was confronted and overcome by those steadfast Americans who did serve faithfully in this unpopular and cruel conflict? Mr. President, I do not think I am being too dramatic in reminding Senators that the hazards of war are faced best by those motivated in high patriotism, confident that their countrymen approve, support, and admire their conduct. Such was the case at Bunker Hill, such was certainly the case on the beaches of Salerno, such has been the case on countless fields of carnage over the long two centuries of our existence as a free people.

Mr. President, in past wars and during the Vietnam conflict there have also been those who have opposed combat and genuinely motivated by high moral purpose have refused to fight, but, Mr. President, they were willing to accept full responsibility for their actions within the framework of our laws and to perform alternate service or to accept punishment in accordance with their own conscience and as proof of their convictions. Thus, too, following almost every conflict, American Presidents, consistent with the generous spirit and popular will of the people of the United States, have when appropriate offered pardons to such individuals. The United States, at the insistence of her people, when at war pursues victory and when at peace plays fair with those who for reasons of conscience would not fight.

Our history proves us to be fundamentally a moral and forgiving nation. However, never once—let me repeat, never once—in our history has an unconditional pardon been given as is now proposed by the President-elect. In every case, American Presidents have required certain actions of those to whom pardons were granted and have also limited in some fashion every general amnesty extended to those who were thought to deserve it. Thus, President Washington demanded an oath of loyalty from the whiskey rebels; President Lincoln sent Union deserters back to their units to serve out their time; and President Truman pardoned one in 10 draft violators after the Second World War only after they had served jail sentences. The Korean war is the only major conflict in our country's history after which no pardons were offered. But, Mr. President, the point is that all of the precedents taken alone or considered collectively, imply that a President in a postwar period ought to exercise the Nations' mercy and forgiveness within limits and with conditions placed upon those who receive it.

At the conclusions of the Vietnam conflict, President Ford apparently felt that there was indeed a need for just such a conditional grant of pardon. He did, therefore, on September 16, 1974, proclaim a limited amnesty program and signed Executive Orders 11803 and 11804 establishing the Clemency Review Board. Individual draft violators were required to apply for clemency, thereby displaying their intent and desire to become again citizens in good standing. Each case was reviewed on its merits, and 94 percent of the cases reviewed resulted in recommendations of leniency or full pardon.

Mr. President, many of the draft evaders, who had been convicted and who were at the time of the proclamation serving out their prison terms, were immediately set free. A good number were given the chance to serve their country in the areas of public health or the environment in order to, as the President put it, "earn their reentry" into American society; 15,500 draft evaders and deserters participated. When the program was about to lapse, it was extended twice—once on January 31, 1975, and again on February 28, 1975—so that more could apply and have the opportunity to right the wrong they had committed. The Clemency Board dispensed the Nation's forgiveness to those who sincerely desired it and who by their actions had manifested their wish to make good in a lawful way the wrong they had committed against their country.

Mr. President, by complying with the rules and determinations of the Clemency Review Board, the individuals who participated in its program will ironically also, in my judgment, along with the millions who served honorably, be aggrieved by a totally unconditional pardon extended now to those who not only disobeyed the law in the first place but who were unwilling later to take any action whatsoever to reclaim their citizenship and to assume its responsibilities. They deserted their country in a time of need; they refused her forgiveness; they deserve nothing more.

At present an all volunteer military force defends our Nation. We are also, thankfully, at peace. However, the reality of the present world order should make evident to us all that the latter condition could change in an instant. A major national crisis could require the reinstitution of the draft. In that unhappy event, it might well prove impossible to implement an effective national mobilization if an unconditional blanket pardon is now granted to those who violated with apparent impunity the very same draft statutes. And let us be frank about this matter, the draft has served to compel millions of Americans to do their duty in a prompt and efficient manner, and it has saved the democracies in this world twice in this century. Without the ability to reimplement it if needed, the peace and security of the world are in certain jeopardy.

When the Selective Service Act was written, it included penalties for its violation. Our predecessors in this Chamber felt those penalties necessary, and if the draft were in a crisis to be reimplemented, those penalties would be necessary again today. Those penalties make effective our Selective Service System, which in itself even when lying dormant acts as a deterrence to potential

enemies of the United States. But, Mr. President, if an unconditonal blanket pardon is given to draft dodgers now, that deterrent effect of a reimplement draft will be undermined, and our enemies—present or future—ought to rejoice at the prospect.

Thomas Jefferson, in his first inaugural address, in which he set forth the standards by which government should be judged, stressed repeatedly the need for equal and exact justice under law. An unconditional pardon would mock that standard, would break the precedent of two centuries of our history, and would aggrieve the millions who have served honorably in past wars, the tens of thousands who had died, and the hundreds of thousands who still bear the scars of conflict as reward for obeying the laws of their Nation. Furthermore, it would undermine and possibly nullify the ability of the United States to take decisive military action, if necessary, on any scale and for whatever cause.

Mr. President, our resolution does not seek vengeance. To so judge it would require the conclusion that our entire history as a nation has been immoral and unforgiving. Senators who stand with this resolution will by their vote offer good advice to a new President and hopefully thereby prevent a serious initial error which might forever blemish his Presidency, even notwithstanding the many future great accomplishments he may achieve and which we all sincerely hope for him. The action I propose would not, therefore, be taken out of any wish for vengeance against lawbreakers or from any desire to embarrass a statesman for whom we all have the deepest respect but would be done rather to reaffirm our commitment to equal and exact justice under law, to insure our future security and peace within the framework of law, and to honor as is justly due those who served lawfully.

Mr. President, I ask unanimous consent that the text of the resolution be printed in the RECORD, such resolution to be for information only and not to constitute the introduction of the resolution. It would merely be a manuscript inserted in connection with my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution is as follows:

Resolved, that—

Whereas President-elect Jimmy Carter has indicated that he will, as one of his first official acts as President, issue some form of Presidential pardon for all Vietnam era draft evaders;

Whereas the grant of an immediate blanket Presidential pardon for all Vietnam era draft evaders would be a disservice to the more than 3 million men and women who served honorably in the Armed Forces during the Vietnam era and to the families whose sons died in battle or captivity or remain missing in action;

Whereas the grant now of an immediate blanket Presidential pardon for all Vietnam era draft evaders would ignore the purpose and work of the Presidential Clemency Board and make meaningless the alternate service performed by those who elected to apply for clemency;

Whereas an immediate blanket Presidential pardon for Vietnam era draft evaders could have dire effect on military morale and discipline and might tend to hamper future defense efforts; and

Whereas the issue of blanket pardons for draft dodgers is of such importance to the United States and the people of the United States that the Senate feels that President-elect Carter and the people should be advised of the Sense of the Senate on this issue;

Now therefore, the Sense of the Senate is that the President of the United States would be ill-advised to pardon, and he is hereby urged not to pardon, by any general or blanket decree, proclamation, order, or amnesty those individuals who violated the laws of the United States rather than to serve in our Armed Forces during the period August 4, 1964, through March 28, 1973.

THE PRISONER OF WAR/MISSING IN ACTION PROBLEM

Mr. HELMS. Mr. President, under the same circumstances prevailing in connection with the request by the distinguished Senator from Alabama, the Senator from North Carolina sends to the desk, purely for the purpose of printing in the RECORD, a concurrent resolution which the Senator from North Carolina intends to submit next Monday, on behalf of himself and the Senator from Alabama (Mr. ALLEN). I ask unanimous consent that it be in order that I do so.

The PRESIDING OFFICER. Without objection, it is so ordered.

The concurrent resolution is as follows:

Resolved by the Senate (the House of Representatives concurring),

Whereas, Article II, Section 2, of the Constitution of the United States designates the President of the United States Commander in Chief of the Army and Navy (Military Forces), and

Whereas, on August 10, 1964, the Senate and House of Representatives of the United States Congress passed Public Law 88-408 authorizing the deployment of the United States Armed Forces for the Maintenance of International Peace and Security in Southeast Asia, and

Whereas, over 800 members of the Armed Forces authorized by the Congress and dispatched by the President to Southeast Asia are still categorized as Prisoner of War or Missing in Action and are still unaccounted for, and

Whereas, Article II, Section 2 of the Constitution of the United States grants to the President of the United States further power, by and with the Advice and Consent of the United States Senate to make treaties, and

Whereas, on January 27, 1973, the Paris Agreement on Ending the War and Restoring Peace in Vietnam (Designated the Paris Agreement), which, by its terms became effective on that date, was executed by duly authorized representatives of the United States, the Republic of Viet-Nam (South Viet-Nam), the Democratic Republic of Viet-Nam (North Viet-Nam) and the Provisional Revolutionary Government of the Republic of South Viet-Nam (the Vietcong), and

Whereas, Article 8(b) of the Paris Agreement provides:

"The parties shall help each other to get information about those military personnel and foreign civilians of the parties missing in action, to determine the location and take care of the graves of the dead so as to facilitate the exhumation and repatriation of the remains, and to take any such other measures as may be required to get information about *those still considered missing in action.*" (Emphasis supplied.)

which Article establishes an obligation under International Law upon the parties to the Agreement in favor of members of the United States Armed Forces who are categorized as Missing in Action and a further obligation to, if possible, exhumate and repatriate the remains of those categorized as Killed In Action. This obligation runs to the United States as a party to the Agreement, and

Whereas, the State Department as the responsible agency of the Executive Branch of the United States Government has exhibited no positive direction or leadership in meeting its responsibility of enforcing Article 8(b) of the Paris Agreement or seeking alternatives that might otherwise resolve the Prisoner of War/Missing in Action problem, and

Whereas, on September 11, 1975, the U.S. House of Representatives formed the Select Committee on Missing Persons in Southeast Asia, to report within one year on the status of persons held as prisoners or missing in action and unaccounted for in North and South Viet-Nam, Laos and Cambodia, which committee has been responsible for identifying or accounting for less than one-tenth of one percent of Americans unaccounted for in those areas, and

Whereas, the Joint Casualty Resolution Center's recent withdrawal from Thailand leaves no United States Agency in Asia to locate Americans still prisoner or missing and unaccounted for in Indochina, and

Whereas, knowledge that some unaccounted for military and civilian personnel, fifty-seven of whom were known to be alive and who have not been returned, were at one time prisoners of war and alive was manifested through enemy propaganda broadcasts, foreign media reports, photographs and other sources, personnel who may be presumed to be living and retained for purposes of bargaining or blackmail by the Vietnamese, Cambodians or Laotians now in power.

Now therefore be it resolved:

1. That the President of the United States recognize his duty and responsibility as Commander in Chief of the Armed Forces of the United States and require an accounting for the person or remains of all military personnel responding to the Orders of the Office of the President and who are presently categorized as Prisoner of War, Missing in Action or Killed in Action (body not recovered) in Southeast Asia on the personnel rosters of the United States Army, United States Navy, United States Marine Corps or United States Air Force.

2. That the President of the United States, by executive fiat, require the Secretary of State to pursue, with diligence and tenacity, enforcement of the Paris Agreement of January 27, 1973, with emphasis on enforcement of Article 8(b) of that Agreement.

3. That the Congress of the United States, having passed Public Law 88-408 authorizing the deployment of the United States Armed Forces for the maintenance of international peace and security in Southeast Asia, recognize a corresponding continuing duty and obligation to determine the fate of Americans missing or unaccounted for consequent from enforcement of that Law.

4. That the President of the United States, through and by the Secretary of State, hold the Democratic Republic of Viet-Nam (North Viet-Nam) and the Provisional Revolutionary Government of the Republic of South Viet-Nam (the Vietcong) responsible to account for and provide essential information not otherwise available to satisfactorily dispose of the Prisoner of War/Missing in Action problem in accordance with the Paris Agreement or seek alternatives that might

otherwise resolve the question of those Americans unaccounted for in Southeast Asia.

5. That responsible officeholders in the Executive and Legislative branches of the Government of the United States, both elected and appointed, should immediately address the authority of their office, individually and collectively, toward a satisfactory resolution of the Prisoner of War/Missing in Action problem, make a public accounting, and remove any question as to the integrity of their function.

NOTICE OF HEARING

Mr. EASTLAND. Mr. President, on behalf of the Committee on the Judiciary, I desire to give notice that a public hearing has been scheduled for Tuesday, January 11, 1977, at 10 a.m., in room 2228, Dirksen Senate Office Building, on the following nomination:

Griffin B. Bell, of Georgia, to be Attorney General-designate.

Any persons desiring to offer testimony in regard to this nomination, shall, not later than 24 hours prior to such hearing, file in writing with the committee a request to be heard and a statement of their proposed testimony.

This hearing will be before the full Judiciary Committee.

BUDGET COMMITTEE HEARINGS TO REVIEW FISCAL 1977 BUDGET GOALS

Mr. MUSKIE. Mr. President, the Senate Budget Committee will hold Public Hearings January 11, 12, and 13 to reassess Congress' fiscal 1977 budget goals in light of the current economic outlook.

The hearings will provide the committee with a thorough evaluation of the current economic forecast in relation to the fiscal and economic objectives of the second budget resolution for fiscal 1977 which Congress adopted in September. They will form the basis for any determination by the committee as to whether the current forecast warrants a modification in the second budget resolution plan. Under the 1974 Congressional Budget Act, and such adjustment would require adoption by Congress of a third budget resolution for fiscal 1977.

The critical question the Budget Committee now confronts is whether the second resolution budget plan provides sufficient economic stimulus to maintain a strong economic recovery.

Adopted by Congress in September, this plan reaffirmed a 1977 budget policy designed to maintain the pace of recovery and reduce the Nation's jobless rate. The committee stated at that time that it would be prepared to reassess congressional budget policy in subsequent months. Our report accompanying the second resolution stated that we would be prepared to consider a new concurrent resolution early in 1977 if the economic data received by then did not indicate that recovery was proceeding satisfactorily.

Since that time, the Nation's key economic indicators have shown that our budget goals, which included an economic growth rate in calendar 1977 of 6 percent and a reduction in the jobless rate to 6.2 percent by the end of the year, are apparently out of reach. This is cause for considerable concern. It is important, therefore, that the committee have before it not only the best available economic information but also a broad review of various fiscal policy options best suited to deal with the current realities.

Such options would include those combinations of tax relief, direct Federal action in creating job opportunities and international policy initiatives that would be most effective in providing this stimulus.

On Tuesday, January 11, the committee will look at the critical economic forecasts as well as various policy options for providing additional economic stimulus. Our witnesses will include Drs. Walter W. Heller and Paul W. McCracken, both former Chairmen of the Council of Economic Advisers, and Dr. Alice M. Rivlin, Director of the Congressional Budget Office.

On Wednesday, January 12, the witnesses will address the implications of the international economic outlook to Federal budget policy. They will include Dr. Lawrence Krause, senior fellow of the Brookings Institution; Dr. Frank Schiff, vice president and chief economist of the Committee for Economic Development; and Lawrence A. Veit, deputy manager and international economist with Brown Bros., Hartman & Co.

On Thursday, January 13, witnesses will include Mr. Reginald Jones, chairman of the board of the General Electric Co.; Hon. Kenneth Gibson, mayor of Newark and president of the U.S. Conference of Mayors; and Albert T. Sommers of the conference board.

All hearings will be held in 357 Russell Senate Office Building beginning at 10 a.m.

HEARINGS ON NOMINATION OF CYRUS VANCE TO BE SECRETARY OF STATE

Mr. SPARKMAN. Mr. President, as Chairman of the Committee on Foreign Relations, I wish to announce that the committee has scheduled a public hearing on Tuesday, January 11, 1977, to hear Mr. Cyrus Vance and public witnesses on Mr. Vance's nomination to be Secretary of State. The hearing will be held in room 4221 in the Dirksen Senate Office Building beginning at 10 a.m.

NOTICE OF MOTION TO AMEND CERTAIN SENATE RULES

Mr. ROBERT C. BYRD submitted the following notice:

In accordance with the provisions of Rule XL of the Standing Rules of the Senate, I hereby give notice in writing that I shall hereafter move to amend Rules XXII, III, V, XV, and XXVII of the Standing Rules of the Senate in the following particulars, namely:

Section 2 of Rule XXII on line 2 of the last paragraph of the Standing Rules of the Senate is amended by striking out "one hour" and inserting "one-half hour."

Section 2 of Rule XXII beginning at the end of lines 4 and 5 of the last paragraph of the Standing Rules of the Senate is amended by striking out the words "and it" and inserting in lieu thereof the following: "and after not to exceed 50 hours of consideration of the proposition on which cloture was invoked, the Senate shall proceed to vote on the final disposition thereof to the exclusion of all motions except a motion to table, amendments, and debate except for one quorum call on demand to establish the presence of a quorum just before the final vote begins. The total amount of time allotted above may be further reduced by the adoption of a motion without debate by a ⅗rds affirmative vote of the Senators duly chosen and sworn, in which case the time allotted shall be equally divided and controlled by the Majority and Minority Leaders or their designees. It"

Section 1 of Rule III of the Standing Rules of the Senate is amended by striking out all after the words "unless by unanimous consent" and inserting in lieu thereof "or on motion decided without debate. Motions to correct the Journal shall be privileged and proceeded with until disposed of and shall be confined to an accurate description of the proceedings of the preceding day."

Rule V of the Standing Rules of the Senate is amended to add a new section numbered 4, as follows:

"SEC. 4. Rulings by the Presiding Officer sustaining a point of order that no business has been transacted since the last quorum call shall not be subject to an appeal when that fact is supported by the minute book of the Journal or the transcript of the proceedings of debate; this prohibition shall also apply to a ruling on a point of order made immediately following a yea and nay vote where the presence of a quorum was shown and no business has intervened."

Rule XV of the Standing Rules of the Senate is amended by adding a new paragraph numbered 3, as follows:

"3. The demand for the reading of an amendment when presented to the Senate for consideration, including House amendments, may be waived on motion decided without debate when the proposed amendment has been identified by the clerk and is available in printed form."

Section 1 of Rule XXVII of the Standing Rules of the Senate is amended by adding at the end thereof following the words "without debate" the following: "The demand for the reading of a conference report when presented may be waived on motion decided without debate when the report is available in printed form."

The purpose of the proposed amendments is—

(1) To modify section 2 of Rule XXII by reducing one hour to one-half hour;

(2) To modify section 2 of said rule as to limit the total amount of time after a cloture motion has been adopted before the Senate proceeds to vote on final disposition of the proposition on which cloture was invoked.

(3) To modify section 1 of Rule III so as to authorize the suspension of the reading of the *Journal* on motion without debate and to confine corrections to an accurate description of the proceedings of the preceding day.

(4) To add a new paragraph to Rule V to remove rulings by the Presiding Officer sustaining a point of order that no business has been transacted since the last quorum call from an appeal when the fact is supported by the minute book of the *Journal* or the transcript of proceedings. The same prohibition would apply to rulings on a point of order made immediately following a yea and nay vote where the presence of a quorum was established and no business had since intervened.

(5) To add a new paragraph numbered 3 to Rule XV to waive the reading of amendments by a motion without debate when presented to the Senate for consideration when they are available in printed form.

(6) To modify paragraph 1 of Rule XXVII to waive the reading of a conference report on motion without debate when the report is available in printed form.

ADJOURNMENT UNTIL 12:30 P.M. THURSDAY, JANUARY 6, 1977

Mr. CRANSTON. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the order previously entered, and as a further mark of respect to the memory of PHILIP A. HART, late a Senator from the State of Michigan, that the Senate stand in adjournment until 12:30 p.m. Thursday next.

The motion was agreed to; and at 3:50 p.m., the Senate adjourned until Thursday, January 6, 1977, at 12:30 p.m.

HOUSE OF REPRESENTATIVES—*Tuesday, January 4, 1977*

This being the day fixed by the 20th amendment of the Constitution for the annual meeting of the Congress of the United States, the Members-elect of the House of Representatives of the 95th Congress met in their Hall, and at 2 o'clock p.m., were called to order by the Clerk of the House of Representatives, Hon. Edmund L. Henshaw, Jr.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

Be strong in the Lord and in the power of His might.—Ephesians 6:10.

O God and Father of us all, who art from everlasting to everlasting, we bow before Thee at the beginning of the 95th Congress to acknowledge our dependence upon Thee and to pray that Thy redeeming and renewing power may flow through our lives enabling us to do what is right and good for our Nation and for all mankind. As we enter this new year awaken within us the realization that Thou are with us always, all the way. May Thy presence strengthen us, Thy spirit guide us, and Thy wisdom make us wise.

Bless our President, our President-elect, our Speaker, the Members of Congress, and all who labor with them that they may continue to lead our Nation in the paths of peace, along the lanes of liberty, and by the roads of righteousness toward the glorious goal of our human brotherhood.

Hear us as we reverently unite in praying the Lord's Prayer:

Our Father, who art in heaven, hallowed be Thy name, Thy kingdom come, Thy will be done on Earth as it is in heaven. Give us this day our daily bread. And forgive us our trespasses as we forgive those who trespass against us. And lead us not into temptation, but deliver us from evil. For Thine is the kingdom, and the power, and the glory forever. Amen.

The CLERK. Representatives-elect to the 95th Congress, this is the day fixed by law for the meeting of the 95th Congress.

This law directs the Clerk of the House to prepare the official roll of the Representatives-elect. Credentials covering the 435 seats in the 95th Congress have been received, and are now on file with the Clerk of the 94th Congress.

The names of those persons whose credentials show that they were regularly elected as Representatives in accordance with the laws of the several States of the United States will be called; and as the roll is called, following the alphabetical order of the States, beginning with the State of Alabama, the Representatives-elect will please answer to their names to determine whether there is a quorum present.

The reading clerk will call the roll by States.

The Clerk called the roll by States and the following Representatives-elect answered to their names:

The CLERK. The rollcall discloses that 434 Representatives-elect have answered to their names. A quorum is present.

ANNOUNCEMENT BY THE CLERK

The CLERK. The Clerk wishes to state that credentials regular in form have been received showing the election of the Honorable WALTER E. FAUNTROY as Delegate from the District of Columbia, the election of the Honorable ANTONIO BORJA WON PAT as Delegate from Guam, and the election of the Honorable RON DE LUGO as Delegate from the Virgin Islands.

The Clerk will also state that credentials regular in form have been received showing the election of the Honorable BALTASAR CORRADA as Resident Commissioner from the Commonwealth of Puerto Rico for a term of 4 years beginning January 3, 1977.

ELECTION OF SPEAKER

The CLERK. The next order of business is the election of the Speaker of the House of Representatives for the 95th Congress.

Nominations are now in order.

The Clerk recognizes the gentleman from Washington (Mr. FOLEY).

Mr. FOLEY. Mr. Clerk, as chairman of the Democratic Caucus, I am directed by the unanimous vote of that caucus to present for election to the office of the Speaker of the House of Representatives of the 95th Congress the name of the Honorable THOMAS P. O'NEILL, JR., a Representative from the State of Massachusetts.

The CLERK. The Clerk now recognizes the gentleman from Illinois (Mr. ANDERSON).

Mr. ANDERSON of Illinois. Mr. Clerk, as chairman of the Republican Conference and by authority, by direction, and by unanimous vote of the Republican Conference, I nominate for Speaker of the House of Representatives the Honorable JOHN J. RHODES, a Representative-elect from the State of Arizona to the 95th Congress.

The CLERK. The Honorable THOMAS P. O'NEILL, JR., a Representative-elect from the State of Massachusetts, and the Honorable JOHN J. RHODES, a Representative-elect from the State of Arizona, have been placed in nomination.

Are there further nominations?

There being no further nominations, the Clerk will appoint tellers.

The Clerk appoints the gentleman from New Jersey (Mr. THOMPSON), the gentleman from Alabama (Mr. DICKINSON), the gentlewoman from New York (Mrs. CHISHOLM), the gentlewoman from Massachusetts (Mrs. HECKLER).

Tellers will come forward and take their seats at the desk in front of the Speaker's rostrum.

The roll will now be called, and those responding to their names will indicate by surname the nominee of their choice.

The reading clerk will call the roll.

The tellers having taken their places, the House proceeded to vote for the Speaker.

The following is the result of the vote:

[Roll No. 2]

Answered present—

O'Neill Rhodes

The CLERK. The tellers agree in their tallies that the total number of votes cast is 434, of which the Honorable THOMAS P. O'NEILL, JR., of Massachusetts, has received 290 votes, and the Honorable JOHN J. RHODES, of Arizona, has received 142, with 2 voting "present."

Therefore, the Honorable THOMAS P. O'NEILL, JR., of Massachusetts, is duly elected Speaker of the House of Representatives for the 95th Congress, having received a majority of the votes cast.

The Clerk appoints the following committee to escort the Speaker-elect to the chair: The gentleman from Arizona (Mr. RHODES), the gentleman from Texas (Mr. WRIGHT), the gentleman from Illinois (Mr. MICHEL), the gentleman from Washington (Mr. FOLEY), the gentleman from Massachusetts (Mr. BOLAND), and the gentleman from Massachusetts (Mr. CONTE).

Without objection, the Clerk appoints the two former distinguished Speakers, the honorable gentleman from Massachusetts, Mr. John W. McCormack, and the honorable gentleman from Oklahoma, Mr. Carl Albert, to the Escort Committee.

There was no objection.

The Doorkeeper announced the Speaker-elect of the House of Representatives of the 95th Congress, who was escorted to the chair by the Committee of Escort.

Mr. RHODES. Mr. Speaker-elect, Mr. Speaker Albert, Mr. Speaker McCormack, my colleagues, guests, ladies and gentlemen, it is always a solemn occasion when the House of Representatives chooses a Speaker. It is particularly fitting that our two Speakers who have served in this capacity so honorably for so many years are here today.

It is equally fitting, of course, that we have elected to be the Speaker of the House a man who has served this body so honorably and well. Believe me, it is not an easy task to run against TIP O'NEILL anytime, but to run against him in this particular Congress as a Republican was a humbling experience. Nevertheless, it is a great honor to be the candidate for Speaker of the Republican Party, and to serve as minority leader when defeated.

Mr. Speaker-elect, I assure you that it will be my job as the leader of the minority to do everything I can to make sure that the minority fulfills that greatest of all purposes: that is, to be the anvil upon which the majority hammers out its legislative program. And if that sounds a little violent, perhaps it sometimes is, but nevertheless I have the feeling—and I know you share the feeling—that we are all working for the same goal, toward the same ends and for the welfare of the American people.

I also want to say, Mr. Speaker-elect, that once upon a time I wrote a book, and in that book I said that you were the most partisan man I ever knew. I am expecting you to work for the next 2 years to prove what a liar I am.

I do not need to tell you, and I do not need to tell those present here, that the Speaker is the Speaker of the whole House. He has the duty and the honor of serving all of the Members as Speaker, and I am sure that as he does, he will take into consideration the fact that the Members of the minority represent some 71 million Americans, that they have their jobs to do here, and their people to represent. Of course, the main job, the main task with which a Speaker is honored, is to make sure that the legislative program goes forward, and I know you will do that.

As the leader of the minority, I promise you that when we are in opposition—and we may be from time to time—we will be as vigorous as we can, but we will not oppose for the sake of opposition alone. If you have a legislative program—and I hope that you will—that is worthy of our consideration, we will consider it eagerly.

Mr. Speaker-elect, you are my friend. We came to Congress together about a hundred years ago. We will retain that friendship through these next 2 years.

Now, it is my great honor and my duty, which I am proud to perform, to introduce to the Members of the House the man who will, in my opinion, be the greatest one-term Speaker that this House has ever had; your Speaker, my Speaker, a great Speaker, my good friend THOMAS P. O'NEILL, JR.

[Applause, Members rising.]

Mr. O'NEILL. I thank the distinguished gentleman from Arizona (Mr. RHODES). My colleague well knows I understand that he has his eye on the Speaker's seat. I am sure that is all he has on it.

I was delighted to break precedent today to have the Honorable Carl Albert, and the Honorable John McCormack, our former Speakers, escort me down the aisle. I was more than grateful to the group that marched with me, including my good friend, the gentleman from Massachusetts (Mr. BOLAND), who came to Congress with me so many years ago and with whom I have lived.

My colleagues and friends, it is with heartfelt gratitude that I stand before you, ready to pick up the gavel as Speaker of the House. Few men have the good fortune to see their dreams realized. But thanks to you, and to the people of the Eighth Congressional District of Massachusetts, I am about to assume the highest office that I have ever aspired to.

In electing me your Speaker, you have placed your trust in me. You have given me authority as the constitutional head of the House. I will spare no effort to discharge the responsibilities that come with that authority. I will spare no effort to justify your trust.

A great Speaker of the House, Henry Clay, once outlined certain principles that he thought should guide a Speaker. These same principles, to paraphrase them, will guide me.

I pledge to be prompt and impartial in deciding parliamentary questions. I pledge to be patient, good tempered, and courteous toward the individual Members. I pledge best to employ the talent of the House for full and fair consideration of issues that come before us. In those "moments of agitation from which no deliberative assembly is always entirely exempt," I pledge to "remain cool and unshaken, guarding the permanent laws and rules of the House from being sacrificed to temporary passions, prejudices, or interests."

This House is made up of individuals—individuals who represent every facet of our society. As your Speaker, I intend to insure that every Member is treated fairly. In the future, as in the past, I will maintain an open door policy with all Members.

This House is greater than any of us. Its greatness is the product of 435 human beings collectively contending with extraordinary problems. If the House is truly to fulfill its role as a coequal partner in Government, we must all work together. No Member can be allowed to abuse his position so as to bring discredit upon this House or to obstruct its work.

I have served in the House of Representatives and this Congress for 24 years. It is not an efficient institution, but it is the most democratic arm of our Government. We are the people's representatives. We must act so as to justify their faith in us.

I have been in politics all my life. I am proud to be a politician. No other career affords as much opportunity to help people, and there is no better political office from which to serve people than as a Member of Congress.

These past several years have seen Congress reassert its rightful place in our scheme of government. With the War Powers Act and the new budget process, with increasingly vigilant oversight. Congress is providing that it is capable of operating on an equal footing with the Executive. Commonsense and the Constitution demand that Pennsylvania Avenue remain a two-way street.

The tasks before us are difficult. By history's yardstick, we are a young nation. We are a nation with a proud heritage. It is a heritage set down by the Founding Fathers in the Declaration of Independence and in the Constitution. It is a heritage that has attracted, and was enriched by, immigrants from all across the world.

Our Nation is dedicated to equal opportunity and the dignity of every individual, but no individual can find dignity when society tells him that there is no job for which he deserves to be paid. Our first priority must be to put Americans back to work.

In partnership with the new President, this new Congress faces a long agenda. Not only must we restore economic good health, we must restore faith in the Federal Government by proving that it can operate efficiently and honestly. We must bolster public confidence in Congress by adopting, and living by, a tough code of ethics.

We must reaffirm our compassion for people by trying to provide better health care and education, to guarantee a decent standard of living for all our citizens, and to distribute the financial burdens of both Federal and local government more equitably. We must expand upon current energy conservation programs and explore alternative long-range sources of energy and raw materials.

As a nation, we must demonstrate that democracy does work. Today, fewer than 25 nations retain democratic forms of government. The future will bring even greater challenges to democratic government—challenges that will lead others to look to us for assistance and inspiration.

As we enter our third century, let us recall the courage and wisdom of that brave band of men and women who founded this Nation. Let us keep faith with them by making sure that the United States stands out as an example of what democracy can achieve. Ours may indeed be the worst form of government—except for all others.

On the floor with us today to witness this ceremony are more than 200 young people—brothers and sisters, sons and daughters, and grandsons and granddaughters of Members of the 95th Congress. It is with their interests as well as our own in mind that we undertake our duties.

Let us forget the frustrations of the past, and think of our unfulfilled potential.

Let us not concern ourselves with what we have tried and failed, but with what is still possible to do.

Let us spare no energy that the Nation and the world may be better for our efforts.

Now I am prepared to take the oath as Speaker of this great House. I hope to be true to the distinguished history and tradition of this institution. With God's help, and yours, I hope to be a good Speaker.

I ask the distinguished dean of the House, Mr. MAHON of Texas, to administer the oath.

Thank you.

Mr. MAHON then administered the oath of office to Mr. O'NEILL, of Massachusetts.

[Applause, the Members rising.]

SWEARING IN OF MEMBERS

The SPEAKER. According to the precedent, the Chair will swear in all Members of the House at this time.

If the Members will rise, the Chair will now administer the oath of office.

The Members-elect and Delegates-elect and the Resident Commissioner-elect rose, and the Speaker administered the oath of office to them.

The SPEAKER. The gentlemen and gentlewomen are now Members of Congress.

The Chair recognizes the gentleman from Washington (Mr. FOLEY).

MAJORITY LEADER

Mr. FOLEY. Mr. Speaker, as chairman of the Democratic Caucus, I have been directed to report to the House that the Democratic Members have selected as majority leader the gentleman from Texas, the Honorable JIM WRIGHT.

The SPEAKER. The Chair now recognizes the gentleman from Illinois (Mr. ANDERSON).

MINORITY LEADER

Mr. ANDERSON of Illinois. Mr. Speaker, as chairman of the Republican Conference, I am directed by that conference to officially notify the House that the gentleman from Arizona, the Honorable JOHN J. RHODES, has been selected as the minority leader of the House.

MAJORITY WHIP

Mr. FOLEY. Mr. Speaker, I have the honor to advise Members of the House that the gentleman from Indiana, Mr. BRADEMAS, will act as whip of the Democratic Party for the 95th Congress.

MINORITY WHIP

Mr. ANDERSON of Illinois. Mr. Speaker, as chairman of the Republican Conference, I am directed by that conference to notify the House officially that the Republican Members have selected as minority whip the gentleman from Illinois, the Honorable ROBERT MICHEL.

ELECTION OF CLERK OF THE HOUSE, SERGEANT AT ARMS, DOORKEEPER, POSTMASTER, AND CHAPLAIN

Mr. FOLEY. Mr. Speaker, I offer a resolution (H. Res. 1) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That Edmund L. Henshaw, Jr., of the Commonwealth of Virginia, be, and he is hereby, chosen Clerk of the House of Representatives;

That Kenneth R. Harding, of the Commonwealth of Virginia, be, and he is hereby, chosen Sergeant at Arms of the House of Representatives;

That James T. Molloy, of the State of New York, be, and he is hereby, chosen Doorkeeper of the House of Representatives;

That Robert V. Rota, of the Commonwealth of Pennsylvania, be, and he is hereby, chosen Postmaster of the House of Representatives;

That Reverend Edward G. Latch, D.D., of the State of Maryland, be, and he is hereby, chosen Chaplain of the House of Representatives.

Mr. ANDERSON of Illinois. Mr. Speaker, I shall offer a substitute for the resolution just offered by the gentleman from Washington (Mr. FOLEY) but before doing so, I would request that there be a division of the question on the resolution so that we may have a separate vote on the office of the Chaplain.

The SPEAKER. The question is on agreeing to the portion of the resolution providing for the election of the Chaplain.

That portion of the resolution was agreed to.

SUBSTITUTE AMENDMENT OFFERED BY MR. ANDERSON OF ILLINOIS

Mr. ANDERSON of Illinois. Mr. Speaker, I offer a substitute amendment for the remainder of the resolution.

The Clerk read the substitute amendment, as follows:

Amendment offered by Mr. Anderson of Illinois as a substitute for the remainder of House Resolution 1:

Resolved, That Joe Bartlett, of the State of Ohio, be, and he is hereby, chosen Clerk of the House of Representatives;

That Walter P. Kennedy, of the State of New Jersey, be, and he is hereby, chosen Sergeant at Arms of the House of Representatives;

That Tommy Lee Winebrenner, of the State of Indiana, be, and he is hereby, chosen Doorkeeper of the House of Representatives;

That Ronald W. Lasch, of the State of New Jersey, be, and he is hereby, chosen Postmaster of the House of Representatives.

The SPEAKER. The question is on the substitute amendment offered by the gentleman from Illinois (Mr. ANDERSON).

The substitute amendment was rejected.

The SPEAKER. The question is on the resolution offered by the gentleman from Washington (Mr. FOLEY).

The resolution was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER. Will the officers elected present themselves in the well of the House?

The officers-elect presented themselves at the bar of the House and took the oath of office.

NOTIFICATION TO SENATE OF ORGANIZATION OF THE HOUSE

Mr. WRIGHT. Mr. Speaker, I offer a resolution (H. Res. 2) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 2

Resolved, That a message be sent to the Senate to inform that body that a quorum of the House of Representatives has assembled; that Thomas P. O'Neill, Jr., a Representative from the State of Massachusetts, has been elected Speaker; and Edmund L. Henshaw, Jr., a citizen from the Commonwealth of Virginia, has been elected Clerk of the House of Representatives for the Ninety-fifth Congress.

The resolution was agreed to.

A motion to reconsider was laid on the table.

COMMITTEE TO NOTIFY THE PRESIDENT OF THE UNITED STATES OF THE ASSEMBLY OF THE CONGRESS

Mr. WRIGHT. Mr. Speaker, I offer a resolution (H. Res. 3) and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES 3

Resolved, That a committee of three Members be appointed by the Speaker on the part of the House of Representatives to join with a committee on the part of the Senate to notify the President of the United States that a quorum of each House has been assembled, and that Congress is ready to receive any communication that he may be pleased to make.

The resolution was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER. The Chair appoints as members of the committee on the part of the House to join the committee on the part of the Senate to notify the President of the United States that a quorum of each House has been assembled, and that Congress is ready to receive any communication that he may be pleased to make, the gentleman from Texas (Mr. WRIGHT), the gentleman from Arizona (Mr. RHODES), and the gentleman from Indiana (Mr. BRADEMAS).

AUTHORIZING THE CLERK TO INFORM THE PRESIDENT OF THE UNITED STATES OF THE ELECTION OF THE SPEAKER AND THE CLERK OF THE HOUSE OF REPRESENTATIVES

Mr. MAHON. Mr. Speaker, I offer a resolution (H. Res. 4) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 4

Resolved, That the Clerk be instructed to inform the President of the United States that the House of Representatives has elected Thomas P. O'Neill, Jr., a Representative from the State of Massachusetts, Speaker; and Edmund L. Henshaw, Jr., a citizen from the Commonwealth of Virginia, Clerk of the House of Representatives of the Ninety-fifth Congress.

The resolution was agreed to.

A motion to reconsider was laid on the table.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed resolutions of the following titles, in which the concurrence of the House is requested:

S. Con Res. 1. Concurrent resolution to provide for the counting on January 6, 1977, of the electoral votes for President and Vice President of the Untied States.

S. Res. 1

Resolved, That a committee consisting of two Senators be appointed by the Vice President to join such committee as may be appointed by the House of Representatives to wait upon the President of the United States and inform him that a quorum of each House is assembled and that the Congress is ready to receive any communication he may be pleased to make.

S. Res. 2

Resolved, That the Secretary inform the House of Representatives that a quorum of the Senate is assembled and that the Senate is ready to proceed to business.

The message also announced that the Vice President, pursuant to Public Law 79–585, and under the authority of Senate Resolution 584 of the 94th Congress, 2d session, appointed Mr. DOMENICI to be a member, on the part of the Senate, of the Joint Committee on Atomic Energy, vice Mr. Buckley, resigned.

The message also announced that the Vice President, pursuant to Public Law 94–280, and under the authority of Senate Resolution 584 of the 94th Congress, 2d session, appointed Mr. STAFFORD to be a member, on the part of the Senate, of the National Transportation Policy Study Commission, vice Mr. Buckley, resigned.

RULES OF THE HOUSE

Mr. WRIGHT. Mr. Speaker, I offer a privileged resolution (H. Res. 5) and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 5

Resolved, That the Rules of the House of Representatives of the Ninety-fourth Congress, including all applicable provisions of law which constituted the Rules of the House at the end of the Ninety-fourth Congress, be, and they are hereby, adopted as the Rules of the House of Representatives of the Ninety-fifth Congress, with the following amendments included therein as part thereof, to wit:

(1) In Rule X, clause 1(b), strike out the word "Unexpected" and insert in lieu thereof "Unexpended";

(2) In Rule X, clause 1(c), insert immediately after subparagraph (10) the following new subparagraph:

"(11) Military applications of nuclear energy.";

(3) In Rule X, clause 1(d), strike out "Committee on Banking, Currency and Housing" and insert in lieu thereof "Committee on Banking, Finance and Urban Affairs";

(4) In Rule X, clause 1(j), insert immediately after subparagraph (16) the following new subparagraph:

"(17) Regulation of the domestic nuclear energy industry, including regulation of research and development reactors and nuclear regulatory research.";

(5) In Rule X, clause 1(k), insert before the period at the end of the subparagraph (14) the following: ", including nonproliferation of nuclear technology and nuclear hardware" and insert before the period at the end of subparagraph (15) the following: ", including all agreements for cooperation in the export of nuclear technology and nuclear hardware,";

(6) In Rule X, clause 1(l), insert at the end thereof the following: "Such committee shall have the same jurisdiction with respect to regulation of nuclear facilities and of use of nuclear energy as it has with respect to regulations of nonnuclear facilities and of use of nonnuclear energy. In addition to its legislative jurisdiction under the preceding provisions of this paragraph (and its general oversight functions under clause 2(b)(1)), such committee shall have the special oversight functions provided for in clause (3)(h) with respect to all laws, programs, and government activities affecting nuclear energy.";

(7) In Rule X, clause 1(m), strike out the last two paragraphs thereof;

(8) In Rule X, clause 1(r), strike out "except nuclear research and development" in subparagraph (11);

(9) In Rule X, clause 1(t), strike out subparagraphs (2) and (3) and strike out the word "provisions" and insert in lieu thereof "provision", and in rule X, clause 1(q), strike out the words "or relating to financial disclosure by a Member, officer, or employee of the House of Representatives" in subparagraph (1);

(10) In Rule X, clause 3, insert at the end thereof the following:

"(h) The Committee on Interstate and Foreign Commerce shall have the function of reviewing and studying on a continuing basis, all laws, programs and Government activities relating to nuclear energy.";

(11) In rule X, clause 4(a)(2), strike out "clause 5(j)" and insert in lieu thereof "clause 4(h)";

(12) In rule X, clause 4(e)(2), insert at the end thereof the following:

"(E) A member of the committee may disqualify himself from participating in any investigation of the conduct of a Member, officer, or employee of the House upon the submission in writing and under oath of an affidavit of disqualification stating that he cannot render an impartial and unbiased decision in the case in which he seeks to disqualify himself. If the committee approves and accepts such affidavit of disqualification, the chairman shall so notify the Speaker and request the Speaker to designate a Member of the House from the same political party as the disqualifying member of the committee to act as a member of the committee in any committee proceeding relating to such investigation.";

(13) In rule X, clause 5(c), strike out the words "after the first":

(14) In Rule X, clause 5, insert at the end thereof the following:

"(e) No bill or resolution introduced or received in the House shall be referred to the Joint Committee on Atomic Energy.";

(15) In Rule X, clause 6(e), insert at the end thereof the following: "The Speaker shall name Members who are primarily responsible for the legislation and shall, to the fullest extent feasible, include the principal proponents of the major provisions of the bill as it passed the House.";

(16) In Rule XI, clause 2(e)(2), insert immediately before the period at the end thereof the following: ", except that in the case of records in the Committee on Standards of Official Conduct respecting the conduct of any Member, officer, or employee of the House, no Member of the House (other than a member of such committee) shall have access thereto without the specific, prior approval of the committee";

(17) In Rule XI, clause 2(g)(1), strike out "clause 4(a)(3)" and insert in lieu thereof "clause 4(a)(1)";

(18) In Rule XI, clause 2(g), strike out the word "quorum" wherever it appears and insert in lieu thereof the word "majority";

(19) In Rule XI, clause 2(g)(2), insert immediately after "House of Representatives" the following: ". No Member may be excluded from nonparticipatory attendance at any hearing of any committee or subcommittee, with the exception of the Committee on

Standards of Official Conduct, unless the House of Representatives shall by majority vote authorize a particular committee or subcommittee, for purposes of a particular series of hearings on a particular article of legislation or on a particular subject of investigation, to close its hearings to Members by the same procedures designated in this subparagraph for closing hearings to the public";

(20) In Rule XI, clause 2(h) is amended to read as follows: "Quorum for taking testimony and certain other action.

"(h)(1) Each committee may fix the number of its members to constitute a quorum for taking testimony and receiving evidence which shall be not less than two.

"(2) Each committee (except the Committee on Appropriations, the Committee on the Budget, and the Committee on Ways and Means) may fix the number of its members to constitute a quorum for taking any action other than the reporting of a measure or recommendation which shall be not less than one-third of the members.";

(21) In Rule XI, clause 2(i) is amended to read as follows:

"(1) No committee of the House (except the Committee on Appropriations, the Committee on the Budget, the Committee on Rules, and the Committee on Standards of Official Conduct) may sit, without special leave, while the House is reading a measure for amendment under the five-minute rule. For purposes of this paragraph, special leave will be granted unless 10 or more Members object.";

(22) In Rule XI, clause 2(l)(3)(A) is amended to read as follows: "(A) shall include the oversight findings and recommendations required pursuant to clause 2(b)(1) of Rule X separately set out and clearly identified;";

(23) In Rule XI, clause 2(l)(3)(D), strike out "clause 2(b)(2)" and insert in lieu thereof "clause 4(c)(2)";

(24) In Rule XI, clause 2(l)(6), strike out the words "following the day" in the first sentence, and insert a comma after the word "holidays";

(25) In Rule XI, clause 2(m)(2)(A) is amended to read as follows:

"(2)(A) A subpena may be authorized and issued by a committee or subcommittee under subparagraph (1)(B) in the conduct of any investigation or series of investigations or activities, only when authorized by a majority of the members voting, a majority being present. The power to authorize and issue subpenas under subparagraph (1)(B) may be delegated to the chairman of the committee pursuant to such rules and under such limitations as the committee may prescribe. Authorized subpenas shall be signed by the chairman of the committee or by any member designated by the committee.";

(26) In Rule XI, clause 2(n) is amended to read as follows:

"(n) Funds authorized for a committee under clause 5 are for expenses incurred in the committee's activities; however, local currencies owned by the United States shall be made available to the committee and its employees engaged in carrying out their official duties outside the United States, its territories or possessions. No appropriated funds, including those authorized under clause 5, shall be expended for the purpose of defraying expenses of members of the committee or its employees in any country where local currencies are available for this purpose; and the following conditions shall apply with respect to travel outside the United States or its territories or possessions:

"(1) No member or employee of the committee shall receive or expend local currencies for subsistence in any country at a rate in excess of the maximum per diem rate set forth in applicable Federal law.

"(2) Each member or employee of the committee shall make to the chairman of the committee an itemized report showing the dates each country was visited, the amount of per diem furnished the cost of transportation furnished, any funds expended for any other official purpose and shall summarize in these categories the total foreign currencies and/or appropriated funds expended. All such individual reports shall be filed no later than sixty days following the completion of travel with the chairman of the committee for use in complying with reporting requirements in applicable Federal law and shall be open for public inspection.";

(27) In Rule XI, clause 4 is amended by adding at the end thereof the following:

"(e)(1) On any legislative day when reports from the Committee on Rules are being considered, the Speaker may announce to the House, in his discretion, before consideration of the first resolution, that he will postpone further proceedings on such of the resolutions reported from that Committee as he may designate if a recorded vote or the yeas and nays are ordered or if the vote is objected to under clause 4 of Rule XV when the Chair puts the question on the previous question or on the adoption of the resolution, until all such resolutions have been considered and any debate thereon concluded, with the question having been put and determined on each such resolution on which the taking of the vote will not be postponed.

"(2) When the last of such resolutions so designated has been considered and any debate thereon concluded, with the question put and determined on each such resolution on which further proceedings were not postponed, the Speaker shall put the appropriate question on each such resolution on which further proceedings were postponed in the order in which each such resolution was considered.

"(3) At any time after the vote on the question has been taken on the first resolution on which the Speaker has postponed further proceedings under this paragraph, the Speaker may, in his discretion, reduce to not less than five minutes the period of time within which a recorded vote on the appropriate question may be taken on any or all of the additional resolutions on which the Speaker has postponed further proceedings under this paragraph.

"(4) If the House adjourns before the question is put and determined on all resolutions on which further proceedings were postponed under this paragraph, then, on the next following legislative day, the first order of legislative business, after the disposition of business on the Speaker's table and such other legislative matters as the Speaker in his discretion may direct, shall be the disposition of all such resolutions previously undisposed of, in the order in which those resolutions were entertained.";

(28) In Rule XI, clause 5(a), (b) and (c)(1) is amended to read as follows:

"5. (a) Whenever any committee, commission or other entity (except the Committee on Appropriations and the Committee on the Budget) is to be granted authorization for the payment, from the contingent fund of the House, of its expenses in any year, other than those expenses to be paid from appropriations provided by statute, such authorization initially shall be procured by one primary expense resolution for the committee, commission or other entity providing funds for the payment of the expenses of the committee, commission or other entity for that year from the contingent fund of the House. Any such primary expense resolution reported to the House shall not be considered in the House unless a printed report on that resolution has been available to the Members of the House for at least one calendar day prior to the consideration of that resolution in the House. Such report shall, for the information of the House—

"(1) state the total amount of the funds to be provided to the committee, commission or other entity under the primary expense resolution for all anticipated activities and programs of the committee, commission or other entity; and

"(2) to the extent practicable, contain such general statements regarding the estimated foreseeable expenditures for the respective anticipated activities and programs of the committee, commission or other entity as may be appropriated to provide the House with basic estimates with respect to the expenditure generally of the funds to be provided to the committee, commission or other entity under the primary expense resolution.

"(b) After the date of adoption by the House of any such primary expense resolution for any such committee, commission or other entity for any year, authorization for the payment from the contingent fund of additional expenses of such committee, commission or other entity in that year, other than those expenses to be paid from appropriations provided by statute, may be procured by one or more supplemental expense resolutions for that committee, commission or other entity as necessary. Any such supplemental expense resolution reported to the House shall not be considered in the House unless a printed report on that resolution has been available to the Members of the House for at least one calendar day prior to the consideration of that resolution in the House. Such report shall, for the information of the House—

"(1) state the total amount of additional funds to be provided to the committee, commission or other entity under the supplemental expense resolution and the purpose or purposes for which those additional funds are to be used by the committee, commission or other entity; and

"(2) state the reason or reasons for the failure to procure the additional funds for the committee, commission or other entity by means of the primary expense resolution.

"(c) The preceding provisions of this clause do not apply to—

"(1) any resolution providing for the payment from the contingent fund of the House of sums necessary to pay compensation for staff services performed for, or to pay other expenses of, any committee, commission or other entity at any time from and after the beginning of any year and before the date of adoption by the House of the primary expense resolution providing funds to pay the expenses of that committee, commission or other entity for that year; or";

(29) In Rule XI, clause 6(c) is amended by inserting immediately preceding the period at the end thereof the following: ", except that two professional staff members of each standing committee shall be entitled to pay at a single per annum gross rate to be fixed by the chairman, which does not exceed the highest rate of basic pay, as in effect from time to time, of level IV of the Executive Schedule in section 5215 of Title 5 United States Code";

(30) In Rule XI, clause 6 is amended by striking out paragraph (j) thereof;

(31) In Rule XIII, clause 7 is amended by striking out paragraph (c) thereof and by redesignating the succeeding paragraphs (d) and (e) as (c) and (d) respectively;

(32) In Rule XV, clause 6 is amended by inserting at the end thereof the following new paragraph:

"(e)(1) Except as provided by subparagraph (2), it shall not be in order to make or entertain a point of order that a quorum is not present unless the Speaker has put the pending motion or proposition to a vote.

"(2) Notwithstanding subparagraph (1), it shall always be in order for a Member to move a call of the House when recognized for that purpose by the Speaker.";

(33) In Rule XXIII, clause 2 is amended to read as follows:

"2. A quorum of a Committee of the Whole shall consist of one hundred Members. The first time that a Committee of the Whole finds itself without a quorum during any day, the Chairman shall invoke the procedure for the call of the roll under clause 5 of Rule XV, unless, in his discretion, he orders a call of the Committee to be taken by the procedure set forth in clause (2)(b) of Rule XV; and thereupon the Committee shall rise and the Chairman shall report the names of the absentees to the House, which shall be entered on the Journal; but if on such call a quorum shall appear, the Committee shall thereupon resume its sitting without further order of the House. After the roll has been once called to establish a quorum during such day, the Chairman may not entertain a point of order that a quorum is not present and may not invoke the procedure for the call of the roll under clause 5 of Rule XV or order a call of the Committee to be taken by the procedure set forth in clause (2)(b) of Rule XV unless the Committee is operating under the five-minute rule and the Chairman has put the pending motion or proposition to a vote. If, at any time during the conduct of any quorum call in a Committee of the Whole, the Chairman determines that a quorum is present, he may, in his discretion, declare that a quorum is constituted. Proceedings under the call shall be considered as vacated, and the Committee shall not rise but shall continue its sitting and resume its business.";

(34) In Rule XXIII, after clause 7, insert a new clause 8 as follows:

"8. At the conclusion of general debate in a Committee of the Whole on any concurrent resolution on the budget pursuant to section 305(a) of the Congressional Budget Act of 1974, the concurrent resolution shall be considered as having been read for amendment.", and redesignate clause (8) as clause (9);

(35) In Rule XXVII, clause 1 is amended to read as follows:

"1. No rule shall be suspended except by a vote of two-thirds of the Members voting, a quorum being present; nor shall the Speaker entertain a motion to suspend the rules except on Mondays and Tuesdays, and during the last six days of a session.";

(36) In Rule XXVII, clause 3(b) is amended by striking out the word "Rules" wherever it appears and inserting in lieu thereof "rules";

(37) In Rule XXVIII, clause 6 is amended to read as follows:

"6. (a) Each conference committee meeting between the House and Senate shall be open to the public except when the House, in open session, has determined by a rollcall vote of a majority of those Members voting that all or part of the meeting shall be closed to the public.

"(b)(1) After the reading of the report and before the reading of the joint statement, a point of order may be made that the committee of conference making the report to the House has failed to comply with paragraph (a) of this clause.

"(2) If such point of order is sustained, the conference report shall be considered as rejected, the House shall be considered to have insisted upon its amendment(s) or upon disagreement to the amendment(s) of the Senate, as the case may be, and to have requested a further conference with the Senate, and the Speaker shall be authorized to appoint new conferees without intervening motion.";

(38) In Rule XXXII, clause 1 is amended by striking out "the Parliamentarian" and all that follows through "subject to the provision of clause 3 of this rule;" and insert in lieu thereof the following: "the Parliamentarian, elected officers and elected minority employees of the House (other than Members); and ex-Members of the House of Representatives, former Parliamentarians of the House, and former elected officers and elected minority employees of the House, subject to the provisions of clause 3 of this rule; and clerks of committees when business from their committee is under consideration and not more than one person from a Member's staff when that Member has an amendment under consideration, subject to the provisions of clause 4 of this rule;";

(39) In Rule XXXII, insert the following new clause at the end thereof:

"4. Persons from Member's staffs admitted to the Hall of the House or rooms leading thereto under clause 1 shall be admitted only upon prior notification to the Speaker. No such person or clerk of a committee so admitted under clause 1 shall engage in efforts in the Hall of the House or rooms leading thereto to influence Members with regard to the legislation being amended. Such persons and clerks shall remain at the desk and are admitted only to advise the Member or committee responsible for their admission. Any such person or clerk who violates this clause may be excluded during the session from the Hall of the House and rooms leading thereto by the Speaker.";

(40) In Rule XLIV, strike out "not later than April 30, 1969, and by April 30 of each year thereafter," and insert in lieu thereof "by April 30 of each year,".

Mr. WRIGHT (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the resolution be dispensed with in order that we may proceed under the rule, during which time I would undertake to explain briefly what changes would be made to the rules of the House by the resolution, and during which time I would expect to yield 30 minutes, or exactly one-half of the time allotted, to the gentleman from Arizona (Mr. RHODES) for his use, yielding only for purposes of debate.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. RHODES. Mr. Speaker, reserving the right to object, the amendments to the rules of the 94th Congress which are to be offered are rather extensive and far reaching. I think it would be well and perhaps would serve the purpose of conserving time and keeping the Members informed better if the amendments were to be read. Therefore, regretfully, I do object.

Mr. WRIGHT. Mr. Speaker, would the gentleman withhold his objection and yield for a brief colloquy?

Mr. RHODES. Yes, Mr. Speaker, but I reserve the right to object.

Mr. WRIGHT. Mr. Speaker, I hope that the gentleman is aware—and I should have made Members aware—that there are some 400 copies of these changes available at the back of the Chamber for each Member. They may secure them at their pleasure.

Does the gentleman still insist upon his reservation of objection?

Mr. RHODES. I feel constrained to do that. I think the time is necessary for the Members to get these copies and look them over, and I believe they can do this better and understand the resolution better if the Members have the copy before them.

Mr. Speaker, I do object.

The SPEAKER. Objection is heard.

The Clerk will continue the reading of the resolution.

The Clerk continued to read the resolution.

Mr. WRIGHT (during the reading). Mr. Speaker, I rise for the purpose of renewing my request and I just wonder if the gentleman from Arizona, now that all Members have had an opportunity to secure and digest the material contained in the resolution, would yield and agree to dispense with further reading of the resolution?

Mr. RHODES. Mr. Speaker, reserving the right to object, the Clerk, has read through paragraph 16 of the resolution.

I can understand the desire of the gentleman from Texas to have the rest of the rules considered as read. I have to agree with the gentleman that probably listening to the gentleman explain the amendments in his resolution will leave the House better informed than trying to read the official language of the rules. I will yield to my own assessment of the gentleman's eloquence, Mr. Speaker, and withdraw my objection.

The CHAIRMAN pro tempore (Mr. NATCHER). The gentleman from Texas (Mr. WRIGHT) is recognized for 1 hour.

Mr. WRIGHT. Mr. Speaker, I shall yield 30 minutes of that time to the distinguished gentleman from Arizona (Mr. RHODES), pending which I shall yield myself such time as I may consume, during which I shall attempt to describe exactly what the rules changes proposed by the Democratic Caucus and embodied in this resolution would entail.

Mr. Speaker, with the exception of purely technical, conforming amendments, relating to spelling, typography, sequential numbering and so forth, the basic changes embodied in this resolution relate to four or five general areas.

First, they concern the powers of the Speaker.

Second, they deal with the powers and the privileges of committees of the House.

Third, there are a number of changes respecting the conduct of business on the floor of the House.

Finally, there are certain specific changes with respect to the Committee on Standards of Official Conduct and with respect to the Joint Committee on Atomic Energy.

Regarding the powers of the Speaker, the rule changes herein proposed would do the following things:

First, they would permit the Speaker at his discretion to impose a time limit upon committees to which bills have been sequentially referred and to require those committees to report the bills back within the stipulated time.

Second, a change would provide additional guidelines to the Speaker in appointing conferees, suggesting that he consider appointing sponsors of major successful amendments which have been adopted on the floor of the House.

Third, there is a rule which would permit the Speaker to facilitate the business of the House by postponing votes on relatively noncontroversial rules, reported from the Committee on Rules,

then taking them in sequence after the debate on all the rules has been completed. This would be similar, in effect, to the manner in which the Speaker now may schedule votes on motions to suspend the rules and pass various bills.

Mr. RHODES. Mr. Speaker, will the gentleman yield for a question?

Mr. WRIGHT. Of course, I am happy to yield to the distinguished minority leader.

Mr. RHODES. I just want to clarify what the gentleman just said. Is my understanding correct that the authority which the rule change gives the Speaker to group votes is confined to matters which are resolutions of the House; House resolutions, rules and other resolutions which might pertain to other matters, particularly allowances for committees to expend funds for various purposes? I just wonder how far it goes, in other words.

Mr. WRIGHT. So far as I am able to determine and will so advise my colleague, it applies only to the one specific area which I have earlier enumerated; those rules reported from the Committee on Rules up for consideration by the House establishing procedures for the debate of bills.

Mr. RHODES. I thank the gentleman.

Mr. WRIGHT. There is another rule which will permit the Speaker to schedule suspensions on any Monday or Tuesday, and during the last 6 days of the session. A second category of changes regards the committees of the House, their powers and privileges and responsibilities. One would permit the committees to adopt a rule in their proceedings allowing one-third of the members of each committee or subcommittee to constitute a quorum, except that a majority must be present in all cases to close committee meetings and hearings and a majority must in all cases be present to report a measure to the floor, and to authorize the issuance of subpenas.

A second change concerning committees would allow committees to exclude Members of Congress who are noncommittee members from attendance at hearings only when so authorized by a majority vote of the House and then only by the same rollcall procedures which apply to closing hearings to the public.

A third rule would permit four specific committees, the Committees on Appropriations, Budget, Rules and Standards of Official Conduct, to sit at any time while the House is in session, and would permit any other committee to sit during the 5-minute rule unless 10 Members should object.

A fourth category of change would authorize committees or subcommittees to issue subpenas upon a vote of a majority of the members of the committee or subcommittee; not simply a majority of a quorum otherwise established, but in this instance a majority of the members of the committee or subcommittee. It would permit a majority of the members of the committee to delegate that authority to the chairman of that full committee.

Finally, a rules change would require Members to report all official committee travel to the chairman of the committee within 60 days, and then require the chairman to submit a report to the House Administration Committee.

A third category of changes regards the business of the House on the floor of the House.

Mr. BAUMAN. Mr. Speaker, will the gentleman yield for a question?

Mr. WRIGHT. I yield to the gentleman from Maryland.

Mr. BAUMAN. I thank the gentleman for yielding.

Mr. Speaker, with regard to the rules amendments that the gentleman has just described, he has noted that one of the new rules changes provide for committees of the House to sit with as few as one-third constituting a quorum.

There is also a general power which allows committees of the House to adopt rules of the House as their own in any instances where the committee's rules do not conflict.

But the pending rules also provide for a further change that says that no further point of no quorum can be made once a quorum is established at the beginning of the meeting of the House or by extension one must assume, once a quorum is established in a legislative committee.

Is the gentleman, therefore, telling us that a legislative committee can meet with as few as one-third of the members present for a markup session, then that one-third membership can drift away and as few as two or three members can remain to mark up a bill and that no point of order of no quorum can be made until the bill is finally reported out? Will that be the case under these rules?

Mr. WRIGHT. Mr. Speaker, I think the gentleman's interpretation of the rule would be a strained interpretation of this rule.

I believe that a point of order suggesting the absence of a quorum may always be in order in any committee. The new rule to which the gentleman refers is not applicable to standing or select committees, but only in the House or in Committee of the Whole.

Moreover, the rule that will concern the business of the House, which I was just about to explain, would apply only with respect to a point of order raised in the House at times other than when the Speaker is putting the pending question. At any time when the Speaker is putting the pending question on any measure before the House or on any matter before the House, a point of order of no quorum always would lie.

Mr. BAUMAN. Mr. Speaker, if the gentleman will yield further, I am given hope by the gentleman's answer, because the tentative ruling by the chief counsel of one of the committees on which I will probably again serve interprets these new rules, taken together, as allowing a quorum to be established at the beginning of a full committee or subcommittee meeting, and then no point of order can be made until the bill is reported. I am pleased to hear the gentleman's interpretation.

Mr. Speaker, I thank the gentleman.

Mr. WRIGHT. So far as the rule regarding the limitation of the point of order that a quorum is not present in the House is concerned, it applies, again, only in the House.

The rule would permit only one quorum call in the Committee of the Whole during general debate or whenever the Chair is not putting a question on a given day. But it would allow a point of order whenever any question was put under the 5-minute rule.

A third change would provide that any concurrent budget resolution must be open for amendments under the 5-minute rule.

A fourth change would require that all conference committees be open to the public unless the House by rollcall vote should determine that all or part of them may be closed by agreement.

And, finally, it would permit any Member offering an amendment on the House floor to have one person from that Member's staff at the committee table only while that amendment is under active consideration in the Committee of the Whole.

To conclude, there are specific changes proposed with regard to the Committee on Standards of Official Conduct and with regard to the Joint Committee on Atomic Energy.

Concerning those changes that would apply to the Committee on Standards of Official Conduct, they would, first, eliminate the legislative jurisdiction of that committee over financial disclosure and lobbying.

Second, they would provide a procedure for members of the committee to disqualify themselves if ever they found themselves unable to render an impartial judgment with respect to a pending question.

And, third, permit nonmembers of the committee to have access to the records of that committee only on those occasions when that committee would so deem proper.

Mr. Speaker, with regard to the Joint Committee on Atomic Energy, the proposed changes in the rules would remove the legislative jurisdiction from that committee and would transfer that jurisdiction to the following committees of the House:

Where it involves the application of nuclear energy for military purposes, the jurisdiction would be transferred to the Committee on Armed Services.

Where it regards domestic regulation, it generally would be transferred to the Committee on Interior and Insular Affairs.

Concerning the export of technology of a nuclear type, those matters would be referred to the Committee on International Relations.

Jurisdiction over facilities regulation and oversight would lie with the Committee on Interstate and Foreign Commerce, and all nuclear research, including jurisdiction over ERDA, would lie with the Committee on Science and Technology.

Mr. Speaker, I believe that describes all of the major rules changes.

Mr. YOUNG of Texas. Mr. Speaker, will the gentleman yield?

Mr. RHODES. Mr. Speaker, will the gentleman yield for a question?

Mr. WRIGHT. Let me yield first to the gentleman from Arizona; then I will yield to my friend, the gentleman from Texas.

Mr. RHODES. Mr. Speaker, I just have one question concerning the Joint Committee on Atomic Energy. It has been somewhat of a mystery to those of us on this side as to what we can expect for the future of that committee.

The rules as proposed by the Democratic Caucus seem to strip that committee of all its jurisdiction. I am wondering if it will be the purpose of the leadership on the majority side to ask that that committee be disbanded or whether Members will be appointed to it for this next Congress.

Mr. WRIGHT. Mr. Speaker, I am not definitively authorized to answer the question. I am not sure I can speak for the leadership, but I think it is logical to assume that, particularly if the other body takes the same or similar action, there probably would be little need for the continuance of the committee.

Mr. BINGHAM. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I am happy to yield to the gentleman from New York.

Mr. BINGHAM. Mr. Speaker, as the gentleman from Arizona knows, there is no reference in the rules to the Joint Committee on Atomic Energy, and presumably some changes in the Atomic Energy Act would be in order, and those would have to be taken up in the regular manner.

Mr. YOUNG of Texas. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I yield to the gentleman from Texas.

Mr. YOUNG of Texas. Mr. Speaker, I would say to my distinguished colleague and friend, the majority leader, that as a member of the Joint Committee on Atomic Energy it has long been my feeling and deep conviction that the interests of this country and indeed the interests of this House in the field of energy require and I think will ultimately demand that all energy, whether it be nuclear or nonnuclear, be within the jurisdiction and authority of one committee of this House.

The reason for that is indeed plain. In order for this House to deal effectively and directly with the enormous problems confronting the Nation and the world in the field of energy, nuclear and nonnuclear, these problems and the authority of the House of Representatives should not be fragmented but should be consolidated, and hopefully they will be consolidated in one committee where the House can deal effectively with these matters.

I was pleased to read and hear public statements made, as I understand it, by the President-elect of the United States and by our distinguished Speaker, that it is their intention to move in the direction of having one committee to handle the matters of energy. Obviously, with the fragmentation that has existed in the nonnuclear field and that now will exist in the nuclear field, some committees at some point are going to have to be willing to step back and be deprived of some authority and responsibility in their various fields .

I can only speak for myself as a member of the Joint Committee on Atomic Energy, Mr. Speaker; but in view of what I have said about the need for a single committee with authority and responsibility, I, for one, gladly give up the authority and responsibility of the Joint Committee.

Indeed, Mr. Speaker, I am hopeful that this will ultimately result in a single committee with total authority in the field of energy.

Mr. WRIGHT. Mr. Speaker, I thank the gentleman from Texas (Mr. YOUNG) for his comments.

I fully agree with the gentleman that nothing could be more important to the future of the United States than for this Congress to have some means of determining a clear-cut, long-range energy policy for long-range and immediate-range development of energy sources and for conservation so as to purchase time for this Nation to bring on that development.

Mr. YOUNG of Texas. Mr. Speaker, if the gentleman will yield further, I support the resolution.

Mr. WRIGHT. Mr. Speaker, at this time I should like to reserve the balance of my time and to yield to the gentleman of the minority in order that they may consume time; and, Mr. Speaker, I yield only for purposes of debate.

The SPEAKER pro tempore. The Chair now recognizes the gentleman from Arizona (Mr. RHODES).

Mr. RHODES. Mr. Speaker, may I inquire as to the format under which we are operating.

Am I to understand that I have been yielded 30 minutes for the purpose of debate only and that I may yield to other Members as I see fit, similar to the situation which would prevail if this were a rule being considered?

The SPEAKER pro tempore. The gentleman is correct.

Mr. RHODES. Mr. Speaker, I would like the attention of the majority leader, if I might have it, to ask him a question.

As I mentioned before, when I reserved the right to object and finally did object to the gentleman's request to consider the resolution as read, this is a very far-reaching set of amendments. The minority has not had a chance to go over them. The amendments were adopted in the Democratic caucus. There was no debate in which the minority took part.

Now, Mr. Speaker, the resolution to adopt the rules, including these amendments, is being brought to the floor under a situation in which the minority has only one-half hour to debate and no ability at all to offer amendments.

May I ask the majority leader, Mr. Speaker, if he will yield to me for the purpose of offering a series of amendments which the minority Members of the House have approved.

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. RHODES. Yes, of course I yield to the majority leader.

Mr. WRIGHT. Mr. Speaker, I really do not think the gentleman from Arizona (Mr. RHODES) expects me to do that, and I shall not disappoint him.

Mr. Speaker, from time immemorial it has been done this way. The majority party in the Congress has the responsibility of organizing the Congress and therefore has the obligation of establishing the rules under which that Congress can operate.

It was thus in 1953 and in 1957 when the gentleman's party was the majority party in the House.

Therefore, Mr. Speaker, I think the gentleman fully understands my declination to yield for any purposes other than for debate.

Mr. RHODES. Mr. Speaker, I thank the gentleman. Of course, I do understand, but it is with regret because I think this is a different situation, a situation in which there are more changes than I have seen at any given time in my 24 years in the House.

Usually, I think it is true that if changes as voluminous and as far reaching as these are to be made, they are made after the initial adoption of the rules; but, Mr. Speaker, I think that the better way to proceed would have been to adopt the rules of the 94th Congress and then at some time in the future, after the Committee on Rules has had a chance to go over the proposed rules, that they then be brought up in the form of a resolution, preferably amendable, but if not, at least in the form of a resolution which can be debated at some length.

Mr. Speaker, here it is 20 minutes to 5 on the opening day with many Members having obligations to people from their own districts. It seems a shame to me that we are conducting such an important event as this under this type of scenario, and I regret it.

Mr. Speaker, I ask unanimous consent that I may include in the RECORD at this point the proposed rules changes which the minority would offer if the minority were in a position to do so.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

(The material referred to follows:)

SUMMARY OF SOME PROPOSED AMENDMENTS TO THE HOUSE RULES FOR THE 95TH CONGRESS

(1) *Ethics Committee Accountability*—clause 4(e) of rule X is amended to *require* the Committee on Standards of Official Conduct to report its findings and any recommendations for action once an investigation has been undertaken and to permit the House to direct the committee, by appropriate resolution, to undertake an investigation. Moreover, a Member who has filed a proper complaint with the committee may call up a privileged resolution to direct the committee to undertake an investigation if the committee fails on its own to undertake an investigation within 15-legislative days after the filing of the complaint. Under the present rule, filing a report on an investigation is discretionary with the committee and the committee may *only* undertake an investigation by majority vote of its members.

(2) *Subcommittee Limitation*—clause 6(c) of rule X amended to limit House committees to having no more than six subcommittees. The present rule requires a minimum of four subcommittees for action committee having more than 20 members, but imposes no ceiling on the number of sub-

committees. Subcommittee proliferation has become an increasing problem, up from 148 to 181 in just the last three years.

(3) *Applicability of House Committee Rules to Special Committees*—clause 1 of rule XI is amended by requiring, insofar as applicable, that the rule apply to any select, special or ad hoc committee, commission or other entity created by the House and that any bill, resolution or report of any such committee, commission or other entity be subject to the rules of the House in the same manner as though reported from a standing committee. The present House committee rules apply only to standing committees.

(4) *Public Access to Records of Committee Actions*—clause 2(e) (1) of rule XI is amended to require each House committee to keep a *verbatim* transcript of all committee action on matters of a legislative or investigative nature as well as a separate written summary of all such action, and that such transcript and summary be available for public inspection unless otherwise prohibited by any law or rule of the House. The present rule only requires that a record of rollcall votes be made available to the public.

(5) *Proxy Voting Ban*—clause 2(f) or rule XI is amended to prohibit all proxy voting in committees. The present rule permits written proxies if provided for in the rules of the committee.

(6) *Open Committee Meetings*—clause 2(g) (1) of rule XI is amended to require that committee *meetings* may only be closed if disclosure of matters to be discussed would endanger the national security, violate any law or rule of the House, or involve committee personnel or budget matters. The present rule permits the closing of committee meetings for any reason.

(7) *Rollcall Votes in Committees*—clause 2(1)(2)(A) & (B) or rule XI is amended to permit any member of a committee to demand a rollcall vote on any proposition put to a vote, to require rollcall vote on the reporting of any measure or matter, and to require publication in the committee report of the names of those voting for and against reporting. The present rule simply requires that a majority be present to report and the *number* voting for and against be published in the report.

(8) *Accuracy of the Congressional Record*—rule XIV is amended to require that words actually spoken on the floor be clearly distinguishable in the Congressional Record from remarks which are inserted. Under the present procedure it is often impossible to distinguish between what was actually spoken and what was inserted.

(9) *Suspension of the Rules*—clause 1 of rule XXVII is amended to prohibit bringing up and matter under suspension of the rules unless authorized by rollcall vote of the committe having jurisdiction or by joint request of the chairman and ranking minority member. Under the present procedure the chairman may unilaterally request bringing a matter up under suspension.

(10) *House Broadcasting*—a new rule XLV would be added providing for the continuous coverage of House floor proceedings by the broadcast media, under the direction and control of the Speaker and subject to certain conditions set forth in the rule, identical to those conditions which now apply to broadcasting committee meetings and hearings.

AMENDMENTS TO STRIKE CERTAIN RULES CHANGES PROPOSED BY THE DEMOCRATIC CAUCUS

Several of the recommended changes in the House Rules, as adopted by the Democratic Caucus three weeks ago, are a throwback to a less reform-minded era. Many changes reek more of expedience than any concern for the workings of democratic government. Five of the more controversial proposals are outlined below.

(11) *One-Third Quorum for Committee Markups*—clause 2(h) of Rule XI would be amended to permit committees (except for Budget, Appropriations, and Ways and Means) to fix the number required for taking any action other than reporting a measure at not less than one-third of the members. The quorum for taking testimony and receiving evidence remains not less than two members.

This proposal is not new; the Democratic Caucus considered this rule change in 1975. The Republican Task Force on Reform, seriously concerned with the impact of a reduced quorum requirement, issued the following on March 10, 1975:

". . . Any new rule subverting the standard quorum in House committees will only debase the democratic process, reduce the incentives for broad based participation and cast public doubt on the legislative product of this body. The proposal for reducing the number of Members needed to constitute a quorum endorses increased absenteeism and non-participation . . . Now is not the time to propose rule changes which will increase the domination of House committee and subcommittee chairmen while serving as an inducement for Members to stay home and rest."

(12) *Increasing Suspension Days*—clause 1 of Rule XXVII would be amended to permit the Speaker to entertain motions to suspend the rules every Monday and Tuesday (instead of just the first and third Mondays and Tuesdays of the month as is the case with the present rule).

At the begining of the 93rd Congress, the use of the suspension was increased from 2 to 4 days per month. A majority of Republican Members opposed such an expansion of the suspension procedure as detrimental to sound legislative practice. Although assurances were given by the Democrat leadership that the suspension rule would be used sparingly and be limited to minor, noncontroversial legislation, what has occurred is an abuse of suspensions with bill after bill being considered under an essentially closed rule procedure—limited debate with no amendments. The end result—debasement of the legislative process. The Task Force on Reform has recommended, strongly that:

1. No bill be brought up under suspension unless the chairman and ranking minority member of a committee so request.

2. A dollar ceiling amount be placed on bills which may be brought up under suspension.

3. At least three calendar days advance notice be given to any bill which is to be brought up under suspension.

4. Prior to scheduling a bill under suspension, the majority party leadership would consult with the minority leader.

Even with these safeguards, expanded use of suspensions is simply an invitation for further abuse.

(13) *Committee Requests to Sit During Five Minute Rule*—Clause 2 (1) of Rule XI would be amended to grant committee requests for special leave to sit during the five-minute rule unless 10 or more Members object. Under the present rule, requests may be denied on the objection of any one Member.

This proposal to increase from 1 to 10 the number of Members needed to object to a committee sitting while the House is in the Committee of the Whole was recently considered by the Commission on Administrative Review during hearings on the report drafted by its Task Force on Scheduling. The Minority Views of Representatives Frenzel, Armstrong and Bauman to this report indicate that no evidence exists of any abuse of the objection privilege which would make such a change necessary or desirable. The minority views emphasized:

"By increasing the potential for committee meetings during floor debate, the Commission is forcing Members to decide between their standing committee responsibilities and those of the most important of all committees, the Committee of the Whole. Either participation in floor debate will suffer, or participation in vital committee work will suffer."

It should be noted that under the present rules, three committees—Rules, Budget, and Appropriations—are exempted from obtaining special leave to sit during the five-minute rule. An additional Democratic rules proposal would add the Committee on Standards of Official Conduct to this list.

(14) *Committee Subpena Power*—clause 2(m)(2)(A) of Rule XI would be amended to permit committees *and subcommittees* to authorize and issue subpoenas by majority vote, a quorum being present. Committees would be permitted to grant blanket subpoena authority to the chairman pursuant to such limitations as the committee may prescribe.

Such an unwarranted expansion of the committee subpoena power creates the probability for a serious abuse of this powerful weapon. This new subpoena power would give over 180 subcommittee chairmen the ability to harass citizens for nearly any purpose, including publicity or personal aggrandizement. Any easing of constraints bears crucial consequences. There is no evidence that subpoena power exercised under the present rules has been inadequate to serve the needs of Congress.

A further wrinkle—this new extended subpoena power combined with the new one-third quorum proposal would allow one-sixth plus one of a subcommittee or committee to authorize subpoenas.

(15) *Quorum Call Restrictions in the House and the Committee of the Whole.*

(a) *Quorum Calls in the House*—clause 6 of Rule XV would be amended by inserting a new paragraph: "(e)(1) Except as provided by subparagraph (2), it shall not be in order to make or entertain a point of order that a quorum is not present unless the Speaker has put the pending motion or proposition to a vote. (2) Notwithstanding subparagraph (1), it shall always be in order for a member to move a call of the House when recognized for that purpose by the Speaker."

In short, under this proposal, except when the Speaker recognizes a Member for the purpose of moving a call of the House, it is not in order to make or entertain a point of no quorum unless the Speaker has put a pending motion or proposition to a vote.

(b) *Quorum Calls in the Committee of the Whole*—clause 2 of Rule XXIII would be amended so that once a quorum has been established in the Committee of the Whole, a quorum call would not be in order except during the five minute rule when the Chairman has put the pending motion or proposition to a vote.

Both these proposals, by restricting quorum calls, will only lead to a reduced participation in the conduct of legislative business.

Mr. RHODES. Mr. Speaker, I yield myself 2 additional minutes.

Mr. Speaker, I think it is particularly important for us to understand some of the ramifications of the rules which will be adopted, particularly the rule pertaining to the markup of bills in committee. As far as I know, it has always at least been the custom that when a bill is marked up that there be at least one Member of the minority side present.

After these rules are adopted—and I have no illusions but what they will be adopted—it will be possible for the majority to hold a committee meeting with one-third of the Members present to

mark up a bill without any minority Members being present at all. It is almost a replay of what we find ourselves doing right now, where we are confronted with rules changes upon which the minority has had no chance to express its opinion whatsoever.

When the time comes at the end of the debate, the gentleman from Illinois (Mr. ANDERSON) will ask for a vote on the previous question. If the previous question were to be voted down, he intends to offer a substitute resolution which would provide for 4 hours of debate on the proposed changes and then amendments would be offered under the 5-minute rule in the ordinary course of events.

I hope that the majority understands our intentions, with all of the changes that are proposed. All Members should have the right to understand what is going on, to fully and adequately debate the changes, and to offer amendments. That would be a much better way to proceed.

Mr. Speaker, I now yield 3 minutes to the gentleman from Texas (Mr. QUILLEN).

Mr. QUILLEN. Mr. Speaker, I thank the distinguished majority leader for yielding to me.

Mr. Speaker, we are here today talking about the importance of the legislative process; talking about the importance of the Government of this country; talking about what makes America great; but, in the final analysis, the majority party of this House is bringing before this body a resolution which was discussed in their caucus and is being considered today under a closed rule process where no opportunity whatsoever is accorded individual Members to debate changes on their merits. I say to my colleagues and the American people it is time that we tightened up the legislative process. It is time that we have openness in government, and openness, yes, in this legislative body, where we should have the freedom to debate at will, where the American people know and understand the impact and the importance of the changes being proposed, rather than doing what is happening here today—on a partisan basis. I say that because this country survives and our Government survives with a two-party system, an openness and the willingness to debate. However, the majority party has chosen to say that this is not what they want. They say we do not want to debate this resolution on its merits, on an individual amendment basis, and that we are going to adopt what we bring before you by resolution, irrespective of what some Members might think.

Yes, Mr. Speaker, I think it is time that we have openness in this body. That we debate the issues, not set a precedent here on the opening day of the 95th Congress, where we are ramrodding this through, and where we seem to think that the American people will not look at it with regret as some Members of this body will.

Mr. Speaker, I do believe that it would pay us to go into full debate on each change and not loosen up the wheels and the machinery of the various committees. The danger is that too much bad legislation will be reported and make this a runaway Congress, and as a result make the American people suffer, and suffer, and suffer.

Mr. Speaker, I plead with the Members to vote down the previous question so that we can get down to debate on each of the items and do the things that are necessary for the benefit of all of the people.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. RHODES. Mr. Speaker, I now yield 7 minutes to the gentleman from Illinois (Mr. ANDERSON).

Mr. EMERY. Mr. Speaker, will the gentleman yield?

Mr. ANDERSON of Illinois. I yield to the gentleman from Maine.

Mr. EMERY. I thank the gentleman for yielding.

Mr. Speaker, we are considering adoption of a set of rules which will, in final form, determine the way the 95th Congress will conduct its business. Today, we are considering rules that will greatly affect the activities, behavior, and rights of Members. We are, in fact, considering the very methods by which laws will be debated and passed in this House. However, we are also dealing with another issue—the rights of individual Members to differ with the organized majority. The majority party has developed a series of rule changes in its party caucus, and has presented this package to the rest of the House under a rule that prohibits amendments and provides only limited debate on each change.

We are today considering rules changes which include provisions affecting committee quorum requirements, their subpena powers, procedures on the floor of the House, and many other important matters.

I oppose these changes and feel that they represent, for the most part, thinly veiled efforts to strengthen the autonomy and power of the leadership, not only against the Republican minority, but also against dissenting Democrats as well. But what I object to most strongly is the blatant and uncompromising action of the majority, denying the minority the right to debate and to offer amendments to these rule changes. Article I, section 5 of the Constitution specifically states that, "Each House may determine the rules of its proceedings * * *" and the word "House," to me, means the whole House, not just part of it. I do not object to the majority decision to adopt the rules; but I do object to being excluded from the constitutional process because of my political affiliation. This unwarranted procedure violates my rights as a duly elected Member of Congress, and also limits the representation that I can provide my constituents.

This is simply a case of a tyrannical majority imposing its will on this body, while at the same time denying the minority the right to participate in the decisionmaking process. I urge every Member here present to vote down the previous question and allow the minority of this Congress, and their constituents, the right of due process in consideration of these rules.

Mr. MOORE. Mr. Speaker, will the gentleman yield?

Mr. ANDERSON of Illinois. I yield to the gentleman from Louisiana.

Mr. MOORE. I thank the gentleman for yielding.

Mr. Speaker, I also rise in opposition to the procedure we are using this afternoon and I support my colleague, the gentleman from Illinois (Mr. ANDERSON).

Mr. Speaker, advocates of the rules package which will determine the procedural conduct for consideration of all legislation during the next 2 years claim necessary changes have been made to streamline Congress so that time will be used more efficiently.

To a limited extent this is true and some changes merit adoption. At the same time, I fear the bulk of the proposed changes actually debauch the legitimate drive for reform of Congress and will ultimately pave the way for those who control the reins of power in Congress to steamroll legislation to enactment in the absence of due legislative consideration. This is not true reform. Moreover, it must not be allowed to be masked as such by anyone.

Let us vote today on each proposed change from rules that governed our conduct during the 94th Congress so that each of us will be able to go on record for or against the awesome concentration of power that is found within portions of rules text now before us. Casting one vote on the merits of all 24 changes in the rules is a reckless departure from recommendations I helped prepare as a member of the Task Force on Reform for the past 2 years. It is cosmetic reform at best.

I firmly believe any Member of Congress should have an equal opportunity to offer a new rule or a change from those under which we have acted in the past regardless of party affiliation. I am presently denied that opportunity. In turn, the citizens of the Sixth District of Louisiana are denied the same voice others have had in assembling each plank of the rules package now before us. Such concentration of power in the hands of any group, caucus, or partisan political entity endangers the precious freedoms of open and free debate inherent in the history of our young Republic, now 200 years old. If persisted in long enough, freedom subsides as corruption flourishes.

Absent the opportunity to vote on each of the 24 proposed rules changes individually, I will vote against the entire package due primarily to four objectionable major procedural changes. Two apply to committee activities and two pertain to floor procedure.

The two committee changes permit fewer Members to be present in order to consider amendments and substantive language on bills before all but three

House committees while the second gives committee and subcommittee chairmen blanket subpena power for the first time.

The first change will permit most committees to determine the text of bills under their jurisdiction with only one-third of the committee or subcommittee membership present. In addition, 10 Members must object to a committee meeting while the House is reading a bill for amendment. Previously, only one objection was required. This spells lower attendance on the floor of the House and a proliferation of committee meetings during vital House floor debate. Worse, it means for the first time less than half a committee can write the laws of this country which goes against traditional concepts of a quorum.

I have never known any democratic organization which could function with less than one-half of its membership, much less committees of the Congress of the United States.

My second objection centers upon granting committee and subcommittee chairmen a free hand at issuing subpenas regardless of the issue, witness, or time. It is a powerful and potentially abusive weapon that should be decided by committee or subcommittee vote in each instance.

Two proposed changes in floor procedures are also worthy of rejection. Under the first only one quorum call will be permitted each day outside of a quorum call request made just prior to a vote on an amendment or final passage of a bill. Free of responsibilities to listen to floor debate, absenteeism and last-minute political pressure on how to vote will continue unabated.

The second proposed change will double the number of days allowed for bills to be brought forward under suspension of the rules. Once reserved only for noncontroversial bills, legislative steamrolling of substantive legislation under this procedure of limited debate and where no amendments are permitted will become even more frequent. In addition, legislation and accompanying reports need only be available to Members 2 days prior to floor consideration instead of the present 3-day requirement. This, too, will lead to a lack of familiarity on major issues being voted upon.

Apart from these flaws steps have been taken to make Congress more open to the public. I support the proposed rules change to open the doors of House-Senate conferences. This "sunshine" move will permit all Members, the news media, and the public in general to monitor this key step in the legislative process which so often drafts legislative language that becomes law. Consolidation of committee expense needs in one primary expense resolution and reassignment of the legislative duties of the Joint Committee on Atomic Energy are two steps to reduce duplication in legislative authority.

In addition to viewing the 24 proposed rule changes before us, we must not ignore suggested rules changes not contained within the rules package and not allowed to be offered under the procedure forced upon us. If I had the opportunity today, I would support a rule to require committees to keep and make public a verbatim transcript and written summary of committee actions, a rule to end proxy voting, a requirement that all committee meetings be open where national security permits, and a provision to allow any committee member to demand a roll-call vote on any issue voted in committee.

Further changes that should be made include increasing the accountability of the Committee on Standards of Official Conduct, limiting committees to no more than six subcommittees, and a requirement that actual remarks made on the House floor be distinguished from statements inserted later.

Similarly, I would support a check upon legislation brought to the floor under suspension of the rules to insure measures are indeed noncontroversial. I would support a rule to requiring reporting of congressional employees who are immediate relatives of a Member under a new Antinepotism Rule, 2-day layover of bills reported by subcommittee to the full committee to provide time for analysis, and an end to closed rules which form the vehicle for steamrolling legislation all too often. Floor legislative schedules should be fixed, published, and adhered to.

Any Member who was defeated or has retired should be prohibited from travel at Government expense. House Members convicted of a felony should be subject to expulsion by a resolution of Congress to be considered within 30 days.

Mr. Speaker, I believe all Members should have an equal footing in the legislative process. Preferential treatment for some as provided in the proposed rules denies open and free debate at all levels of the legislative process. It thwarts the legitimate drive for reform of Congress and the need to restore public confidence in us by the electorate.

Mr. ANDERSON of Illinois. Mr. Speaker, I rise to urge defeat of the previous question on this closed-caucus rule resolution so that we can then offer a substitute resolution that would readopt the rules of the 94th Congress, permit us 4 hours of general debate, and then under the 5-minute rule consider the 24 proposed changes that have been recommended by the Democratic Caucus, along with other suggestions that may be offered on the Republican side of the aisle.

Until a few minutes ago I felt as if I would be a voice from the vast depths asking that the tides stand still in suggesting that course of action. But something took place just a few minutes ago that has given me new courage, that, indeed, has caused some reason to believe that the majority party may yet relent in the attitude demonstrated a moment ago when they refused to yield for any amendment whatever. And what took place was simply a paraphrase of the very eloquent words spoken more than a century ago by a former Speaker of this House, Henry Clay, as they were very eloquently echoed today by our newly elected Speaker, the gentleman from Massachusetts (Mr. O'NEILL) when he suggested that under his speakership there would be full and fair consideration of every matter to come before this House. What better time to start than now to demonstrate that that pledge has real meaning? What could be more important than a full and fair consideration of the rules by which we govern our deliberations in this body?

A few minutes ago the distinguished majority leader suggested that since time immemorial we have done it this way: The majority party has dictated in its caucus a set of changes to existing rules, and then it has been ratified after an hour of debate and under a procedure that permits no amendments.

But when we look back at the history of this body, we find that simply is not so. The House has handled its rules in an open manner in the past.

In his book "History of the United States House of Representatives," Dr. George Galloway, who was at one time Librarian of Congress and a distinguished student of this body, has the following to say:

> The customary practice in post-bellum days when a new House met was to proceed under general parliamentary law, often for several days with unlimited debate, until a satisfactory revision of former rules had been effected. Proposed changes in the old rules were discussed on those occasions in a leisurely, good-natured way, and the meaning of the complex code of the House was explained to new Members.

I suggest what better way could we begin this 95th Congress than to reestablish that very desirable tradition? What do we have to do for the next week or two that is so important that we could not take the time at least for 4 hours and under a procedure whereby we, under the 5-minute rule, could offer amendments to get an explanation of the changes that have been proposed?

I intend no disrespect to my distinguished friend, the newly elected majority leader, the gentleman from Texas (Mr. WRIGHT), when I say that it was too much even for his great and cogent and eloquent powers of articulation to adequately explain in less than 20 minutes some of the very fundamental changes that would be wrought in the rules of this body by adopting this resolution.

I am disturbed by the fact that there is a coverup involved here—and I use the word advisedly because we are being sold this package on the argument and on the basis that it is going to contribute to the greater efficiency of this House. We heard again from the newly elected Speaker a confession that we are not an efficient body. We are democratic but we are not efficient. But the thrust of the rules changes that have been proposed is not to promote greater efficiency but rather it is to permit such things as the distinguished minority leader pointed out, that would permit a quorum of one-third of a committee to sit in markup and to amend a bill and to make important changes with only one-third of the membership of that committee present.

The changes would provide that committees of the House en masse could absent themselves from the floor during the time that important debates are being conducted. The Members could be elsewhere. Cluster voting is designed to permit the Members to be where? To be elsewhere than here in attendance on the

proceedings of this House when under a procedure of voting every 5 minutes we are going to permit that kind of treatment of such important debates as relate to the rules that are adopted on various bills.

Subcommittees are going to have the authority without the approval of the full committee to issue subpenas.

I think that taken together what these new rules provide is not a greater efficiency in the conduct of our business but rather it is a license for absenteeism in the House, and what it amounts to is legislation without representation.

Not the least of my objections, Mr. Speaker, to the procedure which the majority has elected to follow today is the fact that we cannot even consider numerous other important suggestions that have been made. I have made some of these suggestions. The distinguished gentleman from Minnesota, who will address the Members later, as well as other Members in this House have made suggestions whereby we could change the rules of this body, whereby we could open up the process, whereby we could do something for example about the proliferation of subcommittees. They have gone from 148 to 181 in the last 3 years, just in the last 3 years alone. There is where we need to organize this House of Representatives. There is where we need to change the rules.

There should be no monopoly on concern at the other end of Pennsylvania Avenue about the necessity of reorganizing the Government. It ought to be done here in the legislative branch as well, and under the procedure that those on the majority side of the aisle have elected to follow here today we simply cannot raise those important questions under an amending process or an amending procedure.

I urge the defeat of the previous question simply for the purpose of giving us a free and open debate on this very important matter.

I hope that we can adopt the open debate and amendment substitute, not only so we can defeat some of these new absentee rules, but so we can offer some truly constructive and genuine House rules reform.

I am dismayed, for example, that the caucus failed to adopt a rule to provide for the continuous broadcast coverage of our floor proceedings, despite a survey showing 271 Members of the 95th Congress in favor of broadcasting.

We would also like to offer amendments to make the CONGRESSIONAL RECORD an accurate record of words actually spoken on the floor, to require the Ethics Committee to issue reports on investigations undertaken, and to permit a House majority to direct the Ethics Committee to undertake investigations.

We would like to offer further amendments to limit committees to six subcommittees, eliminate proxy voting in committees, permit any member to demand a rollcall vote in committee, and require a rollcall vote on reporting a measure.

We want to offer other amendments to require a verbatim transcript of committee actions and permit public inspection of that record, to extend our House committee rules to select, ad hoc and special committees, and to require all committee meetings to be open unless closed for national security, personal privacy or personnel or committee budget matters, and finally, to prohibit bringing any matter up under a suspension of the rules unless authorized by rollcall vote of the committee or requested by the chairman and ranking minority member.

While all my colleagues may not agree on all of these proposed changes, we should at least agree on permitting these amendments to be offered through an open amendment process instead of this closed, caucus gag rule. I therefore urge defeat of the previous question and adoption of the open amendment substitute.

The SPEAKER pro tempore (Mr. NATCHER). The Chair now recognizes the gentleman from Arizona (Mr. RHODES).

Mr. RHODES. Mr. Speaker, I yield 5 minutes to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Speaker, today we are seeing a rerun of the sorry performance which began the 94th Congress.

Those same friendly folks who last session gave us proxy voting, repudiation of minority staffing mandated by law, and resolution and more closed rules, are this year giving us not only those golden oldies, but some new bonus rules too.

This year that funloving gang is laying on us a one-third quorum rule. Last year, proxies allowed half of us to be absent at committee meetings. That was such fun that this year only an unlucky one-third of us need bother with committees. Never mind that we told the people who sent us here that we wanted to represent them. Just pass the handy proxy to your chairman or to some staff bureaucrat. They will relieve you of the inconvenience of representing your constituents. That is real expediency.

There is even more expediency in the rule allowing the one-third quorum to grant blanket subpena power to committee and subcommittee chairmen. That will increase our potential for citizen harassment, all right.

But there is more. Remember, in 1975, we doubled suspension days. That allowed our leadership to schedule more bills under closed rule prceedings with no amendments and limited debate. This year, we are going to double them again. We can double our fun. Twice as many amendments can be suppressed. Twice as much debate can be limited.

And that is not all. Remember how inconvenient it was last year coming to the floor and representing your constituents by working on legislation. This year's rules will not quite make that work obsolete, but they will give us a great new excuse and a great new obligation to be absent from the floor for committee work.

And, luckily, we would not have to worry about quorums. These rules are not going to allow very many silly interruptions like making sure one-half the Members of the House are alive.

And it does not stop there. Our leadership has decided that there is no reason to trouble ourselves with debate, or voting, on any of the Republican reform proposals. That means that all of you who like the secret committee records would not have to worry about any pesky constituent looking at the verbatim records, and the committee rollcalls can be kept limited too. Our nonorators can still make nonspeeches since we do not have to make the CONGRESSIONAL RECORD factual. We will be spared from drafting any pesky antinepotism rules. Luckily the home folks would not know what we are doing since there will be no electronic broadcasts from the floor. Lame ducks can continue to enjoy the pleasure domes of the world at taxpayer expense. And we can avoid any bothersome pressures to perform oversight functions.

Is that not a wonderful package? No. It is a sick and sorry mess.

All told, the readoption of old rules, the addition of the changes based on expediency, and the refusal to consider responsible reforms may look like a bright and wonderful package to some of the majority group here, but I think the people will view these rules in a different light. They would not be fooled. Americans know what a quorum is. They know what a proxy vote is.

The very process is a "gag rule" which has disenfranchised one-third of the Members of this House. The end result is a set of rules unworthy of this great representative body. Members who vote for these rules will have 2 long years to regret that vote, and 2 long years in which to apologize to their constituents. But that is hardly enough time, because these rules need plenty of regret and even more apologies.

Mr. Speaker, I ask unanimous consent to list in the RECORD at this point a 30-point list of reforms developed by the House Republican Research Committee.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota (Mr. FRENZEL)?

There was no objection.

The 30-point list is as follows:

GOP PROPOSALS FOR REFORM OF HOUSE RULES

1. Inclusion of Minority Views in Conference Reports.

Amendment to Rule XXVIII, probably cl. 1(c).

2. Public Access to Records of Committee Action.

Require each House committee to keep verbatim transcript and separate written summary of all committee action—both of which are to be available for public inspection. Amendment to Rule XI cl. 2(e)(1).

3. Ban On Proxy Voting.

Amend cl. 2 (f) of Rule XI.

4. Subcommittee Limitation.

Limit House committees to no more than 6 subcommittees. Amend Rule X, cl. 6(c).

5. Select Investigating Committee.

Proposal derived from Rep. Cleveland's resolution which was adopted at the December meeting of the Conference. Amend Rule X, cl. 6 to establish a minority controlled Select Investigating Subcommittee at any time in which both Houses of Congress and the White House were controlled by the same party.

6. Congressional Record Reform.

Differentiation in type between remarks spoken on floor and those merely inserted. Amendment to Rule XIV.

7–8. Full Disclosure of Honoraria and Gifts.

Amendments probably would be directed to Rule XLIII, cls. 4 and 5, with additional

amendments necessary if to be available to public inspection. (e.g. Duties of the Clerk—Rule III).

9. Full disclosure of expenditure accounts—to be available in the Office of the Clerk for public inspection.

Derived from Rep. Coughlin's motion to recommit with instructions the Legislative Appropriations Bill of FY 1977. Amendment to Rule III, cl. 3.

10. Antinepotism Rules.

Provide that Clerk of the House maintain records, available to public inspection, of the family relationship of staff to any Member of Congress. Amend Rule III, cl. 3.

11. Compensation for Subcommittee Staff.

Amend Rule XI cl. 5(d)(3) to eliminate restriction that minority staff not be compensated at a rate higher than subcommittee majority staff.

12. Rollcall Votes in Committee.

Permit any member of committee to demand rollcall vote on any proposition put to vote, to require rollcall vote on reporting of any measure or matter, and to require publication in committee report of names of those voting for and against reporting. Amendment to Rule XI cl. 2(1)(2)(A) & (B).

2nd proposal would add following sentence to Rule XI, cl. 2(e)(1)—a rollcall vote shall be ordered on any measure or matter upon demand by any Member.

13. Two-day layover from Subcommittee.

No bill approved by subcommittee would be considered by committee unless measure available to all members at least two calendar days, accompanied by a comparison with existing law and a section-by-section analysis of such measure. Amendment to Rule XI, cl. 2(1) by inserting a new section 6.

14. Prohibition on Closed Rules.

Amendment probably to Rules XI, cl. 4(b).

15. Restriction on Use of Suspensions.

Anderson—prohibit bringing up matter under suspension of the rules unless authorized by rollcall vote of committee having jurisdiction or by joint request of the chairman and ranking minority member.

Task Force additional qualifications—dollar ceiling amount to be placed on bills brought up under suspension; at least three calendar days advance notice; prior to scheduling, majority party leadership to consult with minority leader.

Amendment to Rule XXVII, cl. 1.

16. Broadcasting of Floor Proceedings.

Anderson recommends a new Rule XLV.

17. Fixed, Published Schedule for Floor Work (Armstrong).

Publication of legislative floor schedule in Congressional Record at least one day in advance of consideration. Amendments to Rule XXIV, Rule XXI, Rule XI, cl. 4.

18. Cosponsorship of Bills.

Remove restriction that only 25 members can cosponsor bill. Amendment to Rule XXII, cl. 4.

19. Restriction on Lameduck Travel.

Amend Rule XI, cl. 2(n) to prohibit any funds under this section from being used by any member who has been defeated or has retired.

20. Publication of Committee Votes in Congressional Record.

Require committees to publish monthly in Record compilation of all rollcall votes. Amend Rule XI, cl. 2(e)(1).

21. Nongermane Senate Amendments.

Require a ⅔ vote of the House for adoption of such amendments. Amendment to Rule XXVIII, cl. 4.

22. Committee Travel Funds.

Committee Travel Funds to be approved by roll call vote of the committee in open session. Amendment to Rule XI. cl. 2(n).

23. Travel Fund Itemization.

Funds received under the per diem rate to be itemized as to expense and the excess turned back to committee. Amendment to Rule XI cl. 2(n).

24. Staff Compensation Restriction.

Prohibit any staff person hired pursuant to any primary or additional expense resolution from being on both a Committee and a Member's payroll at the same time. Amend Rule XI cl. 5 by adding new subsection (e).

25. Felony Conviction of Member.

Provide that in an instance of a felony conviction, a resolution for expulsion is considered automatically in the full House within 30 days. Amendment to Rule XLIII, probably cl. 10.

26. Open Committee Meetings.

Task Force—Instances to Close: "tend to degrade, defame or ridicule any person; unreasonably invade the private or personal affairs of any person; reveal private proprietary information of any business entity; reveal information inimical to important national interests".

Anderson—Instances to Close: if disclosure of matters to be discussed would endanger national security, violate any law or rule of the House, or involve committee personnel matters.

Amend Rule XI cl. 2(g)(1).

27. Applicability of House Committee Rules to Special Committees.

Rule XI to apply to any select, special or ad hoc committee, commission or other entity created by the House; any bills reported by same to be subject to the rules of the House in the same manner as though reported from standing committee (present House committee rules apply only to standing committees). Amendment to cl. 1 of Rule XI.

28. Ethics Committee Accountability.

Require Ethics Committee to report findings once investigation undertaken and to permit the House to direct the committee, by appropriate resolution, to undertake an investigation. Member who has filed complaint with the committee may call up a privileged resolution to direct the committee to undertake an investigation within 15 legislative days after filing the complaint if the committee has failed to so do. Amendment to Rule X, cl. 4(e).

29. Committee Budget Reports.

Require that committee reports under the Budget Act be made formal committee action and allow the filing of minority, additional or separate views. At present there is no uniformity among committees as to how the first budget resolution recommendations are put together. Some chairmen effect this by letter, and this deprives the Minority as well as other interested Members from participating. Amend Rule XI, cl. 2(1)(2)(A) and cl. 2(1)(5) to allow greater minority input.

30. Oversight.

Amend Rule X, cl. 2(c) to require inclusion of Minority committee members in the drafting of oversight plans which committees develop in concert with the Government Operations Committee during the first 60 days following the convening of Congress.

Mr. FRENZEL. Mr. Speaker, these proposals are not Republican policy, nor are they the only reforms needed now. They simply represent honest recommendations that should have been considered had the House adopted its rules under a representative process.

Because the rules are hopelessly flawed, and because the process is unrepresentative, I urge a vote against the previous question. If the previous question prevails, I urge a vote against these rules, the passage of which can only mark a dismal beginning for a new leadership in a new Congress.

Mr. McCLORY. Mr. Speaker, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from Illinois.

Mr. McCLORY. Mr. Speaker, I am particularly concerned that the proposed changes in the House rules do not include adequate safeguards for one of the most important minority rights—the right to counsel. In 1970 and in 1974, the House adopted a guarantee that the minority members of each committee be allotted one-third of each committee's funds for staffing. As a general matter, the minority members enjoy far less than a third. For both times the majority reconsidered this guarantee and then removed it. At present only about a fifth of the payroll is spent on minority staffing.

What appears to be overlooked is that Republicans are duly elected by people just as are Democrats. We all have an equal right to be here. And we all have an equal duty under law—to serve the people of the United States.

Why, then, in fulfilling that duty should some Members be preferred over others? Why in a country noted for its freedom of thought and expression should that preference be based on Members' beliefs? Why should Republican Members be denied the legislative tools available to Democrats?

Moreover, it should be noted that as a general matter funds spent on minority staffing are not controlled by the minority. In fact, minority staff persons are hired by the majority.

The fact that the majority must approve of any minority decision to hire a staff person produces a useless waste of time. When interviewing applicants, no commitment can be made regarding salary, starting time, or even the job itself. Often this results in the loss of valuable personnel. If the applicant is willing to go forward without any assurances, there then follows days and sometimes weeks of trying to get ahold of the staff director and the committee chairman for majority approval of the minority applicant. This inevitable delay is understandable. Staff directors and chairmen are busy people. Why should they trouble themselves to help the loyal opposition?

The House rules should not ask them to do so. The administrative solution is to commit a third of the funds to the minority for the employment of staff. Such a proposal would then permit all Members, regardless of party, to participate effectively in the legislative process. The result would be more soundly reasoned legislation which would reflect well on us all.

Mr. Speaker, I also wish to express my support for a proposal of the gentleman from New Hampshire (Mr. CLEVELAND) which would establish a Select Investigating Committee controlled by the minority party which would be activated whenever the majority party in the House also controls the other body and the executive branch. The purpose of this proposal is to give life to the doctrine of checks and balances.

It is self-evident that no one can credibly investigate himself. If some scandal should break out in the future,

there will be established no agency to bring the facts to light. To establish an agency at that time may be too sensitive a matter to accomplish. If we wait until then, the merits of having such an agency may be enmeshed in the merits of the particular controversy. The time to establish the mechanism is now—when there is no scandal to investigate.

Regrettably, these and other desirable rules changes cannot be made unless the House votes down the previous question and adopts the Anderson substitute which would permit the House rules to be freely amended under the 5-minute rule.

Is it too much for a Congressman to ask—the right to offer amendments to our rules? Or is this too much democracy for the House to bear?

Mr. Speaker, I am attaching to these remarks a schedule showing the wide disparity in the staffs allocated to the majority and minority members of the respective committees. The flagrant denial of minority rights is graphically illustrated in the following schedule:

House committee staffs (June 23, 1976)	Number of staff										Gross monthly payroll (March 1976)	Percent payroll majority	Percent payroll minority
	May 1973		September 1974		September 1975		March 1976						
	Total	Percent minority	Total	Percent minority	Total	Percent minority	Total	Majority	Minority	Percent minority			
Agriculture	18	22.2	19	21	48	31	52	37	15	28.9	$92,837.68	67.5	32.5

The SPEAKER pro tempore. The Chair now recognizes the gentleman from Arizona (Mr. RHODES).

Mr. RHODES. Mr. Speaker, I yield 3 minutes to the distinguished minority whip, the gentleman from Illinois (Mr. MICHEL).

Mr. MICHEL. Mr. Speaker and my colleagues, the rules of the House are most important. They are not sacrosanct, and should not be immune from change. However, we ought to examine the more important ones individually, and in my judgment, to vote on each one separately on its own merit.

To lump 24 changes in one package with no opportunity for amendment and with limited debate is running roughshod over the minority. I concur in the remarks expressed by the minority leader, that in all my time here I do not recall an instance of the House ever proceeding in this fashion with so many proposed rule changes being offered at one time. If one considers just the question of establishing a quorum, as has been alluded to several times, in committee and on this floor, one has to be concerned.

The Constitution itself requires that, "A majority of each * * *" meaning the House and Senate * * * "shall constitute a quorum to do business."

What this new rule says is that what goes on during general debate does not count for a thing in this body; it is a sham. This proposed change demeans debate and should tell the American people that free and open discussion of our laws is no longer part of the official business of the House. What about legislative history? Do not the executive departments and agencies of Government downtown depend upon what we establish here by way of legislative history, and to a lesser degree the courts, in determining what kind of decisions they ought to render? This is not reform in the interest of efficiency. This is nothing more than a bold deception in the interest of expediency.

Just a few moments ago the gentleman from Maryland (Mr. BAUMAN) asked the majority leader a question and engaged in a dialogue on his interpretation of these new rules. If every Member were here, undoubtedly other questions would have been asked as to how the proposed changes would apply in committee.

As for only one-third of committees required to mark up legislation, we are saying that all the committees other than those which are exempt—Budget, Appropriations and Ways and Means—really are not as important as those three, and therefore only a third is required to do business.

With fewer and fewer Members required to do business, we are going to have more absenteeism than ever. Mark my words, our major concern should be the fantastic growth and proliferation of committees and subcommittees which, as the distinguished gentleman from Illinois (Mr. ANDERSON) pointed out, now exceed 180. That is why the other body is reorganizing itself. Members are spread too thin, and the net result of these quorum call changes will be fewer and fewer Members engaging in the debate with the big, key decisions affecting this country being made by a handful of representatives.

Make no mistake, everybody talks about, "Let us have everybody participating in our Government." We are going to have fewer people making the key decisions when these rules changes are adopted. Democrary is not neat, it is not even tidy for that matter, and it is not convenient. It demands full debate; open free and candid.

There is something wrong, it seems to me, when the first order of business of the 95th Congress just happens to be a proposal to remedy an inconvenience to the representatives of the people that requires them to attend their committees faithfully and to be present on this floor when important business is being transacted.

The SPEAKER pro tempore. The time of the gentleman from Illinois has expired.

Mr. RHODES. Mr. Speaker, I yield one-half minute to the gentleman from Illinois.

Mr. MICHEL. Mr. Speaker, you have the majority and therefore you have the votes, but that does not necessarily mean that your proposals are good for this House or for the American people. We should have an opportunity in this, the people's House, to freely debate and amend these changes on our side. What, frankly, is the majority afraid of? I hope the previous question will be voted down so that this body will have an opportunity to discuss and vote on each of the proposed changes as well as any others which might be offered under the procedure outline by the gentleman from Illinois (Mr. ANDERSON).

Mr. RHODES. Mr. Speaker, it is my understanding that the gentleman from Texas has no further speakers, and that he desires that I go ahead and run through my list of speakers.

Mr. WRIGHT. Mr. Speaker, the situation has changed only in a minor way. I think perhaps at this time I should like to yield 1 minute to the gentleman from Wyoming (Mr. RONCALIO), and then I will yield for a colloquy to the gentleman from New York.

Mr. RONCALIO. Mr. Speaker, I thank the eminent majority leader for yielding to me.

Mr. Speaker, I want to commend the gentleman from Texas (Mr. YOUNG) for an act of greatness and personal sacrifice in the furtherance of our search for answers in the energy field. It was commendible of him to take the floor as he did earlier today, and announce his support of these rules. His is an act of great leadership, and I commend him for that.

I believe the objections based on lack of openness my good friends on the other side of the aisle raised today are not valid. During the 5 days of the meetings of the majority last December in this Hall, every session was open to the press and to the minority, and they could have attended. They were invited, as a matter of fact. These rule changes were openly arrived at by a two-thirds majority of the full House, duly assembled in a duly called canvas. I would like the RECORD to show that.

Mr. BINGHAM. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I yield to the gentleman from New York (Mr. BINGHAM).

Mr. BINGHAM. I thank the distinguished majority leader for yielding.

Mr. Speaker, I would like to join my friend, the gentleman from Wyoming, in commending the gentleman from Texas (Mr. YOUNG) for his position.

I would like to say that we recognize, with respect to the jurisdiction formerly exercised by the Joint Committee on Atomic Energy, there will be questions arising as between the respective standing committees of the House. This is standard procedure. With any major matters that come before the House there are differences of opinion among the committees with regard to their jurisdiction, and some of these will have to be thrashed out as we go along.

Mr. Speaker, I would like to say that representatives of the Committee on Interior and Insular Affairs and the Committee on Interstate and Foreign Commerce have met with members of my staff and have worked out a suggested arrangement which would seem to be satisfactory to those two committees, so far as the division of responsibilities between those two committees are concerned.

Mr. Speaker, I insert that memorandum of understanding at this point in the RECORD:

The memorandum referred to is as follows:

MEMORANDUM OF UNDERSTANDING WITH RESPECT TO BINGHAM AMENDMENT

The transfer of jurisdiction accomplished by the Rule changes to be proposed by Representative Bingham would clarify the jurisdiction of the Committee on Interstate and Foreign Commerce with respect to nuclear issues. These amendments would explicitly recognize that the Commerce Committee "shall have the same jurisdiction with respect to regulation of nuclear facilities and of use of nuclear energy as it has with respect to regulation of nonnuclear facilities and of use of nonnuclear energy." This legislative jurisdiction is buttressed by special oversight jurisdiction over "all laws, programs, and government activities relating to nuclear energy." Thus, in the course of exercising its regulatory jurisdiction with respect to electric utilities, oil and gas pricing, mandatory conservation and supply, the Commerce Committee can examine the economics of nuclear power and exercise the same authority over siting, reliability and other aspects of economic regulation of nuclear power plants as the Commerce Committee has over fossil fuel and hydroelectric generation facilities.

Similarly, the transfer of jurisdiction accomplished by the proposed Rule change will not limit the jurisdiction of the Committee on Interstate and Foreign Commerce with respect to protection of the public health and environment from radiation discharged from nuclear power plants into the environment. Thus, in the course of exercising its regulatory jurisdiction with respect to control and abatement of air pollution, prevention of exposures to toxic substances, management, disposal and transportation of solid waste, protection of safe drinking water, and other health and environmental protection legislation, the Commerce Committee can examine the public health and environmental effects of nuclear power and can exercise the same authority over regulation of the emission or disposal of any radioactive contaminant eminating from nuclear power plants and other federally licensed nuclear plants and sites as the Commerce Committee has over regulation of the emission or disposal of any other contaminants from fossil fuel fired and other nonnuclear power facilities.

Under the Rule change, however, the jurisdiction of the Joint Committee on Atomic Energy over various matters concerning the domestic nuclear power industry is primarily vested in the Committee on Interior and Insular Affairs; these matters include regulation of research reactors and reactors used in production of energy for commercial purposes; regulation of the commercial production and reprocessing of nuclear fuels; regulation of nuclear waste management at the site of federally-licensed facilities; regulation of transportation of nuclear fuels and wastes; nuclear regulatory research.

The Committees recognize that their jurisdictions with respect to nuclear power may overlap to some extent and in these cases joint or sequential referrals may be appropriate. For example one area in which joint or sequential referral would be appropriate would be regulation of management and disposal of nuclear wastes.

The intention of the proponents of the Bingham amendment, as modified, is to give the Interior Committee primary jurisdiction with respect to legislation that deals principally with nuclear licensing and with safety regulation of nuclear facilities. However, as noted above, the Commerce Committee will have concurrent jurisdiction over many of these measures, and could request a sequential referral of these measures, including amendments to the Price-Anderson Act and authorizations of appropriations for the Nuclear Regulatory Commission.

Measures relating to more than one regulatory agency, such as bills regulating public participation in agency processes, prohibitions on employment of former regulators by regulated industry, and agency litigation authorities would be referred to the Commerce Committee initially.

Harley O. Staggers, John E. Moss, John D. Dingell, Paul G. Rogers, Fred B. Rooney, Morris K. Udall, Jonathan B. Bingham.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. Mr. Speaker, I yield 4 minutes to the gentleman from Washington (Mr. MCCORMACK).

Mr. McCORMACK. Mr. Speaker, I would like to first of all ask the distinguished majority leader a series of questions. The first is as follows:

During the debate on the Bingham amendments in the Democratic Caucus on December 8, in a response to a question concerning the jurisdiction on matters then within the province of the Joint Committee on Atomic Energy, Mr. BINGHAM, the sponsor of the amendments said:

Generally, it is the intention of this resolution that the jurisdiction of the Interior Committee would parallel that of the Nuclear Regulatory Commission, and the jurisdiction of Science and Technology would parallel that of ERDA.

So that we may establish this matter clearly in the formal record of the House at this time, would the majority leader state that the intention of the new rules involving this jurisdiction is as indicated by Mr. BINGHAM; that is, that jurisdiction for all activities of the Energy Research and Development Administration, except for weapons research and fabrication, falls within the jurisdiction of the Science and Technology Committee; and that legislative and special oversight jurisdiction over the Nuclear Regulatory Commission is shared by the Committee on Interior and Insular Affairs and the Interstate and Foreign Commerce Committee, as indicated today by the memorandum placed in the RECORD by Mr. BINGHAM.

Mr. WRIGHT. The gentleman from Washington is completely correct. The jurisdiction for all ERDA programs and activities except for weapons research and production would, under the new rules being offered at this time, go to the Committee on Science and Technology. This includes fusion energy research.

Mr. McCORMACK. It is my understanding that the intent of the amendment is to transfer the jurisdiction for energy research and development activities performed under contract for the Energy Research and Development Administration at the National Laboratories to the Committee on Science and Technology.

Mr. WRIGHT. Yes; that is correct. The basic thrust of these rules is to transfer jurisdiction over all energy research, development and demonstration and all other activities of ERDA except weapons research and production, to the Committee on Science and Technology.

Mr. McCORMACK. It is my understanding that the leadership of the House is taking steps leading toward the creation of a select ad hoc committee on energy, with the necessary legislative and policymaking authority for the purpose of helping to establish a national energy policy for the Congress and the country; and for resolving questions concerning energy policy and jurisdiction within the House. Is that correct?

Mr. WRIGHT. Yes; it is.

Mr. McCORMACK. Mr. Speaker, I appreciate the clarification of the rules that has been provided by the distin-

guished majority leader and I am, of course, greatly pleased that the leadership of the House plans to initiate action to create a select ad hoc committee in the near future. Given the chaotic situation that now faces the House with the adoption of the Bingham amendments, the only solution, it seems to me, is the creation of such a select committee with jurisdiction to help establish energy policy for the Congress and the country, and to resolve policy and jurisdictional disputes between the many subcommittees of the House which now claim jurisdiction in energy-related legislation.

Such a select committee is a goal I have sought for many years. I look forward now to the House helping to establish a coherent energy policy for our Nation.

However much I applaud this new leadership, I must, in all sincerity, record a vigorous protest against the redistribution of jurisdiction in legislation related to nuclear energy in the manner it has been done.

Little or no thought has been given to the many problems that have been created by the Bingham amendments, and although some of the potential jurisdictional problems are resolved by the statement by the gentleman of New York (Mr. BINGHAM) and the answers to my questions by the distinguished majority leader, the fact remains that a great deal of damage has been done to one of this Nation's most important programs, the development of nuclear energy.

Nor should we ignore the fact that the Joint Committee on Atomic Energy has done an outstanding job during recent years in helping to develop nuclear energy to its present state, wherein the production of electricity from nuclear fission is one of the safest of human activities, and wherein the nuclear breeder program and the nuclear fusion program provide this Nation with its only opportunity for energy self-sufficiency during the latter part of the 20th century and the first half of the 21st century.

Mr. Speaker, there is no doubt in my mind that if the entire House could debate and vote the Bingham amendments they would be defeated. However, the parliamentary situation does not allow for such debate or vote.

Now we are all going to be on trial before the people in this country, and all the free world, which looks toward the United States for strength and stability. Of course, I pray that things will go well, and that the damage done by the Bingham amendments and the splintering of energy jurisdiction in the House will be overcome by the wiser deliberations by a select committee on energy.

Finally, I do not consider the Joint Committee on Atomic Energy to be a sacred cow to be preserved at any cost. It could be abolished, and its jurisdiction distributed among other committees, and without harm, if this were done in a rational, deliberate manner, as recommended by the gentleman from California (Mr. BROWN). I do insist that the Joint Committee has done an outstanding job in serving the Congress and the people in this country, with truth, integrity and openness. Its continued existence is however, of no moment if it can be replaced with a committee or committee structure which will meet the same high standards that the Joint Committee has met, and which will continue to move this country forward to energy independence and economic stability and national security.

Mr. WRIGHT. Mr. Speaker, I reserve the balance of my time.

The SPEAKER pro tempore. The Chair now recognizes the gentleman from Arizona (Mr. RHODES).

Mr. RHODES. Mr. Speaker, I yield 2 minutes to the gentleman from Colorado (Mr. ARMSTRONG).

Mr. ARMSTRONG. Mr. Speaker, I thank the gentleman for yielding time to me.

Mr. Speaker, the gentleman from Arizona (Mr. RHODES), the gentleman from Illinois (Mr. ANDERSON), and the gentleman from Illinois (Mr. MICHEL), as well as others, have made the point repeatedly that by the action which we are taking today and the procedure under which we are operating it is impossible, first, for any Member, not just the majority Members, but for any Member of this body to offer for the consideration of this body proposed amendments to the rules.

In other words, it is not just: What are we going to adopt? It is: What are we going to listen to?

I think that is wrong for reasons that have already been adequately stated.

Mr. Speaker, I also want to support and underscore the remarks of the gentleman from Illinois, who said that under this proposal we are not even permitted to consider the predigested amendments of the Democratic Caucus, that it is a take-it-or-leave-it package proposition. I think that is most unfortunate.

I am not pleased with these responses of the majority leader to the inquiries. I think it is a most disappointing reply. He says in effect: "Well, we have the votes, and we are going to run the show."

I am well aware that when you have the majority, the temptation to resort to that kind of argument becomes very strong, and I suppose that the larger the majority, the greater the temptation. I would hope at least in this one instance involving the basic rules of this body and involving the integrity and the honor of this body the majority would be able to resist the temptation to just say out of hand, "We are not going to listen to your arguments, and they will not even be presented or be considered. We have the votes, and we are going to run the show." I hope that just this once we can avoid that temptation.

If the majority is unwilling to do that, it is not just that they are running roughshod over the minority Members of this body, it is not just that their colleagues on this side of the aisle are precluded from expressing their thoughts so that the majority could obtain our judgment and our thoughts, but it is the people whom we represent that are not being heard today.

Mr. RHODES. Mr. Speaker, is my understanding correct that the majority has no further speakers?

Mr. WRIGHT. The gentleman is correct.

Mr. RHODES. Mr. Speaker, I yield 2 minutes to the gentleman from Maryland (Mr. BAUMAN).

Mr. BAUMAN. Mr. Speaker, we all joined in congratulating you earlier today in your election to Speaker of the House. I certainly joined in that expression, despite the letter you sent endorsing my opponent in the recent campaign.

We are all moved by the fact that as a result of participation in Bay State politics and through 24 years of service in Congress you have now reached the pinnacle of power in the House of Representatives as our Speaker. But now under these rules that have been offered, I think I can say to the ladies and gentlemen of the House that the Speaker will never see the Members of the House, unless he desires to call us from wherever we may be. Certainly we will not be on the floor of the House of Representatives learning from debate and forming opinions. We will not be in the committees marking up bills. Where will we be? Will we be in the House gym playing handball or over in the Democratic Club or in the Capitol Hill Club indulging our baser natures? Or will we, like the former gentleman from Ohio, who is no longer with us, be exercising our own personal predilections in preference to performing our duties? No one knows, because these rules allow us to skip out and stay out.

Why is it not important that we act as representatives of the people of the United States and legislate in the House of the people? That is what we are sent here for, and that is exactly what our past rules permitted. We should not walk away from our responsibilities and indulge in steamroller government.

I hope, Mr. Speaker, that we do uphold the integrity of the House of Representatives of the United States of America. I know that this debate is not newsworthy. It will not receive the coverage of Korean payoffs or sex scandals. The press does not look at this important issue with the same scrutiny.

No, this is only the integrity of the legislative process, and the rights of all the people of America. I hope that we will follow the suggestion of the silver-maned moderate from the heartland of America, the gentleman from Illinois (Mr. ANDERSON), and vote these rule changes down. We must instead conduct our affairs on behalf of the people with full understanding of our responsibilities as Members of the Congress of the United States of America. These rules fly in the face of that sworn duty.

Mr. RHODES. Mr. Speaker, I yield 1 minute to the gentleman from Pennsylvania (Mr. COUGHLIN).

Mr. COUGHLIN. Mr. Speaker and Members of the House, we all will recall

that on September 1, 1976, this House considered the legislative appropriations bill under an unprecedented gag rule that prohibited all amendments. We likewise will recall that about midnight of that day we had a vote on a motion to recommit that bill with instructions labeled "E." That was defeated by four votes. By four votes, Mr. Speaker, we then defeated real reform.

Now, Mr. Speaker, we are considering another package of reforms and again under an unprecedented gag procedure.

Mr. Speaker, to consider reform and openness under a gag procedure has to be the height of travesty. Were these rules subject to amendment, a number of those reforms could be introduced now and the House could work its will.

Mr. Speaker, it tarnishes the image of our institution to consider sunshine in the darkness.

Mr. RHODES. Mr. Speaker, I yield the remainder of my time to the gentleman from Michigan (Mr. BROWN).

Mr. BROWN of Michigan. Mr. Speaker, with the increased Democratizing—with a capital "D"—of the House, it seems as though the Members on that side of the aisle would have liked to increase the "Democratizing" of the House in practice.

Mr. Speaker, how are we going to explain to our constituents that one-third of a committee is a quorum which conducts the most important business of this House?

The SPEAKER. The time of the gentleman from Michigan (Mr. BROWN) has expired.

The Chair recognizes the gentleman from Texas (Mr. WRIGHT).

Mr. WRIGHT. Mr. Speaker, much has been said about gag rules. Something has been said about integrity. I think all of us will agree that integrity wears no party label. It is not the exclusive property of either party.

So far as a gag rule is concerned, nothing is being done differently today from what has been done at the beginning of every Congress in this century, and perhaps earlier than that.

Mr. Speaker, since time immemorial, it has been the responsibility of the majority party in the Congress to organize the Congress. With that responsibility has gone the obligation of establishing the rules under which the Congress will operate.

Mr. Speaker, the changes in the rules proposed by the Democratic Caucus this year and embodied in this resolution are not catastrophic. They do make it possible for the business of the House to be facilitated. They do permit us to avoid, hopefully, some of the troubles we got into when last year, during 1 particular week, 20 hours of every Member's time were consumed in frivolous motions to respond to quorum calls and to rollcall votes on which fewer than 15 Members voted on the losing side.

Mr. Speaker, if what we are attempting to do is to permit the committees to work their will in orderly process, then this will serve that purpose. If what we are attempting to do is to permit the Members of the House not to be constantly harassed by obstructionist groups or small coteries of tightly knit minorities, then that is what we are attempting to do.

Mr. Speaker, I have no quarrel with any of the gentlemen who have spoken. It is their right to offer changes in the rules, and I suggest to them that no gag is being applied to them. They have the next 2 years in which any rules change they might propose can be offered, in the orderly process, to the Committee on Rules of the House; and if a majority of the Committee on Rules of the House should find the change worthy, it can be brought to the floor of the House and can be attached as an appendage to the rules that we are now seeking to adopt.

Mr. Speaker, the rules on more than one occasion were described by the late Lew Deschler as the most carefully balanced rules of any legislative body in the world. They exist so as to protect the minority against the intolerance of a majority and also to protect the majority against the intolerance of a minority.

I believe these are constructive additions to the rules, Mr. Speaker.

I move the previous question on the resolution, Mr. Speaker.

Mr. CLEVELAND. Mr. Speaker, I intend to vote against the previous question on the motion to adopt the resolution providing for new House rules for the 95th Congress. If the previous question is defeated, amendments to the rules can then be offered and I will vote for the substitute resolution offered by Congressman JOHN B. ANDERSON of Illinois.

If the previous question is adopted, we will have no opportunity to consider the substitute nor will there be an opportunity for separate consideration of the 24 changes in House procedures adopted by the Democratic Caucus. The previous question issue therefore, amounts to a closed rule issue.

At a time when public confidence in Government, and particularly the U.S. Congress is appallingly low, I find this situation unconscionable. Only 2 years ago, at the beginning of the 94th Congress, there were promises of great reform by the majority party including the elimination of closed rules on legislation. Yet, a mere 2 years later, we are being asked to consider modifications to the procedures which govern our legislative activities as a "package" with no amendments or additions allowed. Such a blatant display of the misuse of power is an affront to the American people.

I find it difficult to believe that responsible members of the majority party will support a motion which not only precludes consideration of any minority proposals but also prohibits separate consideration of proposals offered in the Democratic Caucus. A vote for the previous question is in effect a vote to permit a mere one-third of the Members of the House—or one-half the majority party—to bind 435 Representatives to a set of procedures which clearly calls for improvement.

Some of the amendments which would be offered should the previous question be defeated include the elimination of proxy voting in committees, greater accountability from the ethics committee, and public access to verbatim transcripts of committee actions. Others which I have cosponsored and worked for in past sessions would permit broadcast coverage of House floor proceedings and require that the CONGRESSIONAL RECORD accurately reflect words actually spoken on the floor of the House.

Furthermore, if the previous question is not defeated, we will not even have an opportunity to cast separate votes on such important considerations as whether committees should be permitted to mark up legislation with only one-third of their Members present and whether quorum calls should be drastically restricted thereby promoting absenteeism on the House floor.

Many other amendments with significant impact on the direction and operations of the 95th Congress, including my amendment to establish an investigating committee controlled by the minority party when the majority party controls both the Congress and the White House, will not even be considered on the floor of the House unless we defeat this closed, no-amendment Democratic Caucus rules resolution. I will discuss this important issue in separate remarks.

I urge my colleagues to demonstrate their commitment to achieving meaningful reform of the House and to prove to the American public that the House is capable of effective, responsible representation by joining in defeating the previous question.

Mr. ASHBROOK. Mr. Speaker, in addition to allowing real minority participation in the revising and adoption of the House rules, I have a special reason for voting against the previous question. On the first day of the 94th Congress the House eliminated the House Committee on Internal Security by voting for the previous question, thereby ruling out any amendments to the rules. The House Committee on Internal Security—HCIS—had been eliminated as a standing committee of the House in the Democratic Caucus where the rules for the 94th Congress were amended. These amendments, contained in House Resolution 5, were presented to the House for adoption on January 14 with HCIS no longer listed as a standing committee, effectively abolishing that unit. Thus, a committee whose predecessor committees dated back to the early 1930's and covered such important activities as Nazi and Fascist activities, ongoing investigations of Communist subversion down through the years, the KKK, SDS, and Black Panthers, to mention but a few, were abolished without a direct vote by the Members of the House on the all-important merits of the committee.

On the day following the abolition of the committee, I submitted legislation to reestablish HCIS as it was constituted at the end of the 93d Congress. This measure received no action in the Rules Committee and died at the end of the 94th Congress.

In addition I introduced a proposal

calling for a joint Senate-House Committee on Internal Security. This proposal also received no attention in the House and likewise died at the end of the last Congress.

In order to insure that the House of Representatives give some consideration to the vital area of internal security, in March of 1975 and again in March 1976, I sought to have the House allocate $300,000 for internal security work within the Judiciary Committee. The vehicle for this proposal was the Judiciary Committee's appropriation which I tried to have recommitted for the purpose of adding the $300,000. Unfortunately, these two efforts were voted down.

The support for the internal security units in the House over the years has been demonstrated by the various votes on these committees, lopsided votes favoring the continuance of these units. If the previous question is voted down, I will offer an amendment to the rules, reestablishing the House Committee on Internal Security. In this way, the American people can ascertain whether the longstanding support for the internal security committees is reflected in that of the Members of the 95th Congress.

Mr. GARY A. MYERS. Mr. Speaker, many of the rules changes proposed by the majority here this afternoon are laudable attempts to rationalize committee and floor procedure. Others, unfortunately, appear to sacrifice important minority rights and comprehensive debate on the altar of legislative expediency.

Of greatest significance, however, are the many areas in which meaningful reform has been postponed or ignored. Mr. Speaker, I intend to support attempts to open the proposed rule to further amendment to allow Members to offer further rules changes. Reform is required in several significant areas.

First. Proxy voting in committees: All too many Members are familiar with circumstances where important committee votes have been decided by a flood of proxies wielded by a minority of the Members present and participating in committee debate. If we are to have rational, informed voting on committee business—business that, in many respects, is the heart of the legislative process—then proxy voting should be banned. If we are not prepared for this step, at a bare minimum, Members voting by proxy should be listed in committee reports.

Second. Committee voting tallies: To further strengthen the committee process, legislative reports to the Congress should include lists of Members voting for and against reported measures and for and against amendments offered in committee. Committee vote tallies, combined with proxy voting lists, would offer all Members a better knowledge of the closeness of committee votes, a firmer understanding of Members' positions during debate, and a ready source of Members who participated in and could share information on committee proceedings.

Third. Fuller protection for preprinted amendments under the 5-minute rule: Currently, House rule XXIII partially protects amendments printed in the RECORD 1 day prior to debate by allowing the Member offering the amendment 5 minutes of speaking time when debate has otherwise been closed. However, a Member may still lose the opportunity to speak in favor of his or her amendment if an amendment in the nature of a substitute for the bill has been adopted. A Member who has prepared an amendment should be permitted to offer the amendment, with necessary conforming alterations, and his or her 5 minutes should be protected even if a substitute is being considered.

Fourth. Allocation of debate time between committee members and other Members of the House of Representatives: On numerous occasions in past Congresses, Members not serving on a particular committee have not had time under the 5-minute rule for debate of their proposed amendments. Instead, on a bill with a number of controversial provisions, members of the committee often use up all the time before the motion to limit debate rehashing ideas rejected during committee debate and amendments defeated in committee voting. The less well-known amendments, proposed by committee outsiders, need explanation and debate. The rules of the House should be amended to explicitly provide for equal access to amendment debate time for committee members and other Members, so Members will be able to vote with an adequate understanding of all amendments before them for consideration.

Fifth. Clear differentiation between debate and extension of remarks: A change which is long overdue is the clear distinction in the CONGRESSIONAL RECORD between remarks actually made on the floor of the House and remarks inserted for printing after the debate and the vote on the measure is completed. Increasingly, the debate on legislation is being looked to as an explanation of the intended meaning of the legislature when a phrase in a statute is vague or ambiguous. The public has the right to know which statements were uncontradicted during debate and which were added later and, therefore, reflect the opinion of only one of those voting on the measure.

Sixth. Four hour rule for printing of bills and reports: The 94th Congress improved the rules when it provided that all bills must be available in their final written form on the floor of the House of Representatives at least 2 hours before the bill becomes in order for consideration. However, further improvement is sorely needed. Four hours is a much more reasonable period of time for reviewing the final version of a bill before consideration, especially considering the invariable shortening of debate time at the end of a session. Also the committee reports should be available for the same period of time, since many bills are so technical or so intricately amend existing statutes, that their true impact cannot be weighed within 4 hours without the aid of the report.

Seventh. Twenty-five cosponsors rule: It is time for repeal of this dated rule. Each Congress the duplicate bills which result from this rule cost the taxpayers over $1 million. There should be no limit on the number of cosponsors for any piece of legislation. Reintroduction of an identical bill also should not be permitted. Instead, an official registry of those currently cosponsoring a proposal should be kept and computerized for immediate access. This arrangement would also permit a Member to withdraw his cosponsorship.

Eighth. Lobbying by former Members: Lobbying on the floor of the House of Representatives by former Members should be treated as a serious offense. These former colleagues have changed professions; some are now hired to influence legislation from a narrow point of view rather than determine public policy from a broad perspective. Persons required to register under any lobbying act of the Congress should not be permitted on the floor except for ceremonial occasions. They should face civil and criminal penalties for violation of this rule. There is no way to draw the line between lobbying and not lobbying by these individuals; therefore, we should not force this task on our presiding officer.

This list is by no means all-inclusive; other Members undoubtedly have equally pressing concerns. It is inexcusable to prohibit open debate and voting on these proposed rules changes.

Mr. CLEVELAND. Mr. Speaker, the Democratic majority has decreed that the House will not even consider any amendments to the House rules, no matter how good. This includes one which I was prepared to offer.

Mr. Speaker, my amendment simply provides that a separate oversight committee under minority control be established, funded and vested with investigative authority whenever both the Congress and the White House are controlled by the majority party.

Accordingly, it represents a long-overdue reform in light of at least four facts which should be self-evident to all Members regardless of party:

First, no administration can be relied upon to investigate itself, nor can the majority party in the Congress be relied upon to investigate an administration of the same party. Whatever the competence, commitment and integrity of those carrying out investigative responsibilities, independence from the subject of the investigation is critical to the confidence of the public in their findings.

Second, the legislative oversight function is equally important as the lawmaking function in the discharge of congressional responsibilities.

Third, the committees of the House have yet to meet their responsibilities uniformly on a sustained and comprehensive basis.

And fourth, this failure accounts in large measure for the unresponsiveness and otherwise poor performance of executive branch agencies, which has contributed to the decline of public confidence in government—notably including the legislative branch.

The concept draws on experience from the British parliament and the conduct of the Teapot Dome scandal investigation

in our own country, as well as the not altogether satisfactory conduct of the Estes and Bobby Baker investigations. The concept of independence also has been reflected in establishment of the Watergate Special Prosecutor's Office and the Federal Elections Commission.

Members should note that similar proposals have been advanced seriously since 1965 as fundamental reforms, in years of Republican as well as Democratic administrations. Thus it is by no means a late-blooming response to the present circumstances.

If Members, particularly on the majority side, will examine this proposal carefully, they might note certain advantages.

First, the rules amendment is carefully crafted to assure that the minority-controlled investigations subcommittee be barred from intruding into areas already under active investigation by standing committees of the House. This will guard against any wide-ranging, free-wheeling partisan operation which otherwise might result. Indeed, its very existence should provide incentive for all committees to do what they should be doing anyway in the oversight field.

Second, it would permit investigations in sensitive areas where members of the majority party might find themselves deterred from entering.

Third, its existence should similarly provide incentive to improve executive agency performance, the prospects of embarrassing exposure being the best single spur to competent, efficient and responsive operation.

In recent years, the Congress has taken several steps to improve its own performance, including partial jurisdictional realinements, increased public scrutiny of our operations and a strengthened adversary system through minority staffing improvements. Much remains to be done in these areas.

But we should go beyond these to provide this mechanism as I have proposed it, with the overwhelming support of the Republican Conference. In my view, it should be regarded as a true test of one's commitment to genuine reform of the House as an institution, irrespective of partisan considerations.

The text of the amendment which I was prepared to offer, had the majority party not prevented consideration of any amendments, follows:

AMENDMENT OF MR. CLEVELAND TO THE RULES OF THE HOUSE OF REPRESENTATIVES

Clause 6 of Rule X of the Rules of the House of Representatives is amended by inserting at the end thereof the following:

"(h)(1) Whenever in any Congress the majority party in the House and Senate is the same party as that to which the President belongs, there shall be established in the House a Select Committee on Investigations consisting of fifteen Members appointed by the Speaker and distributed between the majority and minority parties as provided in subparagraph (2).

"(2)(A) The number of members of the select committee appointed from the minority party shall bear the same ratio to the number of members appointed from the majority party as the total number of the Members of the House who are from the majority party bears to the total number of the Members of the House who are from the minority party, rounded to the next higher whole number. The remaining members of the committee shall be appointed from the majority party.

"(B) Any vacancy occurring in the membership of the select committee shall be filled in the manner in which the original appointment was made.

"(3) It shall be the duty of the select committee to conduct studies and investigations of the administration and enforcement of Federal laws by the departments and agencies of the Federal Government, with particular reference to (A) whether such laws are being administered and enforced reasonably, effectively, and in a manner consistent with and in furtherance of the intent, purposes, and objectives for which such laws were enacted; (B) whether such departments and agencies are conducting their operations economically and efficiently; (C) whether each such department and agency is consulting with and seeking advice from all other significantly affected departments and agencies of the Federal Government in an effort to assure fully coordinated programs; and (D) whether the departments and agencies of the Federal Government are supplying full and accurate information to the Congress and the public in accordance with the requirements of law. The committee shall not consider any subject matter under active investigation by any standing committee of the House or by any subcommittee thereof.

"(4) The select committee may from time to time submit to the House such reports as it deems advisable and prior to the close of the Congress for which it was appointed shall submit to the House its final report on the results of its study and investigation, together with such recommendations as it deems advisable. Any report submitted when the House is not in session may be filed with the Clerk of the House.

"(5) For the purpose of this clause the select committee, or any subcommittee thereof, is authorized to sit and act during the Congress for which it was appointed at such times and places within the United States, whether or not the House has recessed or adjourned, to hold such hearings, to require the attendance of such witnesses and the production of such books, papers, and documents, and to take such testimony as the committee deems necessary. The chairman of the committee or any member thereof may administer oaths to witnesses.

"(6) The majority of the members of the select committee shall constitute a quorum for the transaction of business, except that two or more shall constitute a quorum for the purpose of taking of evidence including sworn testimony.

"(7) There shall be paid to the select committee from the contingent fund of the House, upon passage of an expense resolution in the manner provided for standing committees under clause 5(a) of rule XI, such sums as may be necessary to carry out its functions. The minority party on the select committee shall be entitled, upon request of a majority of such minority, to one-third of the funds provided for the appointment of committee staff pursuant to such expense resolution."

Mr. KEMP. Mr. Speaker, one of the most important things which this Congress can do over the next 2 years is to conduct itself in such a manner as to reinstill public trust and confidence in it as an institution and in its Members as holders of the public trust.

Few things are more important in a society, especially a free society, than trust in the institutions which act in behalf of the people's interests.

I am deeply concerned over the stress which a number of disclosures about misconduct on the part of some Members of Congress is putting on our social fabric. We are a strong people, but like any society, the threads which hold us together cannot be too often severed without the cloth coming apart. You cannot get through today at the expense of tomorrow forever, and it is time Congress realizes this point.

The attitude that Congress can take care of a basic, fundamental problem by dealing only with a specific instance of wrongdoing is wrong. So is the attitude that a problem can be glossed over by ignoring it. Maybe that was true at one time, when disclosures of wrongdoing were few and far between, but it is not true anymore. Look at the disclosures and allegations over the past several years. Abuses of congressional staff positions and salaries. Converting campaign funds to personal uses. Accepting political contributions or personal gifts from foreigners with immense financial interest in the decisions of Congress. Traveling abroad at the expense of foreign governments who depend upon the economic and military assistance we vote them. And the list goes on.

My point here is not a partisan one, for the need for genuine congressional reform transcends both political party and philosophical persuasion. That is why I am particularly disappointed in today's debate on adopting the rules of the House for the next 2 years, a debate which once again sees the defenders of the status quo lined up to stop us from passing badly needed reforms.

The situation is not as bad as some believe or as bad as others would want us to believe. For every instance of corruption, or misconduct, or simply bad judgment, there are hundreds of instances of honesty and good judgment. It is like everything else in life—only the abberations make the news, for only they are the news. Probably the most obvious and tangible evidence of this disparity between perceptions of Congress in general and of most Congressmen in particular is the fact that while we have polls showing only 19 percent of the people have confidence in Congress as an institution, individual Members of Congress who run for reelection are returned by majority votes in their respective districts at the rate of 90 to 92 percent. The people appear to be saying, "Congress isn't worth too much, but we think a great deal of our own Congressman." And when you add those sentiments together, it shows the strong support for individual Members, which when added together, should—but does not—show confidence in Congress as an institution.

A number of things—substantive ones—need to be done by us here, at the outset of this new Congress. We have a new Speaker, a new majority leader, and I congratulate them, new faces in the leadership of the committees and their subcommittees, many new Members, and even a new President who made trust in government one of his most successful campaign themes, as did the outgoing President. We have an opportunity, therefore, to carry out meaningful reforms in the coming months, and I am firmly pledged to pushing for them.

I intend to make congressional reform one of my strongest efforts this Congress.

Next week I will introduce one of the most far-reaching congressional reform legislations to have been introduced in Congress. This legislation consist of two measures—the Congressional Reform Act of 1977 and the Congressional Reform Resolution of 1977. The first covers all matters not governed by the rules of the House, and the second encompasses all matters governed by those rules.

The Congressional Reform Act has provisions which—

Prohibit the use of campaign funds for personal use, with a felony penalty provision included;

Prohibit travel by Members and staff at the expense of a foreign government or an organization effectively controlled by a foreign government, with the Attorney General of the United States after consultation with the Secretary of State, making the decisions on which organizations are so controlled;

Prohibit the chairman of the Committee on House Administration or any of its subcommittees from serving simultaneously as an officer of the National Republican Congressional Committee or the Democratic National Congressional Committee;

Assure that salary increases for Members will not take effect until the Congress after which recommendations for increases were not disapproved or amended;

Permit the many allowances to be set or adjusted only by a vote of the entire House;

Prohibit Members from hiring relatives of other Members;

Prohibit travel at Government expense outside the United States by Members who have been defeated or who have resigned or retired;

Require a mandatory study of the personnel policies and practices of Members and committees by an independent management consultant firm;

Prohibit reimbursement for first-class air fare for Members and employees;

Require a mandatory audit of all income tax returns made by Members;

Require the House restaurant, cafeterias, and other food services of the House to be operated on a self-sustaining basis;

Require that estimates of costs and savings in total and to each taxpaying family of legislation proposed be printed on the first page of bills and resolutions;

Require additional information on reports and forms required by proposed legislation to be incorporated in committee reports;

Require information to be made available in post offices on how and where to communicate with Members of Congress;

Require all postal patron mailings by Members and Senators to include information on how to communicate with Members;

Prohibit certain franked mailings by Members and certain officers;

Require reports by executive agencies to persons elected to the House on activities within their districts;

Require seminars for freshmen Members to be conducted;

Better define what honorariums can and cannot be accepted by Members and other officers of the Government and under what circumstances; and,

Establish an Office of the General Counsel of the House.

The Congressional Reform Resolution has provisions which—

Require complete committee and subcommittee records be made available for inspection by the public;

Prohibit proxy votes in committees and subcommittees;

Permit rollcall votes to be demanded by any Member of a committee or subcommittee thereof;

Require a rollcall resolution on every motion to report a bill or resolution from committee to the House;

Establish conditions for admission of ex-Members and certain other persons to the Hall of the House and rooms leading thereto;

Remove the limitation on the number of Members who may introduce jointly any bill, resolution, or memorial;

Prohibit a party caucus or conference from binding a Member to a decision contrary to his or her conscience;

Permit the inclusion of any minority views in conference reports;

Require full disclosure of honorariums and gifts;

Require full disclosure of expenditure accounts with reports to be made available in the Office of the Clerk of the House for public inspection;

Require a 2-day period before a bill reported from subcommittee to full committee can be acted upon by the full committee;

Prohibit closed rules;

Restrict the use of suspensions;

Permit the broadcasting of floor proceedings;

Require committee votes to be published in the CONGRESSIONAL RECORD;

Require that all committee travel funds be approved by rollcall vote of the committee in open session;

Require the itemization and disclosure of all travel funds;

Permits the House to move within 30 days to expell a Member who has been convicted of a felony;

Apply the House rules to special committees;

Make the Ethics Committee accountable to the full House;

Require committee reports under the Budget Act to be made formal committee action and allow the filing of minority, additional, or separate views; and

Require inclusion of minority committee members in the drafting of oversight plans which committees develop in concert with the Committee on Government Operations during the first 60 days following the convening of Congress.

Mr. Speaker, the time has come for the enactment of these measures.

The SPEAKER. The question is on ordering the previous question.

Mr. ANDERSON of Illinois. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 261, nays 140, not voting 32, as follows:

Mr. RUSSO changed his vote from "nay" to "yea."

So the previous question was ordered.

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the resolution.

Mr. RHODES. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 256, nays 142, not voting 35, as follows:

[Roll No. 4]

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Marks, one of his secretaries.

REPORT OF COMMITTEE TO NOTIFY THE PRESIDENT OF THE UNITED STATES OF THE ASSEMBLY OF THE CONGRESS

Mr. WRIGHT. Mr. Speaker, your committee on the part of the House to join a like committee on the part of the Senate to notify the President of the United States that a quorum of each House has been assembled and is ready to receive any communication that he may be pleased to make, has performed that duty.

Mr. Speaker, the President sends to the House and each of its Members his warmest greetings for the new year, and the President further requests the privilege of addressing a joint session of the two Houses in a state of the Union message at 9 o'clock p.m. on Wednesday, January 12, 1977.

The SPEAKER. The Chair thanks the chairman of the committee and its members.

COMPENSATION OF CERTAIN MINORITY EMPLOYEES

Mr. RHODES. Mr. Speaker, I offer a resolution (H. Res. 6) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 6

Resolved, That pursuant to the Legislative Pay Act of 1929, as amended, five of the minority employees authorized therein shall be the following-named persons, effective January 3, 1977, until otherwise ordered by the House, to wit: Joe Bartlett, Walter P. Kennedy, and Tommy Lee Winebrenner to receive gross compensation of $41,800, respectively; Ronald W. Lasch to receive gross compensation of $33,994.80; and J. Brian Smith to receive gross compensation of $32,376 per annum.

The resolution was agreed to.

A motion to reconsider was laid on the table.

HOUR OF MEETING OF HOUSE OF REPRESENTATIVES

Mr. WRIGHT. Mr. Speaker, I offer a resolution (H. Res. 7) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 7

Resolved, That until otherwise ordered, the hour of meeting of the House shall be, 12 o'clock meridian on Mondays and Tuesdays; 3 o'clock postmeridian on Wednesday; 11 o'clock antemeridian on all other days of the week up to and and including May 14, 1977; and that from May 15, 1977 until June 30, 1977 the hour of daily meeting of the House shall be 12 o'clock meridian on Mondays and Tuesdays and 10 o'clock antemeridian on all other days of the week; and that from July 1, 1977 until the end of the first session, the time of meeting of the House shall be 12 o'clock meridian.

The resolution was agreed to.

A motion to reconsider was laid on the table.

JOINT SESSION OF CONGRESS—STATE OF THE UNION MESSAGE

Mr. WRIGHT. Mr. Speaker, I offer a concurrent resolution (H. Con. Res. 1) and ask for its immediate consideration.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 1

Resolved by the House of Representatives (the Senate concurring), That the two Houses of Congress assemble in the Hall of the House of Representatives on Wednesday, January 12, 1977, at 9 o'clock postmeridian, for the purpose of receiving such communications as the President of the United States shall be pleased to make to them.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FOR A JOINT SESSION TO COUNT ELECTORAL VOTES

Mr. WRIGHT. Mr. Speaker, I call up a Senate concurrent resolution (S. Con. Res. 1) and ask for its immediate consideration.

The Clerk read the Senate concurrent resolution, as follows:

S. CON. RES. 1

Resolved by the Senate (the House of Representatives concurring), That the two Houses of Congress shall meet in the Hall of the House of Representatives on Thursday, the 6th day of January 1977, at 1 o'clock postmeridian, pursuant to the requirements of the Constitution and laws relating to the election of President and Vice President of the United States, and the President of the Senate shall be their Presiding Officer; that two tellers shall be previously appointed by the President of the Senate on the part of the Senate and two by the Speaker on the part of the House of Representatives, to whom shall be handed, as they are opened by the President of the Senate, all the certificates and papers purporting to be certificates of the electoral votes, which certificates and papers shall be opened, presented, and acted upon in the alphabetical order of the States, beginning with the letter "A"; and said tellers, having then read the same in the presence and hearing of the two Houses, shall make a list of the votes as they shall appear from the said certificates; and the votes having been ascertained and counted in the manner and according to the rules by law provided, the result of the same shall be delivered to the President of the Senate, who shall thereupon announce the state of the vote, which announcement shall be deemed a sufficient declaration of the persons, if any, elected President and Vice President of the United States, and, together with a list of the votes, be entered on the Journals of the two Houses.

The Senate concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

The SPEAKER. Pursuant to the provisions of Senate Concurrent Resolution 1, the Chair appoints as tellers on the part of the House to count the electoral votes on January 6, 1977, the gentleman from New Jersey, Mr. THOMPSON, and the gentleman from Alabama, Mr. DICKINSON.

AUTHORIZING SPEAKER TO DECLARE A RECESS ON WEDNESDAY, JANUARY 12, 1977

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that on Wednesday, January 12, 1977, it may be in order for the Speaker to declare a recess at any time subject to the call of the Chair.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

AUTHORIZING SPEAKER TO DECLARE RECESSES ON THURSDAY, JANUARY 6, 1977

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that on Thursday, January 6, 1977, it may be in order for the Speaker to declare recesses at any time subject to the call of the Chair.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

PRESIDENTIAL INAUGURATION

Mr. WRIGHT. Mr. Speaker, I offer a concurrent resolution (H. Con. Res. 2) and ask for its immediate consideration.

The Clerk read as follows:

H. CON. RES. 2

Resolved by the House of Representatives (the Senate concurring), That effective from January 4, 1977, the joint committee created by Senate Concurrent Resolution 90, of the Ninety-fourth Congress, to make the necessary arrangements for the inauguration of the President-elect and Vice President-elect of the United States on the 20th day of January 1977, is hereby continued and for such purpose shall have the same power and authority as that conferred by such Senate Concurrent Resolution 90, of the Ninety-fourth Congress.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER. Pursuant to the provisions of House Concurrent Resolution 2, 95th Congress, the Chair appoints as members of the Joint Committee to Make the Necessary Arrangements for the Inauguration of the President-Elect and the Vice President-Elect of the United States on the 20th day of January, 1977, the following Members on the part of the House: Mr. O'NEILL, of Massachusetts; Mr. WRIGHT, of Texas; and Mr. RHODES, of Arizona.

INTRODUCTION AND REFERENCE OF BILLS TODAY

The SPEAKER. The Chair would like to make a statement concerning the introduction and reference of bills today.

As Members are aware, they have the privilege today of introducing bills. Heretofore on the opening day of a new Congress, several thousand bills have been introduced. It will be readily apparent to all Members that it may be a physical impossibility for the Speaker to examine each bill for reference today. The Chair will do his best to refer as many bills as possible, but he will ask the indulgence of Members if he is unable to refer all the bills that may be introduced. Those bills which are not referred and do not appear in the RECORD as of today will be included in the next day's RECORD and printed with a date as of today.

The Chair has advised all officers and employees of the House that are involved in the processing of bills that every bill, resolution, memorial, petition, or other material that is placed in the hopper must bear the signature of a Member. Where a bill or resolution is jointly sponsored, the signature must be that of the Member first named thereon. The bill clerk is instructed to return to the Member any bill which appears in the hopper without an original signature. This procedure was inaugurated in the 92d Congress. It has worked well, and the Chair thinks that it is essential to continue this practice to insure the integrity of the process by which legislation is introduced in the House.

ANNOUNCEMENT BY THE SPEAKER REGARDING JOINT SESSION ON JANUARY 12

The SPEAKER. The Chair desires to make an announcement.

After consultation with the majority and minority leaders, and with their consent and approval, the Chair announces that on January 12, when the Houses meet in joint session to hear an address by the President of the United States, only the doors immediately opposite the Speaker and those on his left and right will be open.

No one will be allowed on the floor of the House who does not have the privilege of the floor of the House.

Due to the large attendance which is anticipated, the Chair feels that the rule regarding the privilege of the floor must be strictly adhered to.

Children of Members will not be permitted on the floor and the cooperation of all the Members is requested.

PROVIDING COMPENSATION AT MAXIMUM PAY LEVELS FOR EMPLOYEES OF HOUSE OF REPRESENTATIVES

Mr. WRIGHT. Mr. Speaker, I offer a resolution (H. Res. 8) and ask unani-

mous consent for its immediate consideration.

Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read the resolution as follows:

H. RES. 8

Resolved, That, until otherwise provided by law—

(1) each employee referred to in subsection (a) of the first sentence of House Resolution 413, Ninety-fourth Congress, adopted May 6, 1976,

(2) each employee in a position referred to in subsection (b) of section 523 of Public Law 91–510, and

(3) each individual with respect to whose compensation House Resolution 890, Ninety-second Congress, was made permanent law by Public Law 92–607,

may be compensated at a rate not in excess of the rate of basic pay for one pay level above the maximum pay level for employees of the House of Representatives provided under clause 6(c) of Rule XI of the Rules of the House of Representatives.

The resolution was agreed to.

A motion to reconsider was laid on the table.

CREATING SELECT COMMITTEE ON ASSASSINATIONS

Mr. WRIGHT. Mr. Speaker, I offer a resolution and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 9

Resolved, That, effective January 3, 1977, there is hereby created a Select Committee on Assassinations to be composed of twelve Members and Delegates of the House of Representatives to be appointed by the Speaker, one of whom he shall designate as Chairman. Any vacancy occurring in the membership of the Select Committee shall be filled in the same manner in which the original appointment was made.

The Select Committee or a Subcommittee thereof is authorized and directed to conduct a full and complete investigation and study of the circumstances surrounding the assassination, murder, homicide and death of President John F. Kennedy and the assassination, murder, homicide and death of Martin Luther King, Jr. and of any other persons the Select Committee shall determine in order to ascertain whether the existing laws of the United States, including but not limited to laws relating to the safety and protection of the President of the United States, assassinations of the President of the United States, deprivation of civil rights, and conspiracies related thereto, as well as the investigatory jurisdiction and capability of agencies and departments of the United States Government, are adequate, either in their provisions or in the manner of their enforcement; and shall make recommendations to the House, if the Select Committee deems it appropriate, for the amendment of existing legislation or the enactment of new legislation.

For the purpose of carrying out this resolution the Select Committee, or any subcommittee thereof authorized by the Select Committee to hold hearings, is authorized to sit and act during the present Congress at such times and places within the United States, including any Commonwealth or possession thereof, or in any other country, whether the House is in session, has recessed, or has adjourned, to hold such hearings, and to require, by subpoena or otherwise, the attendance and testimony of such witnesses and the production of such books, records, correspondence, memorandums, papers, and documents as it deems necessary; to take testimony on oath anywhere within the United States or in any other country and to authorize designated counsel for the Select Committee to obtain statements from any witness who is placed under oath by an authority who is authorized to administer oaths in accordance with the applicable laws of the United States or of any state; except that neither the Select Committee nor any subcommittee thereof may sit while the House is reading a measure for amendment under the five minute rule unless special leave to sit shall have been obtained from the House. The Chairman of the Select Committee may establish such subcommittees of the Select Committee as he considers appropriate. One-third of the Members of the Select Committee shall constitute a quorum for the transaction of business as permitted by the rules of the House, except that the Select Committee may designate a lesser number as a quorum for the purpose of taking testimony, but not less than two. The Select Committee may employ and fix the compensation of such clerks, experts, consultants, technicians, attorneys, investigators, and clerical and stenographic assistants as it considers necessary to carry out the purposes of this resolution. The Select Committee may reimburse the members of its staff for travel, subsistence, and other necessary expenses incurred by them in the performtance of the duties vested in the Select Committee, other than expenses in connection with meetings of the Select Committee or any subcommittee thereof held in the District of Columbia.

Subpenas may be authorized by the select committee, or any subcommittee thereof, or the chairman of the select committee, and issued under the signature of the chairman of the select committee or any member of the Select Committee designated by him, and may be served by any persons designated by such chairman or member.

The select committee shall be considered a committee of the House of Representatives for all purposes of law, including but not limited to section 102 of the Revised Statutes of the United States (2 U.S.C. 192); and sections 6002 and 6005 of title 18, United States Code or any other act of Congress regulating the granting of immunity to witnesses.

The select committee shall adopt written rules governing its procedures, which rules shall not be inconsistent with this resolution and the Rules of the House of Representatives.

The select committee shall report to the House as soon as practicable during the present Congress the results of its investigation and study, together with such recommendations as it deems advisable. Any such report which is made when the House is not in session shall be filed with the Clerk of the House.

The SPEAKER. Is there objection to the present consideration of the resolution?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, will the gentleman from Texas, the new majority leader, tell us whether it is possible in the change of rules for the House Committee on Administration to allocate any money to this particular function without a vote of the House?

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. I would be glad to yield.

Mr. WRIGHT. Mr. Speaker, it is my understanding, and I will yield for confirmation to the House Committee on Administration, that absent an amendment of this type, there would be no means by which the committee could makes funds available to this special committee.

Mr. THOMPSON. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. I would be happy to yield.

Mr. THOMPSON. The gentleman from New Jersey at the moment is not the chairman of the Committee on House Administration.

Mr. ROUSSELOT. Is there any doubt in the gentleman's mind that the gentleman will be?

Mr. THOMPSON. Mr. Speaker, if the gentleman will yield further, with the experiences of the past, it might be reasonable with this rule; but earlier in the day the House adopted the rule so that all select, special, ad hoc and other type committees, before they can be funded must introduce resolutions which will go to the Committee on House Administration, to its Subcommittee on Accounts, the prospective chairman being our colleague, the gentleman from Pennsylvania (Mr. DENT); then to the full committee and then to the floor.

Mr. ROUSSELOT. So what the gentleman is saying, before the committee can function further in that respect, coming from the chairmanship the gentleman formerly held, it must be brought to the floor.

Mr. THOMPSON. Mr. Speaker, if the gentleman will yield further, the answer to that is "Yes." The House will have the opportunity to consider the resolution, not only for the committee to which the distinguished majority leader is referring, but to all other special, select, and ad hoc committees.

Mr. ROUSSELOT. Mr. Speaker, further reserving the right to object, the effect of this resolution is really based on a continuing resolution until a further resolution is passed.

Mr. WRIGHT. Mr. Speaker, if the gentleman will yield, that is precisely correct.

Mr. THOMPSON. Mr. Speaker, will the gentleman yield further?

Mr. ROUSSELOT. I am glad to yield.

Mr. THOMPSON. Essentially the resolution of the gentleman from Texas is to reconstitute the committee. The committee, presuming the adoption of the next resolution, which is a continuing resolution, will be entitled to the equivalent of 1 month's expenditure, or approximately $8,000 per month, until the House acts on the larger budget request.

Mr. ROUSSELOT. Mr. Speaker, I appreciate the gentleman's comment. That was my next question. We are then, in effect, voting to fund this select committee for 1 more month.

Mr. THOMPSON. Mr. Speaker, will the gentleman yield further?

Mr. ROUSSELOT. I would be glad to yield.

Mr. THOMPSON. Presuming from the date the continuing resolution, which will be up next passes, the Committee on Assassinations, or whatever it is called, will be funded under the language of the continuing resolution until March 31.

Mr. ROUSSELOT. At the rate of approximately $8,000 a month?

Mr. THOMPSON. If the gentleman will yield further, at the equivalent of one-twelfth per month of its authorization in the previous Congress, keeping in mind that the committee was constituted late in the previous Congress, in September.

Mr. WRIGHT. Mr. Speaker, will the gentleman yield further?

Mr. ROUSSELOT. I yield to the distinguished majority leader.

Mr. WRIGHT. I think the accurate description of what this would permit is to say that it would allow the continued authorization, until some action can be taken, at the rate of actual expenditure incurred by that committee in the month of December.

Mr. ROUSSELOT. But not to exceed that amount?

Mr. WRIGHT. Not to exceed that amount; not to exceed that amount.

Mr. ROUSSELOT. From the $50,000 per month, is that what it is?

Mr. WRIGHT. If the gentleman will yield further, I am advised that that is approximately correct, and under no circumstances could enactment of this resolution authorize any amount calling for the expenditure of more than $50,000.

Mr. ROUSSELOT. I thank the gentleman for yielding, and I withdraw my reservation of objection.

Mr. BAUMAN. Mr. Speaker, reserving the right to object, I certainly was not aware that this resolution was going to be called up this afternoon. Copies have not been available to Members generally. I listened to its reading very carefully, as one who supported the original authorization for this committee, I believed the statement of the former gentleman from Virginia, Mr. Downing, that the investigation was going to cost one-half million dollars to $1 million and would continue for about a year. I am and a great many other people are alarmed at the scope of both the staffing and the expenditures that have now been proposed.

Surely, this committee does not have a higher claim to the consideration of the House than many of those standing or select committees or other groups. Unfortunately, none of us have had much of a chance to consider this. I would ask the gentleman if the resolution could not be brought up on Thursday so that Members would have a sufficient chance to consider it.

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. BAUMAN. Certainly, I yield to the gentleman.

Mr. WRIGHT. I wish the gentleman would not suggest that we bring it up on Thursday, because Thursday is set aside for the somewhat ceremonial, but nonetheless extremely important, constitutionally directed business of canvassing votes and discovering who was elected President of the United States.

I would suggest to the gentleman that the House will have ample opportunity to work its will as to the vote with respect to this particular committee. I too, as has the gentleman from Maryland, have been alarmed by quite large sums bandied about in the press as to the probable cost of this investigation. What we are doing at the moment is authorizing only the very short view, because it is necessary to authorize continuously lest it die, and then at a rate no more than the amount of money expended monthly as was expended in the preceding month, which was the month of December.

It cannot cost more than about $50,000, and I would suggest to the gentleman that it is appropriate to vote on it today. The gentleman from Texas (Mr. GONZALEZ), I am advised, discussed it in some detail with the gentleman from Ohio (Mr. DEVINE), and I am not aware of any basic issue.

Mr. BAUMAN. Further reserving the right to object, I understand the gentleman's desire to have this fast $50,000 which—if the gentleman will pardon the expression—is not peanuts. I do think that if we go ahead with this resolution we are, in effect, approving of what we have heard the committee's plans are for the future. I cannot agree to the scope of those plans or the cost.

I therefore object to its consideration

The SPEAKER. Objection is heard.

Mr. WRIGHT. Mr. Speaker, I move the adoption of the resolution.

The SPEAKER. The Chair will inform the gentleman that that motion is not in order at this time.

HOUSE RESOLUTION 10 RELATING TO HOUSE DOCUMENTS SUBPENAED BY COURTS OF LEGAL OFFICERS

Mr. WRIGHT. Mr. Speaker, I offer a privileged resolution (H. Res. 10), and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 10

Whereas, by the privileges of this House no evidence of a documentary character under the control and in the possession of the House of Representatives can, by the mandate of process of the ordinary courts of justice be taken from such control or possession except by its permission: Therefore be it

Resolved, That when it appears by the order of any court in the United States or a judge thereof, or of any legal officer charged with the administration of the orders of such court or judge, that documentary evidence in the possession and under the control of the House is needful for use in any court of justice or before any judge or such legal officer, for the promotion of justice, this House will take such action thereon as will promote the ends of justice consistently with the privileges and rights of this House; and be it further

Resolved, That during the Ninety-fifth Congress, when a subpena or other order for the production or disclosure of information is by the due process of any court in the United States served upon any Member, officer, or employee of the House of Representatives, directing appearance as a witness before the said Court at any time and the production of certain and sundry papers in the possession and under the control of the House of Representatives, that any such Member, officer, or employee of the House, after notifying the Speaker, is authorized to appear before said court at the place and time named in any such subpena or order, but no papers or documents in the possession or under the control of the House of Representatives shall be produced in response thereto; and be it further

Resolved, That after the Speaker has been notified by the Member, officer, or employee that a proper court has determined upon the materiality and revelancy of specific papers or documents called for in the subpena or other order, then said court, through any of its officers or agents shall have full permission to attend with all proper parties to the proceedings before said court and at a place under the orders and control of the House of Representatives and take copies of the said documents or papers and the Clerk of the House is authorized to supply certified copies of such documents that the court has found to be material and relevant, except that under no circumstances shall any minutes or transcripts of executive sessions, or any evidence of witnesses in respect thereto be disclosed or copied, nor shall the possession of said documents and papers by any Member, officer, or employee of the House be disturbed or removed from their place of file or custody under said Member, officer, or employee; and be it further

Resolved, That the House of Repesentatives reserves to itself the power to revoke or modify the authority contained herein in all or specific instances; and be further

Resolved, That a copy of these resolutions be transmitted by the Clerk of the House to any of said courts whenever such writs of subpena or other orders are issued and served as aforesaid.

The resolution was agreed to.

A motion to reconsider was laid on the table.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair desires to make an announcement concerning the electronic voting system.

After consultation with the leadership on both sides of the aisle it has been decided that it would be a convenience to Members to permit changes in votes cast with the electronic system by reinserting the voting card under the following conditions:

First, on 15-minute votes, Members may reinsert a voting card in any voting station during the first 10 minutes of the voting period. After 10 minutes, if a Member wishes to change his vote, he must follow the present procedure of doing so by voting card, in the well, following the completion of the 15-minute voting period; with the announcement of his change when called by the Clerk.

Second, on 5-minute votes, the revised procedure will permit Members to reinsert voting cards in any voting station at any time until the Chair directs voting stations to be closed by inquiring whether Members in the Chamber wish to change their votes or be recorded. From that point until the Chair's announcement of the result, Members must follow the present procedure of submitting voting cards, in the well, at the completion of the 5-minute voting period, and an-

nouncing his change when recognized to do so.

The necessary programing of the computer has been accomplished to accommodate this change and so this new procedure on 5-minute votes is effective today.

AUTHORIZING FUNDS FOR THE STANDING AND SELECT COMMITTEES OF THE HOUSE OF REPRESENTATIVES

Mr. THOMPSON. Mr. Speaker, I offer a privileged resolution (H. Res. 11) and ask unanimous consent for its immediate consideration.

Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The Clerk read the resolution, as follows:

H. RES. 11

Resolved, That (a) there shall be paid out of the contingent fund of the House of Representatives, in accordance with subsection (b), for the period beginning January 3, 1977, and ending at the close of March 31, 1977, such sums as may be necessary for the continuance of the same necessary projects, activities, operations, and services, by contract or otherwise (including payment of staff salaries for services performed), and for the accomplishment of the same necessary purposes, undertaken in calendar year 1976 by each standing or select committee established in the rules of the House of Representatives.

(b) Each standing committee or select committee referred to in subsection (a) shall be entitled, for each month or portion of a month occurring during the period specified in subsection (a), to payments out of the contingent fund of the House of Representatives in amounts equal to one-twelfth of the total amount authorized for use by the standing committee or select committee involved during calendar year 1976.

SEC. 2. (a) In the case of any select committee of the House of Representatives which—

(1) was established by resolution during the Ninety-fourth Congress;

(2) did not complete the functions assigned to it by such resolution, or any subsequent resolution, before the close of the Ninety-fourth Congress; and

(3) is reestablished by resolution during the Ninety-fifth Congress before the close of March 31, 1977, to carry out functions substantially similar to functions assigned to such select committee during the Ninety-fourth Congress;

such select committee shall be entitled, for each month or portion of a month occurring during the period beginning on the effective date of the resolution reestablishing such select committee and ending at the close of March 31, 1977, to payments out of the contingent fund of the House of Representatives, for the expenses and purposes specified in subsection (a) of the first section of this resolution, in amounts equal to the greater of—

(A) one-twelfth of the amount determined under subsection (b); or

(B) the total amount of expenditures made by the select committee involved during December 1976;

except that the entitlement of such select committee for the month during which such select committee is reestablished shall be prorated based upon that portion of such month during which such select committee is in existence.

(b) The amount which shall be the basis for an entitlement under subsection (a) shall be the amount which bears the same ratio to the total amount authorized for use by the select committee involved during calendar year 1976 as 12 months bears to the number of months during which such select committee was in existence during such year. For purposes of the preceding sentence, any portion of a month in calendar year 1976 which is 15 days or more and during which any such select committee was in existence shall be considered to be a complete month.

SEC. 3. The entitlement of any standing committee or select committee of the House of Representatives to payments out of the contingent fund of the House of Representatives pursuant to the provisions of this resolution shall cease to be effective on the effective date of the primary expense resolution adopted with respect to the standing committee or select committee involved.

SEC. 4. Funds authorized by this resolution shall be expended pursuant to regulations established by the Committee on House Administration in accordance with law.

Mr. THOMPSON (during the reading). Mr. Speaker, I ask unanimous consent that the resolution be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

Mr. BAUMAN. Mr. Speaker, reserving the right to object, will the gentleman explain the resolution?

Mr. THOMPSON. Mr. Speaker, if the gentleman will yield I will be glad to explain it.

Mr. BAUMAN. I yield to the gentleman from New Jersey.

Mr. THOMPSON. Mr. Speaker, this is a resolution authorizing funds for the continued operation of the standing and select committees of the House of Representatives. It is both traditional and essential to the continued operation of the House of Representatives that a continuing resolution be adopted each session, in order that the standing and select committees of the House of Representatives may continue their necessary activities, projects, operations, and services—including the payment of staff salaries for services performed—as undertaken by these committees in the calendar year 1976.

In order to permit standing or select committees established by the rules of the House to continue their operations, this resolution makes available from the contingent fund of the House an amount each month equal to one-twelfth of that committee's total authorization for calendar year 1976. Such payments are to continue until the effective date of the primary expense resolution adopted with respect to each committee, or until March 31, 1977.

With respect to select committees not established in the rules of the House, their funding under this continuing resolution will be available upon the effective date of the resolution reestablishing such committees in the 95th Congress.

Mr. Speaker, I move the adoption of the resolution.

Mr. BAUMAN. I thank the gentleman.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The resolution was agreed to.

A motion to reconsider was laid on the table.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C.,
January 3, 1977.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker,
House of Representatives,
Washington, D.C.

DEAR MR. SPEAKER: Under Rule III, Clause 4 (Section 647) of the Rules of the House of Representatives, I herewith designate Mr. W. Raymond Colley, Deputy Clerk, to sign any and all papers and do all other acts for me under the name of the Clerk of the House which he would be authorized to do by virtue of this designation, except such as are provided by statute, in cases of my temporary absence or disability.

If Mr. Colley should not be able to act in my behalf for any reason, then Mr. Benjamin J. Guthrie, Assistant to the Clerk, shall similarly perform such duties under the same conditions as are authorized by this designation.

These designations shall remain in effect for the 95th Congress or until revoked by me.

Sincerely,

EDMUND L. HENSHAW, Jr.,
Clerk, U.S. House of Representatives.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C.,
October 5, 1976.

Hon. CARL ALBERT,
The Speaker,
U.S. House of Representatives,
Washington, D.C.

DEAR MR. SPEAKER: I have the honor to transmit herewith a sealed envelope from the White House, received in the Clerk's Office at 11:55 a.m. on Tuesday, October 5, 1976, and said to contain a message from the President wherein he transmits the sixth periodic report on the Cyprus negotiations as required by Public Law 94–104.

With kind regards, I am

Sincerely,

EDMUND L. HENSHAW, Jr.,
Clerk, U.S. House of Representatives.

SIXTH PERIODIC REPORT ON CYPRUS NEGOTIATIONS—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95–2)

The SPEAKER pro tempore (Mr. WRIGHT) laid before the House the following message from the President of the United States; which was read and, without objection, referred to the Committee on International Relations and ordered to be printed:

To the Congress of the United States:

Pursuant to Public Law 94–104, I am submitting my sixth periodic report on the Cyprus negotiations and the actions which this Administration is taking to assist in the search of a lasting solution to the problems still facing the people of the Republic of Cyprus.

In my last report I reviewed recent steps taken by the Administration to bring about further progress in the Cyprus talks, and I emphasized the need for the parties to set aside procedural problems and move on to discussions of key substantive issues.

Our efforts during the past sixty days have been directed to encouraging the resumption of such negotiations. We have been in close contact with our major Western allies regarding new ideas which might contribute to progress in the Cyprus talks and have continued to work closely with United Nations Secretary General Waldheim. Secretary of State Kissinger met with Mr. Waldheim in New York in late August to discuss the Cyprus question. Following that meeting Secretary General Waldheim asked the chief Cypriot negotiators from both sides to come to New York for individual consultations with him on how the negotiations might best be resumed. These consultations developed into a series of joint meetings at which both sides discussed the issues which were blocking further progress. After these meetings, the two Cypriot negotiators agreed to continue their consultations in Nicosia, under the chairmanship of the Secretary General's Special Representative for Cyprus. It is my hope these talks will lead to resumption of meaningful discussion on the main issues.

In his meeting with the Foreign Ministers of Greece and Turkey at the United Nations last week, Secretary Kissinger urged their strong support once again for a new round of talks. We will continue to work as closely as possible with the Governments of Greece and Turkey, with the UN Secretary General, with our Western allies, and with the parties themselves, to insure that every opportunity is seized in pursuing a just and lasting settlement on Cyprus.

To focus the world's attention on the need for rapid progress, Secretary Kissinger stated anew the position of my Administration in his speech before the UN General Assembly on September 30 when he emphasized that our overriding objectives remain the well-being of the Cypriot people and peace in the Eastern Mediterranean. Calling upon all concerned to undertake a new commitment to achieve these ends, he underlined once again the position I have repeatedly voiced:

"A settlement must come from the Cypriot communities themselves. It is they who must decide how their island's economy and government shall be reconstructed. It is they who must decide the ultimate relationship of the two communities and the territorial extent of each area."

This Administration believes that in order to restore momentum in the negotiations a set of principles along the following lines might help the parties to resume talks on substantive issues:

—A settlement should preserve the independence, sovereignty and territorial integrity of Cyprus;

—The present dividing lines on Cyprus must be adjusted to reduce the area currently controlled by the Turkish side;

—The territorial arrangement should take into account the economic requirements and humanitarian concerns of the two Cypriot communities, including the plight of those who remain refugees;

—A constitutional arrangement should provide conditions under which the two Cypriot communities can live in freedom and have a large vote in their own affairs; and

—Security arrangements should be agreed that permit the withdrawal of foreign military forces other than those present under international agreement.

It is my strong hope that these ideas may be given careful consideration by all concerned.

In addition to these steps, the United States also continues to provide financial assistance to the people of Cyprus so that they may overcome the burdens imposed on them by the events of 1974. I have just signed into law a bill authorizing $17.5 million in U.S. relief assistance for Cyprus in the coming fiscal year. Our assistance thus far, some $50 million over the past two years, has been a major factor in providing adequate homes for almost all of those unfortunate Cypriots uprooted in 1974, and, in addition, has made a substantial contribution toward the medical needs, emergency food aid and the general welfare of the many displaced from their homes. We will continue to offer our help wherever it is needed.

The United States also continues to be the largest financial contributor to the maintenance of the United Nations Peacekeeping Force on Cyprus, which has done such a highly effective job. We continue actively to support both the work of the UN Peacekeeping Force and the UN resolutions calling for a just and lasting solution to the Cyprus problem, respect for the sovereignty and territorial integrity of that island, and withdrawal of all foreign military forces not authorized by agreements. While I strongly endorse all of these precepts, the last is of special importance since the cause of peace can only be poorly served when men confront each other with arms. I was therefore gratified to hear of the withdrawal last month of a further portion of the Turkish armed forces from Cyprus.

In summary, during the past sixty days we have increased our efforts to bring the two sides together once more for discussions in any area which might contribute to a more secure and normal life for the people of Cyprus. We have reaffirmed our determination to continue direct bilateral assistance on a large scale. We have worked with other members of the international community to bring about the best possible set of conditions for resumption of the Cyprus talks at an early date.

My Administration will further intensify its efforts to bring both sides together again with the hope, based on their meetings in New York last month, that some further significant advances may occur.

The people of the United States remain keenly interested in promoting an equitable and lasting settlement on Cyprus. My Administration has been active at every opportunity in encouraging such a settlement. We believe the people of both the Greek Cypriot and Turkish Cypriot communities share equally a desire for peaceful, productive and secure lives. We will continue to use every opportunity further to encourage the leaders of both sides toward a common solution which will achieve these goals.

GERALD R. FORD.

THE WHITE HOUSE, *October 4, 1976.*

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C.,
November 5, 1976.

HON. CARL ALBERT,
The Speaker, U.S. House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: I have the honor to transmit herewith a sealed envelope from the White House, received in the Clerk's Office at 2:30 P.M. on Friday, November 5, 1976, and said to contain a message from the President wherein he transmits the fourth special message under the Impoundment Control Act of 1974 for fiscal year 1977.

With kind regards, I am

Sincerely,

EDMUND L. HENSHAW, Jr.,
Clerk, U.S. House of Representatives.

WITHDRAWING OF ONE PROPOSED RESCISSION, REPORTING THREE NEW DEFERRALS, AND REPORTING REVISIONS TO TWO PREVIOUS DEFERRALS—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95–3)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Appropriations and ordered to be printed:

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I am withdrawing one previously proposed rescission and reporting three new deferrals. In addition, I am reporting revisions to two deferrals previously transmitted.

The withdrawal is for the highway crossing federal projects program of the Federal Highway Administration. The three new deferrals, totaling $980.8 million affect programs of the Departments of Defense, Health, Education, and Welfare, and the Treasury. The revised deferrals are for programs in the Department of Health, Education, and Welfare and reflect routine increases in the amounts previously deferred.

The details of the rescission withdrawal and each deferral are contained in the attached reports.

GERALD R. FORD.

THE WHITE HOUSE, *November 5, 1976.*

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore laid before the House the following communi-

cation from the Clerk of the House of Representatives:

DECEMBER 3, 1976.

Hon. CARL ALBERT,
The Speaker,
U.S. House of Representatives,
Washington, D.C.

DEAR MR. SPEAKER: I have the honor to transmit herewith a sealed envelope from the White House, received in the Clerk's Office at 1:35 P.M. on Friday, December 3, 1976, and said to contain a message from the President wherein he transmits the fifth special message under the Impoundment Control Act of 1974 for fiscal year 1977.

With kind regards, I am

Sincerely,

EDMUND L. HENSHAW, Jr.,
Clerk, U.S. House of Representatives.

FOUR NEW DEFERRALS AND TWO REVISIONS OF PREVIOUS DEFERRALS UNDER IMPOUNDMENT CONTROL ACT OF 1974—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95–4)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Appropriations and ordered to be printed:

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report four new deferrals of funds totaling $3.7 billion. Funds deferred were appropriated for the Department of Labor, two International Security Assistance programs, and ACTION.

In addition, I am reporting revisions to two deferrals previously transmitted. The Department of Defense military construction deferral is increased by $259.4 million and a General Revenue Sharing deferral in the Department of the Treasury is increased by $11.1 million.

The details of each deferral are contained in the attached reports.

GERALD R. FORD.

THE WHITE HOUSE, *December 3, 1976.*

FORTHCOMING 1978 BUDGET TO PROVIDE A DETAILED BLUEPRINT FOR FEDERAL SPENDING—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95–5)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, without objection, referred to the Committee on Ways and Means and ordered to be printed:

To the Congress of the United States:

In October 1975, I presented to the Congress a program of tax cuts and spending restraints that would have reduced the burden of government for all taxpayers. It would have given the American people more freedom to spend their incomes as they choose rather than as Washington chooses for them. However, Congress decided otherwise—to increase spending far more than I wanted and to cut taxes far less than I wanted.

My forthcoming 1978 Budget will provide a detailed blueprint for Federal spending. Today, as I promised, I am outlining my proposals for personal and business tax reductions in 1977. First, I again urge a permanent increase in the personal exemption from $750 to $1,000 to replace the system of temporary tax credits that have so greatly complicated the individual income tax return. I am also recommending an increase in the low income allowance and a series of permanent tax rate reductions. In total, my proposals provide income tax relief for individuals of approximately $10 billion in 1977. The tax reductions of 1975 and 1976 focused tax relief on the lower income taxpayer. However, it is high time to focus substantial tax relief on middle income taxpayers. The tax relief I seek will cut the 1977 income taxes of a typical family with four with an income of $15,000 by $227.

In the long run, inflation and real economic growth constantly push taxpayers into higher and higher tax brackets if tax law remains unchanged. Some believe that these additional tax receipts should be spent on new Federal programs. I do not. Instead, I believe that the Congress should periodically counteract the growing burden imposed by the tax system by providing offsetting tax cuts while continuing to restrain the rate of growth of Federal spending.

The creation of good permanent jobs for our expanding labor force requires a higher level of private investment. I am, therefore, recommending again a permanent reduction in the corporate income tax from 48 to 46 percent. This would reduce business tax liabilities by $2.5 billion in 1977.

I also urge making permanent the 10 percent investment tax credit and the surtax exemption provisions of the Tax Reform Act of 1976. In the longer run we must eliminate the double taxation of dividend payments. I am, therefore, renewing my proposal to integrate corporate and personal income taxes gradually over a period of years beginning in 1978. All of these changes in the tax laws will increase the funds available, directly and indirectly, for new and better plants, machinery, stores and equipment.

I am again recommending accelerated depreciation for new plants and equipment installed in rural and urban labor market areas where unemployment is 7 percent or higher. I am firmly convinced that this is a far better way to help create jobs in those areas that have lagged behind in the economic recovery than adding layer upon layer of new hastily conceived spending programs.

A year ago, in my 1977 Budget, I noted that the old age, survivors and disability trust funds would be depleted in the early 1980's unless some action was taken. Therefore, much as I didn't like doing it, I felt compelled to recommend payroll tax rate increases beginning January 1, 1977. The employee share of this increase would have amounted to less than one dollar per week for taxpayers at the top end of the pay scale and a few cents per week for those at the bottom. Congress failed to act on this proposal. Partly because of the delay, a higher tax increase is now necessary if the social security system is to remain intact. Because current law already prescribes a four-tenths of one percent increase in the tax rate in 1978, I do not believe that a very large additional increase is appropriate in that year. I am therefore proposing an additional two-tenths of one percent rate increase in 1978 supplemented by a six-tenths of one percent rate increase in 1979 and a three-tenths of one percent rate increase in 1980. These increases will restore the fiscal integrity of the Social Security Trust Funds in the short run and, together with my proposals for correcting the inflation adjustment for future benefits for currently employed workers, will greatly reduce the long-run deficit faced by the social security system.

I have in the past urged several other changes in our tax laws which are both necessary and desirable. These will be proposed again in my budget, but need not be discussed in detail at this time. These include a tax credit for home insulation, exempting charitable contributions from the burden of the minimum tax, increasing the railroad retirement tax in a manner consistent with the recommended Social Security tax increases, and providing State and local governments with an option to issue taxable bonds subsidized in part by the Federal government.

I am also recommending repeal of the earned income credit and the provision for funding Employee Stock Ownership Plans through additional investment tax credits. The earned income credit is not integrated with the rest of our welfare system and makes future reform of that system even more difficult. The Employee Stock Ownership Plan provides a very large taxpayer subsidy to employers who wish to purchase stock in their firm for their employees. I do not believe that this is an equitable approach to the encouragement of stock ownership.

I urge that the Congress take prompt action on all of the above tax proposals.

GERALD R. FORD.

THE WHITE HOUSE, *January 4, 1977.*

COMMUNICATIONS FROM CHAIRMAN OF COMMITTEE ON AGRICULTURE CONCERNING APPROVAL OF WORK PLANS FOR CERTAIN WATERSHED PROJECTS

The SPEAKER pro tempore laid before the House the following communication from the chairman of the Committee on Agriculture; which was read and, together with the accompanying papers, without objection, referred to the Committee on Appropriations:

WASHINGTON, D.C.,
September 29, 1976.

Hon. CARL ALBERT,
Speaker, House of Representatives,
Washington, D.C.

MY DEAR MR. SPEAKER: Pursuant to the provisions of section 2 of the Watershed Protection and Flood Prevention Act, as amended, the Committee on Agriculture on September 23, 1976, considered and by a voice vote unanimously approved the following work plans for watershed projects, which were referred to the Committee by Executive Communication:

Bayou Grosse Tete, Louisiana
Choctaw Bayou, Louisiana
Deer Creek, Mississippi
Diamond Brook, Massachusetts
Honolulu, Hawaii
Middle Walnut, Kansas
Mill Brook, New York
Sedgwick-Sand Draws, Nebraska and Colorado
Three Mile and Sulfur Draw, Texas
Wailuku-Alenaio, Hawaii
Bailey-Cox-Newtson, Indiana
Espanola-Rio Chama, New Mexico
Hall-Flat Creek, Indiana
Johnson Bayou, Louisiana
Long Branch, Nebraska
Mill Branch, Georgia

The attached are Committee resolutions with respect to these projects.

With best regards.

Sincerely,

THOMAS S. FOLEY,
Chairman.

COMMUNICATION FROM CHAIRMAN OF COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION AUTHORIZING CERTAIN WATERSHED PROJECTS

The SPEAKER pro tempore laid before the House the following communication from the chairman of the Committee on Public Works and Transportation; which was read and, together with the accompanying papers, without objection, referred to the Committee on Appropriations:

WASHINGTON, D.C., *October 1, 1976.*

Hon. CARL ALBERT,
Speaker of the House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the provisions of section 201 of Public Law 89–298, the Committee on Public Works and Transportation of the House of Representatives on September 23, 1976, adopted Committee resolutions authorizing the following water resources development projects:

Bear River Basin, California
Delaware River, Philadelphia, Pennsylvania, to Trenton, New Jersey
Fort Fisher, North Carolina
Grand Isle and Vicinity, Louisiana
Hay Creek, Schuylkill River Basin, Pennsylvania
Iowa and Cedar Rivers, Iowa and Minnesota, at Evansdale, Iowa
Jonesport Harbor, Maine
Kahoma Stream, Maui, Hawaii
Orgeon Slough, Oregon
Petit Anse, Tigre and Carlin Bayous, Louisiana
Ponce Harbor, Puerto Rico
Saw Mill River at Ardsley, New York
Southern Branch of Elizabeth River, Virginia
Upper Guyandotte River Basin, West Virginia
Virginia Beach, Virginia

Copies of the resolutions are enclosed.

With warm personal regards, I am,

Sincerely,

BOB JONES.

COMMUNICATION FROM THE CHAIRMAN OF THE COMMITTEE ON AGRICULTURE

The SPEAKER pro tempore laid before the House the following communication from the chairman of the Committee on Agriculture which was read and, together with the accompanying papers, without objection, referred to the Committee on Appropriations:

WASHINGTON, D.C., *October 2, 1976.*

Hon. CARL ALBERT,
Speaker, House of Representatives, Washington, D.C.

MY DEAR MR. SPEAKER: It has just been brought to my attention that in the last-minute rush toward adjournment of the 94th Congress, the name of the Flint Creek, New York, Watershed was inadvertently omitted from the listing of newly approved watershed projects contained in my September 29, 1976 letter to you although the signed resolution attesting to its approval was attached. This further correspondence is intended to rectify that oversight.

I am enclosing a copy of the original resolution, which you received earlier, in an effort to facilitate the updating of your records and apologize most sincerely for this omission.

With best personal regards,

Sincerely,

THOMAS S. FOLEY,
Chairman.

ADJOURNMENT TO THURSDAY, JANUARY 6, 1977

Mr. LEDERER. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at noon on Thursday, January 6, 1977.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

COMMUNICATION FROM THE CHAIRMAN OF THE COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION

The SPEAKER pro tempore laid before the House the following communication from the Chairman of the Committee on Public Works, which was read and together with the accompanying papers, without objection, ordered to be printed:

WASHINGTON, D.C.,
October 14, 1976.

Hon. CARL ALBERT,
Speaker of the House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the provisions of the Public Buildings Act of 1959, as amended, the House Committee on Public Works and Transportation approved a prospectus for proposed construction of a new Technical and Administrative Complex at the National Aviation Facilities Experimental Center (NAFEC) located near Atlantic City, New Jersey, on September 16, 1976.

The original and one copy of the authorizing resolution are enclosed.

Sincerely,

BOB JONES.

COMMUNICATION FROM THE CHAIRMAN OF THE COMMISSION ON ADMINISTRATIVE REVIEW

The SPEAKER pro tempore (Mr. DANIELSON) laid before the House the following communication from the Chairman of the Commission on Administrative Review, which was read and, without objection, ordered printed:

WASHINGTON, D.C.,
December 20, 1976.

The SPEAKER,
U.S. House of Representatives, Washington, D.C.

DEAR SIR: The Commission on Administrative Review, established by the House Resolution 1368 and incorporated into law by P.L. 94–440, was directed to study administrative operations and services of the House of Representatives. The Commission was requested by the Speaker to review and make recommendations to the House of Representatives regarding House scheduling.

Pursuant to this request the Commission on Administrative Review transmits herewith its initial report on scheduling with recommendations. This report is also intended to serve as the semi-annual report of the Commission mandated in the aforementioned resolution.

The Commission, in pursuing its responsibilities under H. Res. 1368, will continue to study and make recommendations in the following areas:

1. Scheduling of the House. Enclosed is a report and recommendations. Further scheduling changes will be considered later in the Commission study.
2. Financial Management and Accountability. This area is now being studied and the Commission plans to make recommendations to the House early in 1977.
3. Overall Organization of Administrative Units and Resource Management. The Commission is studying the organizational structure of administrative units as well as the resources available to the House.
4. Work Management. The Commission plans to look at the management of work in Member and committee offices and make recommendations to the House.

Sincerely,

DAVE R. OBEY,
Chairman.

COMMUNICATION FROM THE CHAIRMAN OF THE COMMISSION ON INFORMATION AND FACILITIES

The SPEAKER pro tempore laid before the House the following communication from the Chairman of the Commission on Information and Facilities, which was read and, without objection, ordered printed:

WASHINGTON, D.C.,
November 5, 1976.

Hon. CARL ALBERT,
Speaker of the House of Representatives. Washington, D.C.

DEAR MR. SPEAKER: A report of the House Commission on Information and Facilities on the Feasibility of a Congressional Staff Journal is hereto attached.

This project was completed in compliance with the provisions of House Resolution 988 of the 93d Congress, which also provided that the Commission report its findings to the Speaker no later than January 2, 1977.

All members of the Commission present at the meeting on September 30, 1976, voted unanimously to approve this report and the recommendations it contains.

Sincerely,

JACK BROOKS.

COMMUNICATION FROM THE CHAIRMAN OF THE COMMISSION ON INFORMATION AND FACILITIES

The SPEAKER pro tempore laid before the House the following communication from the Chairman of the Commission on Information and Facilities, which was read and, without objection, ordered printed:

WASHINGTON, D.C.,
December 30, 1976.

Hon. CARL ALBERT,
Speaker of the House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: House Resolution 988 of the 93d Congress, which established the

Commission on Information and Facilities, directed the Commission, among other things, to study "House resources for information and the organizational framework which makes them effective or ineffective." The Committee on Appropriations, in House Report 94–208, also expressed an active interest in these studies.

The Commission has completed studies of the Office of Technology Assessment and the Congressional Research Service. The third in this series of studies, devoted to the organizational effectiveness of the Congressional Budget Office, has been completed, and it is transmitted herewith.

Sincerely,

JACK BROOKS.

TRANSMISSION OF STUDY OF ORGANIZATIONAL EFFECTIVENESS OF CONGRESSIONAL RESEARCH SERVICE

The SPEAKER pro tempore laid before the House the following communication from the Chairman of the Commission on Information and Facilities, which was read and ordered to be printed:

WASHINGTON, D.C.,
December 30, 1976.

Hon. CARL ALBERT,
Speaker of the House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: House Resolution 988 of the 93d Congress, which established the Commission on Information and Facilities, directed the Commission, among other things, to study the Office of Technology Assessment, the Congressional Research Service and the General Accounting Office and "the organizational framework which makes them effective or ineffective." The Committee on Appropriations, in House Report 94–208, also expressed an active interest in these studies.

The second in this series of studies, devoted to the organizational effectiveness of the Congressional Research Service, has been completed, and it is transmitted herewith.

Sincerely,

JACK BROOKS.

TRANSMISSION OF REPORT OF STUDY OF INFORMATION PROBLEMS, FACILITIES, SPACE REQUIREMENTS, AND STAFF OF HOUSE OF REPRESENTATIVES

The SPEAKER pro tempore laid before the House the following communication from the Chairman of the Commission on Information and Facilities, which was read and, without objection, ordered to be printed:

WASHINGTON, D.C.,
December 30, 1976.

Hon. CARL ALBERT,
Speaker of the House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: House Resolution 988 of the 93d Congress, which established the Commission on Information and Facilities, directed the Commission to conduct a thorough and complete study of the information problems of the House of Representatives, the facilities and space requirements of Members and committees, and the staff required by the House Legislative Counsel to meet the needs of Members of the House, and to make such recommendations as may be appropriate. The resolution also required that the final report of the Commission be submitted no later than January 2, 1977, and it is transmitted herewith.

During the course of its work, the Commission has conducted a number of studies and pilot projects, the results of which have been published individually. The final report represents an overview of the information and space needs of the House and a summary of the findings and recommendations included in the Commission's previous studies and reports.

Sincerely,

JACK BROOKS.

THE CLOSING OF THE FRANKFORD ARSENAL

(Mr. LEDERER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. LEDERER. Mr. Speaker, I have asked for this opportunity to speak to the members of the House today, the day we take our oath of office, to draw your attention and that of the House to certain actions by the Pentagon and by the administration which continue to harm the economy of Philadelphia and which, in a larger sense, may adversely effect this Nation's security and the faith of our people in their Government.

I am referring to the closing of the Frankford Arsenal which lies partially in my congressional district.

Mr. Speaker, as you may know, Vice President-elect MONDALE has pledged his efforts, and the efforts of the Carter administration, to keeping the arsenal open. He has repeated that commitment many times and has asked that Secretary of Defense-designate Harold Brown begin an immediate review of the entire situation.

Meanwhile, the Army Armament Research and Development Command, under the direction of Gen. Bennett L. Lewis, has stepped up its own closing schedule, originally set for the summer of 1977, presumably to preclude the possibility that enough will be left of the Frankford facility to be saved by the Carter administration.

This is not an issue which simply effects Philadelphia or Pennsylvania; it effects us all.

Mr. Speaker, the history of the Army's decision to scuttle the Frankford Arsenal is filled with broken promises, specious arguments, misinformation, and half truths. In my judgment, there is probably enough evidence to warrant an investigation of the very process by which the Army decided this issue. The Philadelphia Daily News, as long ago as 1974, referred to a "complex web of intrigue and conflict of interest" and suggested that the Government's ability to influence the costs of arms produced by private industry would be severely undermined by this move.

Admittedly, I am distressed by the incredible number of jobs that Philadelphians have lost due to similar Pentagon decisions over the last 8 years—first, at the navy yard, then at the U.S. Electronics Command, and now at the Frankford Arsenal.

Mr. Speaker, I am concerned by the apparent indifference, on the part of the current administration, to the wishes of the incoming administration with respect to this matter. It is one thing to talk about a smooth and cooperative transition of power, but the people that I represent would have a difficult time squaring that sentiment with reality.

Mr. Speaker, I have sent a letter to Vice President-elect Mondale urging him to appeal directly to President Ford for an immediate moratorium on further transfers of people and machinery from the Frankford Arsenal. I am including a copy of my letter for insertion into today's RECORD. Clearly, the President has not gotten the message, and perhaps a direct appeal will remedy any problems of communications or misconceptions that may exist.

Mr. Speaker, I respectfully ask that each Member of this House read that letter and do what they can to help get the message through.

HOUSE OF REPRESENTATIVES,
Washington, D.C., January 4, 1977.

Hon. WALTER F. MONDALE,
Russell Office Building,
Washington, D.C.

DEAR VICE PRESIDENT-ELECT MONDALE: I was pleased by your recent request that Secretary of Defense-designate Harold Brown begin an immediate review of the Pentagon's decision to close the Frankford Arsenal. Your encouraging words and actions since the November 2nd election have served to underscore the sincerity of your pledge to keep the Arsenal open.

However, I am concerned that recent developments, coupled with the mysterious moves by the Pentagon over the past eight years, will make the Arsenal situation ancient history the day of your inauguration. Despite your widely publicized pronouncements to the contrary, the Army seems bent on closing this installation with ever increasing haste. One must assume that these activities are proceeding with the knowledge and approval of the current administration and that the White House has either not received the message, is not interested, or views your statements as empty rhetoric.

I am convinced that the only chance of preventing a premature closing of the Frankford Arsenal is by a direct appeal from you to President Ford, both privately and publicly, requesting an immediate moratorium on any further transfers of people or machinery. Only if that appeal is made and honored will Dr. Brown's review be of any value to the Carter-Mondale Administration. I am writing to you to ask you to make such an appeal.

This letter and my sense of urgency were sparked by the recent decision of the Army Armament Research and Development Command (ARADCOM) to accelerate the moving schedule of the Arsenal's small-caliber ammunition shops. These shops are a core component of the Arsenal and will apparently be dismantled and removed to Dover, New Jersey, by January 18, 1977—two days before your inaugural date.

My concern is not simply restricted to the loss of additional jobs in my district and in my city which some may regard as a parochial interest. Although, I must point out, the shutdown would mean a loss of $50 million in wages and $1.5 million in tax revenues for Southeastern Pennsylvania. I am also concerned about the attitude which has prevailed throughout the Nixon-Ford years and which has resulted in the loss of thousands upon thousands of jobs in this area; first at the Navy Yard, then at the U.S. Electronics Command and, finally, at the Frankford Arsenal.

Perhaps Dr. Brown's review will discover that economic considerations often cited by the Pentagon were merely excuses for these closings. Perhaps the review will find out why Philadelphia was subjected to such callous treatment. It was a decision, in my judgment, made without regard to higher national security considerations. Historically, the Frankford Arsenal has acted as a restraining influence on the costs of armaments

produced by private industry. That important function will be severely undermined by its closing.

In the Fall of 1974, the *Philadelphia Daily News* referred to a ". . . complex web of intrigue and conflict of interest . . ." and revealed that the 22 member panel which planned the Arsenal closing consisted of 18 executives from private companies who stood to benefit from that move.

Hoag Levins, the investigative reporter who wrote that devastating series, concluded by predicting that a probe would someday show ". . . what really happened at the Frankford Arsenal . . ." and that the Pentagon would suffer ". . . its own Watergate in the corruption laced field of armaments contracts."

Perhaps Dr. Brown's review will show all this and more.

It will undoubtedly show that Mayor Rizzo's offer to build new facilities—at no initial cost to the Army—was never seriously considered. It will show that on November 26, 1974, President Ford promised a reexamination of the Arsenal decision and offered the City the chance to submit a rebuttal to the Army's financial justification. I will also show that the Army privately considered its decision "irreversible" even before the City's documents were delivered on January 31, 1975.

Finally, the review will show that the pleas and arguments of Philadelphia's Congressional delegation had no impact on the Ford Administration. I am concerned about this attitude, and I am somewhat perplexed by an administration that prides itself on a "smooth transition" of power while moving in some areas—from the Arsenal issue to the decontrol of gasoline prices—to undercut stated goals and policies of the incoming administration.

I genuinely hope that I have misinterpreted both the actions and motivations of the Pentagon and of the Ford Administration, but I fear that my conclusions are correct.

Again, thank you for your efforts to save the Frankford Arsenal, and I trust that a direct appeal to the President will serve to clear up any doubts he may have about your intentions with respect to the future of the Arsenal.

With warmest wishes,

RAYMOND F. LEDERER,
Member of Congress.

CONGRESS FIRST PRIORITY MUST BE TO LOWER FEDERAL TAX RATES TO FIGHT BOTH INFLATION AND UNEMPLOYMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. KEMP) is recognized for 30 minutes.

Mr. KEMP. Mr. Speaker, the first priority of the 95th Congress must be to reduce rates across the board.

These cuts should not be temporary, one-shot rebates, but rather permanent reductions that will assure more jobs and greater productivity in the private sector.

Today I introduced a bill to provide for such permanent tax cuts. It is the Jobs Creation Act, a successor to my bill of the last Congress which had 132 cosponsors. I will explain it in detail in just a moment, but first let me return to why it is essential to restoring the vitality of our economy to enact this bill.

THE ECONOMIC EFFECTS OF LOWER TAX RATES

Reducing tax rates would be the most immediate and effective boost to economic recovery of all the options open to us. It would stimulate output, the purchase of additional equipment, the construction of homes and factories, and the creation of more jobs at higher real wages. In short, reduced rates will combat both inflation and unemployment.

At lower tax rates, we would have a substantially larger private sector and an expanding tax base. The expanded tax base would more than offset the decline in tax rates, as it has done in the past, so that Government revenues would be higher, even as they fell as a percentage of gross national product. In fact, paradoxically, they would be higher because they were a lower percentage of GNP and therefore less of a drag on the growth of the productive sector.

The choice before us is so simple that it is hard to imagine anyone's not being able to see it. There are two ways to try to gain additional tax revenues: higher tax rates with less economic activity, on the one hand, or lower tax rates with greater economic activity on the other.

Higher tax rates stunt economic growth, and the amount of income available to be taxed, while lower tax rates increase economic growth and income. Congress should pass real tax reform by guaranteeing lower tax rates and thus assuring real growth, but it will not until the public demands it. Too many in Congress have opted for the "spend your way to prosperity" approach in the past because of their attitude that Congress knows how to spend the peoples' income better than the people themselves.

TAX CUT INDUCED DEFICITS ARE SELF-CORRECTING

The simple fact of the matter is that potential deficits from tax rate reductions are nipped in the bud, as additional tax revenue is produced through accelerated expansion of employment and real output. Food, clothing, housing, and other goods and services are produced in larger quantity, helping to hold prices down as real consumer needs are satisfied by increased production.

Deficits created by excessive spending, on the other hand, inevitably lead to some form of tax increase, either through the inflation tax or higher taxes to pay interest on the expanded public debt. This spending adds nothing to the supply of food, clothing, housing, or other goods, and does nothing to help lower prices. It reduces the reward to labor and investment, shrinks the productive private sector, and leads to recession and layoffs. The last 10 years are an excellent example.

THE NECESSITY OF RETHINKING THE TAX CUT QUESTION

Many have argued against spending deficits for so long that they have come to fear any policy which appears, even if only at first glance, to increase the deficit. That fear has blurred our vision of the distinction between the effects of increased Government spending and tax rate reduction.

It is not that fiscal conservatives have not wanted to cut tax rates. But there is something akin to a visceral reaction that causes them to become hypnotized by the possibility of an imbalanced budget, to the point that they will not risk a tax rate reduction, no matter how successful that policy has proven in the past.

The big spenders in Congress have helped construct a national following by offering an endless stream of tax-supported programs to various constituencies. By playing Santa Claus—or, more accurately, Robin Hood—with other people's money, they were able to win popularity, but this appeal has diminished as people have begun to recognize that these programs come out of the hide of the average worker in taxes and inflation.

Unfortunately, however, others in Congress have made too little an effort to build programs which would, in effect, return to the producers and workers of this country their rightful earnings through tax rate reductions. This is what I propose a majority of us in this Congress do, and it has nothing to do with political party affiliation. It has to do with what the American people both need and want and with what freedom requires.

PREMISES FOR TAX ACTION

Tax policy must be considered from the standpoint of its effects on the incentives of people to work and produce, to save and invest, to build and employ. When tax rates go up and investment and employment opportunities in the private sector go down, it is not the rich who have been soaked, but the unfortunate workers who either become unemployed or must work with less productive tools and machinery.

Attempts to benefit the less fortunate and fight poverty by trying to redistribute income through the Tax Code ultimately are counterproductive. The only real way to raise the standard of living is to increase the amount of capital per capita by reducing the tax barriers to investment and employment.

In 1950, the United States had twice the per capita income of Sweden or Switzerland. In 1974, these countries surpassed the United States in per capita income, and several others are close at hand. This rapid progress of our trading partners was due to deliberate attempts to increase the availability of tools and equipment per worker. We should do the same.

The greater the tax, the greater the shrinkage in real growth. Conversely, lower tax rates produce growth. When tax rates were cut in the 1920's, 1950's, and 1960's, workers had more incentive to work, small businessmen worked longer hours, professional people took shorter vacations, people saved more, investment grew, new jobs were created, output soared, and people consumed more.

No wonder tax revenues rose.

We must eliminate the tax bias against saving and investment. I say bias, for there is no economic activity which we tax as heavily as savings and investment. It is taxed on the Federal level through personal and corporate income taxes, double taxation of corporate dividends, capital gains levies, inheritance taxes, and gift taxes. After that, State and local governments tax it in as many ways. The resulting total marginal tax

bite is often as high as 90 percent or more.

Taxes also impact directly on hiring. The firm's total cost of hiring includes payroll and withholding taxes, while a worker's take-home pay is exclusive of both. As taxes rise, the cost of labor to the firm rises, and fewer workers are hired. Simultaneously, the take-home pay of those with jobs is reduced, causing many workers to lose incentive and opportunity.

All of these effects are disastrous at a time of high inflation and unemployment.

Reducing tax rates, coupled with spending and monetary restraint, should be at the center of the Ford Administration's last opportunity for the January budget proposal to expand real economic recovery and Mr. Carter's first chance to address these problems.

REPUBLICAN AND DEMOCRATIC ADMINISTRATIONS HAVE PROVED TAX RATE CUTS WORK

We know such tax rate cuts work, and we also know that Republican and Democratic administrations in this century have gotten them through Congress with substantial benefits to the economy.

The Republicans swept to power in 1920 by pledging a "return to normalcy"—that is, a repeal of the high taxes which had been necessary to finance the first World War. Secretary of the Treasury Andrew Mellon insisted the high wartime rates were stifling economic growth and that their repeal would bring prosperity and government revenues sufficient to pay off the war debt. He was right. The Treasury staff, which had opposed the tax cuts, was proved wrong.

Over 40 years later, President Kennedy fulfilled his campaign pledge to "get the country moving again" by sharply reducing personal and business tax rates. And it worked in the 1960's the same way it worked for Mellon in the 1920's. Both periods saw sharp economic growth and improvement for those in the lower and middle-income brackets.

Clearly, the Kennedy rate cuts were successful, so why do some people oppose tax rate cuts today? The reason may be that they are more interested in redistributing income and expanding the role of Government than in producing greater real income through economic freedom.

The Kennedy tax cuts were rationalized by his chief economic adviser, Walter Heller, as a way of creating a deficit—that is, a way to stimulate aggregate demand. They were not rationalized on the grounds of increasing aggregate supply by increasing the reward to work and investment. They did have the same consequences as the Mellon cuts, however, and that is the economic point to be made here regardless of the rationale.

Kennedy sent his proposals to Capitol Hill despite the simplistic and static analysis of Treasury's accountants, who assumed there would be no increase in GNP due to the tax cut, and projected sizable tax losses. Kennedy's Treasury Department projected 6-year revenue losses of a staggering $89 billion as a result of the 1962–64 and 1965 tax cuts. Instead, revenues jumped upward by $54 billion over that period—a $143 billion total difference from what Treasury had projected. The reality is so dramatically different from the Treasury predictions that it warrants being looked at, year by year:

[In billions]

Year	1963	1964	1965	1966	1967	1968	Total
Treasury-estimated revenue losses	−2.4	−5.2	−13.3	−20.0	−23.7	−24.4	−89.0
Actual revenue gains	+7.0	+6.0	+4.0	+14.0	+19.0	+4.0	+54.0

[1] Library of Congress study done at my request.

Why were the Treasury predictions so far off? Because Treasury ignored the feed-back effects of tax rate changes on productive behavior.

REVENUE LOSS PROJECTIONS ARE USUALLY WRONG

Keynesian economic models ignore the reasons why people produce, and only consider changes in Government spending. In Keynesian economic models, lower Government spending is bad for Gross National Product and employment. Higher spending is good, even if it means a tax increase. The tax increase is assumed not to reduce the incentive to work and invest.

In its projections of revenue impacts arising from proposed tax cuts in recent years, the Treasury has traditionally assumed that tax rate reductions will produce tax revenue losses. The statistical reality of the Mellon and Kennedy tax rate cuts was not seen by the White House last year until 2 weeks before the election. President Ford's statements in favor of tax cuts in the latter part of the campaign reflected an awareness of the concept behind the Mellon and Kennedy approaches, but it was too late.

Candidate Carter was the beneficiary, especially since he had embraced the elimination of double taxation of dividends and the adoption of several other capital-investment-producing measures early in his campaign.

A major article in the Wall Street Journal by one of Mr. Carter's principal economic advisers, Walter Heller, expressing sympathy for this approach, buttressed the Carter campaign platform in this regard.

President-elect Carter—and Republicans and Democrats in both the House and the Senate—have a sizable research base from which to work in pursuing across-the-board tax rate cuts.

WHAT IS THE JOBS CREATION ACT?

Over the past several years, I have helped lead a drive to reduce tax rates on both personal and business incomes. This drive centers around the Jobs Creation Act and continues to be the private enterprise alternative to the Humphrey-Hawkins "full employment bill" and the kind of misguided tax reform act which Congress passed and the President signed into law this year.

The Jobs Creation Act is designed to assure the acceleration of savings and investment capital in the private sector of the economy and remove the bias against savings and production in the tax code. Capital investment is the only way to increase the economic growth rates which once gave this country unquestioned leadership and prosperity in the world community. The Jobs Creation Act would mean more real, productive jobs in the private sector, higher real wages, a boost to the economic growth rate and the Gross National Product, and even more total revenue with which to reduce the deficit and even start paying off the national debt.

The Jobs Creation Act in the 95th Congress will reduce all income tax rates by 10 percent. For example, if the rate is now 20 percent, it will be reduced by 10 percent. This treats everyone equally and brings the tax brackets in line with the shrunken purchasing power of everyone's income. The legislation will bring an end to that double taxation on dividends which taxes the earnings of job-creating investment twice. It will increase the corporate surtax exemption to $100,000 to help smaller businesses compete more successfully.

It will carry into effect additional tax reforms which are badly needed.

An economic analysis of the proposed tax changes was carried out by Dr. Norman Ture, the same consultant who helped work out the Kennedy round of tax cuts.

Dr. Ture estimated that the Jobs Creation Act would significantly increase GNP, employment, and real wages. He estimated that Federal tax revenues would also increase, despite and because of the lower tax rates.

The Department of the Treasury, long imbued with demand-management models, was forced to do some hard thinking by Dr. Ture's emphasis on the real factors that influence people's decisions to work, save, and invest. Treasury has now agreed in principle with Ture's approach, and only quarrels over how much additional Gross National Product and employment the Jobs Creation Act would create.

SOME CAUTION ABOUT ECONOMIC MODELS

Some words about the usual economic models—DRI, Wharton, and Chase—and reliance on their findings is in order here.

The best-known econometric models of the U.S. economy that have been developed since the second World War operate on the basis of measuring changes in total demand. The main emphasis is on changes in spending, and that spending is broken down into three types: consumer spending, investment spending, and government spending.

The premise upon which these models operate is the Keynesian notion that an increase in government spending—especially if the increase in government spending causes revenue to be overspent and results in a Federal budget deficit—

will lead to an increase in economic activity both directly and by raising the level of consumer and investment spending.

In these models, a reduction in taxes is not seen as a way of stimulating the economy through production incentives to individual units, but instead as a way of causing a deficit in the budget, which increases demand.

Therefore, in these models it is not changes in people's behavior that is modeled, but only mechanical changes in total spending. As a result, a cut in tax rates would be modeled in terms of its impact on total spending and not in terms of a behavioral response to being allowed to keep more of what one earns from working or receiving a higher after-tax return from savings and investment.

The Ture model does not make this mistake. It rests upon the understanding that an increase in incentives to work and invest will lead to more work and investment, thereby raising the productivity of labor and the economy. In short, tax cuts stimulate supply as well as demand.

TAX RATE CUTS ARE ESSENTIAL THIS YEAR

The problem here is wider than whether one agrees with one analysis or the other, however. What is at stake is not a contest between economic models, but rather the question of what leadership will be brought to bear to get the needed tax reforms through Congress to expand the economy.

We know for sure that the deficits produced by ever-increasing Government spending have produced double-digit inflation and almost double-digit unemployment. We know the recession arose from those policies. We ought to be able to infer, therefore, that a return to the lower tax rate policies which produced economic growth before will once again produce similar growth.

In a world of increasingly competitive economic interests among nations, I can think of few things more important than reasserting our leadership. I cannot think of anything more important for the men and women in this country who earnestly do want a real job but cannot find one, than to give them a tax policy which will provide them with meaningful and productive jobs that will generate taxes instead of consume them. It is not only sound economics, it is good politics.

LEGISLATION TO REPEAL INEQUITABLE PROVISION OF SOCIAL SECURITY LAW RE EARNINGS LIMITATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Alabama (Mr. EDWARDS) is recognized for 5 minutes.

Mr. EDWARDS of Alabama. Mr. Speaker, I am today introducing legislation to repeal what is perhaps the most inequitable provision of the social security law, the earnings limitation for social security recipients. This legislation is identical to a bill I introduced on the first day of business in the 94th Congress. It is, in fact, a measure of tax reform, since the earnings test appicable to social security beneficiaries actually imposes a 50 percent tax on those recipients whose income exceeds $3,000 a year in 1977.

The earnings test is inequitable, first, because it denies benefits to those persons who have earned them by paying into the social security system all their lives. It is doubly unfair that, even as these workers are denied their social security benefits, they must continue to pay social security taxes on their earnings—even though they may never receive their due benefits.

It is further a very discriminatory tax because it is only imposed on working beneficiaries, whether employees or self-employed. Persons whose after retirement incomes are derived from such sources as rents, dividends, interest, sales of property, pension, or nonearned income are not subject to this tax and receive full social security benefits.

The earnings limitation is not only inequitable in and of itself; it is unfair in its application. Persons such as lawyers, accountants, and entertainers, who are able to earn several thousand dollars in just a few months, are entitled to receive full benefits for the months in which they choose not to work. In contrast, retired persons who have no choice but to work year around begin losing social security benefits every month after they have exceeded the limitation of $3,000 per year.

This provision encourages our workers to retire when the economy needs the output from their labors; and at the same time we are developing and funding programs to provide elderly Americans with meaningful leisure time activity and useful functions in society. This is indeed contradictory.

The social security earnings limitation applies not only to our older workers but to young widowed mothers and students as well. It is not sensible to discourage these persons from working.

Even with recent improvements in social security, the latest data show that the average social security benefit for a retired worker is just sufficient to maintain his standard of living barely above the poverty threshold. The earnings ceiling provision thus penalizes those who absolutely must work to supplement their incomes. This is both a practical and a philosophical problem.

My bill would eliminate the earnings limitation entirely. I believe it is contrary to American philosophy to penalize those who want and need to work; and I urge my colleagues to join me in support of this legislation.

TO MY FRIEND, BELLA

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from New Jersey (Mrs. FENWICK) is recognized for 5 minutes.

Mrs. FENWICK. Mr. Speaker, I would like to join with my colleagues in expressing regret that Representative Bella Abzug is leaving this House. Few Members earned greater respect and affection—respect for her honest concern for her constituents, and the causes she championed; affection for her ability to differ without animosity or rancor.

None of us will soon forget her earnest speeches in the well of the House. She was not one who took her work lightly. Government was a serious matter for her. One had to admire the working of a trained mind, and the passionate devotion to the principle she believed to be at stake.

For me, the loss is also a personal one. We were friends, from the first time we met. A warmhearted, loyal friend, an unforgettable personality, her stay in the House was not long but—unlike many of us who will go from here without leaving a trace—Bella Abzug will be long remembered.

REGULATORY COST IMPACT ACT OF 1977

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Nebraska (Mr. THONE) is recognized for 5 minutes.

Mr. THONE. Mr. Speaker, today I am introducing with FRANK HORTON the Regulatory Cost Impact Act of 1977. The public outcry over the size and cost of the Federal bureaucracy and the heavy-handedness of its regulators continues to grow. Each daily issue of the Federal Register testifies to this.

The tremendous Federal bureaucratic engine, spewing paperwork forms and regulations before it, threatens to smother both small and large business, industry, State and local governments, schools, and individuals—in fact, all that stand in its way. As the enormity of this situation has emerged, we have become increasingly aware that unless we halt the wasteful and unnecessary proliferation of forms and regulations, time and money will be eroded from the institutions and individuals at our Nation's social and economic foundation.

As the size and cost of Federal Government regulation has expanded in recent years, the benefits received by those who pay for these regulations has not been anywhere near commensurate. We cannot, in fact, will not tolerate this trend any longer. Initiatives from both the legislative and executive branches demonstrate the growing concern for this problem at the Federal level. The current administration has worked actively to solve it. The new administration made it a key part of its election campaign. Communications received continually from my Nebraska constituents in reference to specific cases of regulatory harassment and general concern for this matter underline the burgeoning need for action.

We all witness overlapping, complex regulations that in too many cases are at cross purposes with each other—often rendering them meaningless. They often

impose needless impediments in the lives of businesses and individuals. The purpose of Federal regulations—whether they are intended to protect the environment, health or safety of Americans, or to avoid monopoly or destructive competition in our economic sector—is to help and serve the needs of the U.S. citizenry. In order to fulfill this purpose, Government regulations must be cost-effective: each must return to the public in benefits an amount equal to the costs it demands of them. How ironic it is when regulations that impose heavy burdens on the time, energy, and money of consumers and taxpayers are too confusing to be effectively implemented. How ironic when they demand far more in costs than they return in benefits.

It is time Federal regulations undergo scrutiny reflecting cognizance of the fallibility of Washington rulemakers. This bill would require Federal officials to evaluate their regulatory proposals—by comparing their overall costs and benefits—in much the same way that State, local, business and school officials must evaluate theirs in order to comply with Federal requirements. This measure provides a framework for determining if these regulations are an overall help to the public—be they considered in the context of private individuals or that of officials in various capacities.

In order to insure Federal statutes, regulations and policies do provide equivalent public benefits, proposed Federal agency regulations with projected significant economic impacts would be accompanied by a regulatory cost/benefit assessment analyzing public costs and benefits. The assessment would study short- and long-term, direct and indirect costs and benefits—quantifying when possible and listing when immeasurable. The assessment would evaluate the net public benefit of the proposal by examining the relationship between its costs and benefits and the reasonable alternatives to it, their respective costs and benefits and the relationship of their costs and benefits. The final regulatory cost/benefit assessment would be prepared after the public and other agencies had had an opportunity to comment on a draft assessment published in the Federal Register.

This measure follows other congressional and executive branch activity directed toward reforming Federal regulations. Early last year, the Oversight and Investigations Subcommittee of the House Committee on Interstate and Foreign Commerce conducted a series of hearings on nine independent regulatory agencies. Further, hearings were held during the last Congress on bills pertaining to the termination of unneeded agencies, zero base budgeting, and congressional review of administrative rulemaking.

More specifically, both H.R. 7575 and S. 200 from last Congress had provisions for cost assessment statements in certain circumstances when they passed their respective Houses. Executive Order 11821, promulgated by President Ford in 1974, required agencies to certify they have evaluated the inflationary impact of regulatory proposals.

The Regulatory Cost Impact Act would provide Americans with a long neglected role in the rulemaking process. When regulations with a significant economic impact are being proposed, consumers have neither the time nor money to hire legal counsel to represent their point of view. Rulemaking requires technical, economic and administrative expertise not available to the average American. Giving the public the opportunity to present their points of view and evaluating these views fairly with the mechanisms available to Government would logically make Government regulations more just for both the regulators and the regulated.

It is past time we eliminate regulation where Federal intervention is counterproductive and means higher taxes or higher consumer costs without equal overall benefits to taxpayers and consumers. It is past time we expel those regulations that contribute to inflation, promote inefficiency, or discourage innovation. Since there is seemingly no objective general consensus about which regulations are the culprits—those that are wasteful and purposeless—it is important we introduce a mechanism for evaluating proposed regulations from all sides, so that factual evidence can establish which should be instituted and which are not justified by their cost.

A summary of the bill's major provisions follows:

SUMMARY OF THE MAJOR SECTIONS

(1) Congressional findings—

(A) government programs and policies are often adopted without adequate information on public costs, without balancing those costs with the benefits to be derived; and without attempting to determine the net public benefit of those programs and policies.

(B) present and recurring economic problems are at last partially attributable to the excessive costs of government programs which don't provide commensurate benefits; and

(C) programs should bear a reasonable relationship between costs and benefits (Section 2(a)).

(2) A congressional policy declaration for proposed legislation or regulations, where a significant impact on costs to the public can be projected, to provide benefits bearing a reasonable relationship to such costs. (Section 2(b)).

(3) "Benefits" and "Costs" are defined to include short- and long-term effects to the public, those which may be quantified or measured in an appropriate manner, and those which cannot be adequately measured but which are nevertheless deemed to be of significance to the public. (Section 3).

(4) Every agency would prepare a draft Regulatory Cost/Benefit Assessment for regulations which might significantly impact public costs. The Assessment would require short- and long-term costs and benefits to be analyzed. They must be quantified or measured wherever possible and listed when they are not quantifiable. The Assessment would then evaluate the net public benefit of such proposal by examining the relationship between its costs and benefits and the reasonable alternatives to it, their respective costs and benefits and the relationship of their costs and benefits. (Section 4(a)).

(5) The agency shall follow certain procedural responsibilities for review and comment of the draft Assessment by the public and other agencies, for the preparation and publication of the final Regulatory Cost/Benefit Assessment and the final regulation shall be subject to judicial review including compliance with the Act. Section 4(b–d).

(6) Emergency procedures are provided in the case the delay for preparation of a draft Regulatory Cost/Benefit Assessment would present a substantial risk to health or safety of persons or to national security, so the regulation may be promulgated subject to a requirement that a Regulatory Cost/Benefit Assessment can be prepared and the regulation be revised or rescinded as needed in light of the final Assessment. Section 5.

(7) The Executive shall promulgate sufficiently detailed guidelines to insure the preparation of complete, comprehensive, objective Regulatory Cost/Benefit Assessments shortly after adoption of the Act and provide for judicial review of their completeness. Section 6.

(8) Agencies may review existing regulations under certain circumstances, and amend them if they determine there is substantial disparity between the public costs and the benefits derived. Section 7.

(9) Congressional committees shall prepare Regulatory Cost/Benefit Assessments for legislation having a significant impact on public costs. (Section 8.)

DOMESTIC UNEMPLOYMENT IS PRESSING PROBLEM

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Massachusetts (Mrs. HECKLER) is recognized for 5 minutes.

Mrs. HECKLER. Mr. Speaker, as we begin the new session, it is imperative that Congress follow up quickly on initiatives taken last year to deal with one of our most pressing domestic problems—unemployment.

In this regard, my first order of business today is the filing of a bill to provide up to $6 billion in new funds for public works projects to create jobs. I do so in cooperation with many of my colleagues, and especially the new majority leader, the Hon. JAMES WRIGHT of Texas.

But at the same time, I urge Congress to address what I regard as the total ineptitude of the Economic Development Administration in handling the public works funds which already have been made available for unemployment relief.

I represent a district which includes cities that have suffered staggering economic problems and chronic unemployment. And two of these communities in my district—Taunton and Fall River—as well as economically depressed cities throughout eastern Massachusetts, have been denied aid specifically intended for them by Congress.

Any new money for the local public works program must be predicated on major changes in the method of calculating unemployment. Once individuals exhaust their unemployment benefits, they no longer count as far as the official jobless statistics are concerned.

This is absurd, and it means that many cities which need the help the most suffer.

Communities like Fall River and Taunton have suffered because their unemployment rates have been understated on the one hand, but also because the EDA has failed to follow through on the intent of the public works employment law.

The guidelines specifically state that

duration, as well as severity of unemployment, be included in proposed project determinations. And these cities which I represent—which have yet to receive one single dime—have been contending with high unemployment for years. They presented well designed, urgently needed projects which should have been approved.

At the urging of the Massachusetts congressional delegation, the EDA has agreed to hold a public meeting in Boston Thursday to explain the public works selection process which has failed to aid so many needed Massachusetts communities.

I also will be seeking legislative review of the EDA's performance with the program to date. When so many desperately needed communities are left dry, something must be wrong.

NUCLEAR ENERGY REAPPRAISAL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. FISH) is recognized for 10 minutes.

Mr. FISH. Mr. Speaker, due to a rising concern in recent years for the overall effects of the energy crisis, the Congress and the American people have thrown themselves into a frantic search for viable alternative sources of energy in the hope of creating and/or enhancing a technology which would successfully combat the certainty of dwindling oil resources.

Energy research and development has surfaced in the areas of shale oil, fossil fuel, solar, geothermal energy, combustion conversion and a number of energy source alternatives, yet it appears that a disproportionate amount of time, effort, and money have been directed toward the promotion of nuclear power, the light-water reactor, and the liquid metal breeder. Nuclear power has apparently found its way into the hearts of the American utilities as the most convenient, economical, and efficient solution to our energy problems.

Proponents of nuclear power argue that the American people now favor increased development of civilian nuclear plants by a margin of 3 to 1. The risks involved are insignificant we are told when compared with the potential nuclear power has to offer.

I, however, cannot believe that nuclear power is so flawless that we should commit ourselves today to the pursuit of a technology lacking, in my judgment, time tested credibility.

Mr. Speaker, nuclear power is the most dangerous technology to ever enjoy widespread commercial use. It is frighteningly apparent that our nuclear development has far surpassed out collective ability to deal with the resultant and very real negative aspects of a massive expansion of the nuclear power program.

We cannot only concern ourselves with the possibility of catastrophic accidents such as the partial core melt down in the Brown's Ferry, Ala., plant. Mankind also faces the environmental insult of radioactive poisons, increased cancer risks, the problems of waste storage and disposal, the threat of nuclear sabotage and the effects on our national security from thoughtlessly accelerated proliferation. It makes little sense to spend billions of dollars to prevent an atomic attack on the United States while we are heavily subsidizing the construction of nuclear plants near major metropolitan areas—ready targets for radioactive sabotage by small groups of terrorists.

Mr. Speaker, there are viable alternatives to nuclear power. I plan to actively consponsor, in the 95th Congress, legislation which would promote extensive research in the area of solar energy, seeking to facilitate the utilization of solar energy through programs designed to assist States in implementing these systems into public buildings, and establishing guaranteed loan programs encouraging the installation of solar energy hardware in private dwellings. I will also cosponsor legislation calling for studies of waste conversion as a possible energy source, as well as legislation calling for increased attention in the area of our abundant coal resources. Our Nation has a wealth of untapped resources and I am firmly committed to their vigorous development. This and conservation should be our priority.

Mr. Speaker, I am introducing in the 1st session of the 95th Congress, on behalf of myself, Mr. PATTISON of New York and 16 of my colleagues, the Nuclear Energy Reappraisal Act of 1977. This proposed legislation calls for a moratorium on the granting of construction licenses by the Nuclear Regulatory Commission for new nuclear powerplants, pending a 5-year comprehensive and independent study of the nuclear fuel cycle, with particular reference to its safety and environmental hazards, to be conducted by the Office of Technology Assessment. This measure does not affect plants which are currently operating or under construction. Should this measure have a direct negative impact on employment, section 8 of this bill provides that, to the maximum extent possible, the Federal Government will provide funds for employment creation programs in areas in which it is established that unemployment has been caused by the implementation of this act.

We feel that enactment of the Nuclear Energy Reappraisal Act will enable the American people to make an informed judgment as to whether to embark on an irreversible commitment to nuclear power as a major energy source.

Mr. Speaker, the text of the bill follows:

H.R. —

A bill to terminate the granting of construction licenses of nuclear fission powerplants in the United States pending action by the Congress following a comprehensive five-year study of the nuclear fuel cycle, with particular reference to its safety and environmental hazards, to be conducted by the Office of Technology Assessment, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Nuclear Energy Reappraisal Act".

STATEMENT OF FINDINGS AND PURPOSES

SEC. 2. (a) The Congress finds that there is serious division in the general citizenry and in the scientific community about the wisdom of a commitment to a further expansion of nuclear fission power because of: the likelihood of the exportation of atomic reactors increasing the proliferation of nuclear weapons; the unresolved questions about the safety of nuclear plants; the potential danger to society from the use of special nuclear materials, such as plutonium, which if diverted from their intended uses, may be used as weapons of terror; the unresolved problem of the storage of nuclear waste materials for 250,000 years; because the economic feasibility and reliability of nuclear plants continues to be in question; and that several foreign governments are currently reassessing their nuclear power programs.

(b) The Congress therefore declares that—

(1) the further deployment of civilian nuclear fission plants is inconsistent with the national security and public safety as required by section 3(d) of the Atomic Energy Act of 1954;

(2) the serious safety and environmental problems associated with nuclear fission power should be resolved before a further commitment to nuclear power is made by the United States Government; and

(3) The Office of Technology Assessment should undertake a comprehensive review of the safety, environmental, and economic consequences of the proliferation of nuclear fission plants in the United States and abroad in a completely independent manner.

CESSATION OF LICENSING OF NUCLEAR PLANTS

SEC. 3. (a) The Nuclear Regulatory Commission is directed to cease, beginning on the first day after the date of the enactment of this Act, the granting of construction licenses or limited work authorization for the construction of nuclear fission powerplants and the granting of licenses for the export of nuclear fission powerplants.

(b) This termination shall continue until the Congress, after having adequate time to study the results of the investigation described in section 4, shall make a determination that—

(1) the continuance of the nuclear reactor program does not significantly contribute to the proliferation of atomic weapons;

(2) the effectiveness of all safety systems, including but not limited to the emergency core cooling system, of any nuclear fission powerplant operating or to be operated in the United States is demonstrated, by comprehensive testing, in actual operation, of substantially similar physical systems, to the satisfaction of the Congress;

(3) the radioactive wastes from such a plant can be stored or disposed of, with no reasonable chance, or intentional or unintentional escape of such wastes or radioactivity into the natural environment or immediately or eventually adversely affect the land or the people of the United States, whether due to imperfect storage technologies, earthquakes or other acts of Nature, theft, sabotage, acts of war, governmental or social instabilities, or whatever other sources the Congress may deem to be reasonably possible;

(4) the effectiveness of security systems throughout the fuel cycle is demonstrated to the satisfaction of the Congress; and

(5) after analysis of all the safety, environmental, and economic and proliferation consequences enumerated in section 5, nuclear fission plants are acceptable in comparison to other energy sources, including renewable energy sources.

(6) other methods exist to supply the necessary energy to support a strong economy and fullest possible employment.

(c) This termination shall continue until the Congress, after having adequate time to

study the results of the investigation described in section 4, shall provide by law—

(1) for the resumption of issuance of construction licenses for nuclear fission power plants and the development of criteria and standards for the licensing of such plants; or

(2) that resumption of such licensing be permitted but only under limited conditions specified in that law.

(d) Beginning five years and one hundred and eighty days after the date of the enactment of this Act, if the Congress has not determined, under section 3(b), that the licensing of fission plants may continue, each existing nuclear fission power plant and each such plant under construction shall not be operated at any time at more than 60 percent of the licensed core power level of such plant and shall thereafter be derated at a rate of 10 percent per year of the licensed core power level of such plant, and shall not be operated at any time in excess of such reduced core power level.

(e) The provision of section 3 shall not apply to small scale nuclear fission reactors used exclusively for medical or experimental purposes.

OFFICE OF TECHNOLOGY ASSESSMENT STUDY

SEC. 4. (a) The Office of Technology Assessment is directed to undertake a comprehensive study and investigation of the entire nuclear fuel cycle from mining through fuel reprocessing and waste management and, as described in section 5, to determine the safety and environmental hazards of this cycle.

(b) The Office of Technology Assessment shall conduct this study independently. The Office in conducting the study shall request, receive and consider the comments and opinions of independent scientists, engineers, consumer, and environmental representatives. The Office shall hold informal public hearings on each major area of inquiry to permit interested persons to present information orally, to conduct or have conducted cross examination of such persons as the Office determines appropriate for a full airing of the issues and to present rebuttal arguments. A verbatim transcript shall be taken of any oral presentation in cross examination and shall be published by the Office. The Office shall have the power to enter into contracts with individuals or corporations for the purposes of conducting the study, but shall not enter into contracts with or rely primarily on the expertise of any industry or company which provides materials, management capabilities, research, or consultant services for nuclear fission powerplants or which otherwise in the judgement of the Office might have an interest in perpetuating the nuclear industry.

(c) All Government agencies shall cooperate to the fullest extent with the Office and shall provide access to their personnel and data. At the request of the Office, any Government agency shall furnish any information which the Office deems appropriate for the purpose of conducting the study. The Office is further empowered to compel the delivery of any information in the possession of any federal agency, commission or other organization, or any person, corporation, or association which the Office deems necessary for conducting the study.

OFFICE OF TECHNOLOGY ASSESSMENT REPORTS

SEC. 5. (a) Five years after the date of the enactment of this Act, the Office of Technology Assessment shall submit a final report to the Congress and the public concerning the safety and environmental hazards of nuclear fission powerplants and the nuclear fuel cycle.

(b) The Office will provide an annual report to the Congress and the public on the progress of the study, and provide the opportunity for an annual public hearing concerning the progress of the study. In each annual report the Office shall inform the Congress of the actions it has taken to fulfill the requirements of the Act, whether it has found any evidence that any persons have violated the laws and regulations relating to safety in the development or use of nuclear power or special nuclear materials, whether it has any evidence that the agencies of the Federal Government, present or past, which have the responsibility for insuring the safety of the nuclear fission power have not faithfully or effectively exercised their responsibilities, the extent to which other Federal agencies have cooperated with the Office, whether all information requests of the Office under section 4(c) have been complied with, whether and to what extent the Office has made provision to insure that all viewpoints have been adequately considered. The Office, in its annual report, shall also make available to Congress and the public, any information relating to the safety of the nuclear fuel cycle which has heretofore not been public information either because it was not publicly available, it was not compiled in an analytical form, or for other reasons.

(c) The final report shall include recommendations as to whether a resumption of the licensing of nuclear fission power plants should be allowed, and if so, the conditions under which licenses should be granted. The report shall consider the following issues:

(1) The safety and environmental hazards associated with the entire nuclear fuel cycle, including, but not limited to the significance of frequent malfunctions in components of emergency core cooling systems as evidenced by the abnormal occurrences reported by the Nuclear Regulatory Commission, the six failures of emergency core cooling systems in semi-scale tests, and the significance of the British government's rejection of the light water reactor because of the danger of pressure vessel rupture.

(2) The short-term and long-term genetic effects of low level radiation.

(3) The economic implications of a commitment to nuclear fission powerplants, particularly in relation to:

(A) the long-term cost and availability of raw materials in light of the existence of a foreign uranium cartel;

(B) the cost implications of the frequent shutdown of nuclear plants including the costs of shutdown and startup inspections, the cost to consumers of purchase of alternative power during shutdown, unemployment benefits and other costs of unemployment that result from shutdowns:

(C) the economic wisdom of a commitment to an energy technology in which prudent safety management requires that all plants of similar design be shut down when a serious safety problem arises at one plant, or sabotage of one plant is threatened; and the costs of necessary safeguards, including the costs of the design of the components of a nuclear transportation system, the costs both public and private, for personnel, equipment and property to protect the projected several hundred nuclear plants, reprocessing facilities, and the thousands of components of the nuclear transportation system and the costs of decommissioning existing nuclear fission powerplants; and

(D) the total savings to nuclear plant operators arising from the subsidies to nuclear power by the Federal Government since the inception of the civilian nuclear power program including research costs, for programs such as the plutonium breeder reactor, waste storage costs, regulatory costs, promotional costs enrichment costs, safeguards costs, insurance subsidies through the Act commonly called Price-Anderson Act and any other costs associated with the development of civilian nuclear power.

(4) The storage of high level radioactive wastes which may remain dangerous for two hundred and fifty thousand years.

(5) The central question of proliferation, nationally or internationally, of nuclear fission powerplants in relation to possibly safer and cheaper alternatives, especially renewable energy sources.

(6) An assessment of whether utilities, as institutions, are financially and technically capable of operating nuclear plants safely in light of the high costs of safety measures and the nuclear regulatory commission documented abnormal events in utility operated nuclear plants.

(7) An assessment of the licensing processes of the Atomic Energy Commission (and its successor, the Nuclear Regulatory Commission) which have permitted nuclear plants to be built over geologic faults and in other unsafe locations and which have allowed the continuation of licenses for utilities which have shown gross negligence in the operation and construction of nuclear plants.

PUBLIC INFORMATION

SEC. 6. (a) The Office of Technology Assessment shall be subject to section 552 of title 5, United States Code. The provisions of paragraphs (4) and (5) of section 552 of title 5, United States Code, shall not be construed to apply to any records of the Office which relate to the development, operation, or efficacy of the safety systems throughout the entire nuclear fuel cycle, except that provisions of paragraph (4) of such section may be construed to apply to such records in any case where the Office, after notice and opportunity for an agency hearing on the record, determines that such disclosure would result in irreparable injury to the competitive position of the person from whom the information was obtained. Such determination shall be subject to judicial review pursuant to section 552 of title 5, United States Code.

(b) As used in subsection (a)—

(1) the term "records of the Office" includes any application, document, study, report, correspondence, or other material or information or any part thereof received by or originated by the Office in connection with its duties under this Act; and

(2) the term "Office" means the Office of Technology Assessment, or any entity therein.

COMPENSATION FOR PUBLIC

SEC. 7. The Office of Technology Assessment shall, pursuant to rules promulgated by it, provide compensation for travel costs, per diem expenses, and experts' fees, and other costs in consulting with the Office, pursuant to the Office's responsibility under section 3(b), to any person who—

(1) has or represents an interest (A) which would not otherwise be adequately represented in such consultation, and (B) whose views are necessary for a full assessment of nuclear power and alternatives pursuant to this Act; and

(2) who is unable to participate effectively in such assessment because such person cannot afford to pay the cost of travel, per diem expenses and expert witnesses.

SEC. 8. To the maximum extent possible, the Federal government shall provide for the expenditure of funds available for employment creation programs in the areas in which it is established to the satisfaction of the appropriate federal agency that unemployment has been caused by the implementation of this act.

AUTHORIZATION

SEC. 9. There is authorized to be appropriated for the study under section 4 the sum of $15,000,000 for each of the first five fiscal years beginning after the date of the enactment of this Act.

PENSION FOR WORLD WAR I VETERANS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. BURKE) is recognized for 10 minutes.

Mr. BURKE of Florida. Mr. Speaker, on this first day of the 95th Congress, I am introducing for the sixth time my bill to provide a pension for World War I veterans. It was my honor and privilege to introduce this bill in each of the Congresses in which I have served—the 90th, 91st, 92d, 93d, and 94th. This is the first piece of legislation I introduced in the 95th Congress. It is first in my heart, first in my mind, and first in my hopes for success.

Before the 95th Congress ends 60 years will have come and gone since 4,744,000 U.S. soldiers fought in World War I. Sixty years used to be a lifetime. It was when the doughboys were born. Thanks to modern nutrition, medicine, and technology there are an estimated 834,000 World War I veterans with an average age of 80 still living in the United States.

One of the saddest tragedies in our society today is the failure of the Congress to pay proper recognition and respect to those of our World War I veterans who are still living. The time of reckoning is now, not tomorrow because tomorrow is too late. The time has come when we in Congress must act because, for many of our World War I veterans who are still living today there will be no tomorrow. In 1976 more than 94,000 of our World War I veterans died. This assumes significance when we realize that 53,513 doughboys died in World War I. So last year more soldiers of World War I died, than during the war itself.

As these veterans approach their nineties their numbers will diminish at a faster pace. This is one Government program that we know will diminish each year in the future.

Our people worry about food for the world but we have here at home thousands of World War I veterans who are inadequately fed. If we can give so much freely to those who have done nothing to help our country, how can we stand by and watch the suffering of these people who preserved our way of life.

Last year I received a letter from an 84-year-old woman whose husband—a World War I veteran—had died a few months before. Like many women of her generation she married very young, raised a family and kept house all her life. The finances were entirely managed by her husband. When he died the small pension he received from his employer was terminated, and his widow was left to survive on a small social security check. In a few short months the house she had lived in most of her life was being repossessed by the mortgage company, the telephone company had removed her phone, bills were coming in from all over and there was no money with which to pay them. She wrote to me for assistance, and there was nothing I could do to help her under present law. She wrote back when she received my letter and thanked me for trying. She added that she hoped God would see fit to take her soon as he had her husband because her existence here on Earth was so harsh.

The world is not the way people of 84 expected it to be when they planned for their "golden years" more than 20 years ago. Most thought they would be dead. Very few anticipated the longevity they have. Very few planned for the financial burdens of old age. Old age is new to our society and the world. When the people who served in World War I were born the life expectancy was 50 or 60 years maximum. In most parts of the world this is still true. We have a challenge to cope with the problems presented by longevity, but overall we have failed to face them. We do not want to look old age in the eye. Like ostriches we would rather put our heads in the sand than deal with the reality of our new situation.

We have created an environment that makes long life possible. Now let us create an environment that makes long life enjoyable, fulfilling, and worthwhile.

Let us stop treating the elderly like human garbage sitting at the back door waiting to be picked up by the grim reaper. Let us bring them back inside our society and work with them to solve the problems of age. Our over 65 population is one of the fastest growing segments of our society. Our over 85 population is not growing as fast. Those who reach this age, in too many cases curse the good health that let them live so long, instead of blessing the technology, nutrition, and medicine that enabled them to have so many years.

World War I veterans have an average age of more than 80 years. Most have been retired from the work force either by choice or coercion since they were 65. That is more than 15 years for most of living on accumulated savings, social security, and small pensions. With the health problems that occur after 65 only a few have been able to maintain a lifestyle above the poverty level.

Obviously we cannot solve all the problems of the elderly immediately. Some short term measures are necessary to ease the burdens faced by today's elderly. In my opinion, the most valid short term proposal presented to the 95th Congress is a pension for World War I veterans and their spouses. No proposal for Federal spending will do more to ease suffering and hardship than the few dollars per month advocated by my bill to assist World War I veterans.

INTRODUCING LEGISLATION TO EXTEND PUBLIC WORKS JOBS PROGRAM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DON H. CLAUSEN), is recognized for 10 minutes.

Mr. DON H. CLAUSEN. Mr. Speaker, I am pleased to join with other members of the Committee on Public Works and Transportation in introducing legislation to extend the public works jobs program of the Economic Development Administration.

The grants announced recently allowed funding for only 1 of every 12 project applications submitted. This happened though even to be eligible each project had to be ready to go immediately. The 1976 bill just did not go far enough. That bill was aimed at funding projects where construction could begin within 90 days. This means that there are still many very important projects fully justified and ready to go. Funding these projects will make another significant contribution toward job creation and the reduction of unemployment.

These projects are not leaf raking jobs. They will mean a permanent improvement in the local area. They will have an immediate impact on the building trades, which currently are experiencing almost 20 percent unemployment nationally. And there will be a ripple effect, first felt in the building supplies area, then throughout the economy as a whole as the wages earned are spent and circulated among the Nation's small businessmen.

Many of us feel there must be revisions in the allocation formula to reflect the lessons learned in the first allotment of these funds. During the hearings on the bill, our Economic Development Subcommittee will consider these charges and see if remedial action is warranted. I intend to work with my colleagues on the committee to review carefully the entire program. At the same time, I expect that there will be some pressure to advance this bill very rapidly in order to make funds available for selected projects, and thus create jobs and reduce unemployment as quickly as possible.

LEGISLATION TO REESTABLISH SELECT COMMITTEE ON NARCOTICS ABUSE AND CONTROL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. WOLFF) is recognized for 10 minutes.

Mr. WOLFF. Mr. Speaker, today I have introduced legislation to reestablish in the House of Representatives the Select Committee on Narcotics Abuse and Control of which I had the honor to be the chairman in the 2d session of the 94th Congress. Of the 5 months during which the select committee was in existence during the 94th Congress, 3 were while the Congress was in session and 2 were while the Congress was not in session. Although it was originally anticipated that the select committee would be occupied solely with organizational tasks during the 94th Congress, a significant amount of substantive work was completed. Much work, however, remains for the committee during the 95th Congress.

The resolution which I have today introduced is identical in all respects to the resolution cosponsored by over 220 Members in the 94th Congress and which was approved by the House by a vote of 361 to 10. The select committee will be composed of 18 Members with at least 1 member being chosen from each of the seven standing committees which has legislative jurisdiction over a major facet of narcotics abuse and control. These committees are: The Com-

mittee on Armed Services, the Committee on Government Operations, the Committee on International Relations, the Committee on Interstate and Foreign Commerce, the Committee on the Judiciary, the Committee on Merchant Marine and Fisheries, and the Committee on Ways and Means.

The select committee, as during the 94th Congress, would not have legislative jurisdiction. The select committee would have authority to: First, conduct a continuing comprehensive study and review of the problems of narcotics abuse and control, including, but not limited to, international trafficking, enforcement, prevention, narcotics related violations of the Internal Revenue Code of 1954, international treaties, organized crime, drug abuse in the Armed Forces of the United States, treatment and rehabilitation, and the approach of the criminal justice system with respect to narcotics law violations and crimes related to drug abuse; and second, review any recommendations made by the President, or by any department or agency of the executive branch of the Federal Government, relating to programs or policies affecting narcotics abuse or control.

During the 5-month life of the select committee in the 94th Congress, the select committee held 9 days of significant oversight and local law enforcement hearings, wrote three substantive reports, and engaged in a seven-nation factfinding trip, accompanied by the Administrator of the Drug Enforcement Administration, DEA, all with a view toward conducting a comprehensive study of the problems of drug abuse and control.

In line with the mandate of the select committee to "review any recommendations made by the President * * * relating to programs or policies affecting narcotics abuse or control," the select committee has met with the President-elect's transition group to discuss our work, and to hear their views on reorganization of the executive branch so as to more effectively deal with the problem of drug abuse. It is very apparent that the new administration shares the view of the Congress that drug abuse control is one of the priority issues which must be worked on during the next several years.

The select committee has kept the standing legislative committees of the House fully informed as to its continuing studies and findings and has made effective plans for its activities in the 95th Congress. The select committee has in each of its endeavors sought to serve the needs of the standing committees of the House which are responsible for legislation dealing with drug abuse control.

The select committee has concentrated its efforts to date upon examining the current Federal and international effort against drug abuse and the findings, conclusions, and recommendations contained in its interim report will be made available to Members as soon as the printing is completed. The report will be found to be comprehensive and useful.

The distinguished chairman of the Judiciary Committee, Mr. Rodino, made the following observation at the time House Resolution 1350, creating this select committee in the 94th Congress, was debated on the floor in July, 1976:

For a great many years, we in government have decried the dangers posed by narcotics, yet we have failed to act in a systematic coordinated fashion. The results have not satisfied any of us.

This fact alone is enough to justify the extraordinary step in creating a Select Committee of the House to focus our best efforts upon this terrible and crippling problem.

Mr. Speaker, we have begun upon this great and significant effort and I, therefore, ask that the House give its support in the same overwhelming manner in which it acted in the national interest last July. I invite my colleagues to join with me in supporting the reestablishment of the Select Committee on Narcotics Abuse and Control.

At this time a copy of the resolution will be printed in the RECORD.

H. RES. —

Resolved, That (a)(1) there hereby is established in the House of Representatives a select committee to be known as the Select Committee on Narcotics Abuse and Control (hereinafter in this resolution referred to as the "select committee"). The select committee shall be composed of eighteen Members of the House.

(2) Members of the select committee shall be appointed by the Speaker of the House. One member of the select committee shall be designated by the Speaker to serve as chairman of the select committee.

(3) At least one member of the select committee shall be chosen from each of the following committees of the House: The Committee on Armed Services, the Committee on Government Operations, the Committee on International Relations, the Committee on Interstate and Foreign Commerce, the Committee on the Judiciary, the Committee on Merchant Marine and Fisheries, and the Committee on Ways and Means.

(4) Any vacancy occurring in the membership of the select committee shall be filled in the same manner as the original appointment.

(b) The chairman of the select committee may establish such subcommittees of the select committee as he considers appropriate. Any such subcommittee shall be composed of not less than four members of the select committee.

SEC. 2. The select committee shall not have legislative jurisdiction. The select committee shall have authority—

(1) to conduct a continuing comprehensive study and review of the problems of narcotics abuse and control, including, but not limited to, international trafficking, enforcement, prevention, narcotics-related violations of the Internal Revenue Code of 1954, international treaties, organized crime, drug abuse in the Armed Forces of the United States, treatment and rehabilitation, and the approach of the criminal justice system with respect to narcotics law violations and crimes related to drug abuse; and

(2) to review any recommendations made by the President, or by any department or agency of the executive branch of the Federal Government, relating to programs or policies affecting narcotics abuse or control.

SEC. 3. (a) For purposes of this resolution, the select committee, or any subcommittee thereof authorized by the select committee, may sit and act at such times and places as it considers appropriate whether the House is sitting, has recessed, or has adjourned.

(b) For purposes of this resolution, the select committee, or any subcommittee thereof authorized by the select committee to hold hearings, may hold such hearings, and may require, by subpena or otherwise, the attendance and testimony of such witnesses and the production of such books, records, correspondence, memorandums, papers, documents, and other exhibits and materials, as it considers necessary. Subpenas may be issued under the signature of the chairman of the select committee or any member of the select committee designated by him, and may be served by any person designated by such chairman or member.

(c) A majority of the members of the select committee shall constitute a quorum for the transaction of business, except that the select committee may designate a lesser number as a quorum for the purpose of taking testimony. The chairman of the select committee, or any member of the select committee designated by him, may administer oaths or affirmations to any witness.

(d) The select committee and any subcommittee thereof and its staff may conduct field investigations or inspections. Members and staff of the select committee may engage in such travel as may be necessary to conduct investigations relating to the purposes of this resolution.

SEC. 4. The select committee may employ and fix the compensation of such clerks, experts, consultants, technicians, attorneys, investigators, and clerical and stenographic assistants as it considers necessary to carry out the purposes of this resolution. The select committee may reimburse the members of its staff for travel, subsistence, and other necessary expenses incurred by them in the performance of the duties vested in the select committee, other than expenses in connection with meetings of the select committee or any subcommittee thereof held in the District of Columbia.

SEC. 5. The provisions of clause 2(g)(1) of rule XI of the rules of the House shall apply to the select committee.

SEC. 6. (a) The select committee shall report to the House with respect to the results of any investigation conducted by the select committee, or any subcommittee thereof, under section 3(d).

(b) The select committee shall submit an annual report to the House which shall include a summary of the activities of the select committee during the calendar year to which such report applies.

(c) Any report of the select committee under this section which is submitted during a period in which the House is not in session shall be filed with the Clerk of the House.

TAX BILL INTRODUCED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 5 minutes.

Mr. GONZALEZ. Mr. Speaker, as we begin this new Congress I am introducing a tax bill that I hope will be given serious consideration in the next 2 years.

Since we have entered the decade of the seventies our citizens have been faced with ever increasing costs of food, clothing, gasoline, and utility costs, but when they review their budgets they have found that the biggest increase has been in the amount of taxes that they pay. According to the most recent statistics, taxes have risen 65 percent while the cost of living climbed about 40 percent.

The tax system in the United States has been very successful—one of the most successful in the world—because our citizens voluntarily comply with its requirements. The majority of our citizens do not object to paying taxes as long as they feel that everyone is paying his fair share. But what many citizens are finding more and more objectionable is

not being able to understand the present tax system. Its complexities at this stage have forced two out of every five taxpayers to seek outside assistance, usually at some expense, to help them complete their forms.

The middle-income taxpayer is up in arms because he does not feel that the system is equitable. Constant reports of millionaires who do not pay taxes, and numerous tax loopholes not available to the average taxpayer cause many of our middle-income citizens to feel that they are bearing the burden of the tax system and they are not happy with this thought.

The bill I am proposing today will certainly not cure all of the ills of our present system but will simplify it to a degree. My bill says that, notwithstanding any other provisions of the Tax Code, the tax liability of those who file an income tax return on an adjusted gross income of less than $30,000 will be no more than 10 percent of that adjusted gross income.

It is my hope that the House Ways and Means Committee, which has the responsibility for tax legislation, would utilize this basic proposal when considering tax reform in this Congress. Our citizens deserve to be able to understand our tax system without outside help, as well as feel that the system is fair and equitable, but at the present time neither is so.

EULOGY FOR MAYOR RICHARD J. DALEY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

Mr. ANNUNZIO. Mr. Speaker, I rise in tribute to Mayor Richard J. Daley, Chicago's leader and mayor for almost 22 years, who died on December 20 after a lifelong career of dedicated service and devotion to the people of Chicago.

I was privileged to know Mayor Daley for 36 years, and he was a man of great human understanding and compassion who did not tackle a job haphazardly but exercised tremendous discretion before he made a decision. He had one of the most outstanding political careers as a public servant of any man I know in American politics. Not only was he a great leader of a great city, he was a man who strongly believed in the sanctity of the family, and both his public and private life reflected his devotion to the highest standards of loyalty and strength. He was a man who rose to the top from his humble job in the stockyards, and throughout his brilliant career, he never lost his love for family, for friends, for the people of Chicago he served so well.

I watched Dick Daley as the minority leader of the Illinois Senate and in this capacity he was responsible for the enactment of social legislation that to this day is benefiting the people of Illinois. He served with great distinction and honor as a member of Governor Stevenson's cabinet as director of revenue, and it was during his years as an Illinois State legislator and cabinet officer that he became a recognized expert on finance and taxation. I, too, served in Governor Stevenson's cabinet as director of labor working alongside Dick Daley and during those years I had the opportunity to observe the tremendous contribution that he made to the establishment of new procedures for the collection of much needed revenues in our State.

Richard Daley became the county clerk of one of the largest counties in the Nation—Cook County—and all of the election precincts in our county outside of the city of Chicago, Berwyn and Cicero were under his jurisdiction. He was one of the leaders to bring election machines to the precincts of Cook County and was responsible for many of the reforms in that office, again serving the people of his city and his county with humility, understanding, dedication, and devotion.

In 1955 he was elected mayor of the city of Chicago and during the past 21 years he completely reorganized, updated, and modernized every branch of city service to the citizens of Chicago. Mayor Daley moved forward with bold vision and with determination to improve health and sanitation services, to modernize the fire department, to complete construction of the modern O'Hare International Airport, to install a vast network of efficient freeways and public transportation, to initiate urban renewal projects for removal of slum areas, to revitalize the downtown business area, to improve the police system and the welfare system by appointing able administrators, and to make countless other improvements. In fact, every department felt the impact of this man's dedication to bring good, honest, and efficient government to Chicago.

All of Richard Daley's fellow mayors acclaimed him as the best mayor in the United States, and Chicago as the best-run city in the United States. Other mayors were constantly seeking his advice and counsel toward the solution of their own municipal problems, and the people of Chicago held him in the highest esteem for his monumental services by returning him to office for six terms—the longest tenure ever held by any of Chicago's mayors.

What is not a commonly known fact is that the rebuilding of the inner loop area of downtown Chicago was accomplished without a single dollar of Federal urban renewal aid. In other major cities, such as New York and Philadelphia, more than two-thirds of the money spent for rebuilding portions of the central city came from Federal grants. Chicago, instead, used only private funds for improving the downtown loop area. This accomplishment alone stands as a tribute to his organizational genius and his brilliant and tolerant understanding of the need to involve all factions and groups in the success of our community.

Many of the Chicagoans who braved the near-zero temperatures to stand in line and pay their last respects to the mayor acknowledged that "losing Mayor Daley is like losing your own father," and one of the great strengths of Mayor Daley's method of administration was that he extended the same love and devotion to the people of his city that he extended to his own family. The people returned this devotion by giving their overwhelming support to him in election after election because they knew that the mayor was not using their votes as a steppingstone to higher political office in Springfield or in Washington—they knew that he was totally dedicated to the betterment of their city and the solution of their problems.

Mayor Daley never tried to be something that he was not, either personally or politically, and he knew the limits of power in a democracy. The mayor himself said time and again that "good politics is good government," and he understood that politics is people—people working together to achieve a common goal. Long before the politics of "citizen involvement" came to the attention of the Nation at large, Mayor Daley was involving the people of Chicago in the administration of their city. He understood that the people would care deeply about the success of their community only if they felt themselves a part of its governmental structure, and only if their views, their grievances, their wants and their needs were given a hearing and acted upon by the officials they had elected. Thus, to be a good politician Mayor Daley also had to be a good conciliator and mediator as well as a wise and understanding counselor.

Richard J. Daley was a remarkable man and he left our city of Chicago with a legacy of greatness. His outstanding record of excellence will never be forgotten by the generation of Chicagoans he served so well. Mrs. Annunzio and I extend our deepest sympathy to Mayor Daley's devoted wife, Eleanor, and their seven children.

NATIONAL CONDOMINIUM AND PLANNED UNIT DEVELOPMENT CONSUMER PROTECTION ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. MINISH) is recognized for 5 minutes.

Mr. MINISH. Mr. Speaker, I am today reintroducing the National Condominium and Planned Unit Development Consumer Protection Act. This legislation was originally introduced on September 2, 1976, too late in the 2d session of the 94th Congress for the bill to receive full consideration prior to adjournment. I am hopeful that it will receive the early attention of the Banking Committee's Housing Subcommittee in 1977.

The measure embodies the recommendations of a report on condominium development and sales practices issued by the subcommittee on General Oversight and Renegotiation of the Committee on Banking, Currency and Housing. This report, based on 4 days of hearings and an intensive staff analysis, details the rapid growth of condominium and related forms of housing and documents the existence of serious consumer problems.

Almost 4 million Americans currently reside in the condominiums, and it is our belief that condominiums will continue to account for a significant share of the Nation's housing in the years to come. In fact, experts have described condo-

miniums as the best housing alternative available to Americans given the economic and environmental realities of the present time. We are introducing this bill to help insure that condominium purchasers obtain good and decent housing and that condominium development keeps pace with the Nation's housing needs.

One of the major conclusions of the Oversight Subcommittee was that consumer dissatisfaction is based in large measure on purchaser unfamiliarity with the concept of shared property ownership. To remedy this situation, our bill requires developers to disclose to prospective purchasers in a brief, easy to understand format, the information necessary to enable consumers to reach a sound purchase decision. As a further protection, the bill grants purchasers the right to cancel a sales contract within 15 days of its execution. This cooling-off period is warranted by the lengthy and complicated nature of condominium documents as well as the high-pressure sales techniques of certain condominium developers.

One of the most frequently cited consumer complaints in the area of condominium housing is poor quality construction. Unlike purchasers of single family homes, condominium buyers, especially in high-rise structures, are unable to perform adequate inspection of a building's major structural systems. Our bill, therefore, provides a limited 1-year warranty against major structural defects for both the individual dwelling unit and a project's common areas. For converted structures, the warranty would extend for an additional year.

Condominiums also pose problems for tenants whose rental apartments are converted into condominiums. HUD estimates that 100,000 dwelling units have already undergone such conversion, and testimony before our subcommittee indicated that the conversion process will continue to be of significant proportions during the next decade. Too often tenants in projects undergoing conversion cannot afford to purchase their apartments and are given inadequate notice of the landlord's intention to convert. They are, therefore, unable to locate suitable alternative housing. Our bill proposes that tenants in buildings undergoing conversion be afforded written notice of a landlord's intention to convert at least 120 days prior to their being required to vacate their apartments.

Let me stress, Mr. Speaker, that the consumer protection measures set out in our bill are designed as minimum standards. The States are free and are, in fact, encouraged under this bill to develop more stringent protective measures than those we propose. This is possible because we have left enforcement of the rights and obligations set out in this bill to individual unit owners through suit in Federal court. This enforcement mechanism will permit the States that wish to regulate condominiums to formulate their own programs unhampered by a conflicting and duplicitous Federal enforcement scheme. In addition, placing responsibility for enforcement in the hands of those citizens most directly affected obviates the need for a costly and cumbersome new bureaucracy. We believe that nothing in this bill will result in a substantial increase in costs to condominium purchasers or discourage honest developers from initiating new condominium construction.

LEGISLATION REVISING NATIONAL LABOR RELATIONS POLICY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. THOMPSON) is recognized for 15 minutes.

Mr. THOMPSON. Mr. Speaker, I am introducing today a bill which would bring about the most sweeping revisions in national labor relations policy since the passage of the Landrum-Griffin Act 17 years ago. I am convinced that such fundamental reform of the National Labor Relations Act is long overdue.

In the 14 years that I have served as chairman of the Labor-Management Subcommittee of the Committee on Education and Labor, I have discovered many serious deficiencies in the operation of the NLRA. The Labor Reform Act of 1977 is intended to correct many of those deficiencies.

The original Wagner Act asserts in its first section that it is the policy of the United States, in order to eliminate substantial obstructions to the free flow of commerce, to encourage the practice and procedure of collective bargaining in our country "by protecting the exercise by workers of full freedom of association, self-organization, and designation of representatives of their own choosing, for the purpose of negotiating the terms and conditions of their employment or other mutual aid or protection."

It was further recognized that was necessary because otherwise the inequality of bargaining power between individual workers and accumulations of capital organized in corporate form tended to aggravate recurrent business depressions by depressing wage rates and the purchasing power of wage earners and by preventing the stabilization of competitive wage rates and working conditions within and between industries.

Thus the Wagner Act set out to encourage the friendly adjustment of industrial disputes by restoring equality of bargaining power between employers and employees.

The promise of the National Labor Relations Act has still not been completely fulfilled because the structure we established to achieve those objectives has not been adequate to the task. We set up the National Labor Relations Board to protect and enforce the rights we created, but we have encumbered that Board unnecessarily and we have failed to provide it with the weapons needed to carry out its remedial aims.

The hearings of our subcommittee have documented case after case in which workers were thoroughly frustrated in their efforts to secure the promise and benefits of the NLRA because the enforcement mechanism we established was inadequate to cope with the recalcitrant employer adamant in its opposition to bargaining with its workers.

The Labor Reform Act I am introducing is directed at dealing with that problem by expediting the processes and procedures of the act and by strengthening the remedies available for its enforcement.

The word most repeated in our hearings over the years has been "delay." If there is any one single problem that has contributed to the breakdown in enforcement of national labor policy it has been the inability of the enforcing agencies to provide prompt and expeditious protection of peoples' rights. It has reached almost scandalous proportions and has disillusioned millions of working people with the promises of their governmental leaders.

I hate to repeat cliches—but who can challenge the fact that justice delayed is justice denied?

And no one who has examined our hearing records can deny that thousands of individual workers have been denied justice due them under the law because of delays in adjudicating their complaints. Much of this delay is caused by what is essentially a two-tier system of adjudicating unfair labor practice complaints in the first instance. Under the present law, the decision on complaints must be made by the Board.

The hearing examiner is little more than a conduit who forwards the record of the hearing to the Board itself for decision. In addition to delaying the disposition of unfair labor practices, this practice unnecessarily burdens the members of the Board and interferes with their carrying out of other duties. Section 4 of my proposed bill would authorize the Board to delegate decisionmaking authority on unfair labor practice complaints to administrative law judges, retaining a right of review of such decisions within the Board similar to the certiorari or certification jurisdiction of many courts. I believe that such a procedure would greatly help expedite decision in unfair labor practice cases.

Similar problems of delay occur in the Board's handling of representation elections. Under the Board's present procedures, if the unions and the employer cannot agree on holding a consent or stipulated election, the regional director conducts what are often lengthy hearings on the appropriate bargaining unit under the act and the eligibility of various workers to be included in that bargaining unit. After the regional director decides those issues, the parties have a right to seek review from the full Board. Many employers feel they have nothing to lose by contesting the eligibility of numerous workers and by raising every conceivable objection to bargaining unit determinations.

As a result, it often takes more than a year after the filing of a representation petition before an election is finally held. Not only does this cause tremendous frustration and disillusionment among the workers—and often a belief that the boss is above the commands of the law—by the time the election takes place, the vigor of the organizing drive has been dissipated and vast changes in the composition of the work force may have taken place. Section 5 of the proposed

bill would require that even where there are disputes over the appropriate bargaining unit or the eligibility of specific workers, the Board must conduct a representation election in the unit designated by the union within 45 days of the filing of the petition, and thus record the contemporaneous decision of the workers as to union representation. In some instances, where the dispute is solely over eligibility of voters, such a vote will demonstrate that counting the challenged ballots will not affect the result of the election and the Board can immediately certify the results and permit collective bargaining to proceed. At worst, in some cases, the election held will ultimately have to be set aside and a new election held, in which case the workers will be no worse off than they are under the present system.

Section 6 would bring about another reform aimed at eliminating delay in workers' efforts to enforce their right to bargain collectively. Under present law, there is no way a union can avoid the holding of an election to demonstrate its majority status if the employer insists upon it, no matter how clear and overwhelming the union's support among the workers. Section 6 would return the law in this regard to where it was prior to the Taft-Hartley amendments and permit the Board to certify a union as the bargaining agent of the employees without an election if the union can demonstrate that a large majority of the workers so desire. The union would be able to make such a showing by demonstrating that at least 55 percent of the workers in an appropriate unit are members and desire collective bargaining representation.

Even after the Board, with all its delays, decides that an unfair labor practice has been committed or that a union should be certified as collective-bargaining representative, that is only the beginning, not the end, of the legal process.

As the law is now administered, there is no real incentive for the respondent to abide by the Board's order. It can always buy more time by challenging the Board in Court. Although the present section 10(g) of the NLRA states that the institution of judicial proceedings is not to operate as a stay of Board orders, in fact it does, and the burden is on the agency to convince a court to enforce its order provisionally pending the completion of litigation. The courts have shown themselves very reluctant to do this—possibly because it means deciding cases twice, once for temporary relief and again on final hearing. Section 9 of the reform bill attempts to reassert that section 10(g) of the act means exactly what it says—that Board orders are to be enforced until and unless a court sets them aside.

There is no reason, once disputes have been fully litigated through the Board's processes, to make the successful litigant wait until the court relitigates it. This is particularly true since the overwhelming majority of Board decisions are ultimately enforced by the courts. Section 9 would shift the burden to the respondent to convince a court that the Board's determination was so deficient that the court ought to stay the Board result pending full judicial review.

I believe that, if all of the foregoing provisions are enacted by the Congress, we shall have gone a long way toward eliminating delay and procrastination in enforcement of rights under the NLRA.

The act also makes provision for the Board, in particularly egregious situations in which fundamental rights are threatened with destruction even before the Board can proceed to hearing on an unfair labor practice complaint, to go into court for temporary injunction pending its own hearing. This is an important provision. However, the courts have not been overly receptive to these applications and as a result the Board has been deterred from seeking such 10(j) injunctions even in egregious cases. Section 10 of the proposed bill attempts to spell out the standards to be applied in seeking and granting such 10(j) injunctions so that the Board will have clearer guidelines as to when to seek such relief and the courts clearer guidelines as to when to grant it.

The problem I have been describing is really twofold. On the one hand there is the need for timely relief, and on the other hand the type of relief which will act: First, to deter violations of the act by making them unprofitable; and second, to make the victims of violations whole.

In many cases, the present remedies provided in the act are about as effective as hunting lions with a pea shooter. Many employers have discovered it is more profitable to continue to ignore and defy the provisions of the National Labor Relations Act than to comply with them. There are three new remedial weapons provided against violations of the act in the proposed bill. Section 8 gives the Board power to issue "make whole" orders in refusal to bargain cases. The Board lamented the lack of such power in the Ex-Cell-O Corp. case (185 NLRB 107) (1970). This merely means that where a respondent has been found guilty of a refusal to bargain, the Board can restore the other side to the economic position the Board decides it would have achieved but for the violation. The aim is, of course, to take the profit out of the violations of the law.

What is even worse, is when flagrant violators who thumb their noses at the laws of the United States can turn around and make profits out of doing business with the United States. Section 11 of the bill would do away with that possibility by depriving such industrial scofflaws of the privilege of receiving Government contracts.

Finally, section 12 would create a treble-damage remedy for workers who have suffered the loss of their jobs because of their efforts to enforce their rights under the act. Much suffering has been caused to the families of workers wrongfully discharged for exercising their legal rights. If 3 years later they finally get legal vindication and back pay, that hardly compensates them for the great anguish and deprivation suffered in the meantime. By awarding treble damages in appropriate cases maybe some of that deprivation can be redressed and maybe violators will have second thoughts about subjecting themselves to the possibility of such an award.

There are two final provisions which I wish to mention to round out the comprehensive reform it undertakes in order to make the NLRB more effective. Section 7 has to do with the procedures followed by the Board and its personnel in processing charges of unfair labor practices.

When a charge is filed with the Board, it is up to the regional staff under the supervision of the General Counsel's office whether or not to issue an actual complaint, thus triggering the Board's adjudicative processes. We have received many complaints about the refusal of the regional offices to issue complaints because the investigators determined, after ex parte interviews and investigations, that the respondent was not guilty. Our system is committed to the principle of adversary hearings and giving to parties who feel they have been unlawfully aggrieved their "day in court." When grievances are disposed of by faceless investigators without permitting the illumination provided by an adversary process, the frustrations of the grievant who perceives that he or she has been truly wronged, are great. I believe that many of these people should be allowed their "day in court."

I do not insist that the Board issue a complaint every time a charge is filed. Of course, on many occasions it will be clear as a result of objective and uncontradicted evidence that no unfair labor practice has been committed. These charges should be dismissed without a complant issuing and the grievant should be given a written statement of explanation. However, the investigators ought not to attempt to resolve issues of credibility and testimonial disputes as a result of ex parte investigations. Section 7 makes use of the standards developed by the civil courts for the grant of motions for summary judgment. That judicial body of law should be looked to by the agency in deciding when it is appropriate to issue formal complaints. If there is no genuine issue of material fact and it is clear as a matter of law that no unfair labor practice has been committed, then dismissal is appropriate. However, if there is genuine dispute as to the facts and if the charge would be resolved one way if the trier of fact accepted one version of the facts and a contrary way if the other version were accepted, then the charge should not be dismissed without the agreement of the complainant. I acknowledge that such a process will increase the workload of the Board and its hearing examiners, but I believe we will just have to provide the necessary resources in order to see that proper justice is done.

The final provision in title I which I will mention is section 3, which provides that a Board member whose term has expired will continue to serve until a successor has been appointed. This is necessary to prevent the recurrence of situations in which the Board has been left with only four members and important issues of the administration of the act could not be decided because of a standoff among them.

Mr. Speaker, if the Labor Reform Act of 1977 is adopted in its entirety, I am convinced that we will have taken a huge step toward fulfillment of the promises made by the Congress 42 years ago to the working people of America with the adoption of the Wagner Act.

WILSON POSTAL REFORM BILL STRESSES MORE ACCOUNTABILITY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. CHARLES H. WILSON) is recognized for 15 minutes.

Mr. CHARLES H. WILSON of California. Mr. Speaker, I do not believe that it would come as a great surprise to many of my colleagues if I told them that a great number of Americans are dissatisfied with the U.S. Postal Service.

Indeed, it has become increasingly obvious that some form of congressional action must be taken to deal with the many problems which have manifested themselves since passage of the Postal Reorganization Act in 1970.

As the current chairman of the Postal Facilities, Mail and Labor Management Subcommittee of the House Post Office and Civil Service Committee, and a member of the committee for over a dozen years, I have been responsible for exposing many of the difficulties besetting the Postal Service, including the highly questionable billion dollar national bulk mail system.

In the 94th Congress we addressed the postal problem, but in effect reached no solution, and simply voted a $1 billion bailout for the Postal Service, and established a study commission to buy some time.

The fact is, despite some bright recent short-term financial statements which could be misinterpreted, the Postal Service is in serious trouble with an uncertain future at best and will be forced in the near future to either again raise rates or cut service, or both. Whether we like it or not, some basic public policy choices will have to be made, and it is our responsibility, as the elected representatives of the American people, to make them.

Recent events seem to magnify the importance of prompt attention for the future of the Postal Service by the Congress.

Last week a Federal appeals court ruled that the Postal Service and the Postal Rate Commission failed to comply with the law when a rate increase to 10 cents for first class mail was approved several years ago. Implicit is the possibility that the court may also rule in the near future that the method used to arrive at the current 13-cent rate was also improper. Regardless of the merits, such a decision would lead to chaos for users of every class of mail. If rates were raised significantly for major users of second-third- and fourth-class mail, these users might be forced to abandon the Postal Service, an action which would seriously damage first-class users as well.

While not so immediate a consideration, the ever-faster pace of technological development in the communications field raises a number of basic questions as to what role our nationwide postal system will play in the 1990's and beyond.

Mr. Speaker, in order to initiate congressional consideration for some of the issues I have just noted, I am today introducing a postal reform bill which includes some of the basic elements necessary to bring the Postal Service back on the right track and allow the public to have some say in postal rate and service decisions. I trust that this legislation will serve well as a vehicle for discussion.

Clearly, the conclusions of the Postal Service Study Commission, as well as our committee's consideration of the Postal Service's budget under the procedures established by Public Law 94–421, could prompt modifications to the bill.

In essence what my legislation would do is return some degree of accountability for postal decisions to the President and Congress, without going so far as to repeal the 1970 Postal Reorganization Act entirely.

Several years ago I introduced legislation to abolish the Postal Service Board of Governors, and make the Postmaster General again a Presidential appointee—with confirmation by the Senate. This provision is included in the bill I introduce today.

The need for this change is obvious. Responsibility for postal operations is assigned to an anonymous board which the public is not aware of, and thus true accountability is prevented. During the campaign, President-elect Carter endorsed this concept of direct appointment of the Postmaster General.

The legislation which I have introduced today also addresses the question of postal ratemaking authority. Although I personally would not have a serious problem with having Congress once again responsible for setting rates, I recognize that a number of my colleagues are not anxious at this time to jump back completely into the procedure.

For that reason, my bill would establish a procedure whereby if projected postal revenues will not meet estimated cost for a given year, the Postal Service could request an additional authorization and appropriation from Congress, or request a rate increase or a change in the level of postal service from the Postal Rate Commission, or a combination of all three.

If the Postal Service makes a request of Congress, the Postal Service would be required to notify the Postal Rate Commission of such request and provide the Commission with data on the necessary increases required if Congress fails to make such an appropriation. Conversely, if the Postal Service makes the initial request of the Postal Rate Commission, the Postal Rate Commission would notify Congress of the request and provide data on amount of appropriations needed to forego a rate increase or service cut.

If the Congress chooses to appropriate nothing or less than the amount requested after 5 months, the Postal Service would make a request of the Postal Rate Commission. Then, in this case, the Commission would be required to act within 5 additional months.

If the Postal Service makes its initial request for a rate increase or service change, the Commission would have to wait 5 months before making a recommended decision so that Congress would have the opportunity to act if it so chooses.

Also under my bill, the Postal Rate Commission would make a separate budget request to the President, thus increasing its independence from, and objectively toward, the Postal Service.

My experience as chairman of the Facilities Subcommittee has led to the inclusion of a provision which specifies that the Postal Service would not be permitted to carry out any capital investment project having a total estimated cost which exceeds $200 million unless the Postal Service before commencing such a project, transmits a report to the appropriate congressional committees. These committees would review the project and transmit recommendations to the Postal Service within 4 months. The Postal Service would then make the final decision, taking into account congressional recommendations.

If this provision had been in effect in the early 1970's, we may have been able to prevent the unwise expenditure of $1 billion for the national bulk mail system.

Any provisions of this bill are not intended to disrupt the Postal Service's currently mandated collective bargaining system under provisions of the National Labor Relations Act.

Mr. Speaker, without objection, I will include a copy of my bill, Postal Reorganization Act Amendments of 1977, at this point in the RECORD:

H.R. —

A bill to amend title 39, United States Code, to alter the organizational structure of the United States Postal Service, to revise the procedure for adjusting postal rates and services, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Postal Reorganization Act Amendments of 1977".

ORGANIZATION OF POSTAL SERVICE

SEC. 2. (a)(1) Section 202 of title 39, United States Code, is amended to read as follows:

"§ 202. Postmaster General

"The chief executive officer of the Postal Service is the Postmaster General, who shall be appointed by the President, by and with the advice and consent of the Senate. The pay of the Postmaster General shall be at an annual rate equal to the annual rate of basic pay, as in effect from time to time, for level I of the Executive Schedule of section 5312 of title 5.".

(2) The table of sections for chapter 2 of title 39, United States Code, is amended by striking out the item relating to section 202 and inserting in lieu thereof the following new item:

"202. Postmaster General.".

(b)(1) Section 203 of title 39, United States Code, is amended to read as follows:

"§ 203. Deputy Postmaster General

"The deputy chief excutive officer of the Postal Service is the Deputy Postmaster General, who shall be appointed by the Postmaster General. The Postmaster General shall fix the term of service of, and shall have the power to remove, the Deputy Postmaster General. The pay of the Deputy Postmaster General shall be at an annual rate, fixed and adjusted by the Postmaster General, not more than $2,500 less than the annual rate of basic pay of the Postmaster General, as in effect from time to time.".

(2) The table of sections for chapter 2 of title 39, United States Code, is amended by striking out the item relating to section 203 and inserting in lieu thereof the following new item:

"203. Deputy Postmaster General.".

(c)(1) Section 205 of title 39, United States Code, is amended to read as follows:

"§ 205. General authority of Postmaster General

"The Postmaster General shall direct and control the expenditures and review the practices and policies of the Postal Service and perform other functions and duties prescribed by this title.".

(2) The table of sections for chapter 2 of title 39, United States Code, is amended by striking out the item relating to section 205 and inserting in lieu thereof the following new item:

"205. General authority of Postmaster General.".

(d)(1)(A) Section 102 of title 39, United States Code, is amended to read as follows:

"§ 102. Definition

"As used in this title, 'Postal Service' means the United States Postal Service established by section 201 of this title.".

(B) The table of sections for chapter 1 of title 39, United States Code, is amended by striking out the item relating to section 102 and inserting in lieu thereof the following new item:

"102. Definition.".

(2) Section 204 of title 39, United States Code, is amended by striking out "Board" and inserting in lieu thereof "Postmaster General".

(3) Section 207 of title 39, United States Code, is amended by striking out "Board" and inserting in lieu thereof "Postmaster General".

(4)(A) Title 39, United States Code, is amended by striking out section 402.

(B) The table of sections for chapter 4 of title 39, United States Code, is amended by striking out the item relating to section 402.

(5) Section 1001(d) of title 39, United States Code, is amended by striking out "of the Board or".

(6) Section 1002(a) of title 39, United States Code, is amended by striking out "Governor or".

(7) Section 1011 of title 39, United States Code, is amended by striking out "Board" and inserting in lieu thereof "Postmaster General".

(8) Section 2402 of title 39, United States Code, is amended to read as follows:

"§ 2402. Annual report

"The Postmaster General shall submit to the President and to the Congress an annual report concerning the operations of the Postal Service under this title.".

(9) Section 3621 of title 39, United States Code, is amended by striking out "Governors" and inserting in lieu thereof "Postmaster General".

(10) Section 3623(b) of title 39, United States Code, is amended by striking out "Governors" and inserting in lieu thereof "Postmaster General".

(11)(A) Section 3624(c)(1) of title 39, United States Code, is amended by striking out "Governors" and inserting in lieu thereof "Postmaster General".

(B) Section 3624(d) of title 39, United States Code, is amended by striking out "Governors" and inserting in lieu thereof "Postmaster General".

(12)(A) Section 3625(a) of title 39, United States Code, is amended by striking out "Governors" and inserting in lieu thereof "Postmaster General".

(B) Section 3625(b) of title 39, United States Code, is amended by striking out "Governors" and inserting in lieu thereof "Postmaster General".

(C) Section 3625(c) of title 39, United States Code, is amended by striking out "Governors" and inserting in lieu thereof "Postmaster General".

(D)(i) The first sentence of section 3625(d) of title 39, United States Code, is amended by striking out "Governors" and inserting in lieu thereof "Postmaster General".

(D)(i) The first sentence of section 3625(d) of title 39, United States Code, is amended by striking out "Governors" and inserting in lieu thereof "Postmaster General".

(ii) The last sentence of section 3625(d) of title 39, United States Code, is amended to read as follows: "However, the Postmaster General may modify any such further recommended decision of the Commission under this subsection if the Postmaster General expressly finds that—

"(1) such modification is in accord with the record and the policies of this chapter; and

"(2) the rates recommended by the Commission are not adequate to provide sufficient total revenues so that total estimated income and appropriations will equal as nearly as practicable estimated total costs.".

(E) Section 3625(e) of title 39, United States Code, is amended by striking out "Governors" and inserting in lieu thereof "Postmaster General".

(F) Section 3625(f) of title 39, United States Code, is amended by striking out "Board" and inserting in lieu thereof "Postmaster General".

(G)(i) The heading for section 3625 of title 39, United States Code, is amended to read as follows:

"§ 3625. Action relating to recommended decisions".

(ii) The table of sections for subchapter II of chapter 36 of title 39, United States Code, is amended by striking out the item relating to section 3625 and inserting in lieu thereof the following new item:

"3625. Action relating to recommended decisions.".

(13) Section 3628 of title 39, United States Code, is amended by striking out "Governors" each place it appears therein and inserting in lieu thereof "Postmaster General".

(14) Section 3641 of title 39, United States Code, is amended by striking out "Governors" each place it appears therein and inserting in lieu thereof "Postmaster General".

(15) Section 3684 of title 39, United States Code, is amended by striking out "Governors" and inserting in lieu thereof "Postmaster General".

(16) Section 5206(c) of title 39, United States Code, is amended by striking out "Board" each place it appears therein and inserting in lieu thereof "Postmaster General".

PROCEDURES FOR ADJUSTMENT OF RATES AND SERVICES

SEC. 3. (a)(1) Title 39, United States Code, is amended by redesignating section 3628 as section 3629 and by inserting immediately after section 3627 the following new section:

"§ 3628. Appropriations or adjustments for operating deficits.

"(a)(1) If the Postal Service determines that total estimated revenues of the Postal Service for any fiscal year are not sufficient to defray total estimated costs of the Postal Service for such fiscal year, the Postal Service may—

"(A) request the Congress to authorize the appropriation of, and appropriate, an amount which, together with such total estimated revenues, will defray as nearly as practicable such total estimated costs:

"(B) make a request under section 3622(a) of this title for a recommended decision of the Postal Rate Commission; or

"(C) propose a change in the nature of postal services under section 3661(b) of this title.

"(2)(A) If the Postal Service makes a request to the Congress under paragraph (1)(A) of this subsection, the Postal Service shall notify the Postal Rate Commission of such request and shall provide the Commission with data and an analysis with respect to the amount of any increase in a rate or rates of postage or in a fee or fees for postal services, or with respect to the nature of any change in postal services, which would be necessary if the Congress fails to appropriate the amount involved in such request.

"(B) If the Postal Service makes a request under section 3622(a) of this title, or proposes a change under section 3661(b) of this title, as a result of a determination of the Postal Service under subsection (a) of this section, the Postal Rate Commission shall notify the Congress of such request or proposal and shall provide the Congress with data and an analysis with respect to the amount of appropriated funds which, together with total estimated revenues of the Postal Service for the fiscal year involved, would defray as nearly as practicable the total estimated costs of the Postal Service for such fiscal year.

"(b)(1) If the Congress fails to appropriate the amount requested by the Postal Service under subsection (a)(1)(A) of this section, or if the Congress appropriates an amount which is less than such amount, during the 5-month period immediately following the date upon which such request is made, and the Postal Service has not made a request under section 3622(a) of this title or proposed a change under section 3661(b) of this title during such 5-month period, the Postal Service may make such request or propose such change, as a result of a determination of the Postal Service under subsection (a) of this section, at any time after such 5-month period. Any such request or proposal shall take into account the amount of any appropriation made by the Congress as a result of a request of the Postal Service under subsection (a)(1)(A) of this section during such 5-month period.

"(2) In the case of any request made by the Postal Service under section 3622(a) of this title after the 5-month period immediately following the date upon which the Postal Service makes a request under subsection (a)(1)(A) of this section, the Postal Rate Commission shall transmit its recommended decision to the Postmaster General no later than 5 months after receiving such request under section 3622(a) of this title.

"(c)(1) If the Postal Service makes a request under section 3622(a) of this title as a result of a determination of the Postal Service under subsection (a) of this section, the Postal Rate Commission may not make a recommended decision with respect to such request during the 5-month period immediately following the date upon which such request is made. If the Congress appropriates funds to the Postal Service during such 5-month period for the purpose of defraying as nearly as practicable the total estimated costs of the Postal Service for the fiscal year involved, the request made by the Postal Service under section 3622(a) of

this title shall be modified to take into account such appropriation.

"(2) If the Postal Service submits a proposal under section 3661(b) of this title as a result of a determination of the Postal Service under subsection (a) of this section, such proposal may not take effect during the 5-month period immediately following the date upon which such proposal is submitted. If the Congress appropriates funds to the Postal Service during such 5-month period for the purpose of defraying as nearly as practicable the total estimated costs of the Postal Service for the fiscal year involved, the proposal submitted by the Postal Service under section 3661(b) of this title shall be modified to take into account such appropriation.

"(d) The provisions of this section shall not apply to any adjustment of a rate or rates of postage which is authorized by section 3627 of this title.

"(e) For purposes of this section, the Congress shall not be deemed to have passed legislation making an appropriation unless such legislation becomes law.

"(f) For purposes of this section, the term 'total estimated costs' has the meaning given it by section 3621 of this title.".

(2) The table of sections for subchapter II of chapter 36 of title 39, United States Code, is amended by striking out the item relating to section 3628 and inserting in lieu thereof the following new items:

"3628. Appropriations or adjustments for operating deficits.

"3629. Appellate review.".

(b)(1) Section 3624(c)(1) of title 39, United States Code, is amended by inserting immediately before the period at the end thereof the following: ", except that such recommended decision shall be transmitted no later than 5 months after receiving any such request from the Postal Service if such request is subject to the provisions of section 3628(b)(2) of this title".

(2) Section 3624(c)(2) of title 39, United States Code, is amended by inserting "5-month period or" immediately before "10-month period".

(c) Section 3627 of title 39, United States Code, is amended by inserting immediately after "provision of this subchapter" the following: "(other than the provisions of section 3628 of this title)".

REVIEW OF PROPOSED CAPITAL INVESTMENTS

SEC. 4. (a) Chapter 20 of title 39, United States Code, is amended by adding at the end thereof the following new section:

"§ 2011. Review of proposed capital investments

"(a) The Postal Service may not carry out any capital investment project having a total estimated cost which exceeds $200,000,000 unless the Postal Service, before commencing such project, transmits a report to the Post Office and Civil Service Committees of the Senate and the House of Representatives. Such report shall contain a detailed description of the project involved, together with a justification for such project.

"(b) The Post Office and Civil Service Committees of the Senate and the House of Representatives, upon receiving any report from the Postal Service under subsection (a) of this section, shall review the project involved and conduct such hearings with respect to such project as each Committee considers necessary. Each such Committee shall transmit recommendations to the Postal Service with respect to such project no later than 4 months after receiving a report under subsection (a) of this section.

"(c) The Postal Service may not commence any capital investment project with respect to which a report has been transmitted by the Postal Service under subsection (a) of this section until the Postal Service has received recommendations with respect to such project from the Post Office and Civil Service Committees of the Senate and the House of Representatives under subsection (b) of this section. The Postal Service shall take such recommendations into account in making its final determination with respect to carrying out the project involved.

"(d) For purposes of this section, the term 'capital investment project' means any project the cost of which is not properly chargeable, under generally accepted accounting principles, as an expense of operation and maintenance.".

(b) The table of sections for chapter 20 of title 39, United States Code, is amended by adding at the end thereof the following new item:

"2011. Review of proposed capital investments.".

POSTAL RATE COMMISSION BUDGETS

SEC. 5. Section 3604(d) of title 39, United States Code, is amended to read as follows:

"(d) The Commission annually shall prepare and submit to the President a separate budget of the expenses of the Commission, including expenses for facilities, supplies, compensation, and employee benefits. The President shall include the budget of the Commission, with his recommendations but without revision, as a separate item in the budget required by section 11 of title 31 to be transmitted to the Congress.".

EFFECT ON COLLECTIVE BARGAINING AGREEMENTS

SEC. 6. Nothing in this Act, or in any amendment made by this Act, affects—

(1) any collective bargaining agreement entered into by the United States Postal Service which is in effect on the effective date of this Act; or

(2) the authority of the United States Postal Service under chapter 12 of title 39, United States Code, to engage in collective bargaining with respect to any collective bargaining agreement into which the United States Postal Service may enter.

EFFECTIVE DATE

SEC. 7. The provisions of this Act shall take effect at the beginning of the first fiscal year which begins after the date of the enactment of this Act.

LEGISLATION TO CONTROL FRAUD AND ABUSE IN MEDICAID AND MEDICARE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. ROGERS) is recognized for 5 minutes.

Mr. ROGERS. Mr. Speaker, I am joining today with my colleague, the Honorable DAN ROSTENKOWSKI, to introduce before the 95th Congress a bill designed to address problems of fraud and abuse in the medicaid and medicare programs.

Medicaid and medicare are our primary public programs for financing health care services. They are large programs; together, they will soon account for nearly $45 billion in Federal and State expenditures. They are necessary programs. They help our elderly and our disabled and our poor and broken families to pay for sorely needed medical care services. But increasingly over the past several years, the integrity of these programs has been clouded by instances of abuses and in some cases outright fraud by medical providers who have provided poor service or unnecessary service or no service and billed the programs for extensive amounts. These practices cannot continue.

Fraud and abuse in our medical care programs benefit no one—except the unscrupulous provider. The honest, hard-working provider suffers, because his reputation is damaged. Indeed we seem often to have reached the unfortunate situation where simply because providers receive significant amounts of reimbursement through our public medical care programs, they become suspect. The recipients of the program suffer—because instances of abuse and fraud reduce public support for these programs, because providers who engage in abusive and fraudulent activities provide low quality medical care which may cause more harm than good, because the strain on State and Federal treasuries of the high costs of the program often result in cutbacks in benefits covered. And in the end, the general public suffers. They pay for these programs through their taxes, and they resent it when they see waste and fraud and abuse.

We have an obligation to all concerned to improve the administration and management of our medical care programs. Necessarily, much of the burden of this task must fall on HEW and the State agencies who administer medicaid. But I believe we can assist them in this task by tightening up the legislation. The bill Congressman ROSTENKOWSKI and I are introducing today is designed to do this.

In introducing this legislation, Chairman ROSTENKOWSKI and I are fulfilling a promise made to Members in the closing days of the last session. We indicated then our awareness of the serious nature of the problems of fraud and abuse in medicare and medicaid. My colleagues will remember that the Subcommittee on Health of the Interstate and Foreign Commerce Committee held hearings in the closing days of the last session on a measure similar to the one we are introducing today. Testimony was taken from HEW officials, from State medicaid program directors, from an attorney with experience in prosecuting medicaid and medicare fraud, from associations of physicians, hospitals, and professional standards review organizations.

Although the pressure of an early October adjournment made enactment of the legislation in a form satisfactory to the Members impossible, we have used the intervening time to confer with interested parties and improve the measure. We have talked with Justice and HEW officials. We have conferred with fraud investigators. We have talked with State medicaid personnel. We have listened to the advice and comments of interested parties. Our staffs have cooperated fully on this—and I might note, there has also been a high degree of cooperation with Senate Members and staff who have done extensive work in the area. The contribution of Senator TALMADGE and his staff should be particularly noted.

The result, we are convinced, is a bill worth the early attention of the Members. Early hearings are necessary. We anticipate they can occur in the first weeks of February as soon as the organization of the House committees is complete. Additionally, since the bill contains a number of measures that affect medicare and medicaid in parallel, and those programs fall within the jurisdic-

tion of two committees—Ways and Means and Interstate and Foreign Commerce—we believe joint hearings should be held on the measure. And we are committed to that happening. Our cooperation on this, we believe, can result in a strong bill which we can bring to the Members early in the term.

The problems of fraud and abuse in our medical care programs are complex ones. They involve inadequate numbers of able personnel administering the program at the State and Federal level; woefully inadequate data systems in many State medicaid programs; slow payments to providers which allow fraud and abuse to flourish; unethical providers; a reimbursement system which too often encourages overuse; and a lack of alternate high-quality facilities to serve the poor, particularly in areas of our major cities. This bill alone will not solve all of these problems—no one bill could. But it will increase the tools available to HEW and the States to find and prosecute fraud and abuse. It will allow them to put unscrupulous providers out of the programs. And, hopefully it will serve as a first step in a strong and continuing cooperative effort with the new administration to improve our publicly financed medical care programs.

MEDICARE AND MEDICAID ANTI-FRAUD AND ABUSE AMENDMENTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ROSTENKOWSKI), is recognized for 5 minutes.

Mr. ROSTENKOWSKI. Mr. Speaker, today, with the opening of the new Congress, my colleague from Florida (Mr. ROGERS) and I renew our commitment to seek prompt congressional action on legislation designed to help curb the growing number of fraudulent practices in the Federal health programs—medicare and medicaid. We are today introducing a revised and expanded version of legislation that we proposed in the closing days of the last Congress on this subject. In developing this legislation, we have, as in the last Congress, worked closely with our colleague in the other body, Senator HERMAN TALMADGE, in developing tools to better detect and prosecute fraud in both the medicare and medicaid programs.

A similar bill will be introduced in the Senate by our coauthor in that body the distinguished gentleman from Georgia, Senator HERMAN TALMADGE, probably next week.

The bill that we introduced today should not be viewed as the final answer to the problem of fraud and abuse in these programs. For it is not. Rather, it should be viewed as the first of a series of congressional initiatives in this area. As the work of congressional oversight and investigatory committees has shown, the sophistication of those who seek to defraud our health programs has to date far out-distanced the sophistication of our prevention and detection and efforts. In this Congress, we seek to close that gap.

In proceeding jointly on this matter, my colleague, Mr. ROGERS, and I seek to do whatever we can to encourage rapid congressional consideration of this initial antifraud and abuse bill. Since the bill involves subject matter within the jurisdiction of the Committee on Ways and Means—medicare—as well as subject matter within the jurisdiction of the Committee on Interstate and Foreign Commerce—medicaid, we hope that joint hearings on this legislation can be held by our two committees early next month.

As has become only too clear in recent months, strong efforts must now be made both legislatively and administratively—through a renewed commitment to interdepartmental cooperation—to bring a sense of order and morality back into our Federal health payment programs. These efforts must begin here in this session of the Congress—and they must begin before we seriously consider further expansion of these programs.

A brief summary of the highlights of our new antifraud and abuse legislation follows:

SUMMARY OF MEDICARE-MEDICAID ANTI-FRAUD AND ABUSE AMENDMENTS

SECTION 1. The Medicare-Medicaid Anti-Fraud and Abuse Amendments.

SEC. 2. Would modify existing law in both titles XVIII and XIX to clarify the ban on the use of factoring arrangements in the payment of medicare and medicaid monies to physicians or other persons providing services under either program. The provision would make clear that a power-of-attorney could not be used to circumvent existing antiassignment rules.

SEC. 3. Would require providers (other than individual physicians) and suppliers participating in either program to disclose upon request specified ownership information and information pertaining to business transactions with related parties.

This provision would also define a "shared health facility" (a so-called "medicaid mill") so that Professional Standards Review Organizations can increase their review given to this type of ambulatory facility.

SEC. 4. Would clarify and upgrade the criminal penalties for fraudulent activities under medicare and medicaid. Except for penalties involving medicare beneficiaries or medicaid recipients, all penalties would be upgraded to felonies.

SEC. 5. Makes several modifications in the existing Professional Standards Review Organization provisions. The bill would (a) require the Secretary of Health, Education and Welfare to give priority to a Professional Standards Review Organization request to review the services of a shared health facility ("medicaid mill");

(b) the bill would provide that a Professional Standards Review Organization furnish appropriate data to state and federal agencies investigating fraud and abuse (and to agencies engaged in health planning activities under federal or state law);

(c) the bill would clarify provision of present law that all duplicative review activities otherwise authorized under law stop when the Secretary of Health, Education and Welfare finds a Professional Standards Review Organization competent to assume review responsibilities;

(d) the bill would provide that Professional Standards Review Organization review with respect to the necessity and appropriateness of care is conclusive (subject to the provision for hearings and appeals);

(e) the bill would clarify legislative intent that the costs of Professional Standards Review Organization operations are to be financed wholly by the federal government (no state medicaid contribution is required);

(f) the bill would clarify legislative authority for the federal government to assume the costs of defense of Professional Standards Review Organizations against suit;

(g) the bill would authorize the Secretary of Health, Education and Welfare to extend a conditional Professional Standards Review Organiaztion's trial period for 24 months where he finds that the Professional Standards Review Organization has been unable to satisfactorily perform all the functions required of a Professional Standards Review Organization;

(h) the bill would permit the Secretary of Health, Education and Welfare to designate a Professional Standards Review Organization as a qualified organization following its trial period where he finds it is performing reviews of hospital services satisfactorily and has a plan for progressively assuming all required Professional Standards Review Organization functions. (Under present law, a Professional Standards Review Organization must be reviewing all types of inpatient and outpatient services before it can be designated as a qualified organization.);

(i) the bill would would clarify legislative intent that reimbursement for Professional Standards Review Organization operations be made under arrangements similar to those used in medicare for reimbursing intermediaries;

(j) the bill would require the Secretary of Health, Education and Welfare to submit an annual report to the Congress on the administration, impact and cost of the Professional Standards Review Organization program.

Sec. 6. Would give the General Accounting Office subpoena power to assist it in its monitoring, review and oversight activities related to the Social Security Act programs.

Sec. 7. Would require the Secretary of Health, Education and Welfare to suspend individual practitioners from the medicare program who are convicted of a criminal offense related to their involvement in either medicare or medicaid. Similarly, medicaid would be modified to require that states suspend from medicaid, any individual practitioner who is convicted of a criminal offense related to his involvement in either medicare or medicaid.

Sec. 8. Would require prospective providers of services or those seeking recertification under either medicare, medicaid, or title XX social services to disclose in the application for program participation the name of any person who has a five percent or more ownership or controlling interest in the applicant provider and who has been convicted of a criminal offense relating to a prior involvement with a program authorized under either title XVIII, XIX, or XX of the Social Security Act. The Secretary of Health, Education and Welfare or appropriate state agency is not required to enter into any agreement or contract with a provider who, although otherwise qualified, has an owner who meets such criteria. In the case of an application disclosing an ownership or control interest outlined above, the Secretary or appropriate state agency shall notify the Inspector General of both the receipt and disposition of such application.

SEC. 9. Would allow federal access to the books of providers of services under medicaid in the same manner that such access is presently provided to state agencies.

SEC. 10. Would allow 75 percent federal matching towards the cost of operating are approved medicaid claims processing and information system if the system provides explanation of benefits information to a sample group of individuals. This modifies present law which only allows the higher matching if the explanation is furnished to all recipients. The strict matching requirements of existing law have limited the growth of this type of claims processing and information system.

SEC. 11. Would make clear that medicaid is the payor of last resort where other payors might have an obligation to cover the cost of services rendered to a medicaid claimant.

A DESCRIPTION OF LEGISLATIVE PROPOSALS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. KOCH) is recognized for 10 minutes.

Mr. KOCH. Mr. Speaker, today I am inserting in the RECORD a list of 56 bills I plan to introduce early in the 95th Congress. I am introducing 36 of these bills today and I shall be reintroducing the remainder over the next several weeks. Thirty-eight of the total number of bills are reintroductions of bills and resolutions from the 94th Congress. Some of them date back to the 91st Congress when I first came to the House of Representatives. Fifteen of the bills listed are new pieces of legislation. These new bills include the Municipal Financial Guarantee Act of 1977 to provide loan guarantees to municipalities, a bill to reform the transportation trust fund to provide more funds for mass transit, and welfare reform legislation to replace existing public assistance and welfare programs with a single Federal program. In addition, these new bills include legislation to amend the definition of foreign assistance so as to eliminate "maintenance of internal security" as a justification for which U.S. military assistance may be furnished. I am also introducing the Class Action Procedures Improvement Act of 1977 and the Employee Bill of Rights.

In addition, I will be introducing three new Home Health Care bills with Congressman PEPPER which are consolidations of the many bills which I introduced on this subject in the 94th Congress.

Of course, I am also including in this list many of my major bills from the 94th Congress. These include legislation providing a renter's tax credit for a percentage of local real estate taxes, a bill to end tax discrimination against single persons and working married couples, the two major Koch-Goldwater privacy bills, two previous Koch-Pepper Home Health Care bills, the bill to establish a Commission on the Humane Treatment of Animals, the Public Participation in Government Proceedings Act, and legislation which would award fees to the accused in criminal cases where the ultimate disposition is an acquittal, unless such an award is found not to be in the interests of justice.

In the coming weeks and months, I will be sending letters to our colleagues explaining these bills in detail and asking for cosponsorship. Of the approximately 20,000 bills introduced in the House every Congress, about 6 percent receive hearings and are reported from committee, about 5 percent are passed, and 3 percent signed into public law. Obviously, not all of the bills that I am introducing this month will become law in the 95th Congress, but I hope that some will and I shall do my best to make that come about.

The following is a brief description of the bills I am introducing at the outset of the 95th Congress:

LIST OF LEGISLATION: REINTRODUCTIONS AND NEW PROPOSALS

TAXES AND TAX RELIEF

A bill to give tax equity to single taxpayers and working married couples.

A bill to allow a credit to tenants of houses or apartments for their proportionate share of the taxes and interest on mortgage paid by their landlords.

A bill to provide that landlords using an accrual method of accounting may not deduct real property taxes on their property until such taxes are paid.

A bill to allow a tax credit for certain donations of the artist's own work to public institutions.

A bill to provide that the 4-percent excise tax on the net investment income of a private foundation shall not apply to a private foundation organized and operated exclusively as a library, museum, or similar educational institution.

A bill to disallow the business expense tax deduction for first-class air and rail travel in excess of the coach fare for such travel.

A bill to increase to $1,500 the personal income tax exemptions of a taxpayer, including the exemption for a spouse, for dependents, for old age and blindness.

A bill to provide that blood donations shall be considered as charitable contributions deductible from gross income.

HUMAN RIGHTS AND FOREIGN POLICY

A bill to eliminate "maintenance of internal security" as a purpose for which military assistance may be furnished.

A bill to prohibit U.S. companies from participating in the boycott of another U.S. company or a country friendly to the United States, or providing certain information, in response to a foreign country's request.

A resolution to urge the leaders of the Soviet Union to remove all obstacles to emigration and to the free exercise of religious and cultural rights and expressing congressional support of "Solidarity Sunday" to achieve this goal.

A resolution requesting reports from the President and from the Commission on Security and Cooperation in Europe concerning the freedom of the citizens of the Socialist Republic of Romania to emigrate and the status of minorities in the Socialist Republic of Romania.

A resolution expressing the request of the U.S. Government that the Government of the U.S.S.R. provide Valentyn Moroz with the opportunity to accept the invitation of Harvard University.

A bill to provide that the place of birth of an individual issued a U.S. passport shall not be disclosed in the passport and to eliminate the requirement that the passport of an individual seeking entry into the United States disclose such individual's place of birth.

URBAN ENVIRONMENT

A bill to authorize the Secretary of the Treasury to provide loan guarantees for the debts of municipalities.

A bill to modify the Highway Trust Fund, to create a Surface Transportation Trust Fund from which funds will be available for both mass transportation and highway purposes.

A bill to authorize the Secretary of Transportation to make grants for the construction of bikeways in urbanized areas and to connect urban areas with local, State, and national parks.

A bill to repeal the existing statute defining diplomatic privileges in the United States and to substitute a narrower scope of privilege as permitted by the Vienna Convention of 1961.

A bill to amend the Tariff Schedules of the United States in order to require proof of liability insurance for automobiles entered into the United States by nonresidents and foreign government personnel.

A bill to establish a Commission on the Humane Treatment of Animals.

A bill to provide for loans for the establishment and/or construction of municipal, low-cost, nonprofit clinics for the spaying and neutering of dogs and cats.

A bill to authorize money for grants to be awarded by the Secretary of HEW for the development of alternatives to scientific experimentation and testing of toxic substances on live animals.

SOCIAL SECURITY

A bill to reduce from 20 to 10 years the length of time a divorced woman's marriage to an insured individual must have lasted in order for her to qualify for wife's or widow's benefits on his wage record.

A bill to provide that support and maintenance—in cash or kind—furnished to an eligible individual by members of his or her immediate family shall be disregarded—and shall not serve to reduce his or her supplemental security income benefits—to the extent that it does not exceed $200 a month.

PRIVACY

A bill to extend to the private sector and State and local governments privacy safeguards now in effect for Federal agency files on individuals—introduced by Representative GOLDWATER.

A bill to establish restrictions on the disclosure of certain financial, toll, and credit records.

A bill to forbid employers from discharging employees who exercise their first amendment rights, to prohibit retaliation by employers against employees who report law violations in good faith to the authorities, to require employers to respect the privacy of their employees, and to allow employees to examine their personnel files.

A bill to provide that, except in certain limited circumstances, it shall be an unlawful employment practice for the employer to request that an employee or an applicant for employment provide military discharge papers or other service-connected records.

A bill to prohibit the use of polygraphs—lie detectors—for employment purposes.

A bill to prohibit inquiries into records of arrests not resulting in convictions, to

limit inquiries into records of convictions and to regulate the dissemination of arrest and conviction records.

A bill to restrict the disclosure of information in the possession of telephone or telegraph companies.

HEALTH, EDUCATION, AND WELFARE

A bill to amend the Social Security Act to replace existing Federal public assistance and welfare programs with a single program under which all residents of the United States are guaranteed an adequate minimum income, with incentives to work for those who are able to do so, and for other purposes.

A bill to expand home health care and homemaker services provided under medicare and medicaid.

A bill to improve the survey and certification process, ratesetting and fiscal audit methods, and general regulation of nursing homes and intermediate care facilities under medicaid, and provides for medical, psychological, and social assessment of long-term care patients under medicare and medicaid.

A bill to revise and expand various provisions relating to home health and other long-term care services under medicare—introduced by Representative PEPPER.

A bill to improve and make more effective the provision of nursing home services under medicare and medicaid—introduced by Representative PEPPER.

A bill to provide additional programs as assistance for health personnel training programs—introduced by Representative PEPPER.

A bill to provide for supportive day treatment and in-home services to troubled children and families.

A bill to provide equal employment opportunity for handicapped individuals.

A bill to provide access to voting places for handicapped voters.

A bill to provide colleges and universities with Federal funds to make their campuses accessible to disabled students.

A bill to establish state-wide independent living programs to provide various support services for handicapped individuals.

A bill to establish a commission to study the results of racial integration of public schools, the use of busing to achieve racial integration of the public schools, and other questions relating to the quality of public schools.

A bill to establish a library services matching grant program to provide for Federal matching of private contributions made to public libraries for operating expenses.

A bill to increase the fiscal year 1977 authorization for the Museum Services Act from $15,000,000 to $30,000,000.

A bill to require that operators of a schoolbus be at least 18 years of age.

A bill to increase the excise tax on cigarettes and establishes a trust fund for research programs at the National Cancer Institute.

A bill to establish research programs and treatment centers for the study and treatment of problems associated with human fertility, sterility and the reproductive process.

A bill to provide for the protection of the public health from unnecessary medical exposure to ionizing radiation by providing for the licensure of radiologic technologists; directs the Secretary of HEW to prescribe radiation standards for diagnostic and other X-ray equipment manufactured before August 1, 1974, and to conduct regular inspections of all X-ray equipment.

CIVIL LIBERTIES, THE COURTS, CRIMINAL JUSTICE, AND GOVERNMENT

A resolution to endorse the publicly declared Vietnam-era reconciliation program of the President-elect and urging the President-elect to extend that program to include all Vietnam-era selective service offenders and all Vietnam-era veterans who received less than honorable discharges or who deserted or were absent without leave during such era.

A bill to decriminalize personal use and possession of marihuana.

A bill to prohibit discrimination on the basis of affectional or sexual preference.

A bill to permit Federal regulatory agencies to award attorneys' fees where there is a showing that the applying party could substantially contribute to the fairness of the proceeding.

A bill to amend title 28, United States Code, to improve certain procedures in class actions.

A bill to provide for the payment by the United States of attorneys' fees and other costs of the accused in criminal cases where the ultimate disposition is other than a conviction or plea of nolo contendere.

A bill to amend the Federal Election Law to provide that payments made or obligations incurred with respect to campaign items, such as buttons and bumperstickers, shall not be considered to be contributions to Presidential campaigns under such laws.

IMPROVE THE LOCAL PUBLIC WORKS ACT OF 1976

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut (Mr. DODD) is recognized for 10 minutes.

Mr. DODD. Mr. Speaker, as you have stated so well, the first priority of this new Congress must be to put America back to work and to get our economy moving again. We are faced with a great responsibility, and I believe we have new opportunities in this regard.

As throughout the rest of the country, economic recovery and reducing unemployment are of major concern to my State of Connecticut, and to my Second Congressional District.

It is for these reasons that I am cosponsoring an extension of the Public Works Employment Act of 1976, the measure intended by the last Congress to be a primary vehicle for this Nation's economic revitalization. Today, the first day of the 95th Congress is particularly appropriate for the introduction of this extension.

However, in supporting this $4 billion extension, Mr. Speaker, I would like to state emphatically that certain changes must be made in this program if it is to truly meet the needs of the country.

The need for such changes has become unmistakably apparent in recent weeks, as the Federal Economic Development Administration—EDA—announced its preliminary allocation of funds under this program.

It has become clear that the underlying concept of the 1976 Public Works Act remains valid—to stimulate the economy through employing jobless Americans on quick-starting, local public works projects, in areas of highest unemployment. Such projects include libraries, sewer and water lines, police-fire stations and municipal complexes.

Yet, I think it probably is an understatement to say that the administration of this program, and perhaps the criteria to determine which communities qualify for its funds, leave a great deal to be desired.

EDA's preliminary allocation of public works funds 2 weeks ago in Connecticut, and throughout the Nation, raises serious questions whether this agency is following Congress expressed intent in this act, and whether as presently administered, the act will have the desired effects of stimulating economic recovery and lowering unemployment.

Apparently contrary to Congress intent, EDA allocated funds in some cases to economically well-off areas with relatively low unemployment, while communities with much higher jobless rates received no funds whatsoever.

While I am encouraged that some communities in my district, and in Connecticut, received the funds, I have serious questions why others with incredibly high jobless rates did not benefit from this program.

I believe that the 95th Congress should closely scrutinize both the administration and eligibility criteria of the act, and I am gratified that the House leadership, and the leadership of the Public Works Committee, are already moving decisively in this direction.

No doubt the committee will receive many ideas how to improve the criteria established under the act by EDA. I would respectfully suggest that a community's ability to pay for public works projects, measured by its tax revenues, tax base and operating expenses, be seriously considered for inclusion as one of the significant criteria for this program.

To forward the committee's efforts to review the 1976 act, its administration by EDA, and the criteria, four of my Connecticut colleagues in the House, and the distinguished senior Member of the other body from our State, have joined with me to ask the General Accounting Office—GAO—for an investigation of the present program.

It is our aim that such an investigation will produce information necessary to insure that the act is the economic recovery measure it was intended to be.

We also would hope an investigation would produce any recommendations deemed appropriate to improve the program through this extension measure being introduced today. It would be our intention to forward the results of the

GAO's investigation to the appropriate House and Senate committees.

Through this process of committee consideration, GAO investigation and deliberation by the House, I am hopeful that needed improvements will be made to this important program to meet this Congress first priority—to put America back to work and get our economy moving again.

THE FINANCIAL DISCLOSURE ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. KASTENMEIER) is recognized for 5 minutes.

Mr. KASTENMEIER. Mr. Speaker, one of the major items of unfinished business left by the 94th Congress was legislation requiring public financial disclosure by high-ranking Government officials. The Senate passed a comprehensive disclosure bill last year. President Ford had proposed legislation similar to that which was approved by the Senate. In the House of Representatives, 168 Members joined with me in cosponsoring the Financial Disclosure Act. The House Democratic Caucus passed a resolution stating that the House should be allowed to work its will on financial disclosure legislation. Notwithstanding these acts, however, the House, to the disappointment of many, retained its long history of resistance to public disclosure, and the Judiciary Committee became the graveyard for the Financial Disclosure Act.

The need for financial disclosure remains as great as ever. The scandals of the past several years have further contributed to the erosion of confidence and trust held by the American people in their government leaders. Opinion polls reveal that the public overwhelmingly agrees with the statement that too many political leaders are "just out for their own personal financial gain," and we now face the unpleasant prospect of the unraveling of more scandals.

Obviously, we must respond to the urgent challenge to give the public sufficient reason to have faith in the integrity of their Government leaders, and financial disclosure is one of those necessary steps we must take if we are to restore the image of Government so as to establish beyond question the propriety of the public behavior of public servants. Financial disclosure will give the public access to basic information regarding the outside financial interests of Government officials. It will enable citizens to determine for themselves whether or not outside interests could possibly affect the judgment and performance of such officials. Once the public has such information, I believe it will provide the best assurance to them that overwhelming number of those who serve Government are not using their offices for personal financial gain, and through public disclosure, a major contribution will be made to the restoration of confidence in Government.

Mr. Speaker, Congressman TOM RAILSBACK and I, along with 81 of our colleagues, are, today, introducing the Financial Disclosure Act. The main provisions of this measure require the following:

A uniform financial disclosure report, to be filed annually, by the President and Vice President, each Member of Congress, Justices and judges and those officers and employees of the executive, judicial, and legislative branches of Government who are compensated at a rate equal to or in excess of the minimum GS–15 pay scale or who occupy pay grade 0–6 or higher of the uniformed service;

A financial disclosure statement from every candidate for nomination for or election to Federal office;

A financial disclosure statement from any individual appointed by the President to an office for which confirmation is required within 10 days after the nomination is submitted;

The reporting of the amount and source of each item and each gift or aggregate of gifts from one source, excluding immediate family, which exceed $100 in a calendar year;

The identity of each asset, other than household furnishings or personal goods, exceeding $1,000;

The identity of each liability owed exceeding $1,000;

Any transactions in securities of any business entity or transactions in commodities futures if the aggregate amount involved in such transactions exceeds $1,000 in a year;

Any purchase or sale of real property if the value of the property exceeds $1,000; and

The identity of any position as an officer, director, partner, adviser, or consultant of any business enterprise or partnership.

The financial disclosure reports are to be filed with the Comptroller General and will be available for public inspection. It, however, will be unlawful for any individual to obtain or inspect such reports for any commercial purpose, to determine or establish credit ratings or to be used in the solicitation of money for any political purpose.

The Financial Disclosure Act also provides that the Comptroller General shall audit at least one report of the President and Vice President during their term of office. At least one report filed by Members of Congress shall be audited during a 6-year period and an audit of 5 percent of the reports shall be conducted on a random basis.

Mr. Speaker, the campaign for financial disclosure has substantial bipartisan support. The 1976 platforms of both the Democratic and Republican Parties call for public disclosure by high-ranking Government officials. President-elect Carter has said:

> We are . . . in need of requirements for complete financial disclosure by all important officials. . . .

The House Republican Task Force on Reform of the 94th Congress stated that each Member of Congress should make an annual public statement of assets over $1,000 in value.

This new Congress, and the House in particular, has an obligation to restore the faith of the public in the integrity of their leaders, and the public should demand no less. Financial disclosure, perhaps more than any other reform proposal, will place high Government officials and Members of Congress directly under the scrutiny of the public eye. If we fail to act, then I am afraid that the public will interpret such inaction as confirming their worst suspicions about us. I am hopeful, however, that this new Congress will live up to its responsibility, and with the House, the Senate, and a new President acting together, we will see financial disclosure become law.

Mr. Speaker, the following is a list of cosponsors of the Financial Disclosure Act:

Thomas Ashley, Ohio
Les AuCoin, Oregon
Herman Badillo, New York
Alvin Baldus, Wisconsin
Max Baucus, Montana
Richard Bolling, Missouri
Don Bonker, Washington
William Brodhead, Michigan
Clair Burgener, California
John Burton, California
Phillip Burton, California
Bob Carr, Michigan
Shirley Chisholm, New York
Thad Cochran, Mississippi
John Conyers, Michigan
Robert Cornell, Wisconsin
Robert Drinan, Massachusetts
Robert Edgar, Pennsylvania
Don Edwards, California
David Emery, Maine
Dante Fascell, Florida
Millicent Fenwick, New Jersey
Paul Findley, Illinois
Hamilton Fish, New York
Harold Ford, Tennessee
Donald Fraser, Minnesota
Benjamin Gilman, New York
Willis Gradison, Ohio
John Hammerschmidt, Arkansas
Mark Hannaford, California
Tom Harkin, Iowa
Michael Harrington, Massachusetts
Elwood Hillis, Indiana
William Hughes, New Jersey
James Jeffords, Vermont
John Jenrette, South Carolina
Robert Kastenmeier, Wisconsin
Martha Keys, Kansas
Edward Koch, New York
John Krebs, California
William Lehman, Florida
Norman Lent, New York
Jim Lloyd, California
Matthew McHugh, New York
Edward Madigan, Illinois
Andrew Maguire, New Jersey
Romano Mazzoli, Kentucky
Lloyd Meeds, Washington
Helen Meyner, New Jersey
Norman Mineta, California
Joe Moakley, Massachusetts
Anthony Moffett, Connecticut
Ronald Mottl, Ohio
Richard Nolan, Minnesota
James Oberstar, Minnesota
Richard Ottinger, New York
Edward Pattison, New York
Joel Pritchard, Washington
Albert Quie, Minnesota
Tom Railsback, Illinois
Henry Reuss, Wisconsin
Frederick Richmond, New York
Matthew Rinaldo, New Jersey
Robert Roe, New Jersey
Benjamin Rosenthal, New York
Jim Santini, Nevada
John Seiberling, Ohio
Paul Simon, Illinois
Gladys Spellman, Maryland
Fortney Stark, California
William Steiger, Wisconsin

Gerry Studds, Massachusetts
Charles Thone, Nebraska
Bob Traxler, Michigan
Morris Udall, Arizona
Charles Vanik, Ohio
Henry Waxman, California
James Weaver, Oregon
Charles Wilson, Texas
Larry Winn, Kansas
Timothy Wirth, Colorado
Lester Wolff, New York
Clement Zablocki, Wisconsin

TRIBUTE TO MAYOR RICHARD J. DALEY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. FARY) is recognized for 5 minutes.

Mr. FARY. Mr. Speaker, in the few short weeks that have passed since his death, thousands, perhaps millions of words have been committed to print and spoken over the airwaves eulogizing Mayor Richard J. Daley.

The list of men and women who have paid him tribute is impressive: a President, a President-to-be, Congressmen, Senators, public figures from every State in the Union, editors, columnists, and television news personalities; all have contributed in praising this remarkable man.

Permit me now to add my own humble but intensely heartfelt words.

I speak of Richard Daley as mayor of Chicago, and preeminent urban statesman of our time, but still more, I cherish his memory as a constituent of mine and a personal friend.

The strengths of Richard Daley, the public figure, have been amply described by others, and much of what has been said is true:

He was a man of immense, irrepressible energy, matched only by his ability to translate it into solid achievements which benefit more than 3 million Chicagoans every day.

He stood as one of the greatest figures in the Democratic Party he loved so well, towering over his occasional detractors.

He was a man whose pride in his home city know no bounds, and even the casual observer can see that it was a pride amply and demonstrably justified. His love of our country was equally fierce and unswerving.

Richard Daley was mayor of the city of Chicago for two decades; the metropolis itself, in all its vibrance and greatness, stands as his monument. While other great cities from coast to coast sank into decay, Chicago grew and prospered under his dynamic leadership. The Windy City is today universally regarded as the one great urban concentration in the United States that really works.

I also knew Richard Daley, the private man, equally well. He was a humble person, who walked modestly among his fellow citizens. He was a loving and devoted husband and father, and a loyal son of the church. He came up through the ranks the hard way, by his own strenuous efforts, but he never forgot or neglected men, women, and children less fortunate than he. In his characteristic way, he translated this compassion into concrete and successful measures which ease their plight.

Mr. Speaker, six decades ago, Carl Sandburg undertook the formidable task of defining the essence of Chicago. His robust words described our beautiful city well; I think they also describe the man who served as its mayor with such distinction for so many years:

> . . . here is a tall bold slugger, set vivid against the little soft cities; . . .
> Bareheaded,
> Shoveling,
> Wrecking,
> Planning,
> Building, breaking, rebuilding. . . .
> Proud to be Hog Butcher, Tool Maker, Stacker of Wheat, Player with Railroads and Freight Handler to the Nation.

Now Richard J. Daley is gone. I mourn his passing, but I rejoice in the good works he has left behind, and I take comfort in the knowledge that he is reaping his eternal reward.

SURFACE MINING CONTROL AND RECLAMATION ACT OF 1977

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arizona (Mr. UDALL) is recognized for 5 minutes.

Mr. UDALL. Mr. Speaker, today I am introducing the Surface Mining Control and Reclamation Act of 1977 on behalf of myself and 17 of my colleagues on the Interior Committee.

With the exception of minor modifications to assure compliance with the Budget Act and other technical changes, this bill is identical to H.R. 13950 reported by the Committee on Interior and Insular Affairs during the 94th Congress. That bill contained a number of changes and was designed to make the bill more palatable to the Ford administration and coal surface mine operators. Unfortunately, the bill was tabled by the Committee on Rules.

But this is water under the bridge. We are in a new Congress and the new occupant of the White House has repeatedly expressed his support for Federal coal surface mining legislation. During the last televised debate with Mr. Ford, Governor Carter indicated that he would have signed the strip mining bill Mr. Ford vetoed. I believe that the President-elect understands the problems of attempting to increase this Nation's reliance on its vast coal resources without imposing sound reclamation requirements. It is appropriate, therefore, to give the coal surface mining controversy top priority in the 95th Congress.

Critics of Federal legislation have argued that a national bill is no longer needed because mining concerns have improved their reclamation practices under strengthened State laws. Frankly, I have serious doubts that this is the case, but the question of the status of current mining procedures is a good starting point for consideration of coal issues in the current Congress.

I have, therefore, arranged for a series of briefings on the question of reclamation practices and environmental problems of modern day surface mining. On January 10 and 12—room to be announced—at 9:45 a.m., members of the Interior Committee of the 94th Congress will receive comments from a variety of citizens and coal operators on these issues. Formal hearings on the legislation itself will be held at a later date and we plan to receive testimony from the broad spectrum of interested parties, including Federal, State, and local officials, electric utilities as well as industry spokesmen, environmental organizations, and citizens.

The initial briefings on January 10 and 12 will not interfere with the ability of interested parties to contribute to the legislative hearing record. But we need to get started and we can make good use of our spare time during this period of organization by taking a look at the practices and problems of current coal surface mining procedures.

Mr. Speaker, I would like to invite my colleagues who are interested in the issue of coal surface mining to participate in this briefing session. If any of my colleagues desire to attend the meeting I would ask them to direct their staff to contact the Interior Committee at extension 58331 so that appropriate arrangements can be made.

Mr. Speaker, I would also add that I am aware that the legislation I am introducing today is not viewed as beyond improvement by those interested in this issue. The environmentalists want a tougher bill and the coal industry believe many of its provisions are onerous. In general, I believe that the legislation's reclamation requirements and procedures are sound but this is a new Congress and a fresh look at a proposed statute never hurt any legislation. This bill does represent, however, the most recent best efforts of the Interior Committee and is, therefore, the most logical starting point for our deliberations. Our briefing sessions and later hearings will help evaluating the merits of this bill and carry out our responsibility to address this issue that has affected coal development for too many years.

INTRODUCTION OF TENANTS' TAX JUSTICE BILL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Virginia (Mr. HARRIS) is recognized for 5 minutes.

Mr. HARRIS. Mr. Speaker, along with 42 of my colleagues, I am today introducing the tenants' tax justice bill which allows tenants to claim their share of local and State property tax payments for Federal income tax purposes.

Tenants pay property taxes on their dwelling units through their rent payments, but unlike homeowners, they are not allowed to claim their property tax payments for Federal income tax purposes under current law. Because of this inequity, the Federal income tax liability is greater for tenants.

I believe that since the tenant actually pays State and local property taxes, the tenant should have the same right as the homeowner to claim the property tax payment. The tenants' tax justice bill provides a credit for tenants of 25 percent of the property tax payment. For

the average taxpayer, a credit of 25 percent of the property tax payment is approximately equivalent to the full property tax deduction which the homeowner can claim. The amount of the credit which a tenant can claim is dependent upon the actual amount of the property tax payment on a prorated basis.

COMPUTATION OF TENANTS' TAX CREDIT

Under the bill, a tenant can claim a credit of 25 percent of the proportionate share of the property taxes paid. The tenant's proportionate share of the property tax payment is determined by multiplying the total property taxes paid on the building by the ratio of the floor space rented by the tenant to the total rental floor space in the building, excluding common areas. For example, if someone rented for an entire year an apartment with 5,000 square feet of floor space and there was a total of 50,000 square feet of rental floor space in the building, then the tenant's proportionate share of the property tax is 10 percent of the building's property tax. In this example, if the total property tax payment was $6,000 then the tenant's share is $600, and the credit which the tenant can claim is 25 percent of $600 or $150. A tenant is allowed to claim the property tax payment for his principal residence and for only the portion of the year during which he actually rents the apartment. In the example above, if the tenant had only rented the apartment for 6 months, then his share of the property tax is $300 and his credit, $75.

Obviously, since the size of existing apartments and buildings rarely change in size, only one calculation by the landlord is needed to determine the proportionate size of the apartments in the landlord's building. On a yearly basis the landlord would advise the tenant of the proportionate share of the property tax payment which the tenant had paid in his rent and the number of days during the year when the apartment was rented by the tenant.

BENEFITS TO THE TAXPAYER

This legislation is particularly timely and will ease housing problems in several ways. Many Americans find that they are unable to buy a home because of constantly rising purchase, maintenance, and tax costs; other Americans have jobs that require them to frequently move their place of residence; and still others for strictly personal reasons have decided that they would prefer to rent. The average citizen in a free society has the right to make such a decision without suffering tax disadvantages. Not only do tenants rent garden or high rise apartments, but many rent town houses or single family homes. Nationally, about 36 percent of all housing units are renter occupied. The bill enhances rental markets and personal savings. The tenants' tax justice bill discourages "instant condominiums" by removing an artificial tax stimulus to apartment conversion—simply, those who rent will no longer lose the right to claim their property tax payment. By extending property tax relief to tenants, the bill reduces the Federal income tax liability of many average Americans.

The bill also makes partners of property owners and tenants in keeping local property taxes under control. Many landlords support this concept because in addition to enhancing rental markets, the bill makes the tenants realize what portion of the rent is not "rent" at all, but a property tax payment. The landlord is currently caught in the middle—the local government raises taxes, but because the landlord collects the tax in the rent, he is "blamed" for increasing rents. Under the tenants' tax justice bill, it is clear that the landlord is merely acting as a collection agent for the local government.

In no way does the bill reduce the advantages of homeownership, nor does it increase the tax burden on apartment owners. The tax which the landlord collects and passes on to the State or local government is not real income for the landlord and is not considered as such under either current law or our bill. At the same time the landlord reports the property tax collection as income he also lists it as an expense—the property tax payment is not included in the landlord's net income and, therefore, should not be taxed. The tenants' tax justice bill recognizes that the landlord is merely acting as a transfer agent for the local government and, accordingly, does not change the tax liability of the landlord.

WIDESPREAD SUPPORT FOR TAX REFORM FOR TENANTS

During the 94th Congress, similar legislation, which I introduced, received widespread attention from the national news media and several organizations. Those who expressed favorable interest included the National Tenants Association, the American Association of Retired Persons, Apartment Life magazine, as well as several apartment owner organizations. Mr. Bruce Mazzie, president of the National Tenants' Association calls the tenants' tax justice bill "a positive step in correcting an inequity that has existed between tenants and homeowners for too long." Mr. Mazzie adds that the bill "would also stimulate the economy by putting money in the hands of consumers who need it most."

Public policy has discriminated against tenants for too long; genuine tax reform requires that we treat the Nation's tenants with fairness and equity. By allowing tenants to claim their property tax payments the Tax Code will be more just. The tenants tax justice is of considerable interest to the American tenant and deserves the attention of every member. It is my hope that this Congress will quickly act on this proposal and thereby extend property tax relief to tenants. The bill follows:

H.R. —

A bill to amend the Internal Revenue Code of 1954 to allow a tax credit on houses or apartments for a portion of the real estate taxes paid or incurred by their landlords.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to credits allowable) is amended by inserting before section 45 the following new section:

"SEC. 44B. REAL PROPERTY TAXES IN CASE OF INDIVIDUALS WHO RENT THEIR PRINCIPAL RESIDENCE.

"(a) ALLOWANCE OF CREDIT.—In the case of an individual, there shall be allowed as a credit against the tax imposed by this chapter for the taxable year the amount of the rent paid or incurred by the individual during the calendar year in which the taxable year begins for any dwelling unit used by the individual as his principal residence, but only to the extent that such amount does not exceed 25 percent of the individual's proportionate share of the State and local real property taxes (within the meaning of section 164(a)(1))—

"(1) which are imposed on such dwelling unit, or on the building in which such dwelling unit is located, and on the land on which such dwelling unit (or building) is situated, and

"(2) which are paid or accrued during such calendar year.

A credit shall not be allowed under this subsection for any amount of rent for which the individual is entitled to a deduction under this chapter.

"(b) PROPORTIONATE SHARE.—

"(1) IN GENERAL.—For purposes of subsection (a), an individual's proportionate share of the real property taxes described in such subsection which are paid or accrued during any calendar year with respect to any dwelling unit shall be an amount equal to—

"(A) the amount of such real property taxes—

"(i) in the case of a dwelling unit located in a building which contains one or more other units, which are attributable to such dwelling unit, or

"(ii) in the case of any other dwelling unit, which are imposed with respect to such unit; multiplied by

"(B) a fraction the numerator of which is the number of days in the calendar year on which such dwelling unit was used by the individual as his principal residence and the denominator of which is the number of days in such calendar year.

"(2) TAXES ATTRIBUTABLE TO CERTAIN DWELLING UNITS.—For purposes of paragraph (1), the amount of the real property taxes described in subsection (a) which are attributable to any dwelling unit located in a building containing one or more units is an amount which bears the same ratio to the aggregate amount of such taxes imposed on the building and the land on which it is situated as the number of square feet of floor space in such unit bears to the total number of square feet of floor space in all the units in such building. For purposes of the preceding sentence, there shall not be taken into account the amount of any floor space in the building which is a common area or is used by the lessor of such building for purposes of maintenance."

(b)(1) The table of sections for subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 is amended by inserting before the item relating to section 45 the following new item:

"Sec. 44B. Real property taxes in case of individuals who rent their principal residence."

(2) Section 56(c) of such Code (defining regular tax deduction) is amended by striking out "and" at the end of paragraph (7), by striking out the period at the end of paragraph (8) and inserting ", and" in lieu thereof, and by adding at the end thereof the following new paragraph:

"(9) section 44B (relating to real property taxes in case of individuals who rent their principal residence)."

(3) Section 6096(b) of such Code (defining income tax liability) is amended by

striking out "and 44A" and inserting in lieu thereof "44A, and 44B".

SEC. 2. The amendments made by the first section of this Act shall apply to rent paid or incurred after December 31, 1976, in taxable years ending after such date.

LEGISLATION TO AMEND THE 1974 EMPLOYEE RETIREMENT INCOME SECURITY ACT

The SPEAKER pro tempore (Mr. DANIELSON). Under a previous order of the House, the gentleman from Michigan (Mr. CARR) is recognized for 5 minutes.

Mr. CARR. Mr. Speaker, I am today introducing a bill to help a small but important group of people who are not adequately protected by the 1974 Employee Retirement Income Security Act, ERISA.

ERISA has been received as a landmark of congressional legislation. This law sets up basic standards to be followed by pension plans to insure that employees are protected from unsound or unfair practices. Until Congress passed that law, some workers were financially ruined when their pension plans were unscrupulously administered or went bankrupt; other employees were deprived of the money they had paid into a plan before they moved to a new employer; and some workers were even fired before retirement and received no pension benefits at all.

ERISA reduced these inequities. It not only improved the soundness and the integrity of pension plans throughout the Nation, but also set up the Pension Benefits Guaranty Corporation—the PBGC—to take over funding of those plans that go bankrupt. ERISA requires the PBGC to make the basic pension payments of bankrupt plans and also gives PBGC the option to pay other nonbasic benefits in a particular plan, such as health insurance, life insurance, and early retirement.

But experience with the PBGC has revealed some inequities and hardships with the disposition of nonbasic benefits. Specifically, early retirement plans such as the "30 and out" programs are not fully protected by ERISA. The result is that in those cases where pension plans have gone bankrupt since the enactment of ERISA, and have been taken over by the PBGC, employees entitled to early retirement benefits under normal circumstances have been cut off from full compensation. The hardships caused by such circumstances have been devastating for some older workers and their families, and the administrative problems that the PBGC has been saddled with in determining optional benefit payments have been equally frustrating.

The Diamond Reo Corp. of Lansing, Mich., was the first bankrupt company whose pension plan was taken over for administration by PBGC. Some 80 of the 650 Reo retirees had retired early from the company under its supplemental pension benefits plan. When the PBGC ruled against continuing these optional ERISA benefits, the early retirees were devastated, many of them experiencing income drops from $550 per month to as low as $82.44. Early Diamond Reo retirees typically lost over three-fourths of their income. While these personal hardships were abrupt and disastrous for people who were deprived of the investment of decades of work, the slow and grinding administrative problems of the PBGC were also frustrating. In total, the PBGC spent a year and a half analyzing, disposing, and arbitrating the pension problems of Diamond Reo before the last case was settled and the last benefits were readjusted for the third or fourth time. Part of the difficulty stemmed from the PBGC being charged with deciding whether or not to award certain benefits that were treated as optional under the ERISA. Early retirement supplements are currently such optional benefits.

If the intention of ERISA was to prevent persons under pension plans from suffering great financial hardship because their pensions were poorly administered, then clearly in the case of early retirees that protection is still lacking. It is hard to imagine a greater unfairness than telling a person who has contributed most of his life to a pension plan for retirement security that because the plan has gone bankrupt, he will have to live on $82.44 a month instead of $550. This is precisely the situation that ERISA was intended to prevent.

To repair this inequity and to ease the workings of the PBGC, I am today introducing a bill to amend ERISA so that the PBGC would be required to fund not only the basic benefits of a bankrupt pension plan but also the early retirement benefits that would normally go to employees under a solvent pension operation.

The number of people who would be affected by this bill may be few, but their sufferings are nonetheless great. We must act immediately for their protection and welfare to insure that the full intention of ERISA is realized.

YOUNG ADULT CONSERVATION CORPS LEGISLATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Washington (Mr. MEEDS) is recognized for 5 minutes.

Mr. MEEDS. Mr. Speaker, today I am introducing the Young Adult Conservation Corps legislation on behalf of myself and over 60 cosponsors. This legislation was first introduced during the 94th Congress and passed the House with overwhelming approval. Unable to obtain a budget waiver, it died in the Senate. The new administration has indicated its interest in this concept and I feel that its cooperation can be expected in passage and implementation of the Young Adult Conservation Corps program.

This is not a new concept. During the Great Depression of the thirties President Franklin D. Roosevelt proposed this sensible approach to the dual problem of massive unemployment and resource management. It was called the Civilian Conservation Corps. As near to us as Skyline Drive and as far as the Olympic National Park in my home State of Washington, the benefits of this program still stand. In addition to the permanent enrichment of our public lands, however, the human product of the CCC has enriched the ranks of business, labor, agriculture, and government because young lives of our future leaders were provided hope in an era of despair. The productivity of the land and of the corpsmen has repaid many times the cost of the CCC.

Six years ago Congress created the Youth Conservation Corps. Under this highly successful and popular program young people between the ages of 15 and 18 are provided part time summer jobs performing healthful outdoor work on public projects.

The unemployment rate for young people under the age of 25 is three times the national average. The 1976 report of the Congressional Joint Economic Committee states that our "prolonged recession threatens to spawn a large disenchanted group of young adults—out of the work force, without opportunity for adequate self-support and alienated from the society that fails to accord them a productive roll." The report continues that "extended idleness for young people with little past work experience will result in severe social and economic cost" in terms of crime and other antisocial behavior. It is no mere coincidence that while nearly half our Nation's total unemployed are under the age of 25 according to the FBI selected crime index this age group also accounts for over half the total arrests recorded nationally. There is every indication that reducing the unemployment rate among youth will also reduce the crime rate.

While millions of young people are idle and jobless, jobs which need doing on public lands are left undone. Our Nation faces a reforestation backlog of over 3.5 million acres that will penalize future generations if left undone. In addition to reforestation, other vital environmental work such as timber stand improvement, forest firefighting, trail and campground improvement, insect, flood, disease, and erosion control need doing. In Washington State our fisheries are in dire need of enhancement. Other States have similar problems of resource management.

The Young Adult Conservation Corps legislation is based on the combined experience of the CCC and the YCC summer program. It will expand the current YCC program to employ young adults age 19–24 on a year-round basis.

Robert Kennedy once said that our Nation's youth are our "last, best hope." We must do what we can to provide them with the opportunities to become productive members of society. I urge my colleagues from both sides of the aisle to join me in this effort to enrich the lives of our youth and enhance the resources of our Nation.

NUCLEAR ENERGY REAPPRAISAL ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentle-

man from New York (Mr. PATTISON) is recognized for 5 minutes.

Mr. PATTISON of New York. Mr. Speaker, since its introduction to the world in 1945, nuclear power has become one of the most complicated problems of today's world. On one hand, it could possibly supply much of the energy we will need in the future. On the other, it could provide for the destruction of all we know as real and living. Great care must be taken in working with and handling the various elements of the nuclear fuel cycle. If not, disaster may occur. Arguments and counterarguments have been repeatedly made by both sides of the nuclear power debate, and most all of the arguments are sound. What remain is not only a split within our scientific community but a split among the people of this country. Everyone wants all the power they can use, but no one wants a nuclear powerplant built nearby.

I can understand the split. There is simply not enough information available to allay the fears many of us have regarding the use of nuclear power. And in many cases, the lack of information results from a lack of an answer to a problem. This is regrettable, especially when we talk about the most pressing problem concerning the use of nuclear power: the problem of waste disposal.

We must ask ourselves: is there a safe method for permanent disposal of radioactive wastes? The answer: at this time, no. The methods and procedures for the disposal of low and medium level wastes seem to be failing. We have experienced losses of radioactive waste through leakage and improper management. Industry does not want to be in the waste disposal business. We have seen this in New York State where Nuclear Fuel Services, Inc. has recently declared bankruptcy because there are no profits in radioactive waste disposal. The people of New York are now responsible for the safe disposal of these wastes as well as all the costs associated with disposal. High level radioactive wastes are still being stored at the generating facilities. We could continue to do that in the short run, a more long term solution is needed. It also appears that the costs of waste disposal will be staggering. But again, the costs cannot be estimated because there are no agreed upon plans available for safe and long term disposal of nuclear wastes.

This problem alone is cause enough for us to place a moratorium on the construction of new nuclear powerplants. We need to answer many of the questions before we continue our development and dependence on nuclear power. If answers and solutions can be found, and they are reasonable, then I will be able to support nuclear power development. Until that time, I cannot.

I ask that you give serious consideration to the Nuclear Energy Reappraisal Act.

CONGRESSMAN STRATTON INTRODUCES A BILL TO MAKE CERTAIN IMPROVEMENTS IN THE MILITARY SURVIVOR BENEFIT PLAN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. STRATTON) is recognized for 10 minutes.

Mr. STRATTON. Mr. Speaker, during the latter part of the 94th Congress the Committee on Armed Services, after thorough consideration by the Subcommittee on Military Compensation, reported a bill to make a number of important improvements in the military survivor benefit plan. That bill was enacted by the House in substantially the form recommended by the committee.

However the Senate, because of the imminent adjournment of the 94th Congress, passed only those portions of the bill which were patterned on recently enacted changes in the civil service plan and deferred action on the remainder of the bill as passed by the House. In the interest of securing the limited benefits provided by the Senate-passed bill, the House accepted the Senate version which was enacted as Public Law 94–496.

Today, I join with the gentleman from California, (Mr. BOB WILSON) who has been most active in his efforts to correct the shortcomings of the present survivor benefit plan, in introducing a new bill which incorporates the remaining features of the remedial legislation originally passed by the House during the 94th Congress. Very briefly, those features are:

First, cost-of-living increases of annuities under the retired serviceman's family protection plan. This action will provide the same cost-of-living adjustments for those getting benefits under that plan as is provided under the present plan.

Second, reinstatement of the survivor benefit plan payments to widows whose dependency and indemnity benefits are terminated on remarriage after age 60. This would eliminate an inequitable situation in which the widow of a retiree can have her benefits reinstated if her husband died from a non-service-connected death, but the widow of a member who died from a service-connected reason cannot have those benefits reinstated.

Third, reduction from 100 percent to 50 percent in the social security offset.

Fourth, elimination of the social security offset when there is a dependent child.

Fifth, elimination of the social security offset when the spouse beneficiary is not receiving social security benefits based on the deceased retiree's military service; and

Sixth, elimination of the social security offset when the only military service involved periods of active duty of less than 30 consecutive days and the member concerned received a refund of social security taxes withheld for those periods.

Mr. Speaker, the present 100-percent social security offset provisions, while unfair to all widows under the plan, are particularly burdensome to the enlisted men's widows. In some cases, the offset completely wipes out any benefit otherwise payable under the plan. This is grossly unfair to the retired member who contributed very substantially during his lifetime in order to provide this benefit for his widow.

Mr. Speaker, we hope the Committee on Armed Services can consider this bill at an early date, and that the House can pass it early in the session so as to enable the Senate to have ample time to consider and enact these urgently needed improvements during the first session of the present Congress.

Below I include a brief statement comparing the military survivor benefit plan with similar civil service plans:

COMPARISON OF MILITARY SURVIVOR BENEFIT PLAN COST FORMULA VERSUS CIVIL SERVICE FORMULA

In the development of the new Military Survivor Benefit Plan, it was intended to pattern the new Plan on the Civil Service Plan to the maximum extent possible.

As enacted, however, there is one area in which the military plan inadvertently deviates from the civil service plan and results in greater cost to the military retiree than to a comparable civil service retiree.

Under both the military civil service plans, the initial cost calculation to the retired member of providing a survivor's annuity to the spouse is identical. The formula is 2.5 percent of the first $300 of the member's retired pay and 10 percent of any amount in excess of $300.

Post retirement increases in retired pay for military retirees:

When there is a post retirement increase in retired pay, the cost to retired military member is recalculated using the same formula, i.e., 2.5 percent of the first $300 of retired pay plus 10 percent of any amount in excess of $300. Under this method, if the member's retired pay was initially $300 or more (as is the case normally) the premium charged against the additional amount of retired pay which the retiree receives is 10 percent.

Post retirement increases in retired pay for Civil Service retirees:

When there is a post retirement increase in retired pay, the cost to the retired civil service employee for participating in the plan is not recalculated; the amount of retired pay being received is increased by the percentage of the increase; and the amount being withheld by reason of participation in the Survivor Benefit Plan is similarly increased by that percent.

Since the usual retired pay increase is less than 10 percent, the amount of the added survivor benefit cost to the civil service retiree is invariably less than the added cost to the military retiree.

The bill to amend the survivor benefit plan will correct this inconsistency and provide a military survivor benefit cost formula which will function in an identical fashion to the civil service plan.

SELECT COMMITTEE ON POPULATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. SCHEUER) is recognized for 5 minutes.

Mr. SCHEUER. Mr. Speaker, today I am introducing with 100 cosponsors a resolution calling for the creation of a Select Committee on Population. The problem of worldwide population growth and the role the United States should play in assisting the developing nations in getting a handle on their population growth rates continues to be an issue of overriding importance.

Yet, we here in Congress have failed to devote adequate attention to the popu-

lation equation both here in the United States and around the world in the developing nations. The only committee which has taken a serious look at population problems is the Census and Population Subcommittee under the chairmanship of our colleague from Colorado, Mrs. SCHROEDER. I commend her and the other members of the subcommittee for the outstanding set of hearings they held on U.S. population problems.

Four billion people now inhabit our small planet, and the world's population is expected to double in the next 35 years. Seventy percent of the world's population lives in the developing world and accounts for over four-fifths of the yearly increase in population. Yet the world population problem far transcends demographic statistics and national boundaries.

Try to imagine the quality of life of the people in New York City, Atlanta, Los Angeles, Chicago, or Houston if every man, woman and child suffered from malaria, 40 percent had tuberculosis, 1 in 30 were afflicted with leprosy, and 4 in 10 children died before age 5 from measles. This is the quality of life, differing only in detail, endured by 500 million people in parts of Africa, Asia, and Latin America.

It is not easy for us to imagine that literally hundreds of millions of human beings suffer day in and day out from disease and hunger and must wage a perpetual struggle against grinding poverty.

The increase in malnutrition, hunger and mortality rates are compelling reasons for us to give more attention to the population issue. Between one-third and one-half of the world's people are chronically undernourished. As populations expand, we can expect a corresponding increase in the demand for food and improved standards of living.

Just 30 years ago, all of the areas of the world were net exporters of food. Today almost all of the world's food exports come from North America. It is becoming increasingly clear that we will no longer be able to expand food production at the same rate as in the past. As food demand has outstripped production gains, world grain reserves have been depleted and prices have climbed. As recently as 1970, grain reserves, including both the carryover stocks of grain and the grain equivalent of idled cropland in the United States, amounted to 89 days of world consumption. By 1974 reserves had dropped to just over 30 days where they remain today.

The increase in death rates is indicative of this severe nutritional stress. Death rates are on the increase in many of the world's poorest countries. While death rates measure the demographic effect of prolonged hunger, they do not measure the social impact. For every person that dies, many more suffer. While many infants survive prolonged periods of semistarvation, they suffer irreparable brain damage in the process.

There are other compelling reasons of national security and international order which thrust on us a heavy burden of responsibility to give the world population problem the high priority it deserves. In the developing world, where food shortages already exist, expanding populations will mean that food supplies will have to be stretched even further. The fragile governments of these lesser developed countries may have a difficult time responding to these demands for food and better living conditions. The resulting dissatisfaction may lead to internal disorders, perhaps even revolution, which may have international repercussions—all in a world where nuclear weapons are proliferating.

The strained relations between the United States and Mexico is an outgrowth of Mexico's population problem. In 1950 North America and Latin America had populations of almost identical size. Latin America now adds four times as many people to its population each year as North America. Mexico alone with a population of 60 million is adding more people than are the United States and Canada together, with a combined population of 238 million. Mexico's population is doubling every 20 years, probably the fastest growth of any country in the world. Half of the Mexican population is under 15 years of age, threatening even more rapid population growth in decades to come absent effective family planning programs. The population explosion in Mexico is so great, the labor supply is growing so rapidly, and unemployment is so high that millions of persons have no choice but to look to the United States as a source of jobs. Nearly 10 percent of Mexico's 60 million people are illegal aliens residing in the United States. This can only auger strained relations with Mexico.

During recent years we have seen a dramatic change in attitude among the leaders of the developing world toward population programs. Decisionmakers in many underdeveloped countries recognize the galloping population growth rates are a problem and have taken steps to establish population related and child spacing programs. While the developing countries must assume the major responsibility for controlling their own rates of population growth by establishing programs which are consistent with their tribal, religious and political traditions, the United States and, indeed, other nations of the developed world, must also rise to the challenge by assisting those nations which have demonstrated a commitment to slowing their rate of population growth.

Population growth rates are an integral part of poverty and underdevelopment. Rapid population growth has virtually destroyed all the effectiveness of our programs to improve the quality of life in the developing countries like India and Egypt by spreading their already pathetically small stores of food even thinner and by placing a greater burden on already miserably inadequate health care and education facilities, by increasing unemployment and by contributing to the vast tide of rural-urban migration with all its attendant problems. If populations continue to expand at their current rates, we may expect increased political and civil instability and disorders in the future.

If the United States and our AID recipients are to get the maximum cost-benefit return from our foreign assistance dollars, we here in Congress must begin not only to examine seriously the symptoms of population growth but also to seek solutions. We must gather the facts necessary to produce a coherent and sustained national population policy.

Even in the United States there are still between 3 and 4 million women who do not have access to any family planning services at all, and a full third of our counties, mostly rural, do not have any such services. Last year, for the first time, over half of all births in Washington, D.C., were illegitimate.

We must develop a population policy which will assist the developing nations to bring their excessive population growth rates under control and which will enable us to deal effectively with the special population problems of our own country. This is what the Select Committee on Population would hope to accomplish.

INTRODUCTION OF LEGISLATION AMENDING HOUSE RULE XI, PERTAINING TO REPORTING REQUIREMENTS FOR TRAVEL ABROAD BY MEMBERS AND EMPLOYEES OF THE HOUSE OF REPRESENTATIVES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. FASCELL) is recognized for 5 minutes.

Mr. FASCELL. Mr. Speaker, I am offering for consideration by our colleagues, a resolution to amend House rule XI (2n)(2), which pertains to the reporting requirements for travel abroad by Members and employees of the House.

My amendment would reduce the time period within which reports must be filed from 60 days to 10 days following completion of travel. It would also require that these individual reports, showing dates, places and costs of travel, be published in the CONGRESSIONAL RECORD immediately following their receipt by the chairman of the committee.

One of the strongest criticisms which we, as Members of Congress, receive, both as individuals and as a body, is the difficulty the public has in determining the facts about money spent on congressional travel.

Let me state at the outset that I firmly believe that travel on authorized official business by Members of Congress is essential to the work of this institution and need not and should not be curtailed. However, I believe just as strongly that the public is entitled to a clear and prompt accounting of the cost of such travel by each individual Member and employee. Our system to date of reporting these costs needs improvement and I think that my resolution will help to bring this about.

It cannot be denied that there have been abuses of congressional travel in some instances. I believe the responsibility for eliminating abuses and for monitoring travel expenditures rests with each individual who travels. For this reason, the burden of filing prompt and ac-

curate expenditure reports should rest with the individual, as well as with the chairman of the authorizing committee and the House Administration Committee.

Under the old system, each Member and/or employee who traveled abroad was required to file a report showing the amount of foreign currencies expended for per diem and transportation costs. The report was also to show the places visited and the number of days spent in each place. These reports were filed with the chairman of the authorizing committee, although there was no time frame within which they had to be submitted. The chairman of the committee, in turn, was required to submit a consolidated report to the Clerk of the House within 60 days after the start of a new session of Congress showing the total travel expenditures for that committee during the preceding year. These consolidated reports were to be published in the CONGRESSIONAL RECORD within 10 days following their receipt by the Clerk.

The House has just adopted a rules change which wisely requires the individual reports to be submitted to the committee chairman within 60 days following completion of travel. This is an improvement over the old method; however, I do not believe it is enough. There is no reason why such reports cannot be filed within 10 days following the completion of a trip. For one thing, the information about and the reasons for the expenditures are still fresh in the mind of the individual. Second, the public should not have to wait 2 months to find out how much a trip cost.

My proposal for immediately publishing the report in the CONGRESSIONAL RECORD follows the same line of reasoning. It makes the information immediately available and eliminates the need for anyone to have to consume valuable committee time handling requests to see travel records. Last year, the House adopted my amendment to the Mutual Assistance Act restoring the requirement that the consolidated reports be published in the CONGRESSIONAL RECORD. Now we need to include individual reports under this procedure.

I hope our colleagues will agree that my new proposal is an improvement over the rule change we just adopted and will act to incorporate it into the rules accordingly.

There are other areas of foreign travel reform which must be examined and on which I also plan to make proposals in the near future. One of the most necessary reforms we should seek to undertake is to eliminate the practice known as double-dipping. This occurs when an agency such as the Department of Defense pays the entire costs of a Member's travel expenses, including transportation, hotel and meals, and the Member collects the $75 per diem allowance. The per diem is supposed to be used only for allowable expenses such as hotel, meals and related expenses such as tips, et cetera. Thus, if the Department of Defense is paying for all these costs, there should be no need for each Member to collect the $75 per diem. Nevertheless, some may do this—perhaps, without realizing the situation. This practice should be eliminated.

Another area where reform is needed is to require the executive branch to report to the chairman of the authorizing committee on the cost of support services for any congressional delegation traveling abroad. These costs would include provision of a control room, for example, or any other services that are supplied in addition to the per diem and transportation costs—the latter two items are included in the reports made by the individual to the chairman. These reports were required for the State Department until 1973. In that year, the requirement was eliminated by law. It is my understanding that the State Department, under a departmental directive, presently does provide such information, although of lesser detail than was previously required. I believe the earlier requirement should be restored by law and should be expanded to include any executive department or agency which sponsors congressional travel abroad. This information should also be published in the CONGRESSIONAL RECORD, along with that supplied by the Member and the committee.

Mr. Speaker, as I noted earlier, congressional travel abroad is essential to the performance of our duties. However, the abuses of the travel prerogative must be eliminated and we must streamline and clarify the system of reporting the cost of such travel so that it is easily and readily accessible to the American public. It does not seem to me that this should be a very difficult task and I believe the majority of our colleagues would agree that this must be done. I think it will be done by the 95th Congress.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. PRICE) is recognized for 5 minutes.

Mr. PRICE. Mr. Speaker, on behalf of my colleague, the Honorable MORGAN MURPHY, I wish to announce that he will be necessarily absent today because of a death in his family.

FULL FAITH AND CREDIT FOR CONFLICTING CHILD CUSTODY DECREES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. Moss) is recognized for 5 minutes.

Mr. MOSS. Mr. Speaker, Congressman DON EDWARDS and I along with 25 other Members of Congress are today introducing legislation which addresses the problem of conflicting child custody decrees and consequently, the problem of child snatching.

Because there are differences in State laws regarding jurisdiction, this legislation is designed to complement the Uniform Child Custody Jurisdiction Act which was drafted by the National Conference of Commissioners on Uniform State Laws in 1968, and has been adopted by 10 States so far.

Since the U.S. Supreme Court has never held that child custody decrees are entitled to full faith and credit, there is no governing policy regarding conflicting custody decrees. Consequently, a parent who is denied custody in one State may decide to snatch the children and retry the question of custody in another State.

Although no actual statistics on the incidence of child snatching exist, the problem is large. The CBS program "60 Minutes" estimates that 100,000 children a year are snatched by their own parents. These children—children caught in the conflict of laws—are subjected to wrenching changes in environment. Cases have been documented of serial thefts by parents as children are removed and returned to States having decrees favoring a particular parent.

The problem of child snatching and forum shopping will continue so long as States do not honor their sister States' judgments. Our legislation would require that the initial State's custody decree be granted full faith and credit by subsequent States which are called upon to decide the question of custody. In other words, the decision of the original court to issue a custody decree shall be binding on courts which are later asked to consider the question of custody unless the original court declines to exercise its jurisdiction.

For example, Mr. and Mrs. White get a divorce in Nevada. Mrs. White is awarded custody of the children and Mr. White visitation rights. Mr. White later moves to Ohio and the children go to visit him. At the end of the visit Mr. White refuses to return the children and files a petition for a change of custody in Ohio.

Under current law, Ohio is not obliged to honor the Navada custody decree and may proceed to litigate the question. Under our bill, Ohio would be required to defer to the Nevada decree and return the children to Nevada. If Mr. White wants to press for a change of custody, he would have to file a petition in Nevada, the State with continuing jurisdiction.

Once deference to the continuing jurisdiction of the prior court becomes generally accepted, the incidence of custody forum shopping should be considerably reduced. Any new court that is approached for a modification would send the petitioner back to the State of the initial decree.

PROTECTION OF SOCIAL SECURITY BENEFIT INCREASES

(Ms. HOLTZMAN asked and was given permission to extend her remarks at this point in the RECORD and to include extraneous matter.)

Ms. HOLTZMAN. Mr. Speaker, I have introduced a bill which will insure that social security recipients do not lose benefits from federally assisted pro-

grams, because of increases in social security payments.

Under present law, increases in social security benefits are counted as income for the purposes of participation in other Federal aid programs. Thus a person whose income increases, because of higher social security benefits may lose entitlement to such programs as medicaid, public housing, and food stamps. Others may receive reduced veterans' or supplemental security income benefits.

Because of this treatment, cost-of-living increases in social security benefits, which were intended to allow senior citizens to keep pace with today's rampaging inflation, will produce no additional income for many social security recipients, and will actually lower the income of some.

My bill would rectify this injustice by requiring both State and Federal agencies to disregard completely social security benefit increases for purposes of eligibility for and amount of benefits under federally assisted programs. It would guarantee that social security recipients actually get the benefit increases to which they are entitled and which Congress intended.

We have seen too many instances in which the Federal Government gives benefits with one hand and takes them away with the other. I believe that, when Congress provides increases in social security payments in order to help senior citizens cope with inflation, it does not intend to see those increases nullified or worse by reductions in other benefits. I urge my colleagues to support my bill so that America's elderly will not suffer further from this absurd inequity in the social security law.

The text of the bill follows:

H.R. —

A bill to amend the Social Security Act to make certain that recipients of supplemental security income benefits, recipients of aid to families with dependent children, and recipients of assistance or benefits under the veterans' pension and compensation programs and certain other Federal and federally assisted programs will not have the amount of such benefits, aid, or assistance reduced because of post-1974 increases in monthly social security benefits

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1612 of the Social Security Act (relating to supplemental security income benefits) is amended by adding at the end thereof the following new subsection:

"Special Rule for Social Security Benefit Increases

"(c) In determining the income of any individual (or his eligible spouse) who is entitled for any month to a monthly benefit under the insurance program established by title II of this Act, there shall be excluded any part of such benefit which results from (and would not be payable but for) a cost-of-living increase in benefits under such program occurring after 1974 pursuant to section 215(i) of this Act (regardless of any concurrent increase in the benefits payable under this title which may result from the operation of section 1617), or any other increase in benefits under such program, enacted after 1974, which constitutes a general benefit increase within the meaning of section 215(i)(3) of this Act.".

SEC. 2. Section 402 of the Social Security Act is amended by adding at the end thereof the following new subsection:

"(d) In addition to the requirements imposed by subsection (a) as a condition of approval of a State plan for aid and services to needy families with children, there is hereby imposed the requirement (and the plan shall be deemed to require) that, in the case of any individual found eligible (as a result of the requirement imposed by this subsection or otherwise) for aid to families with dependent children for any month who also receives in such month a monthly insurance benefit under title II of this Act which is increased (or is greater than it would otherwise be) by reason of a cost-of-living increase in benefits occurring after December 1974 pursuant to section 215(i) or any other increase in benefits, enacted after December 1974, which constitutes a general benefit increase within the meaning of section 215(i)(3), the sum of the aid to families with dependent children received by him for such month, plus the monthly insurance benefit received by him in such month, shall not be less than the sum of—

"(1) the aid to families with dependent children which would have been received by him for such month under the plan as in effect for December 1974, plus

"(2) the monthly insurance benefit which was or would have been received by him for December 1974, plus the amount by which such benefit (effective for months after December 1974) was or would have been increased by such cost-of-living increase or general benefit increase,

whether this requirement is satisfied by disregarding a portion of his monthly insurance benefit or otherwise.".

SEC. 3. (a) Subsection (g) of section 415 of title 38, United States Code, is amended by adding at the end thereof the following new paragraph:

"(4) In determining the annual income of any individual who is entitled to monthly benefits under the insurance program established under title II of the Social Security Act, the Administrator, before applying paragraph (1)(G) of this subsection, shall disregard any part of such benefits which results from (and would not be payable but for) a cost-of-living increase in benefits under such program occurring after 1974 pursuant to section 215(i) of the Social Security Act, or any other increase in benefits under such program, enacted after 1974, which constitutes a general benefit increase within the meaning of section 215(i)(3) of such Act.".

(b) Section 503 of title 38, United States Code, is amended by adding at the end thereof the following new subsection:

"(d) In determining the annual income of any individual who is entitled to monthly benefits under the insurance program established under title II of the Social Security Act, the Administrator, before applying subsection (a)(6) of this section, shall disregard any part of such benefits which results from (and would not be payable but for) a cost-of-living increase in benefits under such program occurring after 1974 pursuant to section 215(i) of the Social Security Act, or any other increase in benefits under such program, enacted after 1974, which constitutes a general benefit increase within the meaning of section 215(i)(3) of such Act.".

(c) In determining the annual income of any person for purposes of determining the continued eligibility of that person for, and the amount of, pension payable under the first sentence of section 9(b) of the Veterans' Pension Act of 1959, the Administrator of Veterans' Affairs shall disregard, if that person is entitled to monthly benefits under the insurance program established under title II of the Social Security Act, any part of such benefits which results from (and would not be payable but for) a cost-of-living increase in benefits under such program occurring after 1974 pursuant to section 215(i) of the Social Security Act, or any other increase in benefits under such program, enacted after 1974, which constitutes a general benefit increase within the meaning of section 215(i)(3) of such Act.

SEC. 4. Notwithstanding any other provision of law, in the case of any individual who is entitled for any month to a monthly benefit under the insurance program established by title II of the Social Security Act, any part of such benefit which results from (and would not be payable but for) a cost-of-living increase in benefits under such program occurring after 1974 pursuant to section 215(i) of the Social Security Act, or any other increase in benefits under such program, enacted after 1974, which constitutes a general benefit increase within the meaning of section 215(i)(3) of such Act, shall not be considered as income or resources or otherwise taken into account for purposes of determining the eligibility of such individual or his or her family or the household in which he or she lives—

(1) for participation in the food stamp program under the Food Stamp Act of 1964, or for surplus agricultural commodities under any Federal program providing for the donation or distribution of such commodities to low-income persons,

(2) for admission to, occupancy of, or fixing or adjusting rent for low-income housing under the United States Housing Act of 1937, or

(3) for any other aid or assistance in any form under a Federal program, or a State or local program financed in whole or in part with Federal funds (including the Federal-State programs of aid and assistance under titles I, X, XIV, and XVI of the Social Security Act where such programs are effective), which conditions such eligibility to any extent upon the income or resources of such individual, family, or household,

or for purposes of determining the amount or extent of such participation or such aid, assistance, or benefits.

SEC. 5. The amendments made by the first section of this Act shall apply with respect to benefits for months after the month in which this Act is enacted. The amendments made by section 2 of this Act shall be effective with respect to calendar quarters beginning on or after the date of the enactment of this Act. The amendments made by section 3 of this Act shall apply with respect to annual income determinations made pursuant to sections 415(g) and 503 (as in effect both on and after June 30, 1960) of title 38, United States Code, for calendar years after 1974. Section 4 of this Act shall be effective with respect to benefits, aid, or assistance furnished after the month in which this Act is enacted.

ELIMINATING SOCIAL SECURITY EARNINGS LIMITATION

(Ms. HOLTZMAN asked and was given permission to extend her remarks at this point in the RECORD and to include extraneous matter.)

Ms. HOLTZMAN. Mr. Speaker, the present social security laws penalize those senior citizens who must work to supplement their income. If they earn over $2,520 a year in wages, their social security benefits are reduced.

The time has come to do away with this harsh provision which denies to many senior citizens not only the benefits they may have worked 40 years to earn, but the difinity of working for a living. I am therefore, introducing today legislation which will eliminate any lim-

itation on retirement income. My bill will allow senior citizens to work without receiving reduced social security benefits.

For many of our elderly, the income they earn to supplement their meager social security benefits means the difference between bare subsistence and a decent standard of living. In a time of crippling inflation it is criminal that our social security laws penalize those persons who most need additional income.

In addition, many people approach age 62 or 65 in vigorous health, willing and able to continue working. It seems pointless for the social security laws, through the earnings limitation, to discourage these experienced people from continuing to be active and productive.

Finally, the earnings limitation is discriminatory. While wage earners are penalized, persons with unearned incomes are not. There can be no rational justification for taking away all social security benefits from someone who makes a salary, for example, of $8,500 a year, while allowing another, who may receive $50,000 a year in stock dividends, to get full benefits.

Many of my elderly constituents have told me of their despair and fear in the face of rapidly rising prices, and their anger at a Government which seems not to care. Passage of my bill to remove the social security earnings limitation will help to correct this intolerable situation by insuring at least that working senior citizens will not be denied a decent standard of living by their Government.

The text of the bill follows:

H.R. —

A bill to amend title II of the Social Security Act so as to remove the limitation upon the amount of outside income which an individual may earn while receiving benefits thereunder.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsections (b), (d), (f), (h), (j), and (k) of section 203 of the Social Security Act are repealed.

SEC. 2. (a) Subsection (c) of section 203 of the Social Security Act is redesignated as subsection (b); and such subsection as so redesignated is amended—

(1) by striking out "Noncovered Work Outside the United States or" in the heading;

(2) by striking out paragraph (1);

(3) by redesignating paragraphs (2), (3), and (4) as paragraphs (1), (2), and (3), respectively;

(4) by striking out "For purposes of paragraphs (2), (3), and (4)" and inserting in lieu thereof "For purposes of paragraphs (1), (2), and (3)"; and

(5) by striking out the last sentence.

(b) Subsection (e) of such section 203 is redesignated as subsection (c); and such subsection as so redesignated is amended by striking out "subsections (c) and (d)" and inserting in lieu thereof "subsection (b)".

(c) Subsection (g) of such section 203 is redesignated as subsection (d); and such subsection as so redesignated is amended by striking out "subsection (c)" each place it appears and inserting in lieu thereof "subsection (b)".

(d) Subsection (i) of such section 203 is redesignated as subsection (e); and such subsection as so redesignated is amended by striking out "subsection (b), (c), (g), or (h)" and inserting in lieu therof "subsection (b) or (d)".

(e) Subsection (l) of such section 203 is redesignated as subsection (f); and such subsection as so redesignated is amended by striking out "subsection (g) or (h)(1)(A)" and inserting in lieu thereof "subsection (d)".

SEC. 3. (a) Section 202(n)(1) of the Social Security Act is amended by striking out "Section 203(b), (c), and (d)" and inserting in lieu thereof "Section 203(b)".

(b)(1) Section 202(q)(5)(B) of such Act is amended by striking out "section 203(c)(2)" and inserting in lieu thereof "section 203(b)(1)".

(2) Section 202(q)(7)(A) of such Act is amended by striking out "deductions under section 203(b), 203(c)(1), 203(d)(1), or 222(b)" and inserting in lieu thereof "deductions on account of work under section 203 or deductions under section 222(b)".

(c)(1) Section 202(s)(1) of such Act is amended by striking out "paragraphs (2), (3), and (4) of section 203(c)" and inserting in lieu thereof "paragraphs (1), (2), and (3) of section 203(b)".

(2) Section 202(s)(3) of such Act is amended by striking out "the last sentence of subsection (c) of section 203, subsection (f)(1)(C) of section 203,".

(d) Section 202(f)(7) of such Act is amended by striking out "Subsections (b), (c), and (d)" and inserting in lieu thereof "Subsection (b)".

(e) Section 202(w)(2)(B) of such Act is amended by striking out "or 203(c)".

(f) Section 203(a)(2)(C) of such Act is amended by striking out "and subsections (b), (c), and (d)" and inserting in lieu thereof "and subsection (b)".

(g) Section 208(a)(3) of such Act is amended by striking out "under section 203(f) of this title for purposes of deductions from benefits" and inserting in lieu thereof "under section 203 for purposes of deductions from benefits on account of work".

(h) Section 215(g) of such Act is amended by striking out "and deductions under section 203(b)".

(i) Section 1612(a) of such Act is amended—

(1) by striking out "as determined under section 203(f)(5)(C)" in paragraph (1)(A) and inserting in lieu thereof "as defined in the last sentence of this subsection:" and

(2) by adding at the end thereof the following new sentence:

"For purposes of paragraph (1)(A), the term 'wages' means wages as defined in section 209, but computed without regard to the limitations as to amounts of remuneration specified in subsections (a), (g)(2), (g)(3), (h)(2), and (j) of such section; and in making such computation services which do not constitute employment as defined in section 210, performed within the United States by an individual as an employee or performed outside the United States in the active military or naval service of the United States, shall be deemed to be employment as so defined if the remuneration for such services is not includible in computing the individual's net earnings or net loss from self-employment for purposes of title II.".

(j) Section 2 of the Railroad Retirement Act of 1974 is amended by striking out subsections (f) and (g)(2).

(k) Section 3(i) of Public Law 93-233 is amended by striking out "section 203(f)(8),", and inserting a comma after "230(a)".

SEC. 4. The amendments and repeals made by this Act shall be effective with respect to taxable years ending after the date of the enactment of this Act.

LEGISLATION TO DEPORT NAZI WAR CRIMINALS

(Ms. HOLTZMAN asked and was given permission to extend her remarks at this point in the RECORD and to include extraneous matter.)

Ms. HOLTZMAN. Mr. Speaker, I have introduced, today, legislation to authorize the deportation of aliens who engaged in war crimes under the Nazis.

Although the immigration laws exclude from the United States everyone from polygamists to marihuana users, from prostitutes to anarchists, there is no bar against the entry of Nazi war criminals. Deportation actions now underway against alleged Nazis living in this country are based on the concealment of war crime activities in response to questions by immigration officials. The only persons asked about war crimes, however, were those who entered the United States under the Displaced Persons Act. Nazi war criminals who did not enter under the Displaced Person Act—for the most part those who came after 1952—were not questioned about their activities, did not have to answer falsely, and thus, are not subject to deportation.

As a result of this situation, at least two persons against whom INS has received substantial evidence of war crimes allegedly committed under the Nazis cannot be deported.

In addition, of course, Nazi war criminals can enter this country freely today.

My bill would correct this failing in our immigration laws by giving the Immigration Service direct legislative authority to act against Nazi war criminals. INS officials have told me that this provision will aid them in their present investigation of alleged Nazis, and will allow them to proceed against those who would otherwise be protected.

I have been working for nearly 3 years to assure that the Immigration Service does its job in removing Nazi war criminals from this country. I believe it is essential that we in Congress give INS the legislative help it needs in this effort. My bill will do that.

The text of my bill follows:

H.R. —

A bill to amend the Immigration and Nationality Act to exclude from admission into and to deport from the United States all aliens who persecuted others on the basis of religion, race, or national origin under the direction of the Nazi government of Germany

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 212(a) of the Immigration and Nationality Act (8 U.S.C. 1182(a)), relating to general classes of aliens ineligible to receive visas and excluded from admission, is amended—

(1) by striking out the period at the end of paragraph (31) and inserting in lieu thereof a semicolon; and

(2) by adding immediately after paragraph (31) the following new paragraph:

"(32) Any alien, who during the period beginning on March 23, 1933, and ending on May 8, 1945, under the direction of or in association with—

"(A) the Nazi government of Germany,

"(B) any government in any area occupied by the military forces of the Nazi government of Germany,

"(C) any government established with the assistance or cooperation of the Nazi government of Germany, or

"(D) any government which was an ally of the Nazi government of Germany,

engaged or assisted in, or incited or ordered any other person to engage or assist in, the persecution of any person on account of such person's religion, race, or national origin.".

SEC. 2. Section 241(a) of the Immigration and Nationality Act (8 U.S.C. 1251(a)), relating to general classes of deportable aliens is amended—

(1) by striking out "or" at the end of paragraph (17);

(2) by striking out the period at the end of paragraph (18) and inserting in lieu thereof "; or"; and

(3) by adding immediately after paragraph (18) the following new paragraph:

"(19) during the period beginning on March 23, 1933, and ending on May 8, 1945, under the direction of or in association with—

"(A) the Nazi government of Germany.

"(B) any government in any area occupied by the military forces of the Nazi government of Germany.

"(C) any government established with the assistance or cooperation of the Nazi government of Germany, or

"(D) any government which was an ally of the Nazi government of Germany,

engaged or assisted in, or incited or ordered any other person to engage or assist in, the persecution of any person on account of such person's religion, race, or national origin.".

LEGISLATION TO PROMOTE FAIRER AND MORE EFFECTIVE PROSECUTIONS IN FEDERAL RAPE CASES

(Ms. HOLTZMAN asked and was given permission to extend her remarks at this point in the RECORD and to include extraneous matter.)

Ms. HOLTZMAN. Mr. Speaker, today I am introducing a bill to make prosecutions of Federal rape cases fairer and more effective. My bill amends the Federal Rules of Evidence to protect rape victims from unwarranted invasions of their privacy at trial and thereby to encourage them to report and testify about the crime committed against them.

At the present time, a woman who has been raped is often reluctant to report the rape or testify at trial, because if she takes the stand she may be subjected to a painful and humiliating cross-examination into the intimate details of her private life. In Federal court and in most States, the trial judge decides on a case-by-case basis whether the victim can be examined about her sexual past. A woman who has been raped must therefore take the risk that the trial will turn into a degrading public inquisition into her sexual experience.

It is well recognized that this potential intrusion into the victim's privacy makes women reluctant to cooperate with police and prosecutors and acts as a deterrent to effective law enforcement in rape cases. Available statistics indicate that the majority of rapes committed are never reported. For example, the New York City Police Department's sex crimes analysis unit has estimated that only 1 out of 10 rapes in New York City are reported. Information received by the Task Force on Rape of the National Organization for Women indicates no more than a 50-percent report rate.

The trend in recent court decisions has been to limit and prevent cross-examination about a victim's prior sexual experiences, because it is irrelevant to the issue of whether the defendant committed rape. Last year, a District of Columbia Superior Court ruled in a rape case that questions could not be asked about the victim's relations with other men. Several States have recently enacted legislation limiting cross-examination about the victim's prior sexual history.

These court decisions and legislative revisions recognize that questions about a rape victim's prior sexual experience are unduly prejudicial since they suggest to the jury that the issue is the victim's morality rather than the defendant's guilt.

My bill prohibits cross-examination of the rape victim about her sexual history except in two limited circumstances. The first is with respect to prior sexual relations with the defendant. The second is the case where a defendant claims he did not have sexual relations with the victim and wishes to introduce evidence to show a third party was responsible for the act.

Evidence claimed to fall under these two narrowly drawn exceptions is not automatically admissable. If the defendant proposes to offer evidence falling within the exceptions, he must first make a written offer of proof. If the judge decides after a hearing that the evidence is admissible, he must make a written order specifically identifying the evidence to be admitted and describing exactly the areas of cross-examination to be permitted. This procedure should assure the victim maximum notice that such questioning may occur and afford the victim the most effective opportunity to protect her privacy.

The text of my bill follows:

H.R. —

To amend the Federal Rules of Evidence to protect the privacy of rape victims, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Privacy Protection for Rape Victims Act of 1977".

SEC. 2. (a) Article IV of the Federal Rules of Evidence is amended by adding at the end thereof the following new rule:

"RULE 412. RAPE CASES; RELEVANCE OF VICTIM'S PAST BEHAVIOR

"(a) Notwithstanding any other provision of law, reputation or opinion evidence of a person's past sexual behavior is not admissible in any trial if an issue in such trial is whether such person was raped or assaulted with intent to commit rape.

"(b) Notwithstanding any other provision of law, evidence of specific instances of a person's past sexual behavior is not admissible in any trial if an issue in such trial is whether such person was raped or assaulted with intent to commit rape, except that otherwise admissible evidence of specific instances of such conduct is admissible in such trial—

"(1) if such evidence—

"(A) is evidence of sexual behavior with persons other than the accused, offered by the accused upon the issue of whether the accused was or was not, with respect to the alleged victim, the source of pregnancy, disease, semen, or injury; or

"(B) is of past sexual behavior with the accused and is offered by the accused upon the issue of whether the alleged victim consented to the sexual behavior with respect to which rape or assault is alleged; and

"(2) if the requirements contained in subsection (c) are satisfied.

"(c)(1) If the person accused of committing rape or assault with intent to commit rape intends to offer under subsection (b) evidence of specific instances of the alleged victim's past sexual behavior, the accused shall make a written motion to offer such evidence not later than fifteen days before the date on which the trial in which such evidence is to be offered is scheduled to begin, except that the court may allow the motion to be made at a later date, including during trial, if the court determines that the evidence is newly discovered and could not have obtained earlier through the exercise of due diligence. Any motion made under this paragraph shall be served on all other parties and on the alleged victim if not a party.

"(2) The motion described in paragraph (1) shall be accompanied by a written offer of proof. If the court determines that the offer of proof contains evidence described in subsection (b)(1), the court shall order a hearing in chambers to determine if such evidence is admissible. At such hearing the parties may call witnesses, including the alleged victim, and offer relevant evidence. Notwithstanding subsection (b) of rule 104, if the relevancy of the evidence which the accused seeks to offer in the trial depends upon the fulfillment of a condition of fact, the court, at the hearing in chambers or at a subsequent hearing in chambers scheduled for such purpose, shall accept evidence on the issue of whether such condition of fact is fulfilled and shall determine such issue.

"(3) If the court determines on the basis of the hearing described in paragraph (2) that the evidence which the accused seeks to offer is relevant and that the probative value of such evidence substantially outweighs the danger of unfair prejudice, such evidence shall be admissible in the trial to the extent an order made by the court specifies evidence which may be offered and areas with respect to which the alleged victim may be examined or cross-examined.

"(d) For purposes of this rule, the term 'past sexual behavior' means sexual behavior other than the sexual behavior with respect to which rape or assault with intent to commit rape is alleged.".

(b) The table of contents for the Federal Rules of Evidence is amended by inserting immediately alter the item relating to rule 411 the following new item:

"Rule 412. Rape cases; relevance of victim's past behavior.".

SEC. 3. The amendments made by this Act shall apply to trials which begin more than thirty days after the date of enactment of this Act.

ENDING DISCRIMINATION AGAINST WORKING WIDOWS UNDER THE SOCIAL SECURITY LAWS

(Ms. HOLTZMAN asked and was given permission to extend her remarks at this point in the RECORD and to include extraneous matter.)

Ms. HOLTZMAN. Mr. Speaker, I am introducing today an amendment to the social security laws to remedy present discrimination against widows who have worked.

At present a widow who has worked is faced with a difficult problem: she may receive either her own old-age benefit or a widow's benefit based on her husband's earnings—but not both. Since the widow's benefit is usually the larger, she will ordinarily receive that benefit and thereby lose her own contributions to the social security trust fund. As a result, most working widows collect exactly the

same benefit as widows who have never worked.

The unfairness inherent in the law is clear. Not only does the working widow collect no more than the widow who did not work, but she also loses everything she has contributed to the trust fund over the years. I think this law is an unfair restriction on the working spouse's right to receive social security benefits he or she has paid for through the payroll tax.

Under my bill, the working woman would be entitled to collect both her own old-age benefit and her widow's benefit when her husband dies. The bill would equally apply to men, allowing those eligible to collect a widower's benefit also to collect an old-age benefit.

My bill would reward those who have been a productive part of the economy and supply additional income at a time when it is most urgently needed. It would provide security for many widows since they would know that the death of their spouse would not signal a sharp reduction in social security benefits.

In recent years we have witnessed a number of significant changes in the social security laws designed to end discriminatory treatment of women. The need for continued improvement is underscored by the shocking fact that 6 out of 10 elderly women who live alone have incomes below the poverty line. My bill would be an important step toward providing a decent standard of living for widows and eliminating inequities by recognizing that the working woman should collect benefits she has earned in her own right as well as those the law provides her as a surviving spouse.

The text follows:

H.R. —

A bill to amend title II of the Social Security Act to provide that an individual may simultaneously receive (without any reduction or offset) both an old-age or disability insurance benefit and a widow's or widower's insurance benefit

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 202(k)(3)(A) of the Social Security Act is amended by inserting "(except a widow's or widower's insurance benefit)" after "any other monthly insurance benefit".

SEC. 2. (a) Section 202(e)(1) of the Social Security Act is amended—

(1) by adding "and" after the comma at the end of subparagraph (B),

(2) by striking out "and" at the end of subparagraph (C),

(3) by striking out subparagraph (D),

(4) by striking out ", dies, becomes entitled to an old-age insurance benefit equal to or exceeding the primary insurance amount of of such deceased individual," in the matter following subparagraph (F) and inserting in lieu thereof "or dies,", and

(5) by redesignating subparagraphs (E) and (F) as subparagraphs (D) and (E), respectively.

(b) Section 202(f)(1) of such Act is amended—

(1) by adding "and" after the comma at the end of subparagraph (C),

(2) by striking out subparagraph (E),

(3) by striking out ", dies, or becomes entitled to an old-age insurance benefit equal to or exceeding the primary insurance amount of his deceased wife," in the matter following subparagraph (G) and inserting in lieu thereof "or dies,", and and (G) as subparagraphs (E) and (F), respectively.

(c)(1) Section 202(e)(6) of such Act is amended by striking out "(1)(F)" and inserting in lieu thereof "(1)(E)".

(2) Section 202(f)(7) of such Act is amended by striking out "(1)(G)" and inserting in lieu thereof "(1)(F)".

(d) Section 226(h)(1)(B) of such Act is amended by striking out "subparagraph (F)" and "subparagraph (G)" and inserting in lieu thereof "subparagraph (E)" and "subparagraph (F)", respectively.

SEC. 3. Section 202(k)(3)(A) of the Social Security Act (as amended by the first section of this Act) is amended—

(1) by inserting "(i)" after "(A)"; and

(2) by adding at the end thereof the following new clause:

"(ii) If any individual entitled both to an old-age or disability insurance benefit and a widow's or widower's insurance benefit for any month is also entitled for such month to one or more other benefits under the preceding provisions of this section, his or her widow's or widower's insurance benefit (or the largest such benefit) shall be considered the largest benefit to which he or she is entitled under subsections (b) through (h) of this section for purposes of subparagraph (B) of paragraph (2) or subparagraph (B) of this paragraph, and he or she shall not be entitled to any benefit under subsections (b) through (h) other than such widow's or widower's insurance benefit (or the largest such benefit), unless (as determined under regulations prescribed by the Secretary) the total amount of the benefit or benefits which such individual actually receives for such month under this title would be greater without the application of this clause, in which case this clause shall be disregarded and all of the other provisions of this subsection shall apply."

SEC. 4. The amendments made by this Act shall apply only with respect to monthly insurance benefits payable under title II of the Social Security Act for months after the month in which this Act is enacted, and, in the case of individuals who are not entitled to benefits under such title for the month in which this Act is enacted, only on the basis of applications filed on or after the date of the enactment of this Act.

FEDERAL GRAND JURY PRACTICE

(Ms. HOLTZMAN asked and was given permission to extend her remarks at this point in the RECORD and to include extraneous matter.)

Ms. HOLTZMAN. Mr. Speaker, today I am introducing legislation to reform several serious problems related to Federal grand jury practice.

At present, there are no specific limits on the length of time a person can be imprisoned for refusing to answer questions posed by the grand jury. If held in civil contempt, a witness may be imprisoned for the life of a grand jury—up to 18 months. But, when the grand jury's term expires, nothing prevents the witness from being resubpenaed before a new grand jury, questioned again, and subjected to another 18-month period of imprisonment.

Significantly, a judge acting alone cannot imprison a witness for criminal contempt for more than 6 months. My bill brings civil contempt in line with criminal contempt and limits imprisonment to 6 months. It also prohibits reimprisoning a witness for refusing to answer questions about a matter for which he has already been held in civil contempt and imprisoned.

A second major problem is that courts are provided no standards upon which to decide the place of imprisonment for contempt of a Federal grand jury. Because a person can be subpenaed to appear before a Federal grand jury anywhere in the U.S., he can be imprisoned for civil contempt far from his family, home, or attorney. This has caused some extraordinarily harsh results in the past. For example, in the case of the Fort Worth Five, five New York residents were summoned to testify before a Federal grand jury in Fort Worth, Tex. These men were held in contempt and imprisoned in Texas for almost a year and a half. Since the families of all five men and their principal attorney were in New York, imprisonment in Texas posed a serious problem. My bill permits a witness held in civil contempt to apply for a transfer of his place of imprisonment on a showing of hardship.

Furthermore, a person held in civil contempt is sometimes incarcerated in State prisons or county jails. These jails are often substandard. My bill requires that, unless a witness consents, imprisonment must be in a Federally facility.

Although many other major reforms have been suggested with respect to Federal grand jury proceedings, I suggest we begin by correcting the problems I have outlined above.

The text of my bill follows:

H.R. —

A bill to amend titles 18 and 28 of the United States Code to provide that an individual appearing before certain grand juries can be imprisoned for no more than 6 months and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Civil Contempt Reform Act of 1977".

SEC. 2. Section 1826 of title 28, United States Code, is amended to read as follows:

"§ 1826. Recalcitrant witnesses.

"(a)(1) Whenever a witness in any proceeding before or ancillary to any court or grand jury of the United States refuses without just cause shown to comply with an order of the court to testify or provide other information, including any book, paper, document, record, recording or other material, the court, upon such refusal and after a hearing at which the witness may be represented by counsel may, if the court finds that such refusal was without just cause, hold the witness in contempt and order the witness to be imprisoned.

"(2) Any imprisonment for refusal to give testimony or provide information pursuant to this subsection shall be at Federal correctional institution unless the witness agrees to confinement at a non-Federal institution designated by the Attorney General.

"(3) Upon a showing of need or hardship, the court ordering such imprisonment may grant a request by the witness to be imprisoned at a suitable correctional institution near the place of residence or employment of the witness or the witness' family or relatives or the attorney of the witness.

"(4) Any imprisonment for refusal to give testimony or provide information pursuant to this subsection shall continue until such time as the witness is willing to give such testimony or provide such information except that no period of such imprisonment shall exceed the lesser of—

"(A) (i) in the case of a court proceeding, the life of the court proceeding before which such refusal to comply with the court order occurred, or

"(ii) in the case of a grand jury, the term of the grand jury, including extensions, before which such refusal to comply with the court order occurred; or

"(B) six months.

"(5) No hearing shall be held under this subsection unless ten days notice is given to the witness who has refused to comply with the court order under this subsection, except that a witness subpenaed for a trial may be given a shorter notice of not less than five days if the court, upon a showing of special need, so orders.

"(b) No person imprisoned under this section for refusal to testify or provide other information concerning any transaction, set of transactions, event, or events may be again imprisoned under this section or under section 401 of title 18, United States Code, for a subsequent refusal to testify or provide other information concerning the same transaction, set of transactions, event, or events.

"(c) Any person confined pursuant to subsection (a) of this section shall be admitted to bail or released in accordance with the provisions of chapter 207 of title 18, United States Code, pending the determination of an appeal taken by such person from the order of imprisonment, unless the appeal is patently frivolous. If the person has not been released on bail or otherwise released, any appeal from an order of imprisonment under this section shall be disposed of as soon as practicable, pursuant to an expedited schedule, and in no event more than thirty days from the filing of such appeal. If the appellate court shall fail to dispose of the appeal or a person who remains confined within 30 days, the person shall automatically be released on his or her personal recognizance pending disposition of the appeal.

"(d) In any proceeding conducted under this section, counsel may be appointed in the same manner as provided in section 3006A of title 18, United States Code, for any person financially unable to obtain adequate assistance.

"(e) A refusal to answer a question or provide other information before a grand jury of the United States shall not be punishable under this section or under section 401 of title 18, United States Code, if the question asked or the request for other information is based in whole or in part upon evidence obtained by an unlawful act or in violation of the witness' Constitutional rights or of rights established or protected by any statute of the United States.".

SEC. 3. (a) Chapter 21 of title 18, United States Code, is amended by adding at the end thereof the following new section:

"§ 403. Refusal of a witness to testify in a grand jury proceeding:

"No person who has been imprisoned or fined by a court of the United States under section 401 of this title for refusal to testify or provide other information concerning any transaction, set of transactions, event, or events in a proceeding before a grand jury (including a special grand jury summoned under section 3331 of this title) impaneled before any district court of the United States may again be imprisoned or fined under section 401 of this title or under section 1826 of title 28, United States Code, for a subsequent refusal to testify or provide other information concerning the same transaction, set of transactions, event, or events.".

(b) The table of sections for chapter 21 of title 18, United States Code, is amended by adding at the end thereof the following new item:

"403. Refusal of a witness to testify in a grand jury proceeding.".

LEGISLATION RESTORING CITIZENSHIP TO PERSONS WHO RENOUNCED NATIONALITY

(Ms. HOLTZMAN asked and was given permission to extend her remarks at this point in the RECORD and to include extraneous matter.)

Ms. HOLTZMAN. Mr. Speaker, I have introduced a bill to permit Americans who renounced their citizenship because of their opposition to the Vietnam war to regain their citizenship.

President-elect Carter has announced that, upon taking office, he will pardon Vietnam era draft resisters. Such a pardon would enable thousands of Americans who left the country in order to escape the draft to return home without fear of prosecution.

Nearly 5,000 Americans who fled during the period of Vietnam, however, will not be able to come home despite the proposed pardon. These are people who gave up their citizenship after leaving the United States.

Under current law, none of these persons may return to this country; none can regain American citizenship; and the proposed pardon will not remedy their plight.

Most Americans now recognize that our involvement in Vietnam was a tragic and costly mistake. This country should not compound and perpetuate this mistake by continuing to penalize those Americans who, in a painful act of conscience, left the United States and renounced their citizenship because of the war.

The text of my bill follows:

H.R. —

A bill to restore citizenship to persons who renounced or otherwise lost American nationality because of opposition to American military action in Indochina, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) any person formerly a citizen of the United States who lost his nationality through any action taken by such person solely or partially because of disapproval of or opposition to the involvement of the United States in military action in Indochina shall, upon petition, to any district court of the United States by such person or a legal representative, in accordance with subsection (b), be fully and unconditionally restored to United States citizenship.

(b) Any petition submitted pursuant to subsection (a) shall include a statement sworn to or affirmed by the petitioner stating that the loss of nationality of such petitioner resulted from action taken by such petitioner solely or partially because of disapproval of or opposition to the involvement of the United States in military action in Indochina. Such oath or affirmation shall be conclusive evidence of such fact in case of any person who—

(1) is male and reached the age of eighteen years during the period beginning May 13, 1961, and ending April 29, 1975, or

(2) took such action during such period.

SEC. 2. The Commissioner of Immigration and Naturalization shall, upon the receipt of a sworn written statement from any former citizen of the United States stating that such person lost his nationality through action taken solely or partially because of disapproval of or opposition to the involvement of the United States in military action in Indochina, exempt such person from the provisions of section 212(a)(22) of the Immigration and Nationality Act.

TOWARD IMPROVEMENT OF MASS TRANSIT

(Ms. HOLTZMAN asked and was given permission to extend her remarks at this point in the RECORD and to include extraneous matter.)

Ms. HOLTZMAN. Mr. Speaker, today I am introducing a bill to require public hearings before a mass transit system receiving Federal funds can raise fares or make substantial route changes.

Mass transit fare increases can have serious adverse consequences for riders who depend on public transportation. Higher transit fares cut into the pocketbooks of working people and can even prevent the unemployed from seeking jobs. For many people, a fare increase will mean a reduction in their standard of living.

Major route changes for transit buses or subways are also of serious concern to the public. Transportation routes determine whether people can conveniently get to work, school, shopping. Routes affect a city's growth and development.

Although public hearings are now required before a Federal mass transit project is funded, once Federal money is received, fares can be raised and routes changed or discontinued with no public input whatsoever. Decisions that raise fares or change routes are too important, however, to be left to bureaucratic fiat.

The public should be guaranteed a voice in decisions on mass transit fares and routes decisions that vitally affect their lives. Decisions that have passed the test of public hearings are bound to be better than those arrived at behind closed doors.

In many municipalities, however, there is no legal requirement that public hearings be held on fare increases or route changes. There were no hearings on New York City's last fare increase. Now another fare increase is rumored. The public's right to be heard on any such increases should be assured.

The Congress has required public hearings before there can be any change in interstate highway routes. At present, there must be public hearings on airline and railroad fare increases and on rates for all kinds of interstate shipping. Certainly the fares and routes of buses and subways used daily by millions of people are equally important.

My bill would mandate that transit authorities or other appropriate public bodies hold public hearings on the economic, environmental, social and energy conservation consequences of raising fares or changing routes. If no hearings are held, Federal payments could be suspended and no new applications approved for urban mass transit.

I urge support for this bill. The text follows:

H.R. —

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Urban Mass Transportation Act of 1964 (49

U.S.C. 1601 et seq.) is amended by adding at the end thereof the following new section:

"ESTABLISHMENT OR CHANGE OF FARES OR SERVICES

"SEC. 17. (a) The Secretary shall not approve any grant or loan under this Act unless the applicant agrees and gives satisfactory assurances, in such manner and form as may be required by the Secretary, that prior to the establishment or change (1) in any fare, or (2) in any service which the Secretary has, by rule, determined may substantially affect any community or segment thereof, the applicant—

"(A) will afford an adequate opportunity for public hearings on such establishment or change in such fare or such service and will hold such hearings pursuant to adequate prior notice;

"(B) will give proper consideration to views and comments expressed in such hearings and will consider the effect on energy conservation and the economic, environmental, and social impact of the establishment or change in such fare or such service; and

"(C) will have determined that the establishment or change in such fare or such service is consistent with official plans, or plans of local planning agencies, for the comprehensive development of the urban area affected by such fare or such service.

Notice of any hearing held pursuant to this section shall include a concise statement of the establishment or change in the fare or service and shall be published in a newspaper of general circulation in the geographic area affected by such fare or such service and on every vehicle which is owned by the applicant and is used for mass transportation in such area. A transcript shall be made of any such hearing and shall, upon request of the Secretary, be submitted to the Secretary.

"(b) If the Secretary determines, after giving an applicant proper notice and an opportunity for a hearing, that such applicant has established or changed any fare or any such service without first complying with the procedural requirements set forth in subsection (a) with respect to which the applicant has entered into an agreement with the Secretary, the Secretary shall—

"(1) suspend any further payment due under any grant or loan agreement for which such requirements were necessary for approval of such grant or loan agreement; and

"(2) not approve any other application for any grant or loan under this Act submitted by such applicant,

until the Secretary determines that such applicant has established or changed such fare or such service pursuant to such procedural requirements.".

SEC. 2. The amendment made by the first section of this Act shall apply with respect to all grant or loan agreements made under the Urban Mass Transportation Act (49 U.S.C. 1601 et seq.) after the date of enactment of this Act.

IMMIGRATION LAW CHANGE

Ms. HOLTZMAN asked and was given permission to extend her remarks at this point in the RECORD and to include extraneous matter.)

Ms. HOLTZMAN. Mr. Speaker, today I am introducing a bill to change a provision of the immigration law that discriminates against fathers. Under section 101(b)(1) of the Immigration and Nationality Act, an illegitimate child can be brought into the United States by its mother, or even by an unrelated stepmother. The child cannot, however, be brought in by its natural father. Even when its mother has died or abandoned it, the illegitimate child cannot be brought into the United States by its U.S. citizen father.

Similarly, an illegitimate child who is a U.S. citizen may bring his mother or stepmother to the United States, but not his father.

This is blatant sex discrimination against fathers. The immigration law says in effect that the father of an illegitimate child is not a "parent" and that an illegitimate child is not a "child". But saying so does not make it so. Fathers can have a deep and abiding relationship with their children regardless of whether they were married to the mothers of these children. To pretend otherwise is cruel and inhumane. It is outrageously discriminatory to deny a father, solely on the basis of his sex, rights that a mother has.

The law is not designed to protect against false paternity claims since the natural father is not permitted to offer proof of paternity. It is not designed to prevent "kidnaping" of illegitimate children by parents without legal custody since their mothers or stepmothers are not required to prove an award of custody and the father is not even permitted to do so. The law is not designed to keep children out of the hands of unfit parents since the mother or stepmother need make no proof of fitness. The law reflects, rather, a destructive and irrational stereotyping by sex: Rights are given to a mother or stepmother but denied to a father without any justification.

This discriminatory law is also unconstitutional. Only 3 years ago the U.S. Supreme Court decided a very similar case in Stanley against Illinois. Under Illinois law the father of an illegitimate child was denied custody of his child even though the child's mother was dead. The Illinois statute preferred to place the illegitimate child in an orphanage rather than permit the natural father to have custody. The Supreme Court found such discriminatory treatment unconstitutional and held that the father of an illegitimate child must be considered a parent under the law.

This year the Supreme Court talked about the role that fathers as well as mothers play:

It is no less important for a child to be cared for by its . . . parent when that parent is male rather than female. And a father, no less than a mother, has a constitutionally protected right to the "companionship, care, custody and management of the children he has sired and raised. . . .

Section 101(b)(1) of the immigration law works a continuous hardship on illegitimate children and their fathers who wish to be together.

I would urge prompt passage of my bill so that we can accord fathers and their natural children the due process and equal protection of the law guaranteed to them by our Constitution.

The text of the bill follows:

H.R. —

A bill to amend section 101(b) of the Immigration and Nationality Act

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 101(b)(1) is amended—

(1) by striking out clause (C);

(2) by redesignating clauses (D), (E), and (F) as (C), (D), and (E), respectively; and

(3) by striking out the semicolon at the end of the clause redesignated as (C) by paragraph (2) of this section and by inserting in lieu thereof "or natural father; or".

SOCIAL SECURITY AND THE COST OF LIVING

(Mr. ROSENTHAL asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. ROSENTHAL. Mr. Speaker, it has been 5 years since the White House Conference on Aging called for the enactment of a minimum floor of income for the elderly in accordance with the intermediate level budget established by the Bureau of Labor Statistics. With 13 percent of today's older Americans living in poverty, the Conference's recommendations are more valid than ever. Rapidly rising inflation and growing unemployment have served to reduce job opportunities for elderly workers and erode the purchasing power of fixed incomes.

To assure that all older Americans are able to enjoy a decent standard of living and to correct the regional inadequacy in social security benefits, I am today introducing legislation to establish assured minimum annual income benefits for the aged.

My bill would:

First. Establish a minimum standard of income for elderly Americans of $3,850 a year for an individual and $5,200 for a couple.

Second. Adjust this sum annually to reflect changes in the intermediate budget level cost of living as determined by the BLS.

Third. Increase benefits for those living in large metropolitan areas where the cost of living exceeds the national average.

This legislation would be financed by a combination of payments from the social security system and appropriations from general tax revenues.

The erosion of the purchasing power of fixed incomes is a relative problem. For $2,892 a year an elderly person living in a nonmetropolitan area of the South can have all the goods and services and enjoy the same standard of living that would cost him $3,675 in New York City. Yet, regardless of where he lives and what it costs to live there, his social security check is the same—$2,616 a year, for the average retired worker.

For the person living in the lowest cost areas, this means social security benefits nearly cover the costs of his minimum needs. But this is not the case for the elderly person in a large metropolitan area where the cost of living is much higher. Obviously, it is time that the differences in costs of living be accounted for in fixed-income programs. My bill would do that by increasing benefits for those living in metropolitan areas where the cost of living exceeds the national average.

Beyond this, in raising the minimum income to the intermediate budget level, my bill would increase benefits by about $1,234 a year per recipient. This allot-

ment would insure that each elderly individual could live on more than a subsistence budget.

I recognize that some Members would be reluctant to support a measure which would appear, on the surface, to give their constituents slightly less money than it would to social security recipients in certain other areas. However, I am confident that after close study of this proposal, you will see the justice in this measure. While the dollar total of benefits may differ from area to area, this bill would equalize the real dollar buying power of social security recipients throughout the Nation, regardless of where they live.

REINTRODUCTION OF EARTHQUAKE HAZARDS REDUCTION ACT OF 1977

(Mr. BROWN of California asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. BROWN of California. Mr. Speaker, I wish to note the reintroduction of the Earthquake Hazards Reduction Act of 1977 which is nearly identical to the bill by that name which was reported by the Committee on Science and Technology as an amendment to S. 1174 last year. S. 1174, originally authored by Senator ALAN CRANSTON, passed the Senate late in the 94th Congress. This bill is being primarily sponsored in the House in the 95th Congress by the dedicated and distinguished chairman of the Committee on Science and Technology, Mr. TEAGUE, and will have the bipartisan support of a large number of interested Members. It is unfortunate that the Earthquake Hazards Reduction Act is not now law, but due to circumstances last session, it was considered under the suspension calendar where it failed to get a two-thirds vote. I am confident that the votes against this bill were based upon a misunderstanding of its purpose and practicality and I expect that in this Congress a more enlightened attitude will prevail.

The need for this bill was clearly established last year before we adjourned, and more than reestablished by the events which have occurred since the end of the 94th Congress. To cite one specific example, we have had widespread public concern about earthquake predictions which were not based on any recognized science, but which were nevertheless reported by the new media, without any response from a credible, official body. Among the things the bill introduced today does is establish an Earthquake Prediction Evaluation Board. It is exactly such a board which is needed to properly evaluate and respond to predictions by scientists and charlatans alike.

The prime reason for this legislation comes from the progress that has been made in understanding earthquakes. There is a general belief among seismologists that reliable earthquake predictions can be made within the next few years provided the proper level of support is given to accomplishing this task. The estimated costs of such a program are in the tens of millions, while the estimated savings in property are in the billions of dollars, without even considering the immeasurable value of the certain saving of human lives.

The two key Federal agencies involved, the U.S. Geological Survey and the National Science Foundation, have already greatly advanced the areas of science that relate to earthquake hazards, such as seismology and engineering, but they suffer from the lack of a clear cut set of goals and responsibility for carrying out a comprehensive and coordinated national program designed to reduce the hazards from earthquakes. The legislation being introduced today will remedy this problem.

Mr. Speaker, I do not wish to give the full rationale for this legislation here today. The committee report which accompanied S. 1174, as amended by the Committee on Science and Technology, contains ample justification for this bill. I would recommend House Report 94–1440, parts I and II to any of my colleagues who might be especially interested in further details. In addition, I wish to bring to my colleagues attention the floor debate, under suspension of the rules, on this bill. This information can be found on pages H10530 to H10544 of the September 20, 1976, CONGRESSIONAL RECORD.

Let me simply conclude by saying that the Earthquake Hazards Reduction Act of 1977 is a simple, but important bill that gives the Federal Government the responsibility and the resources to conduct a public protection program that only the Federal Government is capable of conducting. I hope that the Congress will act promptly on this bill.

THE NATIONAL CLIMATE PROGRAM ACT OF 1977

(Mr. BROWN of California asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. BROWN of California. Mr. Speaker, today I am pleased to introduce the National Climate Program Act of 1977, which is much like the bill which attracted wide interest and was the subject of hearings before the Subcommittee on the Environment and the Atmosphere last year.

Large-scale change in the world's climate could override all other environmental problems. It could effectively foreclose or negate many global strategies in economics, energy, agriculture, and demography. It is currently primarily a research frontier, but one with implications for almost all practical areas of human activity.

Compared to the immense possible impact of climate fluctuations, we possess only limited scientific understanding of what causes them. Our knowledge is primitive concerning the importance of natural factors such as solar activity or orbital behavior.

We have even less knowledge of man-made effects such as those due to CO_2 and particulate emissions, or to fluorocarbon and NO_x interaction with the ozone layer.

We have only begun to explore alternatives for adjusting to climatic change should significant impacts on society become possible or probable.

During the 94th Congress, members of the Subcommittee on the Environment and the Atmosphere made much progress in emphasizing the urgency and timeliness of the issues surrounding the possibility of long-term climate change. Hearings were held during May 1976, and were supplemented by a Congressional Record Service study entitled "A Primer on Climatic Variation and Change."

Subcommittee efforts drew upon a number of valuable reports and studies issued on this matter in the past 2 years, including: "Understanding Climate Change—A Program for Action," from the National Academy of Sciences, "The Role of the Oceans in Predicting Climate," prepared by the National Academy of Sciences' Ocean Science Committee, and "The Physical Basis of Climate and Climate Modeling," from the Joint Organizing Committee, World Meteorological Organization/International Council of Scientific Unions, "The Natural and Radiatively Perturbed Troposphere," by the Department of Transportation, "Impact of Climatic Impact on Major North American Food Crops," from the Institute of Ecology, and expert reports from many other sources.

Within the executive branch, the Subcommittee on Climate Change of the Environmental Resources Committee of the Domestic Council prepared an important report, "A United States Climate Program," December 1974, making specific recommendations to develop a long-term climate program on a global scale.

The goal of the climate program, as defined in the report is—

> To help the nation respond more effectively to climate induced problems by enabling its government to be aware of or anticipate climate fluctuations and their domestic and international impacts. (Page 6 of A United States Climate Program).

This goal can now be met as a cooperative legislative-executive effort with the National Climate Program Act of 1977.

This bill has four main objectives:

First. To establish a climatic impact warning system. The present National Oceanic and Atmospheric Administration operation does not acquire, process, interpret or deliver timely climatic impact warnings to decisionmakers. The know-how is present for early warning; the tools are not present. In order to adequately process the available data and access and analyze new data on a national and international scale this bill proposes additional funding.

Second. To improve existing climate prediction. Valid forecasts of precipitation and temperature fluctuations for more than a season ahead have not yet been demonstrated. But some improvements are possible in this area if proper analysis of climate factors and application of statistical methods of prediction are carried out. This would be particularly helpful in understanding climate's impact on food production, availability of water resources and energy consumption.

Third. To develop computer simulation and prediction of climate, the simulations and forecasting of climatic variations by computer solution of the gov-

erning laws of physics offer the only approach that lends itself to answering the full range of climate related questions to which the Government must ultimately respond. A long-term commitment is necessary to:

Apply existing mathematical models of experimental monthly forecasts;

Develop a combination of oceanic/atmospheric models;

Determine the limits of climatic prediction; and

Simulate man's effect on climate and determine the possible consequences.

Fourth. To develop a global monitoring system for climate. NOAA, working with NASA and other Federal agencies has developed an extensive worldwide monitoring system for many environmental conditions. However, this system will require substantial bolstering to monitor the global climate. The present system provides a sound base—supported by the Federal Government by about $10.6 million in fiscal year 1975—on which to build U.S. participation in the international climate monitoring efforts from which the United States and many other nations will benefit. Specifically this will include:

International ocean monitoring;

An Earth-orbiting satellite program for climate—beyond the work of NASA;

A global pollutant monitoring program for climate—for example, the effects of CO_2, particulate matter, fluorocarbons and oxides of nitrogen on climate; and

Accelerated development of the climate-related environmental monitoring systems of the United Nations agencies.

I believe we have reached a maturity and urgency of scientific and popular interest which makes possible a successful drive toward scientific, executive branch, and legislative consensus on the design of a national and coordinated climate program. I am impressed by the unusual unanimity of concern among scientific and agency witnesses, variously familiar with the Domestic Council initiative, with continuing National Academy of Sciences studies, and with the most recent efforts toward a global environmental monitoring system, GEMS, under the United Nations environment program. Indeed, the consensus is so broad that it appears that cooperative international effort on the study of climatic change could become a catalyst for greater international cooperation in many other areas.

I also feel that the most successful legislative action will naturally result from cooperation of the Committee on Science and Technology with the members and staffs of a number of other congressional committees, particularly the House Committees on Interstate and Foreign Commerce, on Merchant Marine and Fisheries, on Agriculture, and on the Interior.

I encourage suggestions from Members and staffs, of both the House and Senate, to the staff of the Subcommittee on the Environment and the Atmosphere, and to my staff, regarding the proposed national climate program. We welcome the attention of our colleagues to the international and national impacts of climatic change on food production, energy consumption, health, and the availability of water. Today's technological advances, particularly in satellite monitoring and computer sciences, if guided scientifically and legislatively in the most useful directions, offer hope for dramatic gains in understanding climate, and predicting its behavior and its impact on man's activities.

I have tried to convey the sense of legislative continuity and of timeliness for legislative action which we believe characterizes present concern for the implication of climatic change.

To be prepared to deal with such change, we must assess the adequacy of our knowledge in several areas:

First. Do we have a sound understanding of the climate baseline and fluctuations to be expected?

Second. Can we develop systems able to detect climate change or large-scale fluctuations in a reliable way?

Third. How can we gain a better understanding of natural and possible man-made factors which may cause climate change?

Fourth. Have we accurately assessed the incremental economic effects of incremental climate change?

Fifth. What organizational or technical steps could we take to protect ourselves from possible effects?

These and other unanswered questions have been clearly raised during the past Congress. In hearings before our subcommittees covering "Inadvertent Modification of the Upper Atmosphere," on "Research and Development Related to Sulphates in the Atmosphere," and on "The Costs and Effects of Low-Level Chronic Exposure to Pollutants in the Environment," concern was repeatedly expressed about potential long-range atmospheric changes induced by environmental agents.

Although there was much support after the May 1976 hearings, H.R. 10013 did not reach the House floor. The subcommittee did, however, report a much narrower bill concerning studies of weather modification—later to become Public Law 94-490—and Members were in substantial bipartisan agreement at the conclusion of this work on the need for far more comprehensive climate research and monitoring action during the 95th Congress.

With the help of our colleagues, a successful program of atmospheric research and monitoring need not be overly expensive. It may be possible to organize networks of existing NOAA, EPA, DOD, national, State, and local capabilities. It may be possible to utilize existing international planning frameworks. The potential economic consequences of misunderstanding basic climatic phenomena certainly in themselves justify the investment of effort needed to bring these networks into coordination.

Mr. Speaker, I need not today present further detail on the questions addressed by this legislation. The hearings and report which accompanied H.R. 10013 contain ample justification for this bill. I would recommend the December 1976 subcommittee print, "Climate Research and a National Climate Program," to any of my colleagues who might be interested in further details.

The hearings conducted May 18, 19, 20, 25, 26, and 27, 1976, are published as print No. 78, of the Subcommittee on the Environment and the Atmosphere.

In addition, I wish to bring to my colleagues attention the following selections: on weather and food reserves, with thanks to the gentleman from Iowa, Mr. SMITH, on pages 14313 and 14314 of the May 18, 1976, CONGRESSIONAL RECORD; on the need for a national climate program, from the gentleman emeritus from Missouri, Mr. Symington, on pages 13438 to 13439, of May 11, 1976, CONGRESSIONAL RECORD; and to the comments before the hearings of the Senate Foreign Relations Committee, on pages 13098 to 13105, of the May 10, 1976, CONGRESSIONAL RECORD.

I will work closely with my colleagues in the Congress, with the administration of President-elect Carter, and with interested persons outside the Federal Government, especially from scientific, professional, and public interest organizations, toward achieving consensus in defining a program for investing these long-range but potentially very important matters.

Mr. Speaker, I consider this an important bill. It will contribute greatly to our understanding of climate. I trust that all concerned will provide their prompt input to our deliberations and that the Congress will act promptly on this bill. I encourage my colleagues to support the National Climate Program Act of 1977.

AUTOMOTIVE TRANSPORT RESEARCH AND DEVELOPMENT ACT OF 1977

(Mr. BROWN of California asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. BROWN of California. Mr. Speaker, I rise to note the reintroduction of the Automotive Transport Research and Development Act which was passed by the 94th Congress last September, and subsequently vetoed by President Ford. As you know, the veto of that bill, H.R. 13655, was overridden by the House on September 29 by a vote of 293 to 102, but sustained by the Senate. Since the Senate had voted in favor of this, or similar legislation on four previous occasions by more than two-thirds majority, it is fairly clear that the vote to sustain the President's veto had little to do with the merits of the bill. In addition, the Senate did vote to override the veto of the companion bill to H.R. 13655, H.R. 8800, the electric car bill, only 1 week earlier. Since the House did vote to override both vetoes, it is logical to expect continued support in the 95th Congress for this legislation.

I basically consider the Automotive Transport Research and Development Act of 1977 to be an item of unfinished business from the 94th Congress. Similar legislation has been introduced, and actively considered since early 1973 in both Houses of the Congress. If we had enacted such legislation in 1973, we would be nearing the completion of the R. & D.

program called for in this bill, and we would probably be seeing new automobiles which get double or triple the mileage of existing autos, and be meeting the auto emission standards of the Clean Air Act too. If we are to prevent further delays in this vital energy conservation and environmental improvement program, we must act rapidly to enact the bill we emphatically passed last September.

The legislation itself has already been sent to every Member of the House. I am gratified to note that over 25 Members have agreed to cosponsor this bill. In addition, I wish to express my sincere appreciation to the chairman of the full Committee on Science and Technology, Mr. TEAGUE, and the chairman of the subcommittee which considered this bill, Mr. MCCORMACK, as well as many other Members, for their expressions of support in expediting passage of this bill. Since the Automotive Transport Research and Development Act is already the product of long and careful deliberations, as well as a compromise of many conflicting viewpoints, I believe it is fair to urge support for the bill as it is introduced today. I hope that I can count on that support, not for myself, but for the benefit of the program, in the weeks to come.

The purpose of the Automotive Transport Research and Development Act is relatively easy to explain. It establishes a 5-year program to research, develop, and demonstrate new engines and advanced ground propulsion systems that would be energy-efficient, economical, meet environmental and safety standards, and reduce our dependence on imported oil. The program would be conducted by the Energy Research and Development Administration with the assistance of the Department of Transportation and the National Aeronautics and Space Administration, as well as other public and private national resources.

The need to develop an energy efficient automobile is obvious. The internal combustion engines in existing autos consume about 40 percent of all the petroleum used in the United States today. This makes the auto the single largest user of oil. The automobile is also the single largest contributor to air pollution, and while it is possible for the internal combustion engine to be cleaned up, it is probable that the cleanest, most efficient engines will not be the traditional Otto cycle ICE in current use.

The Automotive Transport Research and Development Act does not specify which engines the Federal program should develop, but rather it gives criteria which must be used by the program managers in choosing engine types. Among those criteria is the ability to use nonpetroleum based fuels, such as hydrogen or methanol. We considered this non-use of petroleum to be quite important for the engines of the future.

Among the engine types anticipated to meet the goals of the act are the Stirling cycle engine and the Brayton cycle engine. These two were most frequently identified as engines likely to meet our goals. However, it is possible that some radical change in the Otto cycle, or the Diesel engine, could also be the result, as well as other engine types. The purpose of the legislation is not to replace, or inhibit the current investments by the automobile industry, but rather supplement or encourage investments into automotive research and development.

The reason for the Federal involvement should be clear. Numerous reports and studies have concluded that some Federal involvement is necessary if the development of high risk, long-range technologies is to be accomplished. This role of the Federal Government is widely accepted, and the existence of ERDA and NASA demonstrate our commitment to it. However, another role is also necessary, and that is one of serving the public interest in developing new, low-cost technologies even in the face of industry opposition. The establishment of the TVA, as a yardstick utility, is an example. Another example is the Federal role in researching and developing scrubbers to clean up stationary air pollution emissions in the face of a "can't do" attitude by the industry. The foot dragging by the American automobile industry, for whatever reasons, cannot be tolerated because the consequences to the United States if we fail to act are too great.

In conclusion, I wish to say that the Automotive Transport Research and Development Act is both necessary and long overdue. The hearing records, the conference report, and the veto override all document the need for this legislation. I trust that it will become law in the very near future.

DISALLOWING ADVERTISING OF ALCOHOLIC BEVERAGES AS A BUSINESS TAX DEDUCTION

(Mr. BROWN of California asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. BROWN of California. Mr. Speaker, I am introducing legislation today to amend the Internal Revenue Code of 1954 to disallow the advertising of alcholic beverages as a business tax deduction. The bill is a modest effort to deal with the problem of alcoholism by discouraging the excessive liquor advertising which has the effect of instilling in people's minds—especially the young—all sorts of favorable associations between alcohol use and good times, the good life, friendship, romance, the great outdoors, and other positive feelings.

The alcoholic beverage industry spent approximately $310 million on various forms of advertising in 1974. By contrast, estimates are that the Federal Government spent $160 million in 1976 to combat alcoholism. And this figure represents only the direct Federal costs of alcoholism prevention and education, exclusive of State, local, and private expenditures. The indirect costs of alcoholism are staggering. Estimates of the dollar loss due to job time lost, decreased productivity, health costs, et cetera, range between $15 and $25 billion annually. Some 15,000 homicides and suicides a year are attributed to alcohol use as are some 20,000 deaths from accidents in which alcohol is involved. It is time to correct the irrationality of spending large amounts of money on the treatment and prevention of alcohol abuse and incurring such high social costs while at the same time providing an incentive for advertising promoting increased alcohol consumption.

Liquor advertising restrictions are seen by many groups as one way of dealing with the widespread problems of excessive alcohol consumption. The American Council on Alcohol Problems, among other groups, has endorsed efforts such as this and views it as one way to reduce the levels of alcohol advertising. The Department of Health, Education, and Welfare in its "Forward Plan for Health" listed the restricting of alcohol advertising as one option to be used for reducing the incidence of alcohol abuse and alcoholism. And, in 1974, the Michigan Task Force on Victimless Crime even recommended a ban on all advertising of alcoholic beverages.

This bill would not restrict the right of the industry to advertise its product, but would simply take the Federal Government out of the business of providing an incentive, through the tax structure, for such advertising. It is about time that we consider the social costs to our society before routinely providing tax incentives for every kind of business activity, regardless of its impact on the human environment.

VETERANS' LEGISLATION

(Mr. HAMMERSCHMIDT asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. HAMMERSCHMIDT. Mr. Speaker, the ever-spiraling cost of living has had a particularly adverse effect upon those of our citizens who are dependent wholly or in part upon fixed incomes. The Nation's veterans are no exception.

This fact has consistently been reflected in the resolutions calling for cost-of-living increases in service-connected disability compensation and survivor benefits; nonservice connected pension payments and educational allowances adopted by the major veterans' organizations in their most recent national conventions.

The spokesman for one organization highlighted this point in testimony before the Committee on Veterans' Affairs last September when he said:

> Aged veterans and widows especially are the prime victims of the raging inflation that has affected the entire American people.

It is essential that veterans' and widows' benefit payments be increased from time to time to reflect the increasing cost of living. Accordingly, I am today introducing a series of bills that respond to the expressed concerns of the Nation's veterans' organizations.

These measures will authorize a 10-percent increase in the monthly rates of compensation payable for service-connected disability and a similar increase for the widows and children of those veterans whose deaths resulted from service-connected causes.

They will increase by 10 percent the monthly payments to veterans, widows, and children who are participating in

the education and training programs offered by the GI bill and related laws.

A measure to provide a 20-percent monthly supplemental pension payment to widows who have reached the age of 78 years is also included in this group.

A bill to provide outpatient treatment for World War I veterans on the same basis as it is provided for Spanish American War veterans is also being introduced. This will permit World War I veterans to receive outpatient treatment when needed for any disability.

Finally, Mr. Speaker, I will introduce in a few days a measure to authorize a 10-percent increase in pension payments for eligible veterans and widows and a similar increase in dependency and indemnity compensation payments for parents of service-connected deceased veterans.

I am hopeful, Mr. Speaker, that early action on these or similar measures in this 95th Congress will alleviate the financial plight of those to whom we owe so much—veterans of our Nation's wars.

AMNESTY OR PARDON SHOULD NOT BE GRANTED FOR PERSONS WHO COMMITTED DRAFT OR MILITARY ABSENCE DURING MILITARY INVOLVEMENT IN VIETNAM

(Mr. HAMMERSCHMIDT asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. HAMMERSCHMIDT. Mr. Speaker, I was shocked and dismayed last August upon learning that the President-elect had informed the American Legion of his intention to issue a blanket pardon to Vietnam draft evaders. I was even more surprised to learn that President Ford upon request was deciding whether to reconsider granting a blanket amnesty to draft evaders and military deserters.

Somehow or other, Mr. Speaker, I received the distinct impression that President Ford had already extended to each civilian and serviceman who had committed draft or military absence offenses during the conflict in Vietnam an opportunity to receive clemency and once again become a productive citizen when he issued his clemency proclamation of September 16, 1974. Basing his program on a "national commitment to justice and mercy * * *" and "the necessity for national reconciliation," draft evaders and military absentees could, according to the President, "earn their return to the mainstream of American society."

The proclamation created a Presidential Clemency Board which considered the case of each applicant on an individual basis. Clemency was not dispensed or denied automatically, by category, or by any rigid formula. The review was based upon the merits of each applicant's case, with full respect given to his rights and interests.

Despite this golden opportunity to again become productive members of our society, the vast majority of the offenders ignored the President's program. Of the 113,337 who were eligible for the clemency program, the Board tells us that 21,729—only 19 percent of the offenders—applied for clemency.

Mr. Speaker, these figures speak for themselves. They are appalling. They tell us that most of those who refused to enter service or fight in Vietnam because the United States was engaged in a conflict that was "morally reprehensible" were spurning amnesty or clemency. The clamor for unconditional amnesty or a blanket pardon appears to have been productive of results with President-elect Carter's pronouncement to the American Legion. Let me share with you the views of some of the Nation's major veterans' organizations on this subject.

The Veterans of Foreign Wars said:

> We sustain total opposition to both unconditional and conditional "amnesty" or "pardon" for draft dodgers and military deserters.

The American Legion stated:

> We reaffirm our opposition to general amnesty for draft evaders, draft dodgers and military deserters and urge that each case be tried on an individual basis, and each deserter be dealt with as prescribed by the Uniform Code of Military Justice.

The Disabled American Veterans reaffirmed its opposition to the granting of blanket amnesty, and that draft dodgers and military deserters be tried on an individual case-by-case basis.

AMVETS informed the President-elect that:

> We cannot condone a concept of special treatment for those who refused to obey the laws, designed by the people for the defense of our Nation and/or the promulgation of democracy abroad.

Mr. Speaker, I share the views of these organizations. The memory of the 56,000 American citizens who gave their lives fighting in the Vietnam war, whether that war was moral or immoral, is still fresh in my mind. The memory of the 1,100 servicemen still missing in action and unaccounted for cannot be erased. The granting of an unconditional pardon or amnesty would be an affront to all who served with courage and honor during that conflict.

In conclusion, Mr. Speaker, I want to commend the gentleman from Mississippi (Mr. MONTGOMERY) for initiating a petition to the President-elect calling upon him to reconsider his pledge to issue a pardon for all Vietnam era draft evaders. I was pleased to sign the gentleman's petition. While the action taken by the gentleman from Mississippi must be applauded, it is my view that a much stronger manifestation of congressional sentiment is necessary. I am, therefore, today introducing a concurrent resolution reflecting the sense of Congress that a general or blanket amnesty or pardon for persons who committed draft or military absence offenses during our Nation's military involvement in Vietnam should not be granted by the President. The text of the resolution follows:

H. CON. RES. —

Whereas President Ford in his Proclamation of September 16, 1974 created a program of conditional clemency for approximately 13,000 civilians and 100,000 servicemen who had committed draft or military absence offenses between the adoption of the Gulf of Tonkin Resolution (August 4, 1964) and the day the last American combatant left Vietnam (March 28, 1973), and

Whereas a total of 113,337 persons were determined to be eligible under the President's clemency program, only 21,727 or 19 percent of those eligible actually applied for clemency during the six and one-half months the privilege was offered, and

Whereas President-Elect Carter has declared his intention of issuing a "blanket pardon" to those who evaded or violated the draft laws of our nation, within one week after his inauguration, and

Whereas the nation's major veterans' organizations have taken strong positions in total opposition to general or blanket amnesty and/or pardon as evidenced by Resolution #401 of the Veterans of Foreign Wars that "we sustain total opposition to both unconditional and conditional 'amnesty' or 'pardon' for draft dodgers and military deserters"; Resolution #434 of the American Legion that "we affirm our opposition to general amnesty for draft evaders, draft dodgers and military deserters and urge that each case be tried on an individual basis, and each deserter be dealt with as prescribed by the Uniform Code of Military Justice"; Resolution #349 of the Disabled American Veterans reaffirming "its opposition to the granting of blanket amnesty, and that draft dodgers and military deserters be tried on an individual case-by-case basis"; and by AMVETS Resolution #78 and 79 that "we sustain total opposition to both unconditional and conditional 'amnesty' for draft dodgers and military deserters" and

Whereas the Presidential Clemency Board said in its minority report, "We do not believe that a man who deserted his comrades on the battlefield in Vietnam or who refused to go to Vietnam when he was so ordered, should be given clemency." and

Whereas a member of the Board further stated, "A Presidential pardon must be viewed as a prized and relatively infrequent occurrence." and

Whereas this proposed action would be an insult to the memory of the 56,000 American citizens who were killed in Vietnam and the nearly 1100 who are still missing in action, as well as an affront to all who served with courage and honor during that conflict: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring,) That it is the sense of Congress that a general or blanket amnesty or pardon for persons who committed draft or military absence offenses during our nation's military involvement in Vietnam would represent a breach of faith with those who served honorably, particularly our honored war dead and their survivors and should not be issued or granted by the President of these United States.

BILL OF RIGHTS PROCEDURES ACT REINTRODUCED

(Mr. WHALEN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. WHALEN. Mr. Speaker, I today am introducing the Bill of Rights Procedures Act of 1977, legislation that is intended to close several gaps in our Federal laws protecting citizens' rights to privacy. Senator MATHIAS is introducing identical legislation in the other Chamber.

We believe that this legislation is essential to helping assure American citizens that their privacy rights are not being improperly abridged by their Government. It is becoming ever easier to

discover the most intimate information about an individual by perusing various sources that are now open without restraint to any investigator. This situation must be corrected.

For instance, Government officials can now look at all of your bank records, photocopies of your canceled checks, and so forth, without legal restraint. Similarly, they also can review all records of our telephone calls and make records of who writes to us. And our national wiretap statutes contain loopholes that permit the telephone company to monitor private conversations and enable anyone to intercept telegrams and computer transmissions.

The Bill of Rights Procedures Act for the first time would subject all of these practices to Federal statutory restrictions. [A brief summary of our legislation appears at the end of this statement.]

The bill we are introducing today is based on the proposed Bill of Rights Procedures Act of 1975 (H.R. 214 in the 94th Congress). That legislation attracted a strong, bipartisan block of 75 cosponsors in the House. Too, it won numerous endorsements from organized labor, the banking community, consumer groups, and leading newspapers.

Following extensive hearings and markup, the House Judiciary Subcommittee on Courts, Civil Liberties and the Administration of Justice—ably lead by our colleagues, BOB KASTENMEIER and TOM RAILSBACK—approved the revised bill 5 to 0. Today's measure closely adheres to the text produced by that subcommittee.

Now that the new Congress is seated, MAC MATHIAS and I intend to seek cosponsors for our bill. We expect again to have the support of a wide spectrum within the Congress, as well as continuing encouragement from the public.

In recent years we have all read a terrible parade of headlines that have catalogued a whole host of ways in which the Federal Government's investigative powers can be abused. Examples include COINTELPRO; the so-called national security wiretapping of Mort Halperin and others; FBI secret files on various public figures; White House directed rifling of psychiatric files in private offices; IRS audits for political reasons; and the list goes on and on.

As the pollster, Louis Harris, noted in September 1974,

> One of President Ford's first pronouncements upon assuming office was to reassure the American people that their privacy would be more respected in the future ... Not only was this assurance undoubtedly welcomed by the people, but the issue of individual privacy promises to remain high on the agenda of politics.

In that period immediately following Watergate the expectation of corrective action was indeed high. But not a single new privacy protection law has yet been approved by the Congress. The promise is unfulfilled.

Mr. Speaker, the need is clear, the demand is great, and the legislation is ready. I am now serving notice that we intend to press ahead vigorously in our efforts to enact H.R. 215, the Bill of Rights Procedures Act.

A summary of the act follows:

A SUMMARY OF H.R. 215 BILL OF RIGHTS PROCEDURES ACT

CHIEF SPONSORS

Congressman Charles W. Whalen, Jr. (R-Ohio) and Senator Charles McC. Mathias (R-Md.)

HISTORY

First introduced in 1974 by Senator Mathias and Congressman Charles A. Mosher (R-Ohio), the bill underwent extensive hearings and markup in the 94th Congress. It was approved 5–0 by the House Judiciary Subcommittee on Courts, Civil Liberties and the Administration of Justice, but proceeded no further in 1975. The bill had a bipartisan group of 75 cosponsors.

PURPOSE

H.R. 215 is intended to close several gaps in Federal privacy protection laws; it addresses several problem areas where American citizens reasonably expect protection of their privacy, but where Federal statutes currently are silent.

This legislation would not prohibit any law enforcement activity now considered to be legal and proper. Rather, it establishes by statute guidelines and procedures to be followed when there would be legitimate need for the invasion of a citizen's privacy in certain areas. Civil and criminal liabilities are established for those who willfully intrude upon those rights to privacy.

HIGHLIGHTS

Third Party Records—Financial institutions, telephone companies and credit card issuers keep detailed records of the personal transactions of millions of individuals. Presently, access to these records is unlimited by Federal law. H.R. 215 provides that Federal agents may gain access to these records only by one of the following means:

a. obtaining the written, express consent of the subject individual;

b. serving a subpoena or summons on the holder institution, with a copy to the customer. Opportunity and standing for a customer challenge is given;

c. obtaining from the courts a search warrant.

Mail Covers—Currently no statute governs the use of mail covers, the procedure in which a systematic record is made of information that appears on the outside covers of first class mail. H.R. 215 establishes strict standards of conduct and accountability, incorporating as much as possible features of existing internal guidelines of the Postal Service.

Service Monitoring—Clarifying a portion of existing Federal wiretap law, this bill establishes strict limits on telephone company "service monitoring" interceptions of customer-to-customer conversations. The bill also sets procedural safeguards for the monitoring of telephone conversations of company employees. H.R. 215 would make illegal the possession of so-called blue boxes and black boxes, devices used to defraud the phone company of long distance toll charges.

Non-Aural Communications—H.R. 215 extends the protection of the Federal wiretap laws to non-aural communications. This will prohibit the interception of telegraph and telex messages, computer data transmissions, etc. except by court order.

CONGRESSIONAL PAY RAISE DEFERRAL ACT IS NEEDED NOW

(Mr. WHALEN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. WHALEN. Mr. Speaker, I wish to call your attention to the Congressional Pay Raise Deferral Act, legislation which I introduced today. This is a rather short bill, only three pages long, but it embodies a very important concept, one which we must enact into law as quickly as possible.

The Congressional Pay Raise Deferral Act provides that no increase in the salary of Members of Congress can go into effect until after the next Congress is seated. In this way, all Members of the House and at least a third of the Senators would have to stand for election before they could actually benefit from any congressional pay raise.

The legislation I am sponsoring does not eliminate cost-of-living increases, Quadrennial Commission recommendations, or any other salary adjustments. Rather, it is designed to provide a more rational framework within which we consider any proposed salary increases.

As we have seen in recent years, any increase in congressional salary levels is inherently a hot political issue. Consistently, we have been unable to debate such pay raises in an objective manner because of the political ramifications and the fact that we, ourselves, are the immediate beneficiaries of our actions.

As you know, Mr. Speaker, the Congress is the only body of Federal workers which can raise its own salaries. This is as it should be, because there is no other agency that can or should be vested with responsibility for altering congressional pay levels.

But I do think it is desirable that the public have a greater opportunity to enter into the decisionmaking process.

I propose that we do this by requiring that a general election must fall between the approval and the actual implementation of a congressional pay raise. I can think of no other way to give the public so great a voice in the debate, and I can think of no other single step that would do more to reinforce the integrity of the process.

In September, 1975, our respected former colleague, Charles Mosher, sponsored legislation similar to that which I am introducing today. He gathered a bipartisan group of 85 cosponsors in the House and he worked with Senator ROBERT TAFT, also of Ohio, to secure passage of this legislation in the Senate. Unfortunately, the 94th Congress ended without the House acting on the Congressional Pay Raise Deferral Act.

This year, I hope, will be different. We are under new leadership and you, Mr. Speaker, have personally pledged to work towards improving the image of the House by assuring the public of the integrity of its Members and its processes.

This legislation can be an important first step in that direction.

Later this month we will receive President Ford's budget message. This is expected to include a recommendation for a substantial increase in congressional pay. If that recommendation is made we, again, will be forced to consider congressional salary levels in a highly political subjective setting. The Congressional Pay Raise Deferral Act, in my opinion, offers a very sound solution to this vexing problem.

Finally, I am pleased to note that I am joined in this first day introduction of the Congressional Pay Raise Deferral Act by

three distinguished colleagues, NED PATTISON, NEWTON STEERS—chairman of the freshman Republican Caucus—and DON PEASE—vice chairman of the freshman Democratic Caucus. It is especially pleasing to be associated with these Members in the task of promoting this sorely needed legislation.

THE NEW CASE AGAINST OSHA

(Mr. ROUSSELOT asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. ROUSSELOT. Mr. Speaker, ever since the passage of the Occupational Safety and Health Act of 1970, both private business and various Government agencies in the United States have been subjected to the unnecessary harassment and arbitrary administrative fines and penalties of the most notorious of all Government regulatory agencies and departments—OSHA. Millions upon millions of dollars have been spent by private industry in an attempt to comply with the thousands of capricious and unreasonable rules and regulations of OSHA; and the constitutional rights of many business owners have been abused in the name of "job safety and health of the employee." However, a recent decision handed down by a panel of three Federal judges held that this unwieldy regulatory agency had gone far enough.

In a landmark case, the panel ruled as unconstitutional provisions of the 1970 law which authorized the Labor Department to make onsite inspections without a warrant. In short, the Idaho ruling stripped the Occupational Safety and Health Administration of its authority to conduct onsite inspections; and the entire authorizing section of the law was struck down as defective. There can be little doubt that the new court decision provides added weight to the contention that many of us have held for some time—that enactment of the Occupational Safety and Health Act has been an invasion of constitutional rights and an economic disaster for the private sector of our country. The attached news article from the January 4 edition of the Washington Post provides details on the judicial ruling.

Today I am reintroducing legislation to repeal the Occupational Safety and Health Act of 1970. It is my hope that during the 95th Congress, my colleagues will consider my proposal within the context of the recent OSHA decision and move to rid the private sector of this unnecessary Federal agency.

[From the Washington Post, Jan. 4, 1977]

JOB SAFETY INSPECTION HELD ILLEGAL WITHOUT A WARRANT

A panel of three federal judges in Idaho has declared unconstitutional the 1970 law authorizing the Labor Department to conduct occupational safety and health inspections without a warrant.

The department fears the decision could strip it of all occupational safety and health enforcement power, and plans to appeal.

"We consider the right of inspection to be absolutely vital," Morton Corn, the assistant labor secretary who heads the Occupational Safety and Health Administration, said yesterday. "We will take whatever legal steps are necessary to vindicate that right."

The Idaho ruling, handed down last week, involved an electrical contractor, F. G. Barlow of Pocatello, who refused to let a federal inspector go through his place of business.

He rested his refusal on the Fourth Amendment to the Constitution, which forbids, "unreasonable searches and seizures" and says search warrants should only be issued where there is probable cause to suspect a violation of the law.

The 1970 Occupational Safety and Health Act not only authorizes unannounced inspections of workplaces but prohibits advance warnings that inspections are about to occur. It makes no mention of search warrants, and federal inspectors do not obtain them.

In a Texas case earlier last year a three-judge panel said in effect that this failure to mention warrants must have been inadvertent, and ruled that safety inspectors ought to take warrants out in the future. That case is on appeal.

In the Idaho ruling, however, the panel simply said the law is unconstitutional, and left any repairs to Congress.

The Idaho ruling thus left OSHA without any authority to make inspections; the whole authorizing section was struck down as defective.

The Idaho judges then issued an injunction forbidding future inspections of Barlow's place of business and possibly—the panel's meaning is not completely clear—forbidding all further OSHA inspections nationwide.

OSHA lawyers said they would appeal the constitutional finding and seek a stay of the injunction. An appeal would take the issue directly to the Supreme Court, which in the past has upheld some warrantless government health and safety inspections and struck down others.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. MILLER of Ohio) to revise and extend their remarks and include extraneous matter:)

Mr. KEMP, for 30 minutes, today.
Mr. EDWARDS of Alabama, for 5 minutes, today.
Mrs. FENWICK, for 5 minutes, today.
Mr. RAILSBACK, for 5 minutes, today.
Mr. THONE, for 5 minutes, today.
Mrs. HECKLER, for 5 minutes, today.
Mr. FISH, for 10 minutes, today.
Mr. BURKE, of Florida, for 10 minutes, today.
Mr. DON H. CLAUSEN, for 10 minutes, today.

(The following Members (at the request of Mr. GEPHARDT) to revise and extend their remarks and include extraneous material:)

Mr. WOLFF, for 10 minutes, today.
Mr. GONZALEZ, for 5 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. MINISH, for 5 minutes, today.
Mr. THOMPSON, for 15 minutes, today.
Mr. CHARLES H. WILSON of California, for 15 minutes, today.
Mr. ROGERS, for 5 minutes, today.
Mr. ROSTENKOWSKI, for 5 minutes, today.
Mr. YOUNG of Georgia, for 5 minutes, today.
Mr. KOCH, for 10 minutes, today.
Mr. DODD, for 10 minutes, today.
Mr. KASTENMEIER, for 5 minutes, today.
Mr. FARY, for 5 minutes, today.
Mr. UDALL, for 5 minutes, today.
Mr. HARRIS, for 5 minutes, today.
Mr. CARR, for 5 minutes, today.
Mr. MEEDS, for 5 minutes, today.
Mr. CORMAN, for 5 minutes, today.
Mr. PATTISON of New York, for 5 minutes, today.
Mr. STRATTON, for 10 minutes, today.
Mr. SCHEUER, for 5 minutes, today.
Mr. FASCELL, for 5 minutes, today.
Mr. PRICE, for 5 minutes, today.
Mr. MOSS, for 5 minutes, today.
Mr. MONTGOMERY, for 60 minutes, on January 11.
Mr. FLOOD, for 60 minutes, on January 26.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. MILLER of Ohio), and to include extraneous matter:)

Mr. STEERS in three instances.
Mr. FINDLEY in three instances.
Mr. QUIE.
Mr. SARASIN in two instances.
Mr. COHEN in four instances.
Mr. COUGHLIN.
Mr. WINN.
Mr. WHITEHURST.
Mr. HORTON in two instances.
Mr. HYDE.
Mr. RHODES.
Mr. BROOMFIELD in two instances.
Mr. HANSEN.
Mr. SYMMS.
Mr. ABDNOR.
Mr. RAILSBACK in two instances.
Mr. DERWINSKI.
Mr. CLEVELAND in two instances.
Mr. PRESSLER.
Mr. REGULA.
Mr. ANDERSON of Illinois in three instances.
Mr. MICHEL in two instances.
Mr. BROYHILL in four instances.
Mr. KEMP in three instances.
Mr. MILLER of Ohio in four instances.

(The following Members (at the request of Mr. GEPHARDT) and to include extraneous matter:)

Mr. SISK.
Mrs. LLOYD of Tennessee in five instances.
Mr. ANNUNZIO in six instances.
Mr. FORD of Tennessee in four instances.
Mr. ANDERSON of California in 10 instances.
Mr. GONZALEZ in three instances.
Mr. BROWN of California in 10 instances.
Mr. CHARLES H. WILSON of California.
Mr. PATTEN.
Mr. MINISH.
Mr. ROSENTHAL in 10 instances.
Mr. CORNELL in five instances.
Mr. KASTENMEIER in two instances.
Mr. KOCH in six instances.
Mr. BLANCHARD.
Mr. TEAGUE in six instances.
Mr. DODD in two instances.
Mr. EILBERG in 10 instances.
Mr. LEDERER in three instances.
Mr. LONG of Maryland in 10 instances.

Mr. MOORHEAD of Pennsylvania in 10 instances.
Mr. DOWNEY.
Mr. EDGAR in two instances.
Mr. UDALL in five instances.
Mr. MCDONALD.
Mr. ZABLOCKI in two instances.
Mr. PATTISON of New York.
Mr. HARRIS.
Mr. OBERSTAR in two instances.
Mr. RICHMOND.
Mr. DENT.
Mr. LLOYD of California.
Mr. ROE.
Mr. MURPHY of New York in three instances.
Mr. STARK in 10 instances.
Mr. CORMAN in two instances.
Mr. CARR.
Mr. MEEDS in two instances.
Mr. YOUNG of Georgia.
Mr. DUNCAN of Oregon in two instances.
Mr. HAWKINS.
Mr. PRICE in three instances.

ADJOURNMENT

Mr. GEPHARDT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 55 minutes p.m.), under its previous order, the House adjourned until Thursday, January 6, 1977, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the President of the United States, transmitting his determination that the sale and financing of certain defense articles to Turkey during fiscal year 1977 is necessary to enable her to fulfill her obligations as a member of the North Atlantic Treaty Organization, and his suspension of the provisions of section 620(x) of the Foreign Assistance Act and section 3(c) of the Arms Export Control Act, pursuant to section 620(x) of the Foreign Assistance Act of 1961, as amended (90 Stat 757), together with notice of the intention of the Department of the Air Force to issue related letters of offer, pursuant to section 36(b) of the Arms Export Control Act (H. Doc. No. 95–6); to the Committee on International Relations and ordered to be printed.

2. A letter from the Secretary of Agriculture, transmitting the annual report on the location of new Federal offices and other facilities in rural areas for fiscal year 1976 and the transition quarter ending September 30, 1976, pursuant to section 901(b) of the Agricultural Act of 1970, as amended by section 601 of the Rural Development Act of 1972; to the Committee on Agriculture.

3. A letter from the Chairman, Commodity Futures Trading Commission, transmitting notice that the Commission's annual report will be transmitted at a later date due to the change in the fiscal year, pursuant to section 105, Public Law 93–463; to the Committee on Agriculture.

4. A letter from the Chairman, Commodity Futures Trading Commission, transmitting a report concerning insuring owners of commodity futures accounts against loss, pursuant to section 417, Public Law 93–463; to the Committee on Agriculture.

5. A letter from the Director, Office of Management and Budget, Executive Office of the President, transmitting a cumulative report on rescissions and deferrals of budget authority as of October 1, 1976, pursuant to section 1014(e) of Public Law 93–344 (H. Doc. No. 95–7); to the Committee on Appropriations and ordered to be printed.

6. A letter from the Director, Office of Management and Budget, Executive Office of the President, transmitting a cumulative report on rescissions and deferrals of budget authority as of November 1, 1976, pursuant to section 1014(e) of Public Law 93–344 (H. Doc. No. 95–8); to the Committee on Appropriations and ordered to be printed.

7. A letter from the Director, Office of Management and Budget, Executive Office of the President, transmitting a cumulative report on rescissions and deferrals of budget authority as of December 1, 1976, pursuant to section 1014(e) of Public Law 93–344 (H. Doc. No. 95–9); to the Committee on Appropriations and ordered to be printed.

8. A letter from the Acting Director, Office of Management and Budget, Executive Office of the President, transmitting the current services estimates for fiscal year 1978, pursuant to section 300 of Public Law 93–344; to the Committee on Appropriations.

9. A letter from the Deputy Director, Office of Management and Budget, Executive Office of the President, transmitting a report that the appropriation to the Department of Agriculture for fiscal year 1977 for the administration of the Packers and Stockyards Act has been reappointed on a basis which indicates the necessity for a supplemental estimate of appropriation, pursuant to section 3679(e)(2) of the Revised Statutes, as amended; to the Committee on Appropriations.

10. A letter from the Deputy Director, Office of Management and Budget, Executive Office of the President, transmitting a report that the appropriations to the Department of Health, Education, and Welfare for fiscal year 1977 for "Public Assistance" and "Special Benefits for Disabled Coal Miners" have been apportioned on a basis which indicates the necessity for supplemental estimates of appropriation, pursuant to section 3679(e)(2) of the Revised Statutes, as amended; to the Committee on Appropriations.

11. A letter from the Deputy Director, Office of Management and Budget, Executive Office of the President, transmitting a report that the appropriation to the Department of Labor for fiscal year 1977 for "Special Benefits, Employment Standards Administration" has been apportioned on a basis which indicates the necessity for a supplemental estimate of appropriations, pursuant to section 3679(e)(2) of the Revised Statutes, as amended; to the Committee on Appropriations.

12. A letter from the Deputy Director, Office of Management and Budget, Executive Office of the President, transmitting a report that the appropriations to the Veterans' Administration for fiscal year 1977 for "Compensation and Pensions," "Medical Care," and "General Operating Expenses" have been reapportioned on a basis which indicates the necessity for supplemental estimates of appropriation, pursuant to section 3679(e)(2) of the Revised Statutes, as amended; to the Committee on Appropriations.

13. A letter from the Assistant Secretary of Defense (Comptroller), transmitting a report that no use was made of funds appropriated in the Defense and Military Construction Appropriation Acts, 1976, during the period January 1 through June 30, 1976, to make payments under contracts in a foreign country except where it was determined that the use of foreign currencies was not feasible, pursuant to sections 734 and 109 of the respective acts; to the Committee on Appropriations.

14. A letter from the Assistant Secretary of Defense (Comptroller), transmitting a report on transfers of amounts appropriated to the Department of Defense, pursuant to section 733 of Public Law 94–212; to the Committee on Appropriations.

15. A letter from the Assistant Secretary of Defense (Comptroller), transmitting a report covering the fourth quarter of fiscal year 1976 on receipts and disbursements pertaining to the disposal of surplus military supplies, equipment material, and for expenses involving the production of lumber and timber products, pursuant to section 712 of Public Law 94–212; to the Committee on Appropriations.

16. A letter from the Assistant Secretary of Defense (Comptroller), transmitting a report on the value of property, supplies, and commodities provided by the Berlin Magistrate, and under the German Offset Agreement for the quarter ending September 30, 1976, pursuant to section 719, Public Law 94–419; to the Committee on Appropriations.

17. A letter from the Assistant Secretary of Defense (Comptroller), transmitting notice of the intent of the Department of Defense to obligate those funds appropriated to the various DOD stock funds for the procurement of war reserve materiel inventory, pursuant to section 735 of Public Law 94–419; to the Committee on Appropriations.

18. A letter from the Administrator of General Services, transmitting additional information to accompany a previously submitted report of a violation of the Anti-Deficiency Act, pursuant to section 3679(1)(2) of the Revised Statutes; to the Committee on Appropriations.

19. A letter from the Architect of the Capitol, transmitting his report of expenditures during the period January 1 through September 30, 1976, pursuant to section 105(b) of Public Law 88–454, as amended; to the Committee on Appropriations.

20. A letter from the Secretary of Defense, transmitting the annual report of the Reserve Forces Policy Board, pursuant to 10 U.S.C. 133(c)(3); to the Committee on Armed Services.

290. A letter from the Assistant Secretary of the Army (Civil Works), transmitting a report of the Chief of Engineers on the inspection of dams located in the United States, recommendations of the Assistant Secretary, and a draft of proposed legislation to establish a National Dam Safety Program, pursuant to section 5 of Public Law 92–367; jointly, to the Committee on Public Works and Transportation, Interior and Insular Affairs, and Agriculture.

291. A letter from the Chairman, Commission on Information and Facilities, U.S. House of Representatives, transmitting a report on the feasibility of a Congressional Staff Journal, pursuant to section 204 of House Resolution 988, 93d Congress [H. Doc. No. 95–18]; ordered to be printed.

292. A letter from the Chairman, Commission on Information and Facilities, U.S.

House of Representatives, transmitting a report on the Congressional Research Service as an information resource of the House of Representatives and the organizational framework which makes it effective or ineffective, pursuant to section 204 of House Resolution 988, 93d Congress [H. Doc. No. 95–19]; ordered to be printed.

293. A letter from the Chairman, Commission on Information and Facilities, U.S. House of Representatives, transmitting a report on the Congressional Budget Office as an information resource of the House of Representatives and the organizational framework that make it effective or ineffective, pursuant to section 204 of House Resolution 988, 93d Congress [H. Doc. No. 95–20]; ordered to be printed.

294. A letter from the Chairman, Commission on Information and Facilities, U.S. House of Representatives transmitting the final report of the Commission, pursuant to section 204 of House Resolution 988, 93d Congress [H. Doc. No. 95–22]; ordered to be printed.

295. A letter from the Chairman, Commission on Administrative Review, U.S. House of Representatives, transmitting the initial report of the Commission on scheduling the work of the House, pursuant to section 5 of House Resolution 1368, 94th Congress [H. Doc. No. 95–23]; ordered to be printed.

RECEIVED FROM THE COMPTROLLER GENERAL

296. A letter from the Comptroller General of the United States, transmitting a report that the legal action of which Congress was notified on July 7, 1976 (House Document No. 94–558) to require the release of rental housing assistance funds, will not be filed because a subsequent court action enjoining the release of those funds; to the Committee on Appropriations.

297. A letter from the Comptroller General of the United States, transmitting his review of the revised deferrals of budget authority contained in the message from the President dated September 28, 1976 (House Document No. 94–633), pursuant to section 1014(c) of Public Law 93–344 [H. Doc. No. 95–24]; to the Committee on Appropriations and ordered to be printed.

298. A letter from the Acting Comptroller General of the United States, transmitting his review of the deferrals of budget authority contained in the message from the President dated October 1, 1976 (House Document No. 94–650), pursuant to section 1014(c) of Public Law 93–344 [H. Doc. No. 95–25]; to the Committee on Appropriations and ordered to be printed.

299. A letter from the Deputy Comptroller General of the United States, transmitting his review of the proposed rescission and deferrals of budget authority contained in the message from the President dated November 5, 1976 (House Document No. 95–3), pursuant to section 1014 (b) and (c) of Public Law 93–344 [H. Doc. No. 95–26]; to the Committee on Appropriations and ordered to be printed.

300. A letter from the Comptroller General of the United States, transmitting his review of the deferrals of budget authority contained in the message from the President dated December 3, 1976 (House Document No. 95–4), pursuant to section 1014(c) of Public Law 93–344 [H. Doc. No. 95–27]; to the Committee on Appropriations and ordered to be printed.

301. A letter from the General Counsel, U.S. General Accounting Office, transmitting a report on the release of budget authority for the Legal Services Corporation, the recission of which was proposed by the President but not approved by the Congress; to the Committee on Appropriations.

302. A letter from the General Counsel, U.S. General Accounting Office, transmitting a report on the status of budget authority involved in three rescissions proposed by the President, but not approved by the Congress; to the Committee on Appropriations.

303. A letter from the General Counsel, U.S. General Accounting Office, transmitting a report on the status of budget authority involved in four rescissions proposed by the President, but not approved by the Congress; to the Committee on Appropriations.

304. A letter from the Comptroller General of the United States, transmitting a list of reports issued or released by the General Accounting Office during September 1976, pursuant to section 234 of Public Law 91–510; to the Committee on Government Operations.

305. A letter from the Comptroller General of the United States, transmitting a list of reports issued or released by the General Accounting Office during October 1976, pursuant to section 234 of Public Law 91–510; to the Committee on Government Operations.

306. A letter from the Comptroller General of the United States, transmitting a list of reports issued or released by the General Accounting Office during November 1976, pursuant to section 234 of the Legislative Reorganization Act of 1970; to the Committee on Government Operations.

307. A letter from the Comptroller General of the United States, transmitting a report assessing the performance of the Federal agencies in implementing internal audit systems; to the Committee on Government Operations.

308. A letter from the Comptroller General of the United States, transmitting a report on the audited accounts of the United States Capitol Historical Society for the year ended January 31, 1976, pursuant to section 451 of the Legislative Reorganization Act of 1970 (40 U.S.C. 193m–1); to the Committee on Government Operations.

309. A letter from the Comptroller General of the United States, transmitting covering needed improvement in the administration of repair contracts for the overhaul and repair of Government property; to the Committee on Government Operations.

310. A letter from the Comptroller General of the United States, transmitting a report recommending that the executive agencies provide the Congress with status reports which compare the current status of major civil projects with original congressional authorizations; to the Committee on Government Operations.

311. A letter from the Acting Comptroller General of the United States, transmitting a report and recommendation on the claims of William J. Elder and Stephen M. Owen against the United States, pursuant to 45 Stat. 413 (31 U.S.C. 236); to the Committee on the Judiciary.

312. A letter from the Comptroller General of the United States, transmitting a report on the recovery of costs incurred in training foreign military students; jointly to the Committees on Government Operations, Appropriations, and Armed Services.

313. A letter from the Comptroller General of the United States, transmitting a report on improving the management of Department of Defense industrial plant equipment; jointly to the Committees on Government Operations and Armed Services.

314. A letter from the Comptroller General of the United States, transmitting a report pointing out the potential for savings to the Department of Defense through the adoption of commercial jet-coach standards; jointly to the Committees on Government Operations and Armed Services.

315. A letter from the Comptroller General of the United States, transmitting a report discussing the utility of the industrial fund method of financing Defense industrial and commercial activities; jointly to the Committees on Government Operations and Armed Services.

316. A letter from the Comptroller General of the United States, transmitting a report discussing the National Defense Reserve Fleet's importance in the time of national emergency; jointly to the Committees on Government Operations and Armed Services.

317. A letter from the Comptroller General of the United States, transmitting a report describing problems pertaining to the treatment of emotionally disturbed and handicapped children under the Civilian Health and Medical Program of the Uniformed Services; jointly to the Committees on Government Operations and Armed Services.

318. A letter from the Acting Comptroller General of the United States, transmitting a report discussing the need for better management of Government facsimile communications equipment; jointly to the Committees on Government Operations and Armed Services.

319. A letter from the Comptroller General of the United States, transmitting a report showing that Department of Defense management action is needed to maximize the benefits of a new aircraft maintenance concept called reliability-centered maintenance; jointly to the Committees on Government Operations and Armed Services.

320. A letter from the Comptroller General of the United States, transmitting a report on alternatives in controlling Department of Defense manpower costs; jointly to the Committee on Government Operations and Armed Services.

321. A letter from the Comptroller General of the United States, transmitting a report on competitive negotiation versus formal advertising when contracting Navy ship repair and overhaul work; jointly to the Committees on Government Operations and Armed Services.

322. A letter from the Comptroller General of the United States, transmitting a report showing how the Department of Housing and Urban Development can improve its program to insure that tenants in subsidized housing projects are paying proper rents; jointly to the Committees on Government Operations, and Banking, Finance and Urban Affairs.

323. A letter from the Comptroller General of the United States, transmitting a review of the Operation Breakthrough program and the lessons learned about demonstrating new technology programs; jointly to the Committees on Government Operations, and Banking, Finance and Urban Affairs.

324. A letter from the Comptroller General of the United States, transmitting a report discussing inequities caused by the current formula used to allocate Community Development Block Grants by the Department of Housing and Urban Development; jointly to the Committees on Government Operations, and Banking, Finance and Urban Affairs.

325. A letter from the Comptroller General of the United States, transmitting a report summarizing the need for the Environmental Protection Agency to establish a health-monitoring program for laboratory employees; jointly to the Committees on Government Operations, and Education and Labor.

326. A letter from the Comptroller General of the United States, transmitting a report describing how the Department of Agriculture and the Agency for International Development disposed of commodities remaining from terminated Indochina economic assistance programs; jointly to the Committees on Government Operations, International Relations and Agriculture.

327. A letter from the Comptroller General of the United States, transmitting a report on the need to reduce food losses caused by storage, spillage and spoilage to better held developing countries, jointly to the Committees on Government Operations, International Relations, and Agriculture.

328. A letter from the Comptroller General

of the United States, transmitting the first report on world population growth and its impact on the quality of life in developing countries (Agency for International Development); jointly to the Committees on Government Operations and International Relations.

329. A letter from the Comptroller General of the United States, transmitting a report summarizing the problems in administering and enforcing immigration laws and the need for reassessing U.S. policy; jointly to the Committees on Government Operations and the Judiciary.

330. A letter from the Comptroller General of the United States, transmitting a report on the need for the U.S. Coast Guard to develop an effective recreational boating safety program; jointly to the Committees on Government Operations, and Merchant Marine and Fisheries.

331. A letter from the Comptroller General of the United States, transmitting a report assessing the progress in meeting objectives of the Coastal Zone Management Act of 1972; jointly to the Committees on Government Operations, and Merchant Marine and Fisheries.

332. A letter from the Comptroller General of the United States, transmitting a report on the long-range planning and analysis activities in selected Federal agencies; jointly to the Committees on Government Operations, Merchant Marine and Fisheries, and Science and Technology.

333. A letter from the Comptroller General of the United States, transmitting a report on the need for revising the civil service disability retirement law; jointly to the Committees on Government Operations, Post Office and Civil Service, and Education and Labor.

334. A letter from the Comptroller General of the United States, transmitting a report describing the Federal Highway Administrations progress in establishing highway safety programs; jointly to the Committees on Government Operations, and Public Works and Transportation.

335. A letter from the Comptroller General of the United States, transmitting a report describing the status of the Appalachian Development Highway System in West Virginia; jointly to the Committees on Government Operations, and Public Works and Transportation.

336. A letter from the Comptroller General of the United States, transmitting a report discussing ways to improve the detection of medically unfit civilian airmen by Federal Aviation Administration; jointly to the Committees on Government Operations, and Public Works and Transportation.

337. A letter from the Comptroller General of the United States, transmitting a report on Federal mass transit programs and the participation of private operators; jointly to the Committees on Government Operations, and Public Works and Transportation.

338. A letter from the Comptroller General of the United States, transmitting a report assessing the Federal Aviation Administration's development of an improved air-traffic-control system; jointly to the Committees on Government Operations, and Public Works and Transportation.

339. A letter from the Comptroller General of the United States, transmitting a report on the need for better water quality data collection and planning to justify the construction of advanced waste treatment facilities funded under the Federal Water Pollution Control Act Amendments of 1972; jointly to the Committees on Government Operations, and Public Works and Transportation.

340. A letter from the Comptroller General of the United States, transmitting a report on how the Interstate Commerce Commission can improve service to small shippers; jointly to the Committees on Government Operations, and Public Works and Transportation.

341. A letter from the Comptroller General of the United States, transmitting a report describing Federal efforts to develop a new short takeoff and landing aircraft for use in a short-haul air transportation system; jointly to the Committees on Government Operations, Public Works and Transportation, and Science and Technology.

342. A letter from the Comptroller General of the United States, transmitting a report on the economies available by designating the Lawrence Berkeley Laboratory computer facility as a Federal Scientific Data Processing Center; jointly to the Committees on Government Operations, and Science and Technology.

343. A letter from the Comptroller General of the United States, transmitting a report describing the evaluation, distribution, and monitoring of science education materials, developed through 10 projects supported by the National Science Foundation; jointly to the Committees on Government Operations, Science and Technology, and Education and Labor.

344. A letter from the Comptroller General of the United States, transmitting a report evaluating the reasonableness of a cost-benefit study the Internal Revenue Service made in support of a new computer system for tax administration; jointly to the Committees on Government Operations, and Ways and Means.

345. A letter from the Comptroller General of the United States, transmitting a report on the Social Security Administration's need for accurate Veterans' Administration and Railroad Retirement Board benefit data to compute supplemental security income payments; jointly to the Committees on Government Operations, and Ways and Means.

346. A letter from the Comptroller General of the United States, transmitting a report discussing alternatives to the present system of dairy import quotas; jointly to the Committees on Government Operations, Ways and Means, and Agriculture.

A bill to amend the Federal Aviation Act of 1958 in order to authorize free or reduced-rate transportation to handicapped persons and persons who are 65 years of age or older, to amend the Interstate Commerce Act to authorize free or reduced-rate transportation for persons who are 65 years of age or older, and to provide new and improved transportation programs for the handicapped and the elderly; to the Committee on Public Works and Transportation.

H.R. 70. A bill to establish the Airport Noise Curfew Commission and to define its functions and duties; to the Committee on Public Works and Transportation.

H.R. 71. A bill to amend the Fair Packaging and Labeling Act to require the disclosure by retail distributors of retail unit prices of consumer commodities, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 72. A bill to amend the Intergovernmental Cooperation Act of 1968 to improve intergovernmental relationships between the United States and the States and municipalities, and the economy and efficiency of government, by providing Federal cooperation and assistance in the establishment and strengthening of State and local offices of consumer protection; to the Committee on Government Operations.

H.R. 73. A bill to amend title 5, United States Code, to provide for the establishment of a special cost-of-living pay schedule containing increased pay rates for Federal employees in heavily populated cities and metropolitan areas to offset the increased cost of living, and for other purposes; to the Committee on Post Office and Civil Service.

H.R. 74. A bill to amend the Social Security Act to provide for a minimum annual income (subject to subsequent increases to reflect the cost of living) of $3,850 in the case of elderly individuals and $5,200 in the case of elderly couples; to the Committee on Ways and Means.

By Mr. DE LA GARZA:

H.R. 75. A bill to provide for furthering the conservation, protection and enhancement of the Nation's land, water, and related resources for sustained use, and for other purposes; to the Committee on Agriculture.

By Mr. FORD of Michigan (for himself, Mr. BROWN of California, Mr. CLAY, Mr. CONYERS, Mr. DENT, Mr. DIGGS, Mr. DINGELL, Mr. DRINAN, Mr. MEEDS, Mr. STARK, Mr. SEIBERLING, Mr. THOMPSON, Mr. TRAXLER, Mr. BRODHEAD, Mr. BLANCHARD, Mr. CARR, Mr. KILDEE, Mr. BONIOR, AND Mr. NEDZI):

H.R. 76. A bill to amend the Fair Labor Standards Act of 1938, to require prenotification to affected employees and communities of dislocation of business concerns, to provide assistance (including retraining) to employees who suffer employment loss through the dislocation of business concerns, to business concerns threatened with dislocation, and to affected communities, to prevent Federal support for unjustified dislocation, and for other purposes; jointly to the Committees on Education and Labor, and Banking, Finance, and Urban Affairs.

By Mr. THOMPSON:

H.R. 77. A bill to amend the National Labor Relations Act to strengthen the remedies and expedite the procedures under such act; to the Committee on Education and Labor.

By Mr. WAMPLER (for himself, Mr. FOLEY, Mr. DE LA GARZA, Mr. BERGLAND, Mr. JONES of North Carolina, Mr. MATHIS, Mr. BOWEN, Mr. WEAVER, Mr. BALDUS, Mr. MCHUGH, Mr. JENRETTE, Mr. THORNTON, Mr. SEBELIUS, Mr. FINDLEY, Mr. THONE, Mr. SYMMS, Mr. JOHNSON of Colorado, Mr. MADIGAN, Mr. BROWN, Mrs. HECKLER, Mr. JEFFORDS, Mr. KELLY, Mr. GRASSLEY, Mr. HAGEDORN, and Mr. MOORE):

H.R. 78. A bill to establish a national agricultural research policy advisory board, and other purposes; to the Committee on Agriculture.

By Mr. WAMPLER (for himself, Mr. TEAGUE, Mr. FITHIAN, Mr. JONES of Tennessee, Mr. PRESSLER, Mr. BRECKINRIDGE, Mr. RICHMOND, and Mr. COLEMAN):

H.R. 79. A bill to establish a national agricultural research policy advisory board, and for other purposes; to the Committee on Agriculture.

By Mr. WYLIE:

H.R. 80. A bill to amend the Congressional Budget Act of 1974 and the Budget and Accounting Act, 1921, to provide that Federal expenditures shall not exceed Federal revenues, except in time of war or economic necessity declared by the Congress; jointly, to the Committees on Rules, and Government Operations.

H.R. 81. A bill to reform the Food Stamp Act of 1964 by improving the provisions relating to eligibility, simplifying administration, and tightening accountability, and for other purposes, to the Committee on Agriculture.

H.R. 82. A bill to amend section 924 (relating to commission of Federal felonies with firearms) of title 18 of the United States Code to make applicable to a first conviction under that section of the rules for suspended or probationary sentences now applicable to school and subsequent convictions; to the Committee on the Judiciary.

By Mr. HARRIS (for himself, Mr. FISHER, and Mr. STEERS):

H.R. 83. A bill to provide for the establishment of an equitable rate structure for water delivered to the District of Columbia and to encourage water conservation in the District of Columbia, and for other purposes; jointly, to the Committees on the District of Columbia, and Public Works and Transportation.

By Mr. HARRIS (for himself, Mr. BRODHEAD, Mr. CONYERS, Mr. FITHIAN, Mr. FLORIO, Mr. GILMAN, Mr. HARRINGTON, Mr. HYDE, Mr. JENRETTE, Mr. KOCH, Mr. LEHMAN, Mr. MAGUIRE, Mr. MINETA, Mr. MITCHELL of Maryland, Mr. MOAKLEY, Mr. MOTTL, Mr. NOLAN, Mr. OTTINGER, Mr. PEPPER, Mr. RINALDO, Mr. ROE, Mr. ROSENTHAL, Mr. SOLARZ, Ms. SPELLMAN, and Mr. ZEFERETTI):

H.R. 84. A bill to amend the Internal Revenue Code of 1954 to allow a tax credit on houses or apartments for a portion of the real estate taxes paid or incurred by their landlords; to the Committee on Ways and Means.

By Mr. BLANCHARD (for himself, Mr. MINETA, Mr. LEVITAS, Mr. RUSSO, Mr. BRODHEAD, Mr. PRITCHARD, Mr. MOAKLEY, Mrs. LLOYD of Tennessee, Mr. OTTINGER, Mrs. HOLT, Ms. FENWICK, Mr. WHITEHURST, Mr. ZEFERETTI, Mr. NEAL, Mr. GRADISON, Mr. JONES of Tennessee, Mr. HANNAFORD, Mr. FUQUA, Mr. SEIBERLING, Mr. SANTINI, Mr. EDGAR, Mr. CLEVELAND, Mr. TRAXLER, Mr. KOCH, and Mr. WHITLEY):

H.R. 85. A bill to require authorizations of new budget authority for Government programs at least every 5 years, to establish a procedure for zero-base review of Government programs every 5 years, and for other purposes; to the Committee on Rules.

By Mr. BLANCHARD (for himself, Mr. MINETA, Mr. GILMAN, Mr. RAHALL, Ms. KEYS, Mr. BEDELL, Mr. MILFORD, Mr. FRENZEL, Mr. AUCOIN, Mr. LAFALCE, Mr. PEPPER, Mr. DUNCAN of Tennessee, Mr. ICHORD, Mrs. SPELLMAN, Mr. SIMON, Mr. MITCHELL of New York, Mr. AMBRO, Mr. DRINAN, Mr. BEARD of Rhode Island, Mr. BLOUIN, Mr. D'AMOURS, Mr. DODD, Mr. FITHIAN, Mr. HUBBARD, and Mr. HUGHES):

H.R. 86. A bill to require authorizations of new budget authority for Government programs at least every 5 years, to establish a procedure for zero-base review of Government programs every 5 years, and for other purposes; to the Committee on Rules.

By Mr. BLANCHARD (for himself, Mr. MINETA, Mr. CORNELL, Mr. LLOYD of California, Mr. MILLER of California, Mr. PATTERSON of California, Mr. WIRTH, Mr. CHARLES WILSON of Texas, Mr. CARNEY, Mr. HILLIS, Mr. COHEN, Mr. HOLLAND, Mr. WAXMAN, Mr. LEHMAN, Mr. BENNETT, Mr. GEPHARDT, Mr. DELLUMS, Mr. NOWAK, Mr. JACOBS, and Mr. CARR):

H.R. 87. A bill to require authorizations of new budget authority for Government programs at least every 5 years, to establish a procedure for zero-base review of Government programs every 5 years, and for other purposes; to the Committee on Rules.

By Mr. EDWARDS of Alabama:

H.R. 88. A bill to repeal the earnings limitation of the Social Security Act; to the Committee on Ways and Means.

By Mr. BENNETT:

H.R. 89. A bill to amend the National Security Act of 1947 to establish procedures and standards for the classification and declassification of sensitive information and unauthorized disclosure of such information or material, and for other purposes; to the Committee on Armed Services.

By Mr. BALDUS:

H.R. 90. A bill to provide price support for milk at not less than 90 percent of the parity price therefor, and for other purposes; to the Committee on Agriculture.

By Mr. BENNETT (for himself and Mr. STEIGER):

H.R. 91. A bill to amend title 10, United States Code, to regulate the discharge of members of the Armed Forces, and for other

purposes; to the Committee on Armed Services.

By Mr. PEPPER (for himself and Mr. KOCH):

H.R. 92. A bill to amend the Social Security Act to improve and make more effective the provision of nursing home services under the medicare and medicaid programs, and for other purposes; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. KASTENMEIER:

H.R. 93. A bill to promote competition in the production of coal, uranium, and geothermal power; to the Committee on the Judiciary.

By Mr. EILBERG:

H.R. 94. A bill to establish certain rules with respect to the appearance of witnesses before grand juries in order to better protect the rights and liberties of such witnesses, to require notice to a grand jury of its rights and duties, to provide for independent inquiries by grand juries, to require periodic reports to Congress, and for other purposes; to the Committee on the Judiciary.

By Mr. ROGERS:

H.R. 95. A bill to amend title II of the Social Security Act to increase to $6,000 the amount of outside earnings which (subject to further increases under the automatic adjustment provisions) is permitted an individual each year without any deductions from benefits thereunder; to the Committee on Ways and Means.

By Mr. MONTGOMERY (for himself and Mrs. HOLT):

H.R. 96. A bill to amend titles 10 and 32, United States Code, to authorize additional medical and dental care and other related benefits for reservists and members of the National Guard, under certain conditions, and for other purposes; to the Committee on Armed Services.

By Mr. MONTGOMERY (for himself, Mr. NICHOLS, Mr. DICKINSON, and Mrs. HOLT):

H.R. 97. A bill to amend section 1448 of title 10, United States Code, to provide survivor benefits in case of death of certain members or former members of the Armed Forces who die before becoming entitled to retired pay for nonregular service, and for other purposes; to the Committee on Armed Services.

By Mr. MONTGOMERY (for himself, Mr. DICKINSON, and Mr. HOLT):

H.R. 98. A bill to amend section 1333 of title 10, United States Code, relating to retirees point credit for nonregular service; to the Committee on Armed Services.

By Mr. MONTGOMERY (for himself, Mr. NICHOLS, and Mrs. HOLT):

H.R. 99. A bill to amend chapter 67 of title 10, United States Code (relating to retired pay for nonregular service), to authorize payment to persons otherwise eligible, at age 55, and in reduced amounts to such persons who are at least 50 but less than 55 years of age; to the Committee on Armed Services.

By Mr. MONTGOMERY (for himself and Mrs. HOLT):

H.R. 100. A bill to amend title 10, United States Code, to authorize retirement of enlisted members of the Army and of the Air Force with 20 years of active Federal service; to the Committee on Armed Services.

By Mr. ROONEY:

H.R. 101. A bill to establish the Office of General Counsel to the Congress, and for other purposes; to the Committee on House Administration.

H.R. 102. A bill to create a national landlord and tenant commission, to establish housing courts, and to define or to provide therefor the rights, obligations, and liabilities of landlords and tenants so as to regulate the activities of the commercial rental housing operations which affect the stability of the economy, the amount of a person's real income, the travel of goods and people in commerce, and the general welfare of all citizens of this Nation; to the Committee on Banking, Finance and Urban Affairs.

H.R. 103. A bill to amend section 223 of the Communictions Act of 1934 to prohibit harassing telephone calls made to collect alleged debts, and to inform the public of their right to be free from harassing, coercive, abusive, and obscene telephone calls; to the Committee on Interstate and Foreign Commerce.

H.R. 104. A bill to establish and prescribe the duties of a Federal boxing commission for the purpose of insuring that the channels of interstate commerce are free from false or fraudulent descriptions or depictions of professional boxing contests; to the Committee on Interstate and Foreign Commerce.

H.R. 105. A bill to amend the Interstate Commerce Act to extend coverage of such act to certain motor vehicles used to transport schoolchildren and teachers, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. ROONEY (for himself and Mr. ECKHARDT):

H.R. 106. A bill to amend the Interstate Commerce Act to provide improved enforcement of motor carrier safety regulations; to protect motor carrier employees against discrimination for reporting violations of such regulations; and for other purposes; to the Committee on Public Works and Transportation.

By Mr. ROONEY:

H.R. 107. A bill to make Flag Day a legal public holiday, and for other purposes; to the Committee on Post Office and Civil Service.

H.R. 108. A bill to protect collectors of antique glassware against the manufacture in the United States or the importation of imitations of such glassware; to the Committee on Interstate and Foreign Commerce.

H.R. 109. A bill to improve existing tertiary eye centers, to examine the delivery of eye care to the general public, and to study the feasibility of implementing a system of tertiary eye care centers throughout the United States; to the Committee on Interstate and Foreign Commerce.

H.R. 110. A bill to amend chapter 27 of title 49 of the United States Code to provide that compressed gas cylinders shipped in interstate commerce be inspected in the United States; to the Committee on Interstate and Foreign Commerce.

By Mr. YOUNG of Georgia:

H.R. 111. A bill to authorize the establishment of the Chattahoochee River National Recreation Area in the State of Georgia, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. BURLESON of Texas (for himself, Mr. ARMSTRONG, and Mr. JONES of Oklahoma):

H.R. 112. A bill to amend section 4940 of the Internal Revenue Code of 1954 with respect to private operating foundations the principal activity of which is the operation of long-term care facilities; to the Committee on Ways and Means.

By Mr. COHEN:

H.R. 113. A bill to provide for quality assurance and utilization control in home health care under the medicare, medicaid, and social services programs in accordance with a plan to be developed by a commission specifically established for that purpose; jointly, to the Committee on Ways and Means, and Interstate and Foreign Commerce.

By Mr. CORNELL (for himself, Mr. EDGAR, Mr. MCHUGH, Mr. HUGHES, Mr. MILFORD, Mr. MURPHY of New York, Mr. MOAKLEY and Mr. FLOOD):

H.R. 114. A bill to amend the Internal Revenue Code of 1954 to allow persons covered by certain other retirement plans to establish personal savings for retirement; to the Committee on Ways and Means.

By Mr. FINDLEY (for himself, Mr. CORMAN, Mr. FISH, Mr. FLOOD, Mr. HANNAFORD, Mr. HARRINGTON, Mrs. KEYS, Mr. KINDNESS, Mr. KOCH, Mr. LENT, Mr. MCCLORY, Mr. MARTIN, Mr. MOAKLEY, Mr. MURTHA, Mr. NEAL, Mr. ROE, Mr. SEBELIUS, Mr. WAXMAN, and Mr. WIRTH):

H.R. 115. A bill to terminate age discrimination in employment; to the Committee on Education and Labor.

By Mr. FLOWERS:

H.R. 116. A bill amending title 5 of the United States Code to improve agency rulemaking by expanding the opportunities for public participation, by creating procedures for congressional review of agency rules, and by expanding judicial review, and for other purposes; to the Committee on the Judiciary.

By Mr. HYDE:

H.R. 117. A bill to amend title 18 of the United States Code for the purpose of prohibiting the sale of children in interstate or foreign commerce; to the Committee on the Judiciary.

By Mr. JONES of Oklahoma:

H.R. 118. A bill to amend the Walsh-Healey Act to permit employment not in excess of 10 hours in any 1 day and not in excess of 4 days in any 1 week; jointly, to the Committees on Education and Labor, and the Judiciary.

By Mr. MIKVA:

H.R. 119. A bill to prohibit the importation, manufacture, sale, purchase, transfer, receipt, or transportation of handguns, except for or by members of the Armed Forces, law enforcement officials, and, where authorized, licensed importers, manufacturers, dealers, and pistol clubs; to the Committee on the Judiciary.

By Mr. MONTGOMERY (for himself, and Mr. BEARD of Tennessee):

H.R. 120. A bill to amend chapter 49 of title 10, United States Code, to prohibit union organization in the Armed Forces, and for other purposes; to the Committee on Armed Services.

By Mr. SARASIN:

H.R. 121. A bill to provide for economic growth and job creation through a reordering of Government priorities and reorganization of Government programs; tax reform for individuals, small businesses, and corporations; and amendment of existing employment and training programs; and for other purposes; jointly to the Committees on Rules, Government Operations, Ways and Means, and Education and Labor.

By Mr. WRIGHT:

H. Res. 9. A resolution creating a Select Committee on Assassinations; to the Committee on Rules.

By Mr. MEEDS (for himself, Mr. BONKER, Mr. DICKS, Mr. PRITCHARD, Mr. FOLEY, and Mr. MCCORMACK):

H.J. Res. 1. Joint resolution to provide for the establishment of a Commission to examine the effect of Northwest Indian Off-Reservation Treaty Fishing Rights, and for other purposes; jointly, to the Committees on Interior and Insular Affairs, and Merchant Marine and Fisheries.

By Mr. WYLIE:

H.J. Res. 10. Joint resolution to designate March 16, 1977, as "James Madison Day"; to the Committee on Post Office and Civil Service.

H.J. Res. 11. Joint resolution to designate January 13, 1977 as "Religious Freedom Day"; to the Committee on Post Office and Civil Service.

H.J. Res. 12. Joint resolution authorizing the President to proclaim the week beginning October 2, 1977, and ending October 8, 1977, as "National Volunteer Firemen Week"; to the Committee on Post Office and Civil Service.

By Mr. ROBINSON (for himself and Mr. MOORHEAD of California):

H.J. Res. 13. Joint Resolution to authorize and request the President to issue a proclamation designating May 13 of each year as "American Business Day"; to the Committee on Post Office and Civil Service.

By Mr. BAFALIS (for himself, Mr. ABDNOR, Mr. ARMSTRONG, Mr. BEARD of Tennessee, Mr. BURGENER, Mr. DEL CLAWSON, Mr. COLLINS of Texas, Mr. GRASSLEY, Mr. HAGEDORN, Mr. HARSHA, Mrs. HOLT, Mr. KETCHUM, Mr. LAGOMARSINO, Mr. LOTT, Mr. LUJAN, Mr. MCDONALD, Mr. MANN, Mr. MONTGOMERY, Mr. MOORHEAD of California, Mr. ROBINSON, Mr. ROUSSELOT, Mr. RUNNELS, Mr. SNYDER, Mr. SYMMS, and Mr. WINN):

H.J. Res. 14. Joint resolution proposing an amendment to the Constitution of the United States to provide that appropriations made by the United States shall not exceed its revenues, except in time of war or national emergency; and to provide for the systematic paying back of the national debt; to the Committee on the Judiciary.

By Mr. BRINKLEY:

H.J. Res. 15. Joint resolution proposing an amendment to the Constitution of the United States to provide for the special election of a Vice President in cases of vacancy in that office; to the Committee on the Judiciary.

H.J. Res. 16. Joint resolution proposing an amendment to the Constitution of the United States relating to the tenure in office of Supreme Court Judges; to the Committee on the Judiciary.

H.J. Res. 17. Joint resolution to designate Christmas week as Blood Donor Week; to the Committee on Post Office and Civil Service.

By Mr. FRENZEL:

H.J. Res. 18. Joint resolution proposing an amendment to the Constitution of the United States to limit the tenure of office of Senators and Representatives; to the Committee on the Judiciary.

By Mr. MOTTL:

H.J. Res. 19. Joint resolution proposing an amendment to the Constitution of the United States to prohibit compelling attendance in schools other than the one nearest the residence and to insure equal educational opportunities for all students wherever located; to the Committee on the Judiciary.

By Mr. SMITH of Iowa:

H.J. Res. 20. Joint resolution proposing an amendment to the Constitution of the United States relating to the nomination of individuals for election to the Offices of the President and Vice President of the United States; to the Committee on the Judiciary.

By Mr. TEAGUE:

H.J. Res. 21. Joint resolution proposing an amendment to the Constitution of the United States relating to the busing or involuntary assignment of students; to the Committee on the Judiciary.

By Mr. BOB WILSON:

H.J. Res. 22. Joint resolution designating the second Sunday in June of each year as National Pet Remembrance Day; to the Committee on Post Office and Civil Service.

By Mr. ROUSSELOT (for himself, Mr. MCDONALD, and Mr. SYMMS):

H.J. Res. 23. Joint resolution proposing an amendment to the Constitution of the United States relative to abolishing personal income, estate, and gift taxes and prohibiting the U.S. Government from engaging in business in competition with its citizens; to the Committee on the Judiciary.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

1. By the SPEAKER: A memorial of the Senate of the Commonwealth of Massachusetts, relative to the cost of education in the City of Boston Public School System; to the Committee on Education and Labor.

2. Also, a memorial of the Legislature of the State of California, relative to the exchange of public lands; to the Committee on Interior and Insular Affairs.

3. Also, a memorial of the Legislature of the Territory of Guam, relative to the U.N. resolution concerning Guam's political status and the military presence on Guam; to the Committee on Interior and Insular Affairs.

4. Also, a memorial of the Senate of the Commonwealth of Massachusetts, relative to the Arab boycott; to the Committee on Interstate and Foreign Commerce.

5. Also, a memorial of the Senate of the Commonwealth of Massachusetts, relative to the Public Safety Officers Benefit Act of 1976; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

1. By the SPEAKER: Petition of Mary C. Torres, Keaau, Hawaii, and others, relative to foreign sugar quotas; to the Committee on Agriculture.

2. Also, petition of John R. Eggen, Jacksonville, Fla., relative to charter provisions of the Veterans of Foreign Wars; to the Committee on Armed Services.

3. Also, petition of the Municipal Assistance Corporation for the City of New York, State of New York, relative to the city's financial crises; to the Committee on Banking, Currency and Housing.

4. Also, petition of the Arkansas Legislative Council, Little Rock, Ark., relative to publicly supported retirement plans; to the Committee on Education and Labor.

5. Also, petition of the National Indian Education Association, Minneapolis, Minn., relative to extending the Indian Education Act; to the Committee on Education and Labor.

6. Also, petition of Jessie D. McDonald, Nashville, Tenn., relative to the primary and general election in the 5th Congressional District in Tennessee; to the Committee on House Administration.

7. Also, petition of Harrison E. Livingstone, Baltimore, Md., relative to entitlement to press credentials for the House Press Gallery; to the Committee on House Administration.

8. Also, petition of the Fourth Northern Mariana Islands Legislature, Susupe, Saipan, Mariana Islands, Trust Territory of the Pacific Islands, relative to commending U.S. Senator Hiram L. Fong; to the Committee on Interior and Insular Affairs.

9. Also, petition of the speaker of the Marshall Islands Nitijela Legislature, and others, Majuro, Marshall Islands, Trust Territory of the Pacific Islands, relative to Trust Territory Medical Fee Schedules; to the Committee on Interior and Insular Affairs.

10. Also, petition of the Lithuanian American Council, Inc., Chicago, Ill., relative to the annexation of Lithuania, Latvia and Estonia by the Soviet Union; to the Committee on International Relations.

11. Also, petition of the President of the Legislative Assembly of the Turkish Federated State of Cyprus dispute; to the Committee on International Relations.

12. Also, petition of Vincent J. Donahue, Cocoa Beach, Fla., relative to U.S. servicemen missing in Southeast Asia; to the Committee on International Relations.

13. Also, petition of the Allegheny Chamber of Commerce, Pittsburgh, Pa., relative to the Consumer Communications Reform Act of 1976; to the Committee on Interstate and Foreign Commerce.

14. Also, petition of the Nebraska Medical Association, Lincoln, Nebr., relative to the National Health Planning and Resources Development Act of 1974; to the Committee on Interstate and Foreign Commerce.

15. Also, petition of Oklahoma Society of Professional Engineers, Oklahoma City, Okla., relative to divestiture of the petroleum industry and the Consumer Communications Reform Act of 1976; to the Committee on Interstate and Foreign Commerce.

16. Also, petition of the Georgia Association of Chiefs of Police, Inc., Atlanta, Ga., relative to the Federal Bureau of Investigation; to the Committee on the Judiciary.

17. Also, petition of the Ladies' Auxiliary, Ancient Order of Hibernians, Burlington, N.J., relative to the rights of citizens of the United States; to the Committee on the Judiciary.

18. Also, petition of Lithuanian Workers Society, Woodhaven, N.Y., relative to Lithuanian immigration; to the Committee on the Judiciary.

19. Also, petition of the Maui County Council, Wailuku, Hawaii, relative to prayer in public schools; to the Committee on the Judiciary.

20. Also, petition of Hartleigh Dillman, relative to redress of grievances; to the Committee on the Judiciary.

21. Also, petition of Aden D. Kauffman, Dundee, Ohio, relative to Redress of Grievance; to the Committee on the Judiciary.

22. Also, petition of City Council, Norton, Ohio, relative to the Local Public Works Employment Act of 1976; to the Committee on Public Works and Transportation.

23. Also, petition of the Joint Commission on Accreditation of Hospitals, Chicago, Ill., relative to the Department of Health, Education, and Welfare annual report on medicare validation surveys of hospitals accredited by the Joint Commission on Accreditation of Hospitals; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

REGULATION OF LOBBYING ACT

In compliance with Public Law 601, 79th Congress, title III, Regulation of Lobbying Act, section 308(b), which provides as follows:

(b) All information required to be filed under the provisions of this section with the Clerk of the House of Representatives and the Secretary of the Senate shall be compiled by said Clerk and Secretary, acting jointly, as soon as practicable after the close of the calendar quarter with respect to which such information is filed and shall be printed in the CONGRESSIONAL RECORD.

The Clerk of the House of Representatives and the Secretary of the Senate jointly submit their report of the compilation required by said law and have included all registrations and quarterly reports received.

REGISTRATIONS*

*All alphanumeric characters and monetary amounts refer to receipts and expenditures on page 2, paragraphs D and E of the Quarterly Report Form.

The following registrations were submitted for the third calendar quarter 1976:

(NOTE.—The form used for report is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective letter and number.)

FILE ONE COPY WITH THE SECRETARY OF THE SENATE AND FILE TWO COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19_____ ◄

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th
(Mark one square only)				

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:

(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)

(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".

(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:

(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.

(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:

1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (*a*) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (*b*) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(*a*) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§ 302(e).

(*b*) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).

(*c*) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, ☐ place an "X" in the box at the left, so that this Office will no longer expect to receive Reports.

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (*a*) Short titles of statutes and bills; (*b*) House and Senate numbers of bills, where known; (*c*) citations of statutes, where known; (*d*) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (*a*) Description, (*b*) quantity distributed; (*c*) date of distribution, (*d*) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out item "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.◄

*All alphanumeric characters and monetary amounts refer to receipts and expenditures on page 2, paragraphs D and E of the Quarterly Report Form.

The following quarterly reports were submitted for the third calendar quarter 1976:

(NOTE.—The form used for report is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective letter and number.)

FILE ONE COPY WITH THE SECRETARY OF THE SENATE AND FILE TWO COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19_____ ◄

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th
(Mark one square only)				

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:

(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)

(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".

(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:

(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.

(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:

1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (a) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (b) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(a) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§ 302(e).

(b) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).

(c) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, ☐ place an "X" in the box at the left, so that this Office will no longer expect to receive Reports.

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (a) Short titles of statutes and bills; (b) House and Senate numbers of bills, where known; (c) citations of statutes, where known; (d) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (a) Description, (b) quantity distributed; (c) date of distribution, (d) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out item "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.◄

AFFIDAVIT

[Omitted in printing]

PAGE 1◄

COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

NOTE ON ITEM "D."—(a) *In General.* The term "contribution" includes *anything of value.* When an organization or individual uses printed or duplicated matter in a campaign attempting to influence legislation, money received by such organization or individual—for such printed or duplicated matter—is a "contribution." "The term 'contribution' includes a gift, subscription, loan, advance, or deposit of money, or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make a contribution"—Section 302(a) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN EMPLOYER.—(i) *In General.* Item "D" is designed for the reporting of all receipts from which expenditures are made, or will be made, in accordance with legislative interests.

(ii) *Receipts of Business Firms and Individuals.*—A business firm (or individual) which is subject to the Lobbying Act by reason of expenditures which it makes in attempting to influence legislation—but which has no funds to expend except those which are available in the ordinary course of operating a business not connected in any way with the influencing of legislation—will have no receipts to report, even though it does have expenditures to report.

(iii) *Receipts of Multipurpose Organizations.*—Some organizations do not receive any funds which are to be expended solely for the purpose of attempting to influence legislation. Such organizations make such expenditures out of a general fund raised by dues, assessments, or other contributions. The percentage of the general fund which is used for such expenditures indicates the percentage of dues, assessments, or other contributions which may be considered to have been paid for that purpose. Therefore, in reporting receipts, such organizations may specify what that percentage is, and report their dues, assessments, and other contributions on that basis. However, each contributor of $500 or more is to be listed, regardless of whether the contribution was made solely for legislative purposes.

(c) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE.—(i) *In General.* In the case of many employees, all receipts will come under Items "D 5" (received for services) and "D 12" (expense money and reimbursements). In the absence of a clear statement to the contrary, it will be presumed that your employer is to reimburse you for all expenditures which you make in connection with legislative interests.

(ii) *Employer as Contributor of $500 or More.*—When your contribution from your employer (in the form of salary, fee, etc.) amounts to $500 or more, it is not necessary to report such contribution under "D 13" and "D 14," since the amount has already been reported under "D 5," and the name of the "employer" has been given under Item "B" on page 1 of this report.

D. RECEIPTS (INCLUDING CONTRIBUTIONS AND LOANS):

Fill in every blank. If the answer to any numbered item is "None," write "None" in the space following the number.

Receipts (other than loans)

1. $_____Dues and assessments
2. $_____Gifts of money or anything of value
3. $_____Printed or duplicated matter received as a gift
4. $_____Receipts from sale of printed or duplicated matter
5. $_____Received for services (e.g., salary, fee, etc.)

6. $_____TOTAL for this Quarter (Add items "1" through "5")
7. $_____Received during previous Quarters of calendar year

8. $_____TOTAL from Jan. 1 through this Quarter (Add "6" and "7")

Loans Received

"The term 'contribution' includes a . . . *loan* . . ."—Sec. 302(a).

9. $_____TOTAL now owed to others on account of loans
10. $_____Borrowed from others during this Quarter
11. $_____Repaid to others during this Quarter

12. $_____"Expense money" and Reimbursements received this Quarter

Contributors of $500 or more
(from Jan. 1 through this Quarter)

13. Have there been such contributors?
Please answer "yes" or "no": _____

14. In the case of each contributor whose contributions (including loans) during the "period" from January 1 through the last days of this Quarter total $500 or more:

Attach hereto plain sheets of paper, approximately the size of this page, tabulate data under the headings "Amount" and "Name and Address of Contributor"; and indicate whether the last day of the period is March 31, June 30, September 30, or December 31. Prepare such tabulation in accordance with the following example:

Amount	*Name and Address of Contributor* ("*Period*" from Jan. 1 through _____, 19____)
$1,500.00	John Doe, 1621 Blank Bldg., New York, N.Y.
$1,785.00	The Roe Corporation, 2511 Doe Bldg., Chicago, Ill.
$3,285.00	TOTAL

NOTE ON ITEM "E".—(a) *In General.* "The term 'expenditure' includes a payment, distribution, loan, advance, deposit, or gift of money or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make an expenditure"—Section 302(b) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE. In the case of many employees, all expenditures will come under telephone and telegraph (Item "E 6") and travel, food, lodging, and entertainment (Item "E 7").

E. EXPENDITURES (INCLUDING LOANS) in connection with legislative interests:

Fill in every blank. If the answer to any numbered item is "None," write "None" in the spaces following the number.

Expenditures (other than loans)

1. $_____Public relations and advertising services
2. $_____Wages, salaries, fees, commissions (other than item "1")
3. $_____Gifts or contributions made during Quarter
4. $_____Printed or duplicated matter, including distribution cost
5. $_____Office overhead (rent, supplies, utilities, etc.)
6. $_____Telephone and telegraph
7. $_____Travel, food, lodging, and entertainment
8. $_____All other expenditures

9. $_____TOTAL for this Quarter (Add "1" through "8")
10. $_____Expended during previous Quarters of calendar year

11. $_____TOTAL from January 1 through this Quarter (Add "9" and "10")

Loans Made to Others

"The term 'expenditure' includes a . . . *loan* . . ."—Sec. 302(b).

12. $_____TOTAL now owed to person filing
13. $_____Lent to others during this Quarter
14. $_____Repayment received during this Quarter

15. Recipients of Expenditures of $10 or More
In the case of expenditures made during this Quarter by, or on behalf of the person filing: Attach plain sheets of paper approximately the size of this page and tabulate data as to expenditures under the following heading: "Amount," "Date or Dates," "Name and Address of Recipient," "Purpose." Prepare such tabulation in accordance with the following example:

Amount	*Date or Dates—Name and Address of Recipient—Purpose*
$1,750.00	7–11: Roe Printing Co., 3214 Blank Ave., St. Louis, Mo.—Printing and mailing circulars on the "Marshbanks Bill."
$2,400.00	7–15, 8–15, 9–15: Britten & Blaten, 3127 Gremlin Bldg., Washington, D.C.—Public relations service at $800.00 per month.
$4,150.00	TOTAL

A. Action for Legal Rights, 2030 M Street NW., Room 300, Washington, D.C. 20037.
E. (9) $48.30.

A. Ad Hoc Coalition for Low and Moderate Income Housing, 1800 M Street NW., Suite 400 South, Washington, D.C. 20036.
D. (6) $8,850. E. (9) $12,361.11.

A. Bruce Adams, 2030 M Street NW., Washington, D.C. 20036.
B. Common Cause, 2030 M Street NW., Washington, D.C. 20036.

QUARTERLY REPORTS*

*All alphanumeric characters and monetary amounts refer to receipts and expenditures on page 2, paragraphs D and E of the Quarterly Report Form.

The following reports for the second calendar quarter of 1976 were received too late to be included in the published reports for that quarter:

FILE ONE COPY WITH THE SECRETARY OF THE SENATE AND FILE TWO COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19_____ ←

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th
(Mark one square only)				

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:
(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)
(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".
(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:
(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.
(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:
1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (a) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (b) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(a) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§ 302(e).
(b) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).
(c) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, ☐ place an "X" in the box at the left, so that this Office will no longer expect to receive Reports.

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (a) Short titles of statutes and bills; (b) House and Senate numbers of bills, where known; (c) citations of statutes, where known; (d) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (a) Description, (b) quantity distributed; (c) date of distribution, (d) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out item "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report. ←

EXTENSIONS OF REMARKS

IRS REGULATIONS ON TUITION

HON. NEWTON I. STEERS, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. STEERS. Mr. Speaker, on November 2, 1976, the IRS issued proposed regulations that would treat tuition remitted by an educational institution on behalf of a student who is a dependent of a faculty member as prima facie compensation taxable to the faculty member, rather than as a scholarship to the dependent, excludable from income. These regulations came as a total surprise to the academic community which had no reason to anticipate a unilateral action by the Internal Revenue Service in a matter which has had both congressional and IRS approval for 22 years.

It is clear that the effect of the regulations would be to destroy tuition remission programs while the return to the Treasury would be minimal—estimated at less than $5 million. In addition, if the 27,000 students currently enrolled in accredited institutions under tuition remis-

sion programs were to apply next year for basic education opportunity grants—and a significant number of these same students would indeed be eligible for BOGS's—the cost to the Federal Government would be approximately $45 million.

This situation coupled with the existing financial burdens on institutions of higher learning will most certainly prove intolerable. I am, therefore, introducing a measure to provide that these tuition-remission programs of higher education will be treated as scholarships and as such will not be taxable.

Tuition exchange programs originated in large part to remedy the inequities caused by the existence of a large number of all-male and all-female colleges and universities. For example, it seemed unfair that the son, but not the daughter, of a faculty member at an all-male institution would be ineligible for scholarship.

There are approximately 1,000 public and private colleges and universities throughout the United States with some type of tuition-remission program. The three variations are:

First. Tuition waiver, which provides for the waiving of tuition at the institution for faculty and/or all other employees of the institution, their dependent children, and their dependent spouses;

Second. Tuition exchange, which provides for the waiving of tuition for faculty and dependent children at approximately 150 institutions which are associated with Tuition Exchange, Inc., a nonprofit corporation; and

Third. Tuition grants, which provide a grant to the dependent children of faculty and/or all other employees of the institution who are admitted to accredited institutions.

Under my bill, all three forms of tuition-remission enumerated above would be treated as an amount received as scholarship.

Although there has apparently been no study of the potential impact of the proposed regulations, it is probable that they will generate little or no revenue, while placing severe burdens on educational institutions, faculty, and students.

It is my understanding that Chairman PERKINS of the House Education and Labor Committee has voiced his objections to the implementation of these regulations in a letter to Chairman ULLMAN of the House Ways and Means Committee.

I am hopeful that this measure will move swiftly toward passage before it places an inequitable and most unfair burden on our institutions of higher learning.

PETER LISAGOR

HON. JOHN J. RHODES

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. RHODES. Mr. Speaker, on December 10, 1976, the Nation lost one of the best reporters it has been my privilege to know. Peter Lisagor's death has saddened all his friends who came to know him, respect him, enjoy his humor and sometimes fear his acute incisiveness.

Most of us in public life do not like to admit that we care greatly about what the press thinks; and mainly we do not. But there are exceptions and, for many of us, Peter Lisagor was a prime exception. If he did not respond to a particular line of reasoning, or react with enthusiasm to a particular proposal, it was usually a good indication that the thought or the proposal had little merit.

It was very obvious to those of us who had occasion to attend morning breakfast sessions with reporters, a Washington tradition, that Peter Lisagor had a profound effect on the thinking of his colleagues in the press. He was a true leader in his field.

Those morning sessions were brightened frequently by Peter's sharp wit and congenial personality. The laughter he provoked time and again was one of his great gifts to us, and the separate instances of his humor are too numerous to recount. But one example comes to mind. I was explaining to the reporters the pitch that congressional Republicans would be making to the voters in the upcoming campaign, a case predicated on public displeasure with the performance of a Congress dominated by one party for over two decades. I concluded my explanation by saying:

Now I realize that my proposition may be a bit too simple for such a sophisticated group as this one . . .

I was cut off in midsentence by Peter Lisagor, seated across the table from me.

But not for those peasants out there in the country!

Probably the most beautiful thing about Peter Lisagor in a professional sense was that he would never allow those of us in higher office to become "too big for our britches" or take ourselves too seriously. He had a masterful talent for bringing us all back to reality whenever we were in need of the trip.

Those of us who knew him shall miss him profoundly for the rest of our days.

RECALCULATION OF RETIRED OR RETAINER PAY TO REFLECT LATER ACTIVE DUTY

HON. JAMES T. BROYHILL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. BROYHILL. Mr. Speaker, I am introducing again today legislation that revises the rule for computing retired or retainer pay to reflect later active duty service. I have been a sponsor of this legislation since 1971 and I am proud to say that during the 94th Congress, this bill received the support of the full Armed Services Committee. This legislation is directed to only a very small number of persons and it will correct an inequity that has existed since 1966.

During the peak of the Vietnam conflict, men experienced in combat techniques were desperately needed to train young men being sent into combat. Therefore, the Navy and the Marine Corps sent letters inviting several thousand selected men to return on active duty. Most of these men had combat experience and outstanding prior military records. In return for leaving their communities and returning to active duty, these men were promised, in writing, by both the Navy and Marine Corps that—

Upon your future separation from active duty, your retainer pay will be recomputed using the current pay scales and crediting your additional active service.

For example, a constituent of mine served from 1943 until 1962. He was asked to return on active duty in 1966. He served for a second time until his retirement in 1971, devoting over 25 years of service to his country. It was not until after he retired for the second time that he learned that the promise made to him could not be kept.

This legislation applies to a small group of retirees who served a minimum of 2 years during the Vietnam conflict after their first retirement. This legislation is a simple and equitable bill and certainly not a costly one.

Several men returned to active duty to serve their country for 2 years in good faith when they were needed. They were promised in writing that their entitlement to retired pay would be on the basis of their latest active duty. This promise was not in accordance with the law. By passing this legislation, we would restore the faith of these brave Americans who helped this country when it was in need.

This legislative proposal recognizes the contribution of these men and it meets every test of fairness and good conscience. It will restore in the minds of this small number of men that their government is as good as its word. I am hopeful that the legislation can be considered and passed early in this session of the Congress.

LEGISLATION TO PERMIT ALIEN RESIDENTS OF THE UNITED STATES TO REGISTER AIRCRAFT IN THIS COUNTRY

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. ANDERSON of California. Mr. Speaker, under present law, persons not citizens of the United States cannot register aircraft in the United States. Section 501(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1401) makes it un-

lawful for any person to operate or navigate any aircraft eligible for registration if such aircraft is not registered by its owner, or to operate or navigate within the United States any aircraft not eligible for registration. Section 501(b) limits eligibility to: First, those aircraft owned by a citizen of the United States; second, those aircraft not registered under the laws of any foreign country; and third, those aircraft of the Federal Government, or of a State, territory, or possession of the United States, or the District of Columbia, or of a political subdivision thereof.

A foreign national can own and operate an aircraft within the United States provided it is registered in another country and provided that person complies with any permits, orders, or regulations issued by the Civil Aeronautics Board pursuant to section 1108(b) of the Federal Aviation Act of 1958 (49 U.S.C. 1508 (b)). This has not been a satisfactory solution for permanent residents of the United States who wish to base their aircraft here. This is because the aircraft must be maintained in accordance with the airworthiness requirements of the country of registry, including periodic maintenance and inspection. It is often difficult, if not impracticable, for a foreign national to contract with qualified mechanics and repair stations in the United States in order to meet the particular requirements of the country of registry.

With respect to airman licensing there is no parallel problem. A foreign national can obtain a U.S. pilot license and a Federal Communications Commission permit to operate the radio transmitters aboard aircraft. The anomaly of the present law is that a foreign national can legally fly a U.S. registered aircraft in the United States, but he or she is prevented from owning an aircraft of U.S. registry.

This bill would extend the eligibility to register aircraft in the United States to citizens of foreign countries who have been lawfully admitted for permanent residence in the United States, provided, as is the present case, the aircraft is not registered under the laws of any foreign country. If a foreign national loses his or her status as a resident alien, the aircraft would no longer be eligible for registration, thus subjecting the certificate of registration to suspension or revocation by the Secretary of Transportation pursuant to section 501(e) of the Federal Aviation Act of 1958 (49 U.S.C. 1401(e)).

An identical bill passed the House last year.

VETERANS' BENEFITS AND SOCIAL SECURITY

HON. HAROLD E. FORD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. FORD of Tennessee. Mr. Speaker, I rise today to call the attention of my distinguished colleagues in the House to the problem of those persons receiving both veterans' benefits and social security. Today, an increase in social security payments results in a decrease in veterans' benefits. I am introducing legislation to make certain that increases in social security will be "passed through" to those who receive veterans' benefits as well.

This would be accomplished by directing the Administrator of Veterans' Affairs to disregard any part of a general increase in social security benefits in determining the annual income, and therefore, the level of benefits, of any individual who is entitled to a veterans' pension.

Currently, the amount of income used to determine benefit levels is called countable income. This excludes such forms of assistance as welfare and food stamps but includes social security payments. Thus, as the general price level rises and social security beneficiaries are given a cost of living increase, the Veterans' Administration quickly recovers part or all of the increases by decreasing the recipient's veterans' pension.

The use of this procedure is especially important because of the number of beneficiaries it affects. Of the nearly 5,470,000 persons receiving veterans' pension benefits, about 80 percent receive social security payments also. While 321,000 of these beneficiaries rely wholly on their veterans' pension as countable income, many others rely on their veterans' pension and social security checks as their sole means of support.

It is said that the decreases in veterans' benefits resulting from an increase in social security benefits never leave the recipient with less overall monthly income—that the decrease never more than offsets the increase and often leaves the beneficiary with a net gain in monthly income. Such thinking fails to realize, however, that speaking in terms of real income, the beneficiary is often worse off. Social security cost-of-living increases are given to offset the cruel bite of inflation. When the Government takes it away, the recipient is increasingly pressed for ways to make ends meet, since his monthly cost of living rises without regard to his income. This is especially crucial in this case, where so many of those affected are on the fixed incomes of veterans' benefits and social security.

To those who claim the veterans' pension program is based on need, and determined by the recipient's level of income, from whatever source, I say this is not a welfare program, but an assistance plan which helps us say thanks to those many veterans who gave exemplary service to their country in its time of need.

Now it is those veterans, who were loyal to their country, who are in need. Are we going to play bureaucratic games with them and take away from them what was meant as a cost-of-living adjustment on their social security? I say no.

Mr. Speaker, it is my belief that in all too many cases, increases in social security enacted by Congress to help recipients deal with inflation are being nullified by decreases in the beneficiary's veterans' benefits. We should not take away with one hand what we give with another. I urge my colleagues to strongly support the legislation I am introducing today, to guarantee that future increases in social benefits will be passed through to veterans' pension recipients.

JET NOISE CURFEW

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. ROSENTHAL. Mr. Speaker, noise pollution is one of the major environmental problems facing this country today. Aircraft are prime contributors, not just in urban districts, but in suburban and most rural areas as well. This is a national problem, not a regional one.

I am today introducing a bill to create a nine-member commission to investigate the establishment of curfews on aircraft operations during normal sleeping hours. A curfew on aircraft operations is not the ultimate solution to the noise pollution problem, but it is a viable short-term answer that will provide immediate relief to millions of persons plagued by the whine, roar, and soot of low-flying planes.

The cost of a curfew is minimal, there is no question of compromising safety, and no new technology is needed. Curfews may mean some inconvenience for the airlines and an extremely small number of passengers—because most flights during normal sleeping hours contain freight—but that must be weighed against the public's right to domestic tranquility and a decent night's sleep.

The noise impact of a jetliner taking off or landing is 10 times more disturbing during sleeping hours, when it is much more difficult to assimilate sounds, than during the day, according to acoustics experts.

The commission proposed by this bill would report its findings and recommendations to the Congress within 6 months of creation. It would be composed of the Administrators of the Environmental Protection Agency and the Federal Aviation Administration, two representatives of the aviation industry, and five public members.

Nighttime curfews already are in effect here at Washington National Airport as well as in Tokyo, London, Geneva, and Zurich; Fresno, Los Angeles, and Newport Beach, Calif.; and Boise, Idaho.

THE TYRANNY OF EGALITARIANISM

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. MICHEL. Mr. Speaker, the distinguished attorney and treasurer of the Democratic National Committee, Edward Bennett Williams, has long been known for his devotion to civil liberties. It was no surprise, therefore, to learn that Mr. Williams, in October 1976, delivered a lecture before the Lawyers Division of the Anti-Defamation League of B'nai B'rith, in which he eloquently and courageously spoke against a new tyranny that is currently endangering civil liberties. I refer to what Mr. Williams calls "the tyranny of egalitarianism."

Mr. Williams quite correctly reminds us that racial and religious bigotry is "a cardinal sin in the litany of human evils." But, as Mr. Williams points out, "it does not follow that we must all share equally in the rewards for the efforts, talents, and enterprise of others." He criticizes those perhaps well-intentioned "total egalitarians" who "would divide the wealth equally, impose quotas and ratios in education, in employment and in the political processes, regardless of merit."

Unfortunately, the imposition of quotas and ratios in employment and education is currently the result—unintended, perhaps, but nonetheless cruel to its victims—of the Federal Government's "affirmative action" programs. Defenders of these programs state that the "goals and timetables" they impose upon employers for the hiring of officially designated minorities are not really "quotas." Try to tell that to a young man or woman who has been denied a place in college or in industry or a trade because he or she belongs to an ethnic or racial group not officially designated as being worthy of governmentally imposed quotas. This is no matter of semantics—the sad fact is that currently we have what is called "reverse discrimination" in this country. I believe that it is time that the Congress got around to reexamining the various programs that have made the quota system possible in this country. My own view is that neither the Civil Rights Acts nor Executive orders of the President demand "goals and timetables" in hiring and education. Indeed, governmentally imposed quotas are inherently discriminatory and, therefore, violate the civil rights of many Americans.

Mr. Williams does not simply point out what is wrong. He offers a solution to the problem. He calls for "a national commitment to excellence" and states:

I think the best kept secret in America today is that real satisfaction, real fulfillment, real exhilaration come not from leisure, or tranquillity, pampered idleness, or self-indulgence, but rather from striving with all one's physical and spiritual might for a worthwhile objective.

It seems to me that the kind of America envisioned by Mr. Williams is one that has no room for the kind of regulatory obsession which unfortunately seems to be the hallmark of so much that goes on in Congress. No, Mr. Williams' vision looks to a time when individual effort will once again be applauded instead of regulated to death, when striving for excellence means more than lobbying for favors, when the "goals and timetables," of our current "quota society" are replaced by goals and timetables each individual sets for himself, in a spirit of freedom. It is my hope that those of us in the Congress keep Mr. Williams' words in mind.

At this time I would like to place in the RECORD "The Tyranny of Egalitarianism" by Edward Bennett Williams, as printed in the ADL Bulletin, October 1976:

THE TYRANNY OF EGALITARIANISM

(By Edward Bennett Williams) *

When I first went to Washington to attend law school over three decades ago, I used to enjoy walking on Sunday afternoons in the vicinity of the Supreme Court. I never failed to thrill when I read the words emblazoned across the magnificent marble portico of the Supreme Court building: "Equal Justice Under Law."

"Equal," not almost the same, not similar, not comparable, but "equal."

Since those days many pages of legal history have been written and we have advanced many leagues in our quest for equality, liberty and justice. We have advanced beyond the concept of equal justice under law so that now equal opportunity, equal education, equal enfranchisement, and equal respect are the patrimony of every American.

Yes, we are all equal, but we must carefully recognize what that means. For by my lights, the most significant threat to freedom on our 200th anniversary as a nation is the tyranny of egalitarianism.

Almost a century and a half ago, Alexis de Tocqueville warned of this threat to liberty in his "Democracy In America":

"There is indeed a manly and legitimate passion for equality which rouses in all men a desire to be strong and respected. This passion tends to elevate the little man to the rank of the great. But the human heart also nourishes a debased taste for equality, which leads the weak to want to drag the strong down to their level and which induces men to prefer equality in servitude to inequality in freedom. It is not that peoples with a democratic social state naturally scorn freedom; on the contrary, they have an instinctive taste for it. But freedom is not the chief and continual object of their desires; it is equality for which they feel an eternal love; they rush on freedom with quick and sudden impulses but if they miss their mark they resign themselves to their disappointment; but nothing will satisfy them without equality, and they would rather die than lose it."

If there be a cardinal sin in the litany of human evils, I believe it is racial and religious bigotry. I believe that for those who practice prejudicial discrimination against their fellow man or woman by reason of his or her color, religion, sex, national origin, or other accident of birth, there must be reserved the hottest corner of Hades. But it does not follow that we must all share equally in the rewards for the efforts, talents and enterprise of others.

We are equal in the sense that we must all have equal opportunity to compete for the rewards of excellence, not share in its fruits regardless of personal effort or ability. An equal opportunity based on merit benefits everyone. By rewarding excellence, we share in the fruits of that genius.

The total egalitarians miss the point. They would divide the wealth equally, impose quotas and ratios in education, in employment, and in the political process, regardless of merit, overlooking the crucial fact that all human progress throughout history owes its origin to the talented and the enterprising. We must keep a system that allows us to develop and use the talents and excellence of all, no matter what their origin. But if we practice inverse discrimination in the name of a ratio or quota system, we shall deprive the country of some of the real genius and talent we desperately need.

The really great people of each generation are those who have a commitment to excellence—a commitment to be at all times, in all places, under all circumstances, the very best that they can be at whatever they do. John Gardner said it best in this century when he wrote:

"An excellent plumber is infinitely more admirable than an incompetent philosopher. The society which scorns excellence in plumbing because plumbing is a humble activity and tolerates shoddiness in philosophy because it is an exalted activity will have neither good plumbing nor good philosophy. Neither its pipes nor its theories will hold water."

Edward Gibbon said it all 200 years ago when he wrote:

"In the end, more than they wanted freedom, they wanted security. They wanted a comfortable life and lost it all—security, comfort and freedom. When the Athenians finally wanted not to give to society but for society to give to them, when the freedom they wished for was freedom from responsibility, then Athens ceased to be free."

Albert Sindlinger did a poll in Swarthmore, Pennsylvania. Every afternoon a battery of pollsters sat at a bank of telephones and called people all across the land.

"What's the principal sickness in America today, ignorance or apathy?"

"I don't know and I don't care," was the majority answer.

I think the best kept secret in America today is that real satisfaction, real fulfillment, real exhilaration come not from leisure, or tranquility, pampered idleness, or self-indulgence, but rather from striving with all one's physical and spiritual might for a worthwhile objective.

As we begin our third century as a nation we are suffering a malaise of the national spirit. As a nation we have grown fat, indolent, and apathetic, affluent and corrupt. We cannot bring ourselves to make the personal

---

*Mr. Williams, one of the nation's most famous trial lawyers, is president of the Washington Redskins football club, general counsel of Georgetown University, and author of "One Man's Freedom." Among the posts in which he has served are: President Ford's Foreign Intelligence Advisory Board, the President's Lawyers Committee on Civil Rights, the U.S. Judicial Conference Advisory Committee on Federal Rules of Evidence, chairman of the American Bar Association Special Committee on Crime Prevention and Control. He has taught criminal law at several university law schools. This article is based on his address before the Lawyers Division of the ADL Appeal.

sacrifices required to have once again a national commitment to excellence. Our preoccupation with self-centered concerns and pleasures has deflected us from public obligations and necessary collective endeavors. We have lost the spirit that changed a people into a citizenry and transformed a territory into a nation.

This is a time for heroes. The test at the beginning of our third century will be whether we mistake the growth of affluence for the growth of character.

The long run challenge to our country is nothing less than a challenge to our sense of purpose, our vitality, our commitment and our rededication. To understand the nature of the challenge, we must remember that our kind of free society is still the exception in the world—still unattainable to most people, for most of the world lives under government that has no interest in fostering and nurturing the concept of freedom. The world is full of people who think men need masters.

Our survival as a free society is not inevitable. It will remain alive only if enough of us care. The words of the poet philosopher Rabindranath Tagore on the freedom of his beloved India are an inspiration for America:

"Where the mind is without fear and
The head is held high;
Where knowledge is free
Where the world has not been broken
Up into fragments by narrow domestic walls;
Where words come up from the depth of truth;
Where tireless striving stretches its
Arms toward perfection;
Where the clear stream of reason has
Not lost its way in the dreary desert
Sand of dead habit;
Where the mind is led forward
Into ever-widening thought and action—
Into that heaven of freedom, my Father,
Let my country awake."

NATIONAL HEALTH SERVICE IN U.S.S.R. A FAILURE OR SOME HEALTHIER THAN OTHERS

HON. LARRY M'DONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. McDONALD. Mr. Speaker, many persons while not admiring communism per se feel that their massive state health systems are something desirable. Somehow the illusion has always been that while Socialist states do not always have top quality medical care available, it is always free and adequate for its citizenry. An article from the Sunday London Telegraph of October 3, 1976, brings out the fact that the Soviet system is in trouble. I commend the attention of my colleagues to this item, who feel we should completely go to a national health system of some sort during this Congress. The item follows:

SOME HEALTHIER THAN OTHERS

The Soviet Russian nationalised health service is in such financial difficulty, according to Mr. Anatoly Rubinov, writing in last week's Moscow *Literaturnaya Gazeta* that "instead of tipping your hospital doctor or nurse with a crystal vase or box of chocolates, please put the money into a fund to keep the health service running."

Mr. Rubinov said many Soviet hospitals were in dire straits with patients "lying in the corridors; and at holiday times, it is painful to see that all hospital patients have to go unattended and un-fed. In fact many have to remain un-treated at such times, except in the most drastic cases, and are usually ignored by their neighbours in other beds who may be lucky enough to have visitors or relatives to care for them, and even to give them their necessary medicine."

Earlier, a Soviet Minister of Health, writing in *Pravda*, said that in future it would be necessary for people to pay a contribution to keep elderly relatives in hospital because there was not enough money for the State to keep them.

Mr. Rubinov said that the Soviet Union must adopt the policy now adopted by Poland, where the health service was largely financed by a tax on vodka and all spirits, and a tax on football.

He added that old age pensioners who wish to do so, should be allowed to leave money to the Soviet health service—in a will. How about that, Mr. David Ennals?

FISHING RIGHTS

HON. LLOYD MEEDS

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. MEEDS. Mr. Speaker, on several occasions, I have stood before the House of Representatives and stressed the extremely serious impact of the 1974 Boldt fishing-rights decision on the people and the economy of the Pacific Northwest.

That ruling, handed down by Federal District Court Judge George H. Boldt on February 12, 1974, was based on Indian treaties signed by the Federal Government during the mid-1800's in the Pacific Northwest. The treaties allowed the tribes the right to take fish at all their usual and accustomed grounds and stations, in common with all citizens of the territory.

Judge Boldt interpreted the treaties to mean that certain tribes in the Pacific Northwest have the right to take up to 50 percent of the harvestable runs of steelhead and salmon in State waters. That ruling was upheld by the U.S. Ninth Circuit Court of Appeals on June 4, 1975, and by the U.S. Supreme Court on January 26, 1976, when it refused to hear the case.

To say the least, the Boldt ruling has placed tremendous new demands upon an ever-diminishing resource and has thrown considerable confusion into our fishing industry.

Previously, I have explained the impact of the ruling on the industry—which is one of our most important in our State. I have told of its serious impact on the size of the fish runs, and the growing threat of depletion.

Perhaps most importantly, however, I have stressed how this ruling has affected our people and our human relations in the Northwest. I have pointed out how this decision has, in many instances, resulted in confusion, confrontation, and even violence; how lawbreaking seems the rule, rather than the exception.

Let me assure the Members of Congress that since I last spoke of these problems, they have not subsided. In fact, they have worsened.

Lack of management, poor regulation, as well as bitterness, anger, and frustration continue to threaten fish runs and endanger lives. Lawbreaking and violence are common. Relations among Indians and non-Indians are strained.

ACTION DUE

Mr. Speaker, this situation in Washington State cannot and must not continue.

A precious resource is threatened; hundreds of livelihoods are at stake; violence and confrontation are constantly around the corner. We must come up with answers soon.

If not, we might well witness the disappearance of one of the most valuable resources in the Northwest.

Therefore, I believe it is imperative that the Congress of the United States become more directly involved in efforts to help find solutions to the fisheries controversy in my region.

Although such action might have been disruptive or potentially misdirected prior to final action by the courts, I do believe it is now necessary. The courts have acted; it is now up to Congress. I have taken this position before; I reiterate its importance now.

In fact, solutions to our fishing troubles must be one of the highest priorities of the 95th Congress.

Toward that end, Mr. Speaker, I am today introducing in the House of Representatives, a bill designed as a vehicle to provide some of those answers.

The bill would set up a commission to explore the impact of the Boldt ruling on the Northwest and would make specific recommendations to Congress on the steps necessary to solve those problems. It would recommend the very best systems for management, for enforcement, for planting fish, and so on.

The commission would be comprised largely of local people—people from the Northwest. Commercial and sports fishermen, who are feeling the brunt of the ruling most directly, would be included on the commission as active members. It would also include representatives of the Indian tribes, the State and Federal Governments, and experts in the fisheries field.

All would have a chance to speak—to have their voices heard. All would be actively involved in jointly working out solutions to these fisheries hassles.

DUTIES

The commission would explore the entire fisheries controversy. It would look at the problems their causes, and how best to solve them. It would explore the impact of the Federal court decision by Judge Boldt and what it means to the people of our area. Finally, and most importantly, it would suggest specific actions to Congress on how to solve these problems.

Among its highest priorities, would be to find the best management system for the entire fishery—the best system for setting rules and regulations, seasons and limits, gear restrictions, and so on.

Right now, the management of the fishery is near chaos.

Under the Boldt ruling, 30 Indian tribes and Government agencies potentially have the right to set regulations, seasons, limits, and other rules regarding catches.

This is a blueprint for disaster. Poor management of seasons and limits, can easily mean the destruction of fish runs. Overlapping jurisdiction and conflicting rules cause only confusion and anger among fishermen.

The commission would attempt to resolve this confusion, by recommending a single management unit. It would consider the possibility of total Federal control, total State control, control by a separate management mechanism, control by the regional management council under the 200-mile limit and possible control through a separate State-Federal agreement.

After considering these possibilities and others, it would recommend a specific course of action. A priority consideration for the commission would be to consider the prospect of removing the Indian steelhead nets from the rivers.

Prior to the Boldt ruling, Indians—like all other citizens—could catch steelhead only in the conventional "hook-and line" manner in off-reservation areas. This allowed substantial escapement for spawning purposes.

However, the Boldt ruling allows the Indians to fish in their usual and accustomed manner, which includes netting steelhead in off-reservation locations and selling them commercially.

As a result of this netting, tremendous demands are being placed upon these runs, as I mentioned earlier. The runs are rapidly dwindling, leaving fewer and fewer fish for State sportsmen, whose license fees are used in propagating these prized runs.

In an effort to remove these nets, the commission would consider the possibility of substitution, buy-out, or trade-off of the Indians' rights in the steelhead fishery.

Also, the commission would recommend the best system for planting more fish in our streams.

Since the controversy first began, I have strongly maintained that one of the best answers to our fisheries troubles is by putting more fish in the water for all fishermen.

More fish mean more jobs, a better economy, better recreation, and better human relations. We all benefit, regardless of heritage or treaties or courts.

And finally, the commission would be able to look into various other aspects of the fish controversy: It could consider phasing in of the Boldt decision; it could recommend the best system for enforcement; it could and should explore every facet of the controversy and get to the bottom of it.

TO PRODUCE SOLUTIONS

Mr. Speaker, let me reemphasize that this commission would be set up to provide answers and workable solutions to our fisheries problems. Unlike some other studies or commissions, it is not designed to sweep the problem under the carpet or bury it in a mountain of redtape. That would only intensify the problems and the frustration.

The commission would be directed to report its findings to Congress as soon as possible, and in any case no later than 1 year after the bill is signed into law. This will allow enough time for the various parties to get together, to explore the problem, and come up with recommendations.

It will not stretch out for years and years, while our fish slowly disappear.

Also, the commission would be made up of those people directly involved in this issue—those who stand to benefit the most from workable solutions. Commission members would include representatives of the commercial and sports fishermen, Indian tribes, sportsmen, Federal and State officials. I feel confident that these people will not allow this commission to in any way ignore the problems, but will, rather, deal with them openly, honestly, and directly.

Finally, once the commission's work is complete, it will not quietly become another permanent agency of the Federal Government. Under the bill, the commission itself will be dissolved 90 days after its report is submitted to Congress.

THE VIEW FROM HOME

As many of you recall, I introduced a similar bill in Congress last fall, with the support of the entire Washington State delegation in the House of Representatives.

My purpose was to present a "talking paper"—a place to begin on such a concept.

Since that time, this bill has attracted considerable interest. I have talked with many people about it—fishermen, Indians, biologists, fisheries experts, elected officials, and so on. In making their comments, all have expressed the urgency of the fisheries troubles. All have indicated that something must be done. Unless we act now, they say, we will see our fish runs disappear and our human relations go further downhill. I could not agree more with that assessment.

But it is not enough for me to stand in this House, as I have before, discussing this sense of urgency I hear, this frustration and irritation and anger that is building. It is not enough to stand in this historic hall and discuss this issue in the abstract, without seeing the concern on the faces of the people directly involved.

Therefore, because of the need for action to solve these problems and the deep concern among the people of Washington State, I intend to call for congressional hearings in Washington State to present testimony regarding this fishery controversy. I am hopeful that we can proceed with these hearings in the very near future.

I am looking forward to the testimony of those individuals who have been severely impacted by the Boldt ruling. I invite all to testify: the commercial and sports fishermen, the Indian tribes, the State and Federal officials, the experts, the biologists, the packers and processors, the local residents.

I welcome their views on my own legislation—the good or the bad points they see. I welcome their views on the matter generally, on what answers are best, on how we go about finding solutions, on answers that are realistic. I welcome their views on any other legislation that may be introduced concerning fisheries in the Northwest.

Since this is such an important issue which affects citizens throughout the Northwest, I think it is only appropriate that the Congress not only hear the representatives of these people, but also the people themselves.

TOP PRIORITY

Today begins the first session of the 95th Congress—the first Congress of the third century of this Nation.

For 200 years, we have been a strong, proud, and brave Nation. We have served our people well and dealt with our neighbors honorably.

I am proud of the role that Congress has played in that progress, and I look forward to the challenge of the future.

But a very serious, complex problem is growing in one corner of our Nation. It is a problem that demands the closest attention and concern of this institution.

It is a problem fed by anger and frustration. It cuts across the issues of race and economic survival. It has all the earmarks for violence and confrontation.

These troubles in the Pacific Northwest must be dealt with directly and must be dealt with very soon. The Congress must explore every avenue and it must help find solutions.

This problem will not go away by itself; it will not go away with only cursory attention. It will be removed only through the persistent efforts of those who honestly desire to provide workable solutions.

Therefore, I urge my fellow House Members to consider the impact of this fishing controversy on the Northwest; to consider the serious need for Congress to play its fair share in providing answers. I look forward to the active involvement of this Congress in developing solutions to these fisheries troubles of Washington State and to finally resolving this controversy which continues to plague the entire Pacific Northwest.

PROPOSES SELECT COMMITEE ON ENERGY

HON. JAMES T. BROYHILL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. BROYHILL. Mr. Speaker, in the 93d Congress, some 2,000 energy bills were drafted. Last Congress, over 1,500 energy-related bills were introduced with more than 86 committees and/or subcommittees hearing testimony on energy problems and proposed solutions. While everyone involved in the issue is complaining about energy disorganization Congress has done nothing to coordinate the multitude of proposals to arrive at a sound solution.

Congress energy record is nothing to be proud of. Such inaction is inevitable, however, unless we construct a rational and effective mechanism for dealing with our Nation's energy dilemma.

I have introduced a proposal which calls for the creation of a Select Committee on Energy which would have legislative jurisdiction over all energy matters. This bill would not create a new energy bureaucracy, but rather would consolidate control and coordinate congressional action. We would be using what we have more effectively and would not spread energy jurisdiction throughout 8 or 10 committees with their countless subcommittees. It is no wonder that this body cannot produce a comprehensive energy policy. As soon as a bill is introduced, it is lost somewhere among the committees and subcommittees who all are fighting for a piece of the energy action.

I have seen energy issues in Congress diluted and torn apart until the only issues left were political ones. A select committee such as I have proposed will reflect the balance of the House and will enable us to unite in our efforts for a sound comprehensive energy program. Through such a consolidation as I have proposed, Congress will at least be able to face the issue squarely. There should be no reason for any Member, majority or minority, to oppose a measure such as this.

VERNON JORDAN ADDRESSES 50TH ANNIVERSARY OF SPRINGFIELD URBAN LEAGUE

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. FINDLEY. Mr. Speaker, 3 weeks ago the executive director of the National Urban League, Vernon E. Jordan, Jr., came to Springfield, Ill., to address the 50th anniversary dinner meeting of the Springfield Urban League. Mr. Jordan's speech contained a candid appraisal of how crucial black support was to the Presidential victory of Jimmy Carter, and a message to Republicans that if we wish to win future Presidential contests, we must make inroads among black voters. Vice Presidential candidate ROBERT DOLE, a prominent conservative Republican, has echoed these thoughts in some of his recent statements.

In addition, Mr. Jordan also presented a perceptive analysis of the debilitating effect of poverty on white and black Americans. While many believe that poverty is a problem primarily of our Nation's black ghettos, the facts are otherwise. The burden of poverty, unemployment, and lack of opportunity falls heaviest upon white Americans, even though it also affects blacks in substantial numbers. In truth, these are American problems which do not know the boundaries of race or color.

Following is a portion of Mr. Jordan's speech to the Springfield Urban League on December 12, 1976:

There are many lessons to be drawn from this election. I want to mention just a few of them tonight.

First, the black vote elected Carter. Without a large black turnout and without such massive black support for Carter, the outcome would have been different. It was the black vote that won the South for Carter. His so-called solid southern base was black; white southerners gave President Ford a majority of their votes. The black vote won Ohio. The black vote won Texas. The black vote won Missouri, Pennsylvania and other key states.

From this comes the second lesson of this election, which should be taken to heart by the Republican Party: the black vote is necessary to win a close election. Black people have a stake in a viable two-party system. To a large degree, black citizens were driven out of the party of Lincoln forty years ago because of active hostility to their needs, and have stayed out of it because the National Republican Party demonstrated continued indifference to black interests. The Republican Party should learn from 1976 that it cannot win a close national election without penetrating the black and urban vote, and it should frame policies in the coming years that will attract those votes.

A third lesson of this election is that the Voting Rights Act of 1965 has been vindicated, that the Selma-to-Montgomery March culminated on November 1, 1976. Black voters connected their needs and aspirations to a Presidential election as never before. They examined the issues and voted, like others in a democracy, on their perception of their own best interests. And they did it with sophistication and maturity, as can be seen by extensive ticket-splitting that showed black willingness to support any candidate of any party who identified with black interests.

So black people today are justifiably proud. They elected a President, made use of the precious right to vote that was bought so dearly in the struggles of the 1960s, and used that right with skill and comprehension. But winning a battle must not be mistaken for winning a war.

It is one thing to get elected, and quite another to govern. We must concern ourselves with governance. No matter how personally concerned about race relations the President-elect may be, once he gets to Washington and faces the political pressures of the Office and the necessary compromises that are part of the democratic process, he may find it expedient to defer those programs of vital importance to black people.

We must not allow this. Our history is full of instances in which our friends took our friendship for granted and sold us cheap. The President-elect must understand that it's not enough to sing with us, it's not enough to pray with us, and it's not enough to give some of us important jobs.

The President-elect must understand we want action on the real issues facing us, action to create jobs, to replace welfare with work with a rational income maintenance program, to provide quality health care for all, to save our cities, to enforce the civil rights laws, to improve our schools, to make life better for the many millions of all races who are shackled by poverty and discrimination.

The next four years must be marked by a concentrated effort to restore a sense of purpose and vitality to our national life, to place before our people a vision of a future free of the horrors of poverty and discrimination.

A sense of purpose must pervade a new set of policies geared to creating a better, brighter future for all. It was Lincoln, in his first inaugural, who declared America's purpose is "to lift artificial weights from all shoulders; to clear the path of laudable pursuits for all; to afford all an unfettered start and a fair chance in the race of life."

Thus, the underlying engine of the policies we propose is the goal of equality, the total and irrevocable dismantling of the institutional arrangements that keep black and brown and all poor citizens from realizing their full potentials.

I recognize the enormous reservoir of white fears and the resistance to change. But I realize too, the vast reservoir of goodwill and common sense waiting to be tapped by self-confident leadership guided by the morality of doing right. Jimmy Carter, during the campaign, talked of how the civil rights laws freed not only blacks but also southern whites, from the oppressive hand of racism. The removal of racial barriers nationally would free white people too.

It is too often forgotten that four times as many whites as blacks are without jobs, that twice as many whites as blacks are on welfare, that far more whites than blacks lack decent housing, health care and schooling.

And it is too often forgotten that the major beneficiaries of the so-called "black programs" of the 1960s, were white. The war on poverty became a major instrument for reducing white poverty faster and in greater numbers than black poverty.

In spite of this, many white people trained by manpower programs and placed in well-paying jobs, living in decent homes financed with federal loans and guarantees with children in college on federally-financed scholarships and grants, people whose entire well-being was made possible by the programs of the 1960s, are now castigating those programs as being for black people.

We see people themselves just one generation removed from poverty, whose access to jobs and schools was increased by the absence of black competition, now screaming about welfare, food stamps, integrated schools, and affirmative action.

Even more absurd is the phenomenon of millions of white people out of work or in low-paying jobs, unable to afford decent housing, unable to provide their children with good educations, resisting social programs that would benfit themselves on the incredible grounds that such programs are for blacks.

Clearly, white Americans must come to understand that racial arrogance and fear of black competition is a major impediment to their own progress and to the construction of a Nation free of the curse of poverty and unemployment.

Thus, the crying need in these last years of the 1970s, is for our national leadership to encourage white people to abandon those beliefs that have held both races back, and to unite with concerned black people behind programs that offer solutions to the basic problems affecting both groups.

Last year alone, the poverty rolls grew by two-and-a-half million people. Some 40 million Americans endure unacceptably low living standards. The official unemployment figures that show over 7 million jobless are grossly understated, with the true total of unemployed and undermployed in the neighborhood of 15 million.

And there can be no doubt that these problems affect black people disproportionately. The largest share of the burdens of our society and economy have been placed on the shoulders of black citizens.

A fourth of the black work force is unemployed, two-thirds of black teenagers are jobless, a third of all black families are poor and half of them do not get a single penny from welfare, and black family income is slipping to only a little more than half of white family income. In almost every measure of socio-economic status blacks lag behind whites and in many instances the gap is growing, not closing.

MARGARET McKINLEY

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. ANDERSON of California. Mr. Speaker, our educational system is without a doubt one of the most important segments of our society. Through the children and young adults they instruct, educators deal directly with the future. Thus, it is not surprising that the men and women in the field of education—faculty, administrators, and staff—occupy a special place in the hearts of most Americans.

On January 7, 1977, one of these very special people will leave education after more than 42 years of tireless, selfless dedication. Margaret McKinley, who began her teaching career in 1934, will retire from her position as an instructor with the Los Angeles Unified School District.

Margaret McKinley was born on January 20, 1914. Her teaching career began in the State of Nebraska in 1934, where she taught in several small towns including Bristol, Thurston, and Harvard for the next 6 years.

Arriving in California in 1940, Margaret attended the University of Southern California for 1 year, earning her masters degree in English. After instructing students in El Centro and Anaheim, she joined the Los Angeles Unified School District in 1947, beginning at Banning High School in Wilmington, Calif.

After serving as chairperson of the English department at Banning in 1955, Margaret McKinley transferred to Carson High School when it first opened in 1963. She brought her experience and dedication to that school as English department chairperson in that initial year, helping Carson earn a reputation for academic excellence early in its existence.

Her hobbies are bridge and travel, and Margaret McKinley has been able to apply the latter pursuit to her chosen profession. With the experience and knowledge gained by her journeys, she has tried to give her students a wider perspective of the world and of our Nation.

Margaret toured Europe in 1958 and 1967, including the Holy Land and the Middle East in the later trip. She spent the summer of 1960 in South America, and took a coast-to-coast tour of the United States in 1969. She has also traveled extensively through Mexico, Canada, and Hawaii, and plans to tour the Orient during the spring of 1977.

Mr. Speaker, it is always hard to judge the contribution of a person who provides leadership and knowledge to our young people today. In Margaret McKinley's case, the danger is to underestimate that contribution. Through her dedication and inspiration, this modest, unassuming woman has had an inestimable impact on the students she has touched through the years. Her wise counsel and encouragement—to fellow faculty members as well as students—have earned her a very special status to all who know, love, and respect her.

Margaret McKinley will be missed by students, parents, and the teachers and administrators who were fortunate enough to know her. In addition, her visits to hospitals, contributions to the needy and to children, and many charitable activities have made her a very special member of the community. My wife, Lee, joins me in expressing our thanks to this wonderful person who helped improve our community in so many ways.

Perhaps this quotation—which I am told is Margaret McKinley's favorite—best expresses her excellence as an educator. It is from "The Deserted Village," by Oliver Goldsmith:

And still they gazed, and still the wonder grew
That one small head could carry all he knew.

THE TAX CREDITS AND ALLOWANCES ACT

HON. ROBERT J. CORNELL

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. CORNELL. Mr. Speaker, I am taking this opportunity today to reintroduce one of the most comprehensive welfare reform and tax relief measures ever before Congress, the Tax Credits and Allowances Act. I had the pleasure of introducing this much needed reform bill during the 94th Congress when 30 of my colleagues joined me in sponsoring this legislation.

As many of you already know, the bill as introduced in the last Congress, would have replaced aid to families with dependent children and the food stamp programs with a dual system of first, rebatable $225 tax credits for everyone, and second, basic cash grants to those with little or no income. The direct cash grants would be keyed to family structure, size, and income. The combination of tax credits and cash allowances would provide a maximum total of $4,300 to a two-parent family of four, $3,775 to a one-parent family of four. For a married couple, maximum benefits would total $3,100; for a single adult, $1,100. To encourage work, $1 in gross wages subject to the social security payroll tax would cause only a 47-percent reduction in the basic cash grant. Among other advantages, this proposal would end the practice of categorical aid which has penalized poor families for staying together and denied cash help to nonaged persons without children. This program would be administered by the Internal Revenue Service which would have the capability of more accurately dispensing benefits, thus reducing overpayments as well as underpayments.

Although this measure as proposed last year had many good features, some of my colleagues suggested that more meaningful reform could be acomplished if the supplemental security income program—SSI—could be incorporated into the bill's provisions. Therefore, I am reintroducing the bill with this important addition. As now drafted, the Tax Credits and Allowances Act provides benefits slightly higher than now currently guaranteed to SSI recipients by the Federal Government. A single filer who is aged, blind, or disabled would receive $2,075 in cash assistance plus the rebatable $225 tax credit for a total of $2,300. A couple who are both aged, blind, or disabled would be guaranteed $3,500 plus $450 in tax credits for a total of $3,950. Because these levels are greater than the Federal SSI maximum, further fiscal relief will be available to the States who may no longer have to supplement SSI.

The second substantive change in the Tax Credits and Allowances Act is the addition of a work registration requirement. Again, some of my colleagues requested that this be added to a revised bill. All recipients of assistance except those needed to care for children or dependent adults or those incapable of working will be required to register with the State employment agencies. In addition, recipients will have to provide—on a quarterly basis—certification reports along with their income statements to demonstrate that they are continuing to search for employment.

Over the past 2 years, I have called attention to the fact that while welfare reform was often on the public's mind, it was rarely mentioned on the House floor. I am more optimistic about the prospects for such legislation during the 95th Congress. President-elect Carter has repeatedly stated that welfare reform is one of his top priorities for the new administration. I hope that Mr. Carter will not waiver from his public statements on the need to overhaul our welfare system rather than to resort to a patchwork approach. I believe the Tax Credits and Allowance Act could serve as a model for real reform.

A nation with the resources of the United States can no longer tolerate a welfare program filled with abuses and inequities. Bureaucratic redtape is sapping funds from the poor and the needy. Impoverished families living side by side find one set eligible while the other is not. The working poor are discouraged to find themselves laboring for less than what those on welfare receive and yet work is discouraged since it often means the loss of considerable benefits. Neither morally nor financially can the United States afford to foster generations of welfare families. We must establish a system where the needy will receive assistance, but will be encouraged to build a better and more independent life for themselves. It is my belief that the Tax Credits and Allowances Act will move us closer to this goal.

A BICENTENNIAL POEM

HON. RONALD A. SARASIN

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. SARASIN. Mr. Speaker, although our Bicentennial is now behind us, it is

important that we not lose the spirit of last year's celebrations. The contributions of our ancestors, as well as of our present-day patriots, the traditions and the values that have made us a great nation and a great people must accompany us always, particularly as we enter our third century.

I would like to offer to my colleagues the following poem written by Mr. Harris F. Dake, one of my constituents from Monroe, Conn. Mr. Dake captures the feeling of our Nation's proud history and the timeliness of our grandeur. The poem follows:

I AM A NATION

Conceived in the Plymouth breasts of faith
With a need to preserve my liberty,
For more than a hundred and fifty years;
Waiting to be born—wanting to be free.
Listening to the Spanish unsheathed sword
The French and the English musketry,
In the darkened womb, I plead to my Lord:
"I want to be born—I want to be free".

While Congress debated for a full two years
(But even before they had eventually met)
The pamphlet of Otis in Boston town
And the "seventy-four" Declaration was set.
Bring forth this child I pray and I cry
Where *are* these hands to deliver me?
When will my people pay heed to my call?
"I am a nation and I want to be free!"

With the Albany Plan of Union,
From Benjamin Franklin's pen,
Came my first breath of joy and of freedom
Though I really was not free—even then.
There were forty-eight men of the eleven
And of the eleven there were seven from the king.
In Philadelphia—In "fifty-four"
What did it *actually* bring?

There was Livingston, Sherman and Jefferson
Franklin and Adams,—these five
Charged by my God and my Congress
To keep my freedom alive.
I was *really* born the Fourth of July
On a hot Thursday afternoon.
I was moulded and shaped by these ten strong hands
As promised the eleventh of June.

It was heard on the following Monday
As Hopkins declared it to all,
But it was received as a "Song of Triumph"
And not as a "Battle Call".
There were dancing and cheers from the patriot.
There was prayer in the church and the home.
There were fasting and pleas for forgiveness
For this child that was frail and alone.

But they came from the farm and the village
From the clergy and the businesses too
And all that they asked of their leaders
Was "Give me a job to do".
Oh, they had their Arnold's and Andre's,
And the retreat was Washington's game,
But with faith in the causes of justice
They preserved the nation's name.

I am two hundred years a nation,
But so young as nations go,
I have opened my doors to the whole wide world—
The seed and the fruit that have me grow.
I have stuttered and stumbled along the way
Yet victory has come to me.
I have minted the phrase "In God We Trust".
By this I am a nation, through Him I am free!

The lessons I've learned, the blood and the tears,
The fear I might fail from within
Give truth of the words to Corinth by Paul—
Love is the power and the place to begin.
The yoke of my future is directly on you.
You must preserve my dignity.
From thirteen to fifty, from now and beyond,
I am a nation and I must remain free!

FISH AND WILDLIFE COORDINATION ACT AMENDMENTS

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. OBERSTAR. Mr. Speaker, today I am introducing a bill with two very important national purposes. It is designed to conserve valuable fish and wildlife resources and to expedite our national water development program. The bill would amend the Fish and Wildlife Coordination Act to include several recommendations from Federal and State fish and wildlife agencies and many conservation organizations with an interest and expertise in these matters.

A series of conferences among these groups developed a consensus of views which were incorporated into an action report released late in 1971. That report offered 169 recommendations for needed changes in legislation policy, and procedures to streamline fish and wildlife consideration in planning and constructing Federal and federally licensed and assisted water projects. Among the highest in priority was a recommendation to strengthen the Coordination Act.

A bill was introduced and extensive hearings were conducted in 1974 by the House Subcommittee on Fisheries and Wildlife Conservation and the Environment. Those hearings, supported by a 1974 General Accounting Office report, show conclusively that changes in the Fish and Wildlife Coordination Act would be in the broad public interest. Governors of 37 States and one territory have given their support to such changes.

Late last year I introduced a refined version of the original bill to give my colleagues an opportunity to study and help improve the language. I am reintroducing that bill today with only a few minor technical changes.

My bill would bring projects constructed or assisted by the Tennessee Valley Authority and the Soil Conservation Service under the provisions of the Fish and Wildlife Coordination Act. Licensing of nuclear power generating stations would be covered also. The legislation would encourage changes in planning procedures to have fish and wildlife professionals become a part of each project-planning team so their views and recommendations would be considered from the earliest point. The joint planning would minimize and help eliminate the divisive and costly action-reaction relationships among agences.

The amended act would encourage use of new procedures to prevent, compensate, and mitigate fish and wildlife losses in water development projects. It would strengthen public participation in planning those projects. It would help assure that features recommended for fish and wildlife be installed in phase with other project features, rather than later when land costs, for example, have escalated.

Mr. Speaker, there is no question that water development is necessary. The problem remains, however, that many projects are developed without adequate input to protect fish and wildlife habitat. Consequently we are confronted with unnecessary losses of valuable resources which result in public opposition and costly delays in water projects.

It is important to note that my bill is complementary to the National Environmental Policy Act. NEPA requires environmental consideration only after a project has been planed—after many major decisions have been made. My bill would require such consideration during the earliest planing stages before any commitments are made. Thus, agencies could avoid the many delays, arguments, and loss of taxpayers' money that have characterized our water development program.

Let me stress that my bill would not give wildlife agencies veto power over water development projects. Under my bill the U.S. Army Corps of Engineers and other agencies would not have to accept any recommendations where the public interest demands otherwise. But those agencies must take affirmative steps to accept or reject them in a timely manner.

I invite my colleagues to study this matter. I invite the widest possible participation and assistance in producing legislation which will assure that fish, wildlife, and other natural resources are considered fully in the planning and operations of Federal and federally licensed or assisted water resource projects. The public is calling for needed changes in the way we conduct our national affairs. The management of natural resources is no exception; these values are important to people, make no mistake. I hope Congress will respond to the call for changes that will improve the conduct of our natural resources programs.

An analysis follows:

SECTION-BY-SECTION ANALYSIS OF PROPOSED AMENDMENTS TO THE FISH AND WILDLIFE COORDINATION ACT

Section 1—This Section would confer a statutory title (Fish and Wildlife Coordination Act Amendments of 1977).

Section 2—This Section would add to Section 1 of the present Act a declaration of Congressional policy that lands and waters for fish and wildlife purposes be acquired concurrently with other lands and waters for Federal projects. It is intended that the amendment proposed would insure timely acquisition.

Section 3—This Section would extend the coverage of the Coordination Act and clarify its consultation requirements. Its application to activities on the continental shelf would be confirmed, as for mineral development. This proposed application is of particular interest to fish and wildlife agencies of coastal States whose concerns extend both to offshore and induced onshore impacts. Such impacts are also of growing concern to the Federal agencies to be consulted. It is essential that these activities be conducted in an environmentally responsible manner so that when extraction is complete the natural

values will still be intact for future generations.

The amendment would also extend coverage to TVA (as a wholly owned Government corporation) and to the small watershed and related water planning and development activities of the Department of Agriculture. Both programs are now exempted from the Act. This section is intended to extend the Act's coverage to the licensing of nuclear power generating stations by the Federal Government, a clarification of the present situation. Application of the present Act to most Federal and federally licensed water projects would be undisturbed. The proposed Section also would clarify application of the Act to all surface and ground waters. It would then apply to some or all geothermal projects.

The Section would also clarify and expand the consulting and reporting requirements of the Act. It would require consultation (defined in Sec. 10) with the National Marine Fisheries Service as well as the Fish and Wildlife Service and the State agency having "immediate and direct" administrative responsibility for fish and wildlife. Intent is to insure that the consultation is with fish and wildlife professionals and not a general Department of Natural Resources. It would then require written reports from the Secretary of Commerce as well as the Secretary of the Interior (as now) and the State agency (in this instance it might be a Department of Natural Resources).

The amendments would require that the public be given "every appropriate opportunity" for participation and planning. This would recognize the present capabilities of many citizens to participate meaningfully in water resources planning.

Section 4—This Section would amend subsection (2)(b) of the present Act, relating principally to reporting, and expand it into six new subsections.

Subsection 2(b)(1) would require that the reports required by subsection 1(a) above be based on written findings of the fish and wildlife agencies. These findings must include an evaluation of probable project effects—both direct and indirect—and specification of measures needed to prevent, mitigate, or compensate for losses to fish and wildlife. In addition, the draft amendments would ask that the findings consider "the need for additional pre- or post-construction investigations" to further identify project impacts and needed mitigatory measures. The draft would prohibit the use of dollar evaluation of losses in justification for the adoption or rejection of any fish and wildlife recommendation. Monetary evaluations typically have been based on recreational use (as fishing and hunting) which is often at a low level on private lands and does not reflect the underlying environmental values at issue.

Subsection (2) would provide an orderly procedure for considering and disposing of fish and wildlife recommendations by construction agencies. The objective is to insure adequate consideration, but avert any possibility of veto by environmental or conservation agencies, and at the same time avoid imposing undue delays on existing review schedules. The subsection would require the construction or licensing agency to advise the two Secretaries and the State agency of its proposed disposition of fish and wildlife recommendations, including their implementation schedule. Concurrence would be required prior to construction except that (1) failure to respond in 90 days would be deemed to signify concurrence and (2) a negative report could be overridden by a published determination that acceptance is not in the public interest.

The draft amendments would add, at the request of representatives of State fish and wildlife agencies, a further requirement that construction agencies conduct a public hearing prior to a final determination that specific recommendations are not in the public interest if the affected fish and wildlife agency so requests. The proposed requirement is consistent with contemporary notions of what constitutes due process and orderly procedure. Public resources are at issue and the public voice and advice should be heard.

Subsection (3) of the draft would retain the present reimbursement treatment of costs related to mitigation, compensation and loss prevention measures in Federal or federally assisted water and associated land projects. Briefly, these costs are now assumed to be a joint responsibility of beneficial purposes. Accordingly they are allocated as joint costs among all purposes. That portion of those joint costs allocated to reimbursable functions such as water supply are also reimbursable to the U.S. Treasury. Those allocated to flood control are nonreimbursable. This is believed to be equitable and reasonable.

Concerning enhancement costs, present law requires the Federal Government to assume 75% of the cost of separable features allocated to fish and wildlife, and all joint costs. Annual operation and maintenance costs are a responsibility of the administering non-Federal agency. The enclosed draft amendments would change this situation only to require that all costs of enhancing anadromous fish should be non-reimbursable (Federal).

This is proposed in recognition of the fact that anadromous fish are interstate and international in their migrations and in their pursuit by sport and commercial fisherman. It is manifestly wrong to expect any State or local entity to assume these costs in behalf of beneficiaries who may be thousands of miles removed. This proposed provision would place anadromous fish on a par with migratory waterfowl insofar as reimbursement requirements are concerned.

Probably the greatest single burden on State fish and wildlife agencies is associated with annual O & M costs of enhancement features under their management. The subsection would settle a current discussion as to which Federal agency's budget should carry the appropriations requested to defray operation and maintenance costs related to means and measures to minimize or prevent losses to fish and wildlife. Traditionally, the Corps has maintained that such costs should be funded by the Federal fish and wildlife agencies.

It is the view of the latter that such costs would not have been incurred except for the Federal project and, therefore, they should be funded by the construction agency. They should clearly be in the public works budget so that the true costs of Federal water development are conspicuously apparent in that place.

Subsection (4) would make specific provision for post-construction studies in evaluating proposed major projects to determine with greater accuracy the impacts of the project on fish and wildlife resources. This is of importance in those cases where the probable impacts are difficult to predict or when pre-construction planning may be on such a short deadline that there is inadequate time for thorough ecological and economic studies. It is expected that the need for such studies will be recognized in project authorization documents. Their costs would be nonreimbursable.

Subsection (5) would continue the present requirement that findings and reports prepared under the Act shall be made an integral part of authorizing documents and add a further requirement that they promptly be made available to the public.

Section 5—This Section would require construction agencies to transfer adequate funds to the Fish and Wildlife Service and National Marine Fisheries Service to cover the costs of investigations and reporting. These agencies would make necessary funds available to State fish and wildlife agencies. The present authority to transfer funds is discretionary and relates only to the U.S. Fish and Wildlife Service as a recipient. It is believed important to make the requirement mandatory and to insure that funds transferred are adequate to finance all studies necessary under the Coordination Act, whether expended by the Federal or by State fish and wildlife agencies who have been chronically underfunded for this activity. These are administrative problems implicit in the proposed language but they can be surmounted.

Section 6—This Section would repeal that part of the present Act (Sec. 2(h)) which exempts from its application those impoundments of less than 10 acres in area and watershed activities on Federal lands which are considered to be primarily for land management purposes. Although few projects of 10 acres are of major concern, it is believed that the fish and wildlife agencies should have the option of giving attention to such projects if the probable impacts justify such action. Some of the more significant damages to the environment stem from the cumulative impacts of a number of small projects. This is particularly true in the wetlands of the Nation. Insofar as diversions of water on public lands for land management purposes are concerned, these are similar in intent and impact to irrigation projects. The Government as landlord should be treated the same as private beneficiaries of water development.

Section 7—This Section would add two new subsections—2(h) and 2(i).

Subsection (h) would require that Federal agencies authorized to construct or assist in the construction of water projects prepare annual reports detailing their progress in installing fish and wildlife features compared to the rate of installing other project features. The purpose is to help insure that fish and wildlife measures are in proper phase and to avoid situations in which such features have been delayed to the point that they are no longer feasible. This is particularly true for land acquisition. The fish and wildlife agencies have never had sufficient resources to monitor this situation. The proposed report would provide the intelligence necessary to keep everyone informed. The report would be provided to the Congress along with the views of the Secretary of the Interior and the Secretary of Commerce.

Subsection (i) would establish procedures to be followed in connection with the post-construction investigations authorized by subsection 2(b)(5). The report and recommendation of the fish and wildlife agency would be fully considered by the construction agency. Recommendations which are justified and within the authority of the latter would be implemented. For measures not implemented, the construction agency would publish its reasons and inform the Congress. The objective would be to make the information available as a basis for Congressional decision.

Section 8—This Section would provide that revenues realized from the administration of wildlife lands (as from share cropping or timbering) shall be left with the administering wildlife agency for its use in managing the area. Present Corps of Engineers' regulations have prohibited such retention and thus deprived certain State fish and wildlife agencies of funds which were important in the management of these lands. State agencies are particularly concerned in connection with mitigation lands. As noted, the measures are strictly attributable to losses associated with the project and the project and construction agency should make whole such losses in the degree reasonably possible.

Section 9—This Section is designed to clarify the intent of the proviso in subsection 3(c) of the existing Act. Subsection 3(c) authorizes the acquisition of lands, waters, and interests therein when consistent with the purposes of the Act and the reports of the Secretary of the Interior. The proviso then appears to offer an option in the case of previously authorized projects, for the construction agency to request the Congress for specific authority in each instance. This has proven time consuming and has brought such actions out of phase with project construction. The alternative proposed is to permit the acquisition when a properly justified report is presented to the Congress before an appropriation is requested therefor. It is believed that this would facilitate acquisitions in connection with projects previously authorized while preserving the proper oversight by the Congress.

Section 10—This Section would amend Section 8 of the present Act to expand the definitions of terms. The present definition of "wildlife" would be improved. A definition of "consult" would be added to emphasize that it extends to assistance in project planning and evaluation insofar as fish and wildlife concerns are affected. The key to realization of the objectives of the Act is the participation of conservation interests throughout project planning, from inception of planning through operation of the constructed project. The term "Federal Department or agency" is also defined to include agencies that receive delegated authorities otherwise subject to the Coordination Act.

Section 11—This Section would authorize the institution of citizen suits alleging violation of the Act or regulations, orders, or permits issued pursuant to the Act. Prior notice to the appropriate department or agency would be required.

Section 12—This Section would repeal Sec. 3 of the Act of August 12, 1958 (72 Stat. 563), which added Section 12 to the Watershed Protection and Flood Prevention Act. Sec. 12 requires notification to the Secretary of the Interior whenever the Secretary of Agriculture approves the furnishing of assistance to local sponsors in preparing work plans for small watershed projects. It also provides that no funds may be transferred from the Department of Agriculture to conduct fish and wildlife studies related to such work plans, although such studies by the Secretary of the Interior are authorized. Placing the small watershed program under the Coordination Act makes this section no longer necessary.

LEGISLATION TO PROHIBIT THE SALE OF CHILDREN IN INTERSTATE AND FOREIGN COMMERCE

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. HYDE. Mr. Speaker, I am today reintroducing legislation to amend the Federal Criminal Code for the purpose of prohibiting the sale of children in interstate or foreign commerce.

I realized when I first introduced this bill last August 25, just prior to the congressional recess, that there was not enough time to schedule hearings on the bill, much less enact legislation. However, it was my intent to stimulate interest in the need for adequate Federal legislation in this area and to encourage both the support of my colleagues and public comment on this issue.

Due to the scarcity of babies available for adoption, the black market in interstate and international baby selling has become a flourishing business for profiteers who barter with human lives—in these cases, the sale of a child for cash. In treating the baby as a chattel, not only is the future welfare of the child placed in jeopardy, but in many instances, both the mother or natural parents and the future parent or parents are emotionally and financially victimized.

Last year two investigative reporters for the Chicago Sun-Times, Palm Zekman and Bob Olmstead, were the authors of an excellent, indepth series on the black market baby business, particularly in the Chicago area. This outstanding study of the problem first alerted me and many other Chicago area residents to the nature and severity of the problem, and stimulated continuing national media interest. This series revealed that the black market baby business is most flagrant in interstate and international deals that are beyond the control of State authorities and where there is a legal vacuum, because of the absence of Federal controls.

Since the Sun-Times series appeared, there have been indictments in New Jersey, which are now undergoing jurisdictional challenges; recent indictments in the District of Columbia; and investigations of black market baby selling are now underway in New York City. In addition, a recent UPI dispatch reports that the Government of Mexico has launched an investigation into the alleged sales of Mexican babies to American families.

My legislation seeks to make it a criminal offense to place or coerce the placement of a child for adoption under circumstances which amount to a "sale" of the child. Once this legislation is enacted, any individual convicted of violating this law will face a fine of up to $10,000 or imprisonment of up to 5 years or both.

I invite my colleagues cosponsorship of this bill and urge that hearings on this legislation be scheduled before the Judiciary Committee as soon as possible.

FREEDOM FOR VIETNAMESE POLITICAL PRISONERS

HON. EDWARD I. KOCH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. KOCH. Mr. Speaker, last week the International League for Human Rights sent a letter to the Socialist Republic of Vietnam asking that it end its jailing of peaceful political opponents. I joined with over 100 other antiwar activists in signing that letter. I did so for the same reasons that I had opposed the war earlier: I believe that the United States should never support or condone repression in another country.

I want to make clear that these South Vietnamese political prisoners did not collaborate with the Thieu regime. On the contrary, they opposed the repression and advocated peace and reconciliation. They faced persecution for their beliefs then, and for their independence they have once again been suppressed. Tran Van Tuyen perhaps typifies the spirit of these "prisoners of conscience." Ordered to write lengthy self-criticisms, he simply responded:

I have committed no crime against the Vietnamese fatherland or the Vietnamese people. If I have done anything wrong, it is only in the eyes of the Lao Dong party (the Communist Party of Vietnam).

The daughter of Tran Van Tuyen, Mrs. Tran Thi Dam Phuong, has made an eloquent and passionate plea for the release of her father. I am appending that statement, and urge that my colleagues read it.

In a very real sense, the United States owes a great debt to these third-force leaders. During the war the United States blindly supported the Thieu regime and thus indirectly suppressed these other South Vietnamese. We now have another opportunity in which these people need our help, and we should not let it escape us.

Some may ask me if I regret my opposition to the war. I do not. I am one of those who always believed that North Vietnam was as repressive as South Vietnam. But I also believe that the United States should not become involved in a civil war between two repressive regimes.

Others may question the right of the United States to voice concerns about freedom in Vietnam. Whatever our mistakes, and they have been tragic and numerous as regards Vietnam, we as a nation should not be fearful to speak out in the cause of freedom. In recent years many of us here in Congress have worked to promote respect for basic human rights as a factor in U.S. foreign policy. Assistance to Chile and Uruguay has been cut because of repression there. I am hopeful that the new administration will be more sensitive to these concerns.

Mr. Speaker, I believe the United States can once again stand as a symbol of freedom if we voice our opposition to repression whether it comes from the left or the right, and if we understand the limits of our abilities to influence the actions of other governments. For instance, the United States can play a constructive role in securing the release, by exchange, of political prisoners in right- and left-wing dictatorships, as has already occurred between Chile and the Soviet Union.

Mr. Speaker, however terrible the war in Vietnam was, the Government of Vietnam should be held accountable for its detention of political prisoners. I hope that it will allow an international human rights organization to conduct a review of the situation there. I am appending the letter from the International League for Human Rights to the Government of Vietnam, followed by the statement of the daughter of Tran Van Tuyen:

THE INTERNATIONAL LEAGUE
FOR HUMAN RIGHTS,
New York, N.Y., December 29, 1976.

H. E. AMBASSADOR DINH BA THI,
Office of the Permanent Observer of the Socialist Republic of Vietnam, New York, N.Y.

DEAR AMBASSADOR DINH BA THI: As a non-governmental organization affiliated with the United Nations, we address you to convey our deep concern with reported activities of your Government which appear to be in violation of the human rights principles to which we assume your Government subscribes by virtue of its United Nations connection.

These activities, supported by documentation, cover suppression of language held to be critical of the Government or its policies, thus contravening Article 19 of the Universal Declaration of Human Rights. In similar fashion, other articles of the Declaration appear to be violated in the detention of political prisoners solely for activities not involving violence or organized opposition. In this connection, we enclose a petition addressed to your Government and signed by 90 well-known Americans concerned with foreign affairs.

It is particularly appropriate that these Americans should address you in view of the fact that they were all staunch opponents of America's participation in the war against Vietnam. They are equally now staunch advocates of the principles of human rights established by the United Nations and subscribed to by almost every member state, including, we hope, your own.

We respectfully request you to forward this communication to your Government for the attention of the appropriate offices. We would appreciate your acknowledgement.

With assurances of our respect.

Yours sincerely,

ROGER N. BALDWIN,
Honorary President.

A PLEA TO THE GOVERNMENT OF THE SOCIALIST REPUBLIC OF VIETNAM

STATEMENT BY MRS. TRAN THI DAM PHUONG, INTERNATIONAL LEAGUE FOR HUMAN RIGHTS PRESS CONFERENCE, DECEMBER 29, 1976

Please release my father, political prisoner Tran Van Tuyen, former chairman of the Opposition Bloc in Saigon's National Assembly.

I would like first of all to express my support for the International League for Human Rights, and my gratitude for the efforts of all people concerned about political prisoners held by the government of Vietnam. I know my father would want me to say this first, because he once led an organization to free political prisoners jailed by the old Saigon government. He himself has suffered jail, torture and other forms of persecution by the French, by the various Saigon dictators, and by the Communists, for his life-long efforts to free political prisoners and establish a government where there could be no political prisoners.

My father and my brother are among the many in Vietnam's "re-education" detention camps. Tran Van Tuyen, my father, is 63 years old, and very sick. He is held in the strictest confinement at the Long Khanh province detention camp, denied an adequate diet, and refused medical care, according to information my family has received from Vietnam from a variety of trusted sources.

Who Is Tran Van Tuyen?

My father fought against the French colonialists as one of the youngest members of Vietnam's Nationalist Party, inspired by Sun Yat Sen's similarly named political party in China. Like Sun, my father was committed to an independent republic in Vietnam, democratic socialism, and welfare for the people.

My father demanded immediate independence for Vietnam, commanded an entire province in armed resistance to French rule, and was jailed by the colonial Surete in Hanoi. He joined the late Ho Chi Minh's coalition government in 1945 as second-ranking member of the foreign ministry. He was driven into exile when the Communists showed they wanted to dominate all power in the coalition government rather than share power democratically, and actually began assassinating non-Communist nationalist leaders, or betraying them to the Surete for arrest.

After this experience my father tried to use the Emperor Bao Dai as a rallying symbol for the Vietnamese people to fight both the colonialists and the Communists. He served in Bao Dai's cabinet, accepting what he thought was a French offer of a compromise peace, but was forced to flee again when French Governor General Jean de Lattre de Tassigny ordered his arrest after my father forcefully instructed the colonial officer to shut up and leave a Bao Dai cabinet meeting. He became a colonel in the army of the Cao Dai Buddhists in Tay Ninh because they agreed with his proposals to fight against both enemies of Vietnamese freedom.

In 1960, under Ngo Dinh Diem's rule, my father was arrested and tortured for three years on the then-secret Con Son island prison, which later became known for its "tiger cages." His crime was that he joined the "Caravelle Group" political leaders who in a public statement daringly criticized the Diem dictatorship for political arrests that "fill the prisons to the rafters." The widely-circulated statement demanded a free press, open political parties, a liberal form of government, civil rights, the recognized right of a functioning political opposition, and "authentic democracy." This is what my father has stood for his entire life.

I can remember well my father's early opposition to the introduction of American troops in Vietnam, and I can also remember pro-Saigon government newspapers attacking him as a "pacifist" because of this. Until the day Saigon became Communist my father hoped to end the war and transform the fighting into a peaceful political contest for the support of the people.

When Saigon was ruled by Marshal Cao Ky and later General Nguyen Van Thieu, my father called repeatedly for a new civilian government with freedom of expression. As the elected chairman of the Opposition Bloc in South Vietnam's National Assembly—the equivalent of the House Minority Leader in America—during the Thieu regime, he strongly opposed the detention of political adversaries, worked as a lawyer to achieve their release, and attended street demonstrations at great personal risk to try to prevent Thieu's secret police from beating and maiming non-violent demonstrators, all too often with scant success. Because of such actions, he was persecuted by the Saigon regime. Thieu's secret police even tried to bomb his house once to scare him off.

My father persisted then, as in the past, to stand up and openly declare his belief in freedom of expression, and I know in my heart that he will continue to show the courage of his convictions until his dying day. Vietnamese refugees who shared his prison camp report that when he was ordered to "confess" his crimes in lengthy self-criticisms, he produced two sentences: "I have committed no crime against the Vietnamese people or the Vietnamese fatherland. If I have done anything wrong, it is only in the eyes of the Communist Party of Vietnam." A New York Times column recently called him the "Solzhenitsyn of Vietnam's Gulag Archipelago."

An appeal

All his life my father fought for the independence and unification of his country, for the freedom of his people, and for a democracy in which human rights are honored for all Vietnamese. I appeal to the leaders of the Socialist Republic of Vietnam to release my father, who has been detained for more than 18 months, and whose only crime has been a lifetime of doing his best to express his love for his people and his fatherland. My father wanted a true democracy in Vietnam. I now appeal to people in democratic nations everywhere to try to persuade the Vietnamese government to free him and other political detainees.

STATEMENT OF THE HONORABLE NEWTON I. STEERS, JR.

HON. NEWTON I. STEERS, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. STEERS. Mr. Speaker, I am today releasing a detailed financial statement of my net worth as of December 31, 1976.

I believe that disclosures of this nature by public officials are important and in the public interest. Public officials in my view are public servants, and "no servant can serve two masters," as the old saying goes.

As a Congressman, I will be called on to vote on a wide variety of issues. It is the public interest I am sworn to serve. By detailed disclosure, Montgomery Countians can determine whether there was a conflict between my private and my public interest, and which one I served with my vote.

In recent years, the Congress as an institution has been shaken by revelations of bribery, kickbacks, and campaign office account abuses of some Members of Congress. The net effect of these charges is that the public's respect for the Congress has plummeted to the point where only a bare majority of Americans have any faith in this body. Many of the citizens we represent believe that the majority of Members of Congress are—pure and simple—crooks, using their office to line their pockets rather than to serve the public.

Although I am only a freshman Member of this body, and today is only my first day as a Member of Congress, I know that this sorry view is not correct. As a resident of the Washington area for almost 20 years, I have known a great number of individuals who have served in Congress with honor and integrity and deserve the highest respect. I can say that the vast majority of the present Members of the House and Senate—on both sides of the aisle—are decent, honorable individuals whose overriding interest is serving the people.

However, I believe that perceptions are very important and that we should do all we can, as individuals and as a body, to erase the public's doubts through complete personal financial disclosure, as practiced by a good number of Members over the past several years. I have decided to devote this, my

"maiden statement," in the CONGRESSIONAL RECORD to publishing my own financial statistics, on an annual basis

By means of this statement, the people of my district—and the people of the Nation—will be able to review my record each year to satisfy themselves that I am serving their interests and not my own.

I urge my colleagues, especially those in the freshman class, to set the tone for the 95th Congress by publishing their financial statements.

A detailed statement of my net worth follows:

NEWTON I. STEERS, JR., STATEMENT OF NET WORTH AS OF DECEMBER 31, 1976

ASSETS

Cash Items:	
Net credit, E. F. Hutton & Co. brokerage account	$6,817.00
Checking accounts:	
Potomac National Bank	9,491.76
American National Bank	4,351.35
Riggs National Bank	1,251.83
Savings Accounts:	
Gov't Services Savings & Loan	26,072.30
Chevy Chase Savings & Loan	30,778.82
Total cash items	78,763.06
Securities (Schedule A)	893,926.50
Retirement account, State of Maryland (as of 6/30/76)	3,485.60
Car, 1972 Pontiac LeMans, mean of wholesale and retail values	2,500.00
Insurance—National Service Life, $10,000 face, cash value	----------
Personal belongings such as furniture, clothing, tools, and equipment are omitted as not relevant to the purpose of this statement. Current household expenses payable are omitted for the same reason	----------
Real estate:	
6601 River Road, Bethesda (home)[1]	490,000.00
6509 River Road, Bethesda (rented out)[1]	112,500.00
Less mortgage payable (on 6509 River Road)	3,013.29
Total real estate	599,486.71
Net worth	1,578,161.87

[1] Two independent appraisals have been made, as follows:

9/26/73	$112,500	$490,000
10/8/73	75,000	292,400

Higher value adopted above, in view of lapse of time since appraisals were made.

SCHEDULE A

NEWTON I. STEERS, JR., SECURITIES HELD AS OF DEC. 31, 1976

	Shares or amount	Market value: Per share	Market value: Total
Common stocks:

AN URGENT NEED: A NEW, FAIR, AND EQUITABLE 1977 PUBLIC WORKS EMPLOYMENT ACT

HON. EDWARD J. PATTEN

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. PATTEN. Mr. Speaker, it sounds very hard to believe, but although Middlesex County, N.J., suffered an unemployment rate of 9.3 percent and almost 26,000 jobless during the April, May, and June 1976, period considered, not one of its 25 communities was included for a Federal construction grant under the Public Works Employment Act list issued by the Economic Development Administration—EDA.

The selection list was not only disturbing to the county and its communities, but to me as a cosponsor. Since the 9.3-percent unemployment rate was about 2 percent higher than the national average, we certainly expected some Middlesex County grant applications to be approved by the EDA. Unfortunately, despite the fact that over $100 million in applications were filed by the county and its municipalities, not even one was selected.

The EDA claims that it has no control over the selections made in late December, because of the seven criteria analyzed by the computer—ranging from the rate of unemployment, to the personal income of the area. However, it is evident to me and to many other Members that a new, fair, and equitable bill should be passed soon by Congress and signed by President Jimmy Carter.

Besides urging an investigation to determine how and why Middlesex County and its communities—and similar high-unemployment areas—were excluded from selection by EDA, I strongly urge the new Congress and the Carter administration to extend—and expand—the Public Works Employment Act introduced by its chief sponsors: Representative JIM WRIGHT, Democrat of Texas, and Representative ROBERT A. ROE, Democrat of New Jersey. I commend them for their fine leadership, and join them again as a cosponsor of this vital program.

Mr. Speaker, more Federal funds must be authorized and appropriated in the new bill being introduced today. The $2 billion in title I funds was certainly inadequate—even ridiculous. For example, $24 billion worth of applications from State, county, and local units in the Nation had to compete for the $2 billion. I also believe that the 70–30-percent formula should be eliminated and replaced with one which gives high unemployment areas the priority and attention they deserve. To express it in very mild terms, Middlesex County and its communities failed to obtain the grants they deserve.

I am well aware that the Public Works Employment Act is not the solution to the serious unemployment problem America faces today, but it does help. In my congressional district, alone, over 30,000 persons are looking for work—a real economic tragedy. Let us help put more people to work and also aid communities in their building plans—from the construction of libraries, to providing street improvements.

The $2 billion is not enough. I feel that we should pass a bill which includes the amount supported by the Democratic leadership and reportedly by President-elect Carter: $4 billion, at least. It would be a wise investment—in both human and physical terms. My colleagues of the House, let us show that we care about the unemployed and their communities.

ACTION NEEDED TO ALLEVIATE GAS SHORTAGE

HON. JAMES T. BROYHILL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. BROYHILL. Mr. Speaker, the natural gas shortage continues to loom as one of the largest problems facing this Nation, and the public is beginning to pay the price of congressional inaction. The question of deregulation of the wellhead price for new natural gas has consumed much time in Congress, with the result that the serious short-term supply shortages have been ignored. It is obvious that Congress must take immediate steps to protect homeowners, small businesses, and industrial users for whom there is no ready substitute for natural gas.

Fortunately a number of factors, primarily mild weather conditions, have enabled the Nation to avert major economic disruptions the last two winters. This winter, however, has been much colder than anticipated. Not only have substantial volumes of gas been withdrawn from next year's storage, but hundreds of small industrial and commercial users are relying on purchases of "emergency" gas, supplies which may be discontinued with only a few hours notice.

There are more than 75 small commercial and high-priority natural gas users in North Carolina which are being threatened with a total cutoff of gas supplies this month. These companies employ more than 50,000 persons, and are vital to my State's economy and my

constituents' welfare. With the weather as cold as it is, this trend is expected to continue throughout the Nation. I am informed that the State of South Carolina hosts another 100 companies whose supplies might be discontinued this month. It is my belief that Congress should act to alleviate this situation before it worsens, so that small and vital users of natural gas may be reasonably assured of essential supplies.

For these reasons, I am introducing a short-term or "emergency" bill to amend the Natural Gas Act to temporarily increase the availability of natural gas supplies. My bill would permit an interstate pipeline that is curtailing users to purchase emergency supplies of natural gas from intrastate pipelines. The high priority needs which would be protected by this bill would include industry, small businesses, schools, and similar users whose operations are vital to public health and well-being. The gas would be available for periods of 180 days, and would be flowing only through April 1978.

There is little doubt that the 95th Congress will again be debating long-term solutions to our Nation's natural gas shortage. However, the likelihood exists that thousands of Americans may be unemployed, industries and schools closed down while Congress considers the long-term problem and ignores the immediate crisis. Regardless of your point of view on how best to assure future adequate supplies of natural gas I would urge your support of my emergency proposal which can, if we act promptly, relieve the impending crisis of the next 3 months.

APPLIED SOCIOLOGY AND THE MONDALE BLUEPRINT

HON. ROBERT W. EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. EDGAR. Mr. Speaker, I would like to share with my colleagues a provocative analysis and commentary on legislation conceived of by Vice President-elect WALTER MONDALE which would increase the role of social scientists in Federal decisionmaking. This paper, entitled "Applied Sociology and the Mondale Blueprint," is authored by Prof. Arthur Shostak of Drexel University in Philadelphia. Accepted for reading at the 1977 meeting of the Eastern Sociological Society, the paper assesses the need for this bill and reviews its nearly 10 years of legislative history:

ABSTRACT

Since 1967 Walter F. Mondale has been urging Congressional colleagues to enact a bill that would vastly increase the uses made of the social sciences by the Federal government. In his position now as Vice-President he may move to finally secure its passage, and aides and consultant are already reviewing a 1977 update of the oft-considered, but never-passed bill. As law it would establish a Council on Social Analysis and an annual Social Report to the President, either or both of which would dramatically and radically revamp the status and role of sociology in American life. Objections to the Mondale blueprint are discussed, and the paper closes with an assessment of the bill's overall significance, whatever its near-future fate.

Applied sociology *may* have a larger role in the Carter-Mondale administration than ever before true in federal affairs—though whether to the better or detriment of the profession and the nation remains a perplexing and open matter. Much hinges on whether or not Vice-President Walter F. Mondale seeks and gets approval to press ahead with his ten-year old quest to vastly increase the government's use of social indicators, social evaluations, and social reports. No other present or recent member of Congress has pushed as long, as hard, and as knowledgeably as has Mondale on behalf of a remarkable boost in the status, power, and impact of our discipline. The time for resolution of the Mondale campaign now appears close at hand—with Carter Administration influentials likely to decide within the term's first year whether to go with or stifle the Vice-President's vision of a "twice-born" sociology, a vigorous and relevant sociology in the service of immediate and long-range public policy questions.

As often before over the decade-long record of this particular Mondale campaign a number of opportunities will exist for sociologists to contribute to the dialogue. Testimony pro and con the Mondale blue-print is already on-the-record from the likes of Amitai Etzioni, S. M. Miller, Talcott Parsons, Eleanor Sheldon, Mancur Olson, Daniel Patrick Moynihan, and a score of others invited by Mondale to appear before concerned Congressional committees.[1] As well, occasional magazine articles and journal essays attest to past interest, and to present-day opportunities to help shape the 1977 outcome of this go-around.[2]

To help enlarge the diversity and quantity of concerned sociologists I propose to raise and answer three central questions:

First, just what *is* the Mondale blue print?

Second, what are the major criticisms leveled at it?

Finally, what is its special significance, regardless of its 1977 fate?

Research of mine in support of the discussion that follows includes Summer, 1976 interviews with consultants retained by Mondale to prepare a 1977 draft of his original 1967 bill. I have also interviewed several sociologists who have previously testified before Congressional groups inquiring into the Mondale bill (in all of its various versions). And I have analyzed all the relevant testimony in hundreds of pages of Congressional hearings ('68, '70, '71) on the bill.[3]

1. *Mondale's Blue-Print.* First proposed as legislation in 1967, the Senator's plan for applied sociology revolves about his deepset conviction that the social sciences in general, and sociology in particular, offer a signal advance over the "hunch, intuition, and good intentions that have been the heavy artillery of social problem solvers."[4] When he re-introduced his bill in 1971, after Senate passage in 1970—and again in 1972—(but House neglect on both occasions), Mondale stressed the fundamental inadequacy of the information on which he and his colleagues had been operating as they had legislated the Great Society into existence.

Still more interesting is Mondale's apparent conviction that securement of the missing information might have spelled the difference between policy and program success or failure:

"To our collective sorrow most of [the sociology studies that would have helped] remained buried in the forbidding pages of the scholarly journals . . . One can only imagine how different the tumultuous decade just ended might have been had there existed then the sort of mechanism for monitoring and reporting social conditions I am proposing."[5]

Whether this 1972 persuasion of his has actually withstood the test of five intervening years is presently known only to Mondale, and may be decisive in the scenario ahead.

Be that as it may, Mondale's original confidence in the "if/then" analytic and prescriptive powers of the social sciences has had him champion the development of two remarkable additions to the Executive Office of the President:

First, the creation of a *Council on Social Analysis* (CSA), comparable to the Council of Economic Advisers, as set in motion 31-years ago in the Employment Act of 1946.

Second, the creation of an annual *Social Report of the President*, prepared by the CSA, and analogous to the annual Economic Report to the President, prepared for 31-years now by the CEA.

Either or both development will immediately and radically alter the role of sociology in American life, . . . and in short order, elsewhere as well.

The proposed CSA would be composed of three of the nation's "most gifted and respected social analysts (appointed by the President and confirmed by the Senate) and staffed by a number of America's brightest young social scientists", or so Mondale prescribed.[6] It would have four major functions—date-gathering, social monitoring, program evaluation, and "translation" (or the interpretation of sociologese to Congress, and, vice versa!). Mondale went out of his way to note that a "principal task" of the Council would entail developing a system of social indicators—something presumably more substantial than our '73 OMB and '76 OMB compendiums of assorted indicators.

As for the proposed annual report of the President on the nation's social status, Mondale cited two related objectives:

"Requiring the President to report annually on such areas as education, health, housing, alienation, political participation, personal security, and social mobility would do far more than assure the publication of CSA findings and recommendations: It would guarantee such societal knowledge visibility of the sort that only presidential involvement can generate."[7]

These two objectives—bolstering a case for many different CSA studies of strategic facets of American life, and lending Presidential prestige and clout to CSA findings and recommendations—would usher in a new age for applied sociology, an age of far more potential influential and power than any save Comte and Saint-Simon might rest easy with.

2. *Criticisms.* From the 1967 beginning of the campaign to win enactment of this blueprint opposition has been considerable, thought-provoking, and over-whelming—at least to date.

Some critics insist that the Council of Economic Advisers can do all that Mondale asks, and recommend therefore that we need only add a sociologist or two to the CEA staff.[8] Certain critics contend that the social sciences, with the lone exception of economics, of course, lack basic theories of causation, and cannot be looked to for the really substantial counsel that Mondale seems to envision.[9] And still other critics castigate the blueprint for its seeming over-reliance on the alleged potential of "scientific" information. Typical here is a recent stinging column by conservative commentator George F. Will, who sees in Mondale's "reverence for the social sciences" a sorry and revealing indicator of the man's "idea of sensible statecraft."[10]

In response Mondale has respectfully, but firmly contended that the CEA ought not to be taxed with an entirely new and distinctive agenda, especially one with which many economists hold little brook. As for

Footnotes at end of article.

the lack of powerful and relevant theoretical schemes, Mondale concedes the point, but quotes social science testimony on the benefits to theory-building of applied exercises . . . and falls back on his basic insistence that some help, however limited, from the "soft" sciences is better than the normative workings at present of the federal apparatus.

Mondale's strongest rebuttal, however, remains his willingness to yield, especially when criticism is constructive and cogent: In the first year of his bill's Congressional review, for example, in 1967

Prof. Preston Wilcox of Columbia urged inclusion of a clear role for community people on CSA Advisory Committees; the Act was so revised.

Prof. Bertram Gross of Syracuse urged strengthening of the role in CSA matters of local and State governments; the Act was so revised.

Mr. Allan Speiser of the ACLU urged addition of admonitions against violations of civil liberties or invasions of privacy; the Act was so revised.

Prof. S. M. Miller of NYU urged new stress on the CSA's concern with long-range aspects of social policy and social programming; the Act was so revised.

Most recently the 1977 draft version of the bill has adroitly retitled the 1967 "Council of Social Advisers" by a new tag—the "Council on Social Analysis"—in a delicate effort to placate status-sensitive members of the prestigious Council of Economic Advisers . . . who want no other profession to share such proprietery nomenclature.

3. *Significance?* While members of Mondale's staff have been preparing a 1977 draft since the Spring of '76, and while several sociologists and other social scientists have been privately asked to critique versions of a new bill, the possibility remains that Administration strategists will choose instead to forego another Mondale-backed effort to win its enactment. They are weighing the argument that the "foresight" requirement of the 1974 Congressional Budget Act, the mandate that now requires a five-year plan (and futures research) of all dollar-allocating agencies and Congressional committees, does much of the job that Mondale called for back through '67 to '74, and is at least owed a chance to prove this.[11]

Whatever its particular near-future fate, however, the example of the decade-old *unsuccessful* campaign to elevate sociology's employ in federal affairs has at least this major significance—It challenges our profession to ask once again, as from our very founding by French social engineers and American social activists, just what really ought to be our relationship to power, and our instrumental place in the federal scheme of things?

Does the Mondale blue-print ask too much of us? Ought we to run the risks our economist colleagues know in too close an identification with White House mainstream ideologies? Should we welcome a new source of crystallization of status and prestige within our profession—this a stultifying likely—consequence of the establishment of a new Council on Social Analysis?

Or should we see instead in the Mondale blue-print an overdue extension to the social sciences of hard-earned and warranted influence and significances? Should we see in the blue-print a natural next stage, a logical advance, a healthy challenge, and an indispensable prod to advances both in theory-building and program and policy applications?

If the continued prospect of still-another go-around with the Minnesotan's sociological vision accomplishes little other than the reinvigoration of our own internal dialogue in the matter it will have made a signal contribution—though I, for one, join the Vice-President in dreaming of far more.

Summary. Trying to second-guess the likely sociological areas of concentration under the first two years of the new Carter-Mondale administration calls attention to four leading candidates:

Job Preparation Programs, in terms of skills acquisition, morale and motivation, a pro-job style of life, and other aids to permanent placement on the nation's payrolls.

Neighborhood Self-Help Efforts, as a calculated alternative to government-abetted neighborhood "triage" policies.

Youth Corps Service, as a revival of the CCC mode of fostering adolescent skills—attainment, citizenship experience, and race and class exposure.

Day Care Provision, as a government-run, or subsidized and monitored aid to dual job-holding parents; and also as a calculating supplement to childhood educational and social-psychological growth.

Less well-known, but possibly more far-reaching than all of these is the prospect that this Administration will once and for all set the Federal government's course firmly in the direction of vast new reliance on better-than-ever social intelligence.

From Hoover's request in the early 1930's for the fourteen-volumes of *Recent Social Trends,* (the extraordinary and sadly neglected prototype of the social indicator annuals now published or underway in twenty-six countries), through the 1969 HEW stimulant, *Toward a Social Report,* and our two recent national efforts at social intelligence centralization, the OMB '73 and '76 volumes on social indicators, we have moved unsteadily and unevenly—but also unerringly toward a state of relations envisioned in the Mondale blue-print.

Our public policy and reality-comprehension needs seem increasingly to require more of social science analysts than ever earlier true, especially as once-powerful agents of explanation (religious, ideological, and even economic paradigms) steadily lose their grip on our minds . . . and spirit. We are freshly challenged by a host of seemingly-new quandries—such as the possible desirability of slower growth, a smaller population, a shorter work involvement, a larger free-time challenge, a turbulent politics of young versus old, and so on. We look for keener tools of analysis and insight than we have thus far possessed—and are urged by the Mondale plan to consider two in particular, a Presidential Council and a Presidential Social Report, that could help meet the bill—or hasten instead the sorry spectacle of adult sociologists serving as servile "mansion houseboys", the equivalent among '77 academics of 1857 "house blacks".

The challenge cuts to the heart of a major dilemma of ours in the transition from an industrial to post-industrial period: How best can we serve—our profession, the community of social scientists everywhere, and our nation—with craft and integrity, while remaining free of the "entangling alliances" some perceive in the otherwise exhilerating likes of Mondale's vision of a "twice-born" sociology.

FOOTNOTES

[1] See, for example, *Hearings on S. 843 Before the Subcommittee on Government Research of the Senate Committee on Government Operations,* 90th Cong., 1st Sess. (1968).

[2] Etzioni, for example, devoted a Summer, 1976 column of his in *Human Behavior* to the subject, and a forthcoming 1977 issue of *The Annals,* edited by Conrad Taxieber, will be devoted to several essays assessing the December, 1976 publication of *Social Indicators, 1976*—paying special attention to alternative models of sociology's optimum contribution to public affairs.

[3] All of this research is part of a much larger undertaking: I have two Summers still to run on a 3-Summer NSF Fellowship to study the role of social indicators in the solution of societal problems. My first Summer (1976) was spent as an NSF Fellow at the Center for Coordination of Research on Social Indicators, SSRC, Washington, D.C.

A CONTINUING CONCERN OVER TELEVISION VIOLENCE

HON. TOM RAILSBACK

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. RAILSBACK. Mr. Speaker, last September, I expressed my concern over the rising rates of juvenile crime and violent crime. I noted that from 1960 to 1975, the most recent available statistics, the number of violent crime arrests rose 156.4 percent with juvenile arrests up 293.4 percent. At the same time, I was faced with criticisms of the high incidence of violent events on television. For example, by the age of 12, the average child will have seen over 101,000 violent episodes on television and will have witnessed 13,400 deaths. Furthermore, recent reports, including those done by the University of Utah and by the Annenberg School of Communications of the University of Pennsylvania, indicate a relationship between viewing violence on television and changing attitudes toward violence in the real world. I responded by introducing a resolution expressing the concern of Congress in this area and asking those responsible for television programing to take these trends into account. Seventeen other Members of Congress joined me as cosponsors and two other indicated their desire to cosponsor on the next reintroduction.

Since that time, I have received numerous letters from concerned parents and teachers voicing their support of this effort. The PTA had already launched a project of its own and is holding a series of eight public hearings in major U.S. cities. The 6½ million members also plan to monitor and evaluate TV programs, to boycott products or programs and to contact local stations, networks, sponsors, and legislators. People continue to be troubled by the violence occurring in the real world and on the screen. They still suspect a causal link between the two.

Until we, as legislators, are convinced that there is no relationship or that the relationship, if significant and harmful, can be remedied, we have an obligation to express the feelings of our constituents to those in a position to make the necessary changes.

I ask for wide support and involvement in resolving this problem. All of us are personally affected. Early hearings and full consideration in regard to the resolution I am introducing will indicate our sincere efforts.

A DEBT OF GRATITUDE

HON. LARRY WINN, JR.

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. WINN. Mr. Speaker, today is a day filled with excitement as we welcome our new colleagues and begin what we all hope will be a productive Congress.

We have been through some turbulent times in the past decade, and we can now look forward to the promise of the future. To a great extent, I think we owe a debt of gratitude to President Ford for this renewed spirit of optimism.

My purpose in making these remarks today, however, is not to make a partisan stand, nor to criticize the soon-to-be-installed administration. Instead, my purpose is to share with my colleagues in the House an article printed soon after the November election in the Kansas City Times.

In my opinion, this article sums up the feelings of countless Americans regardless of party affiliation, and therefore, I urge my colleagues to give it their consideration:

THANK YOU, MR. FORD, FOR BEING THERE

(By Bob Greene)

Dear Mr. Ford:

These must be among the most trying hours of your life, and I hope this letter is not an intrusion. Losing the presidency is a hurt that only a handful of men will ever know, and no one besides yourself can understand the personal sorrow that you are feeling now.

But I want to write—as one of many Americans who are not very interested in politics, and who are not registered members of either political party—to say thanks. Thanks for being there when we all needed you.

You did not seek the presidency when it was handed to you. You were the middleman in a crisis the likes of which we may never see again. The rest of us could feel relief when your predecessor left office; while we talked about how the bad times were over, you alone faced the burden of trying to put us all back together again.

Before you came to office you said that you would never run for the presidency on your own. You changed your mind soon after entering the White House, but it would be hard to blame you for that. Only 36 other persons in the history of this nation shared with you the experience of being President; it is not hard to imagine that the lure of wanting it some more is an enticement hardly any man could resist.

In the first minutes of your presidency, you said that you realized you had not been elected by our votes. You asked that, in the absence of our ballots, you could have our prayers. You wished aloud that your predecessor and his family could find personal peace; you said that the long national nightmare was over.

We out here in the country were moved by your speech that day, but we all have short memories. Within months we were treating you the same way we have treated all of our modern Presidents. It is probably good, this intense scrutiny and easy criticism, for it helps make a President realize that his constituency is, indeed, paying close attention. But in your case we went out of our way to let you know that we did not regard you as an unflawed man.

So we made the jokes and the nasty cracks and the innuendos. It wasn't just the editorial cartoonists and the political columnists; so many of us joined in the glee at laughing every time you displayed a physical clumsiness and making jokes about your uneasy way with words and snickering over what we were led to believe was your lack of intellect. That you were an athlete, that you were a discerning survivor of the political infighting of the Congress, that you were an attorney graduating near the top of your law school class at Yale University—those things did not impress us. Now you were the President, and Presidents are the biggest targets we have.

By the time this election season came around it was fashionable to portray you as a bumbling clown. How this may have affected you as a human, we didn't much care. You were the President, and that is how we have been conditioned to treat our Presidents in the second half of the 20th century.

So you must be nursing hurts that you never expected. You will be leaving the White House soon, perhaps leaving Washington. And now perhaps it is the right time to say the words to you that we didn't ever say before.

You were a victim of circumstances. We all were victims of circumstances, of the national crushing of the spirit that was brought about by your predecessor. It was a little easier for us to be victims, though; we could merely complain and not be forced to do anything about it.

You, though—you had the job of beginning the healing. And you did it.

Two years ago it seemed at times impossible that we could ever be a nation that could smile again—that we could ever be a people who felt good about ourselves. But somehow it began to turn around. And you, more than anyone else, did it. In a quiet, low-key way you made sure we knew that the White House was not a place of uncleanliness anymore. You made sure that we knew that a President could, indeed, still be a caring man worthy of our trust. You helped get us out.

I don't want to talk about the results of Tuesday night's balloting. As I said at the beginning of this letter, there are many of us who do not spend very much time thinking about political matters, and it is best to leave the political analysis to those who make a career of that.

This is just a note of gratitude for helping all of us find a peace that, for a while, seemed destined never to be ours again. May you and your own family find peace, too. We can never repay you for the service you gave to your countrymen when we needed it most. It is difficult to put our feelings into words, but please know that the feelings are there, and that we will not forget.

Thank you, Mr. President.

ERISA AMENDMENTS URGED

HON. JOHN H. DENT

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. DENT. Mr. Speaker, on Labor Day, 1974, the President signed into law the Employee Retirement Income Security Act of 1974. This comprehensive scheme of Federal regulation of private pension and welfare plans was the product of more than 10 years of intensive study and work by the Congress. We knew when ERISA was enacted that it would not prove to be a perfect law. It was recognized that some of the complex and difficult legislative judgments we made as ERISA was developing, judgments which appeared correct in theory, would need improvement as the experience with the law developed.

I believe that our experience to date clearly demonstrates a vital need for statutory amendments to ERISA. Reporting requirements, for instance, must be reexamined to make certain that plan assets, which should be used primarily to pay benefits to participants, are not being used instead to pay for the preparation of duplicative and nonproductive Government reports. Confusion and a frequent lack of coordination among the agencies responsible for the administration of ERISA must be remedied. Other areas, to be sure, demand attention as well.

Our goal throughout the development and oversight of ERISA has been to improve and protect an employee's interest in his or her pension and welfare plans. I believe that ERISA represents a tremendous advance toward this important goal. By carefully and thoughtfully considering amendments to ERISA, I believe the Congress can move still closer toward this goal.

Mr. Speaker, I welcome the recommendations of my colleagues in the House regarding both the need for amendments to ERISA as well as the contents of such amendments. By acting early in this new 95th Congress, I believe we can achieve a more effective and more meaningful level of pension reform.

A TRIBUTE TO GEORGE WHITE

HON. B. F. SISK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. SISK. Mr. Speaker, on November 27, 1976, dairymen and those associated with the dairy industry of California gathered to pay honor to Mr. George White who retired as general manager of the San Joaquin Valley Dairymen's Association, a position he had held since 1949.

As a result of his hard work and efforts on behalf of the 317 dairymen who make up this dairy cooperative, their single plant now processes the same amount of milk in 1 month as it used to in 1 year. That, in and of itself, is a tribute to both the dairymen and the man they selected in 1949 to be their general manager.

Mr. White's career with the San Joaquin Valley Dairymen's Association began in June 1928 and has been continuous since, except for 4 years in the 1940's when he worked for another dairy firm. In 1948 he returned to the Los Banos Dairymen's Association as assistant

manager, and became general manager the following year. In September 1974 the East-West Dairymen's Association and the Los Banos Dairymen's Association merged into today's San Joaquin Dairymen's Association which last year processed 692,298,000 pounds of milk.

During his lengthy career in processing milk for the producer-owners of the Los Banos area, White developed inline processing for churning butter, as well as for automated powdered milk. He also introduced processing of mozerella and jack cheese to Merced County.

The California Legislature will be memorializing this dairy industry leader and I feel that his retirement dinner November 27 will be but a single tribute of many to be received as he steps aside. I wish he and his wife Elba a happy retirement.

A CALL FOR INDEXING

HON. LAWRENCE COUGHLIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. COUGHLIN. Mr. Speaker, today marks the beginning of the third Congress in which I have introduced tax indexing legislation as I have done this afternoon.

Tax indexing, in its simplest terms, is the concept of tying income taxes to real income rather than to inflated dollar incomes. My bill would require annual automatic adjustments in the income tax rates, the amount of standard deduction, personal exemption, depreciation, capital gains, and interest on certain U.S. obligations and their redemption value to reflect changes in the cost of living as measured by the Consumer Price Index. The result would be a tax structure which prevents taxpayers from being pushed into higher and higher tax brackets due to rising wages which provide them with no additional purchasing power in real terms because of inflation.

I am pleased to note the growing acknowledgement of the merits of tax indexing and draw the attention of my colleagues to the release recently of a Joint Economic Committee staff study which advocates the indexing approach. The American people want real tax reform and any meaningful reform must include the indexing concept. Once again I urge the Ways and Means Committee to give serious consideration to tax indexing which reflects the views not only of a growing circle of noted economists, labor and financial leaders but an increasing number of average taxpaying Americans as well.

An article by James L. Rowe Jr. which appeared in the Washington Post on January 2, 1977 focuses on the Joint Economic Committee staff report and I insert it in the RECORD at this point:

A CALL FOR TAX INDEXING

(By James L. Rowe, Jr.)

The progressive income tax, far from automatically keeping the economy on a stable path as it is designed to do, actually made the 1974–75 recession worse because it pushed people into ever higher tax brackets when their real incomes were falling.

That is the contention of a Congressional Joint Economic Committee staff study released yesterday.

The study argues that the federal personal income tax system must be indexed—or corrected for inflation—so that effective tax rates are not raised by wage increases which merely keep pace with, or even lag somewhat behind inflation.

Under an indexed system, persons with larger incomes would continue to pay a bigger percentage of those incomes to the government than would poorer persons, but wage increases which merely keep pace with higher prices would not raise the average tax rate for any individual.

Thomas F. Dernburg, chairman of the economics department at American University and author of the study, contends that not only does the progressive income tax reduce real incomes during inflation periods ("so that erstwhile automatic stabilizers become destabilizers) but that it also provokes labor to seek higher wages, lowering production (and employment) and intensifying inflation.

Traditional economic theory holds that the graduated income tax is an "automatic stabilizer" because when prices and wages are rising during periods of excess demand, progressively higher percentages of the incomes are taxed. This boosts the federal tax take and has a restrictive effect on the economy. Similarly, when production and wages are falling during a recession, the percentage tax take falls faster than wages decline, thereby propping up real income and production.

The same theories argue that indexing will contribute to inflation and economic instability by failing to reduce excess demand during periods of inflation.

But when, as in 1973 and 1974, inflation occurs not because of excess demand but because of supply problems—such as the quadrupling of oil prices by producing countries and the worldwide grain shortage which boosted food prices—the progressive tax system does not help inflation and can contribute to recession.

"Very few competent analysts would seriously claim that the economy of 1974 was characterized by excessive demand," Dernburg contends. Instead, it was plagued by what economists call stagflation—rising prices and falling production.

Yet, because prices were rising, the progressive income tax pushed federal spending and taxing policies into a sharply restrictive mode. Between the final three months of 1973 and the third quarter of 1974, real economic output (as measured by the gross national product adjusted for inflation) fell at an annual rate of 3.2 per cent. But nominal GNP, including the effect of inflation, rose at an annual rate of 11.1 per cent. That means that even though fewer goods and services were produced, their total cost was much higher than the price tag on the bigger output nine months earlier.

Personal income rose 9.4 per cent in dollar terms, but after adjusting for inflation, it fell 2.4 per cent. Because the federal income tax rate rises on additional dollars earned, federal tax receipts increased faster than either nominal personal income or GNP.

The federal income tax take rose from 11 to 11.5 per cent of personal income during the period, even though the economy was weakening, as evidenced by the fall in real economic output.

"This is one of the troubles with an unindexed income tax. The aggregate income tax rate rises as long as nominal personal income rises, rather than as long as aggregate demand is excessive," Dernburg notes. Had the tax system been adjusted to account for inflation, the ratio of taxes to personal income would have fallen slightly, to 10.9 per cent.

"There is no doubt, therefore, that indexed taxes would have moderated the collapse of 1974," Dernburg contends.

Even without outside disturbances, however, the progressive tax system contributes to inflation, as workers seek to compensate for the higher taxes by demanding large wage increases, he argues. The tax increases reduce demand, thereby lowering production, employment and incomes. By itself, this would lower the price level. But the wage increases workers demand raise production costs. Because production costs rise, output falls even further, which lowers incomes. But total consumption never falls as much as total income (consumers either reduce savings or borrow to maintain a higher spending level), so effective demand rises relative to output and may boost the overall price level back up to where it was.

As a result, Dernburg contends, the progressive tax system may decrease employment during an inflation period without much gain against inflation. "This certainly ought not to be permitted to happen automatically, inasmuch as it implies a built-in mechanism that automatically creates a bias toward higher unemployment and rapidly rising wages as well," he says. He concedes that the empirical evidence to support this theory, at least in the case of the United States, is far from conclusive, but says that events in 1964, following the tax cut, and in 1968, following the imposition of the tax surcharge, would be consistent with this theory.

Dernburg, co-author of one of the leading intermediate economic-theory textbooks, notes that Congress regularly has taken action to ensure that inflation does not substantially change the way the tax system redistributes income and to keep the overall share of federal taxes (personal and corporate income and Social Security) at about 20 per cent of GNP.

Discretionary action, however, cannot perform adequately "in the handling of short-run stabilization policy," he says. Without indexing, the progressive tax system today can make matters worse.

He argues that rather than having a tax system which responds to inflation (whatever its cause) by raising the aggregate tax rate, an indexing system would produce a "neutral response that keeps the aggregate tax rate constant and maintains proportionality between taxes and personal incomes when the price level changes."

SOVIET STRUGGLE FOR HUMAN RIGHTS

HON. HERBERT E. HARRIS II

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. HARRIS. Mr. Speaker, on this, the first day of the 1st session of the 95th Congress, I take this opportunity to charge that the Soviet Union has not complied with its promise to permit the reunification of families who seek to emigrate to Israel. I, and many of my colleagues, plan to redouble our efforts on behalf of those individuals who continue to be denied their human rights in the U.S.S.R. Two such individuals are Eugene Reinberg and his wife Sophia. The Reinbergs have been separated from their only child and son, Yuri, for 19 months by Soviet emigration policy.

In addition to being a full-time medi-

cal student in Tel Aviv, Yuri was forced into part time employment in order to assist his parents. Yuri gained support for his cause by visiting the United States this past August to meet with me and other concerned citizens to discuss his parents' plight. During his visit to my office, I telephoned his father in Leningrad, informing him of our actions on his behalf. Yuri's father has a Ph. D. in physics and worked 28 years as a specialist and professor of metallurgy at the Institute for Shipbuilding in Leningrad. Like many other scientists who have applied to leave the Soviet Union, he has since been demoted to the much lower position of foreman of building repairs. It is felt that Yuri's father is being used as an example to warn others at the institute not to apply for permission to emigrate. But I believe that Professor Reinberg has become a symbol to free persons everywhere that we must maintain our dedication to human rights wherever they are being denied.

At this time I want to reassure the Reinberg family and others in the Soviet Union that the world has not forgotten them. Those who are seeking their restoration of human rights should continue their struggle. Their cause is just and Members of Congress, such as myself, will continue our work for this cause.

MAJOR POST OFFICE AND CIVIL SERVICE COMMITTEE BILLS

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mrs. SCHROEDER. Mr. Speaker, I am today reintroducing four bills from the 94th Congress which fall under the jurisdiction of the House Post Office and Civil Service Committee, of which I am a member.

The first of these bills would require that once again the Postmaster General and the Assistant Postmaster General be confirmed with the advice and consent of the Senate. Since the Postal Reorganization Act of 1971, these offices have been filled by persons solely appointed by the Postal Service Board of Governors. Thus, while Congress has been struck with Postal Service mismanagement and deficits, it has had no say in the appointment of those who have managed to create the deficits. I think my bill represents one of the steps which must be taken to correct this situation.

The second bill I am putting in the hopper today abolishes the congressional franking privilege and puts postage meters in each congressional office. The bill would serve two useful purposes: First, it would create a system of total accountability for mail sent by each Member of Congress. Second, it would eliminate the abuses of the congressional frank like those which have previously occurred and make it clear to the average citizen that congressional mail is not free and unaccountable.

The third measure I am introducing is the Federal Statistical Activity Control Act of 1977. This measure will provide the Federal Government with a mechanism to bring under control our Nation's paperwork burden. This bill contains the following provisions:

First, it imposes a "sunset principle" on all Federal authority to collect or process information for statistical purposes. Under the bill's provision, every statistical authority shall terminate at the end of a 5-year period beginning with the effective date of the legislation, or in the case of new authority, 5 years after its effective date. In other words, the forms or questionnaires are going to have to prove their necessity every 5 years or go out of existence.

Second, my legislation recognizes that Congress must bear much of the blame for the glut of data demands, because it all too frequently gives little or no attention to the data implications of legislated requirements for program reporting, for application for participation in programs, or in mandated studies and reports.

Therefore, my legislation requires that each committee of Congress shall provide a detailed data impact statement to accompany any piece of reported legislation which provides for Federal information authority. Such a statement would include: First, the nature of the information a respondent would have to collect, process, or provide; second, the method by which such information would be collected; third, the estimated costs both to respondents and the Government to provide and collect the information; and fourth, alternative methods for collecting such information.

These provisions would, at least, get the Congress thinking about the potential impact of its legislation before it becomes too late.

Some may believe that this issue is too small to cause great concern. Such a notion is clearly inappropriate when one considers that in recent years the "data and statistics business" has grown so much that the total cost of providing the information that Government agencies ask for has been estimated to run as high as $40 billion annually.

Mr. Speaker, the fourth measure which I am reintroducing is the Agricultural Census bill. I am happy to say that Representatives CHARLES ROSE, GILLIS LONG, and PAUL SIMON are cosponsoring this bill. These Members assisted me greatly when this bill was before my Subcommittee on Census and Population last year. In the 94th Congress, this measure, H.R. 14830, was reported to the House floor by the House Post Office and Civil Service Committee late in the second session. Unfortunately, although there was widespread support for the bill's passage, time was too short for its enactment.

The most recent Census of Agriculture met with great resistance throughout rural America because of the unreasonable burden it placed on farmers. Farmers were required to fill out forms which were too long, too complex, and too irrelevant. While it is important that reliable agricultural information be collected and published regularly, it is neither necessary nor desirable for farmers to be forced to fill out incredibly detailed forms which ask questions for which farmers just do not have answers. It simply appears as if much too little thought and effort went into considering the average farmer's time and frustration in filling out these forms.

The result was an agricultural census which is a marketer's dream, but a farmer's nightmare. I believe that now is the time to deal with this issue before plans are made for the next Census of Agriculture which will be taken in 1979.

My bill would reduce by at least 40 percent the paperwork burden placed on respondents to the agricultural census. The net result of the bill will be to reduce by at least 1.5 million hours the time needed by American farmers and ranchers to fill out Government forms. To meet this requirement, the Bureau of the Census would be forced to cut the size of its questionnaires and to make much greater use of sampling techniques—something it should have been doing all along.

The bill would also do two other things. First it would require the Bureau of the Census to continue to collect certain limited information on very small farms, and to continue to consider them as farms. Last Congress, the Bureau of the Census and the Department of Agriculture wanted to increase by 400 percent the minimum sales required for an establishment to be considered as a "farm." This would have resulted in hundreds of thousands of farms being technically redefined out of existence.

Because of an adverse congressional response to this redefinition, the action was later rescinded. But I think that the Congress ought to preclude any further attempts to redefine large number of farms out of existence. Therefore, the bill provides that any future changes in definition which would increase the sales to qualify as a farm cannot exceed inflationary trends.

Third, the bill recognizes the fact that there have been great changes in the ownership structure of farms in recent years which are not fully understood or documented. Therefore, the bill calls upon the Bureau of the Census to improve upon its collection of data on the farm ownership of the United States.

I believe that this bill presents a great opportunity to reduce substantially the paperwork burden on a major section of the economy without damaging in any way the information needs of our society.

FEDERAL WORKERS' PAY DIFFERENTIAL

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. ROSENTHAL. Mr. Speaker, Federal employees who live in high cost-of-living areas should be entitled to appropriate cost-of-living wage differential benefits. Private industry and many State governments already pay higher salaries and wages to employees in large cities than they do for the same kind

of work in other areas where living costs are not as high.

In contrast, the Federal Government pays many of its own employees in the New York City area salaries which, within $100 of the amount, they could receive if they collected welfare. Under current Federal pay scales, a GS–1 appointment starts at $5,810 while a family of four receiving full welfare benefits in New York City gets the equivalent of $5,712.

Labor Department studies show that the average family of four needs $13,886 to maintain a moderate standard of living in a small city, but almost $17,498 a year more for the same level in New York City.

Every major national employer has resolved this issue—everyone except the Federal Government, which is the Nation's largest employer. Improved salaries would not only aid Federal employees, but would help the Government as well. If the Federal Government paid its classified workers salaries which are competitive with private industry in that locale, it would be able to recruit and retain more qualified and better trained employees, instead of losing them to private industry.

I am introducing today legislation to provide for the establishment of a special cost-of-living pay schedule containing increased pay rates for Federal employees in metropolitan areas of 500,000 and up to offset the increased cost of living there. This would cover about 2.1 million persons in 65 metropolitan areas.

OSHA'S SINKING AUTHORITY

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. HANSEN. Mr. Speaker, on December 30, 1976, a panel of three Federal judges in Idaho declared the inspection provisions of OSHA unconstitutional and void, and refused the Department of Labor further inspections of private business premises with or without a search warrant. That is a milestone in the continuing fight for individual rights which are traditional to American citizens.

I urge my colleagues both favorable and unfavorable to OSHA to read the panel's landmark decision, which follows:

CIVIL NO. 1–76–3 (THREE-JUDGE COURT)

SUMMARY JUDGMENT

Barlow's, Inc., an Idaho corporation, Plaintiff, vs. W. J. Usery, Secretary of Labor of the United States of America, in his official capacity, et al., Defendants

The cross motions of the parties for summary judgment having been heard and submitted and the court having heretofore entered its memorandum decision and order, and it appearing that there are no genuine material issues of fact and that the record in this cause presents only questions of law, and the court having concluded that plaintiff is entitled to the relief prayed for in its complaint on file herein,

It is hereby ordered, adjudged and declared as follows:

I

That Section 8(a) of Public Law 91–[illegible]6, December 29, 1970, 84 Stat. 1598 (29 U.S.C. 657(a)), is unconstitutional and void in that it directly offends against the prohibitions of the Fourth Amendment of the Constitution of the United States of America.

II

That defendant, the Secretary of Labor of the United States of America, and all other defendants, and their successors in office, and all other persons acting by, through or under them, are hereby forever and permanently RESTRAINED and ENJOINED from acting or attempting to act pursuant to or in furtherance of Section 8(a) of OSHA (29 U.S.C. 657(a)) and from conducting or attempting to conduct any general searches or inspections of the non-public portions of the premises of the plaintiff herein pursuant to Section 8(a) of the Occupational Safety and Health Act of 1970.

III

No costs or attorneys' fees are allowed.

Dated this 30th day of December, 1976.

M. OLIVER KOELSCH,
Senior Circuit Judge.
J. BLAINE ANDERSON,
Circuit Judge.
RAY MCNICHOLS,
Chief District Judge.

CIVIL NO. 1–76–3 (THREE-JUDGE COURT)

MEMORANDUM DECISION AND ORDER

Barlow's, Inc., an Idaho corporation, Plaintiff, v. W. J. Usery, Secretary of Labor of the United States of America, in his official capacity, et al., Defendants

Before: Koelsch and Anderson, Circuit Judges, and McNichols, Chief District Judge.

Plaintiff is an Idaho corporation in good standing situated in Pocatello, Idaho. Its business is the installation of electrical and plumbing fixtures, heating and air conditioning units. The corporation is engaged in interstate commerce in that it purchases and uses materials such as sheet metal which are made without the State of Idaho.

On September 11, 1975, Occupational Safety and Health Compliance Officer Daniel T. Sanger arrived at plaintiff's business premises for the purpose of conducting a safety and health inspection pursuant to Section 8(a) of the Occupational Safety and Health Act. 29 U.S.C. § 657(a).[1] Mr. Sanger properly identified himself and requested permission to inspect the nonpublic area of the premises. Mr. Ferrol G. "Bill" Barlow, President and Manager of Barlow's, Inc., refused to allow the inspection, basing his refusal on the absence of a search warrant. It is undisputed that Mr. Sanger did not have any cause, probable or otherwise, to believe a violation existed nor was he in possession of any complaints by any employee of Barlow's, Inc.

As a result of Mr. Barlow's refusal, the Secretary petitioned this court on December 13, 1975, for an order compelling entry, inspection and investigation. A show cause order was thereafter issued and subsequent to the show cause hearing the Secretary's petition was granted on December 30, 1976.

On January 5, 1976, the court's order was presented to Mr. Barlow. Mr. Barlow again declined to permit the inspection. The next day the plaintiff filed the instant action requesting that a three-judge court be convened to enjoin the enforcement of the Act on the ground of repugnance to the Fourth Amendment and, further, requesting a temporary restraining order. The present three-judge court[2] empaneled and the temporary restraining order was denied on the ground of an inadequate showing of immediate and irreparable injury.

Footnotes at end of article.

This case squarely presents the issue of whether the entry and inspection provisions of the Occupational Safety and Health Act (OSHA), 29 U.S.C. § 651, et seq., are consistent and compatible with the dictates of the Fourth Amendment.[3]

I

Preliminarily, the Secretary advances two grounds to preclude this panel from reaching a decision on the merits. First, it is contended that this court lacks subject matter jurisdiction. This argument is premised on two principles: First, that judicial review is improper because Congress has designated an exclusive forum—the Occupational Safety and Health Administration, and, second, that plaintiff is not entitled to challenge agency action for a supposed or threatened injury until prescribed administrative proceedings have been exhausted. In short, the Secretary contends that plaintiff should simply have permitted a full inspection under protest, thereby preserving its objections for the Commission and appellate courts, if and when a citation resulting from the inspection is actually issued against it.

The purposes served by the exhaustion doctrine, as set forth in *McKart v. United States*, 395 U.S. 185 (1969), are absent from this case and we therefore will not apply the rule to this case. It is beyond question that the administrative channels of OSHA lack the expertise to consider and determine the constitutional question presented by this case. We also find, after a consideration of the factors set forth in *Abbott Laboratories v. Gardner*, 387 U.S. 136 (1967), that the issue presented by this case is ripe for judicial determination. The issue presented is one of constitutional law only and, further, the plaintiff is placed in a dilemma of being forced to give up his asserted right of privacy or potentially finding himself in contempt of court. We therefore reject the Secretary's contention that this court lacks subject matter jurisdiction.

The Secretary's second ground urged in support of dismissal is that plaintiff's failure to appeal the order of December 30, 1976, requiring the inspection bars the present action on res judicata grounds. Our review of the transcript of that hearing convinces us that the presiding judge reserved the constitutional issue on the basis that it was premature. The ruling in that case, Civil 4–75–58, clearly left open the door for subsequent litigation of the Fourth Amendment claim. We thus proceed to the merits.

II

In *Frank v. Maryland*, 359 U.S. 360 (1959), the Supreme Court upheld the conviction of Aaron D. Frank who refused to permit a Baltimore City health inspector to enter and inspect his premises without a search warrant. This holding was expressly overruled by the Supreme Court in *Camara v. Municipal Court of San Francisco*, 387 U.S. 523 (1967), and its companion case, *See v. City of Seattle*, 387 U.S. 541 (1967). In *Camara* appellant was awaiting trial on a criminal charge of violating the San Francisco Housing Code by refusing to give permission to a city housing inspector who sought to inspect appellant's residence without a warrant. The court, in tracing the history and scope of the Fourth Amendment, stated:

"Nevertheless, one governing principle, justified by history and by current experience, has consistently been followed: except in certain carefully defined classes of cases, a search of private property without proper consent is unreasonable unless it has been authorized by a valid search warrant." 387 U.S. at 528–29 (citations omitted).

The court went on to hold that under the Fourth Amendment a person has the constitutional right to insist that a search warrant be obtained before an administrative inspection of a private residence is allowed.

In *See, supra,* the court was faced with a warrantless inspection of a commercial warehouse in the course of a municipal fire, health and housing program. In expanding its *Camara* holding to include commercial structures as well as private residences, the court stated:

"We therefore conclude that administrative entry, without consent, upon the portions of commercial premises which are not open to the public may only be compelled through prosecution or physical force within the framework of a warrant procedure." 387 U.S. at 545.

In *Colonnade Catering Corp. v. United States,* 397 U.S. 72 (1970), the court narrowed the scope of its *Camara* holding in upholding the warrantless inspection of the premises of a retail dealer of liquor. In *United States v. Biswell,* 406 U.S. 311 (1972), the *Colonnade* reasoning was expanded to permit warrantless inspections of firearms dealers.

III

It is upon the framework of the abovementioned cases that we must base our decision. We reject the notion as espoused in *Brennan v. Buckeye Industries, Inc.,* 374 F. Supp. 1350 (S.D. Ga. 1974), that the *Colonnade* and *Biswell* decisions envision a trend of the Supreme Court to generally narrow the holdings of *Camara* and *See.* Instead, we find that the warrantless inspection scheme pursuant to OSHA is more properly aligned with and must be controlled by the holdings in *Camara* and *See, supra.* See *Brennan v. Gibson's Products, Inc. of Plano,* 407 F. Supp. 154 (Three-judge court, E. D. Texas, 1976).

We simply cannot overlook the fact that in *Colonnade* and *Biswell* the court dealt with an "industry long subject to close supervision and inspection" (*Colonnade,* 397 U.S. at 77), and a "pervasively regulated business" (*Biswell,* 406 U.S. at 316). We believe that both of those cases fit into the *Camara* categorization of "certain carefully defined classes of cases." We have no such industry in this case. OSHA applies to all businesses that affect interstate commerce. 29 U.S.C. § 651 (a) (3). As such, it applies to a wide variety of over 6,000,000 work places and does not focus on one particular type of business or industry. It cannot be questioned that this broad spectrum of businesses can be distinguished from the heavily-regulated liquor and firearm industries encountered in *Colonnade* and *Biswell,* supra.[4]

We have also had the benefit, not enjoyed by the court in *Brennan v. Buckeye Industries, Inc., supra,* of recent Supreme Court pronouncements which show a continued allegiance to the *Camara* and *See* holdings as expressing the court's views on the scope of the Fourth Amendment. In *Almeida-Sanchez v. United States,* 413 U.S. 266 (1973), the court was faced with a statute and regulations which permitted warrantless searches for aliens, without probable cause, within a one hundred mile zone along the international border. The court invalidated these roving searches by the Immigration and Naturalization Service, finding that such searches: "embodied precisely the evil the court saw in *Camara* when it insisted that the 'discretion of the official in the field' be circumscribed by obtaining a warrant prior to the inspection." 413 U.S. at 270.

The court went on to distinguish *Colonnade* and *Biswell* by noting that "businessmen engaged in such federally licensed and regulated enterprises accept the burdens as well as the benefits of their trade, . . ." 413 U.S. at 271.

More recently, in *Air Pollution Variance Board v. Western Alfalfa Corp.,* 416 U.S. 861 (1974), an inspector of the Colorado Department of Health conducted daylight visual pollution tests of smoke being emitted from the company's chimney. The inspector had entered the outdoor premises of the business without the owner's consent or having obtained a search warrant. The court expressly reaffirmed the holdings of *Camara* and *See,* but held them inapplicable to the case because of the "open fields" doctrine. See *Hester v. United States,* 265 U.S. 57 (1924).

There is one common thread among these cases that requires the result we reach here. In *Camara, See* and *Western Alfalfa, supra,* each was involved with statutory and regulatory schemes aimed at promoting and protecting public health and safety. The warrantless inspections authorized under OSHA likewise seek to promote public health and safety and therefore must be controlled by *Camara* and *See.*

The analysis which we have outlined above is consistent with that taken by another three-judge panel in *Brennan v. Gibson's Products, Inc. of Plano, supra.* While we adopt, in general, the similar reasoning employed there, we decline the invitation to judicially redraft an enactment of Congress. Unlike the *Gibson's Products* court, we cannot accept the proposition that the language of the OSHA inspection provisions envision the requirement that a warrant be obtained before any inspection is undertaken. Certainly, Congress was able, had it wished to do so, to employ language declaring that a warrant must first be obtained, the procedures under which it is to be obtained, and other necessary regulations. Congress did not do so and we refuse to accept that duty.

We therefore hold that the inspection provisions of OSHA which have attempted to authorize warrantless inspections of those business establishments covered by the Act, are unconstitutional as being violative of the Fourth Amendment.

It is so ordered and judgment shall be entered accordingly.

Dated this 30th day of December, 1976.

M. OLIVER KOELSCH,
Senior Circuit Judge.
J. BLAINE ANDERSON,
U.S. Circuit Judge.
RAY MCNICHOLS,
Chief, U.S. District Judge.

FOOTNOTES

[1] 29 U.S.C. § 657(a) states:

"(a) In order to carry out the purposes of this chapter, the Secretary, upon presenting appropriate credentials to the owner, operator, or agent in charge, is authorized—

(1) to enter without delay and at reasonable times any factory, plant, establishment, construction site, or other area, workplace or environment where work is performed by an employee of an employer; and

(2) to inspect and investigate during regular working hours and at other reasonable times, and within reasonable limits and in a reasonable manner, any such place of employment and all pertinent conditions, structures, machines, apparatus, devices, equipment, and materials therein, and to question privately any such employer, owner, operator, agent or employee."

[2] During the pendency of these proceedings Judge Koelsch took senior status and Judge Anderson was elevated from district judge to circuit judge and continues to participate in this matter by designation of the Chief Judge of the Ninth Circuit.

[3] Amendment IV—Searches and Seizures

"The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no Warrants shall issue, but upon probable cause, supported by Oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized."

[4] The Congressional investigations revealed in the legislative history of the Act (3 U.S. Code Congressional and Administrative News, 91st Congress, Second Session, 1970, p. 5177, et seq.) make a persuasive case for "need" in the health and safety fields. We, of course, do not sit in judgment of the wisdom of Congress. Our only concern is the alleged affront to the Fourth Amendment. The rationale of an anonymous saying "Expediency is the argument of tyrants, it precedes the loss of every human liberty" seems of forceful application here. That the end result may be laudable and desirable does not justify the means used to accomplish it when constitutional prohibitions are confronted. To paraphrase Burke, *Impeachment of Warren Hastings,* February 16, 1788; "The Constitution (law) and arbitrary power are in eternal enmity." We suggest that there are other less intrusive and oppressive methods of accomplishing the intended result, e.g., employer reporting requirements with provisions for employee contribution and participation; employer-employee safety committees; encouragement of employee complaints; in the organized management-labor relations field a greater and more forceful input by labor unions as the safety representative of their members; efforts toward better enforcement by the states of their health and safety laws, etc. We subscribe to the *Camara* court holding that warrantless inspections must be confined to "certain carefully defined classes of cases." *Camara, supra,* p. 528–9.

UNIFORM LAW ON THE SUBJECT OF BANKRUPTCIES

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. EDWARDS of California. Mr. Speaker, today I introduce, with the gentleman from Virginia (Mr. BUTLER) a bill to establish a uniform law on the subject of bankruptcies. This bill is the product of several years of intensive study of our bankruptcy laws and bankruptcy system, conducted by the Commission on the Bankruptcy Laws of the United States, a Congressionally created Commission on which Mr. WIGGINS and I were privileged to serve; by the National Conference of Bankruptcy Judges; by the National Bankruptcy Conference; by numerous other consumer and commercial organizations and during the 94th Congress, by the Subcommitee on Civil and Constitutional Rights of the Judiciary Committee. The bill that Mr. BUTLER and I introduce today is the product of the subcommittee's study, after hearing from many of the groups interested in this legislation.

During the 94th Congress, the subcommittee held 35 days of hearings on the subject of bankruptcy, heard from over 100 witnesses, and compiled a hearing record of over 2,700 pages. It was the detailed and comprehensive work and study of the organizations I have mentioned that enabled the subcommittee to conduct its hearings and study in such depth, and to understand the issues of the many complex problems in the bankruptcy field.

What the subcommittee has found in all of its work is that the bankruptcy system is basically sound. It is sound because of the people that operate the system, the bench, the bar, and the support people in administrative capacities. This is all the more amazing, Mr. Speaker, when it is understood that the bankruptcy system under which we are operating today was designed in 1898, in

the horse and buggy era of consumer and commercial credit, and was last overhauled in 1938, nearly 40 years ago. It has only been since 1938 that the consumer credit industry has grown; and it has only been since the widespread adoption of the Uniform Commercial Code in the early 1960's that commercial credit has grown to its present magnitude. In spite of the enormous new demands these two developments have placed on the bankruptcy system, the people that operate the system have adapted and modernized within the existing framework to process a 20-fold increase in the number of bankruptcy cases, and an even greater increase in the amount of assets passing through the bankruptcy courts every year.

But, Mr. Speaker, this is not to say that the bankruptcy system and the bankruptcy laws are not without their problems. The principal problem, of course, is that the bankruptcy system has outgrown itself. It has come of age, and it is time to recognize this fact in law, as it has been recognized in fact ever since the adoption of the Rules of Bankruptcy Procedure, promulgated by the Supreme Court 4 years ago. Though the bankruptcy courts were established as adjuncts of the district courts, their work has become more and more independent over the years. As higher caliber judges have assumed the bankruptcy bench, they have been less and less subject to supervision on a case-by-case basis than ever in the past. But in spite of this growing independence, and in spite of the totally different nature of the cases that pass through bankruptcy courts and through district courts, the bankruptcy judges still remain subservient to the district judges. The dependency of the bankruptcy courts and the resulting inability to accomplish what needs to be done in bankruptcy cases, is perhaps the major problem in the bankruptcy system today.

It is for this reason that the bill introduced today proposes to recognize statutorily what should have been recognized years ago. The bill establishes a new court system that will handle bankruptcy cases, exclusively, without interference from another court unconcerned with the problems and difficulties of bankruptcy practice. The independent court system, Mr. Speaker, is the most significant and important aspect of this bill.

Before I describe the other salient features of the subcommittee bill, I would like to point out that this bill is not a final product. It is a codification of a loose consensus of the subcommittee. We have not held formal markup on this bill. It is a starting point for final subcommittee deliberations, which will take place in the next few months. It is a starting point, but it is also more. It is not the subcommittee's intention to begin the process of study and debate all over again. We have accomplished that in great depth in the 94th Congress. We expect now to move quickly to put the finishing touches on this bill, and to be able to report to the Judiciary Committee and to the House early this year a final product for your consideration.

The bill is a complete rewriting of all of the bankruptcy laws. It starts from scratch, because to attempt to make amendments to an 80-year-old law that has continually been amended during its long life would be to create an unintelligible and unworkable statute. The bill is divided into five parts. The first, title I, codifies and enacts title II of the United States Code, and contains the substantive law of bankruptcy. It is the heart of the bill. Title II establishes the new court and administrative system, and contains the rules for everything pertaining to the courts. Title III has been set aside for conforming amendments to the Internal Revenue Code. Technical and conforming amendments to other laws are found in title IV, and title V contains the transition provisions—the rules for operation of the bankruptcy system while the new system is being established.

As I have already mentioned, the most important changes the bill makes are in the court system, so I will describe those first. The bill establishes new U.S. bankruptcy courts, modeled after the district courts, and established under article III of the Constitution. The judges of the new courts will have all of the powers and privileges of judges, including tenure during good behavior and the full salary protections of constitutional judges. The bill establishes constitutional courts for several reasons. First, the nature of the work of the bankruptcy courts, its importance, and its volume justify the same treatment for bankruptcy cases and litigants as other civil cases and litigants now receive in the district courts. In fiscal 1975, the bankruptcy courts handled over 250,000 cases, involving over $500 billion in assets, and over $700 billion in liabilities. Approximately 700,000 creditors were affected in these proceedings. Second, the increased stature of the bankruptcy courts will attract the highest caliber people to serve as judges. In this highly complex area, it is important to have the best people possible manning the benches.

Finally, there has developed some constitutional doubt about the status of a court whose judges have less than full constitutional protections. It is not clear exactly what, if any, limits there are on the powers of judges with fixed terms. The Supreme Court has not spoken clearly on this issue, but the subcommittee's research has raised the issue as possibly interfering with the broad scope of powers that must be given to bankruptcy judges in order for them to discharge their duties fully. In order to remove all doubt, and to invest the bankruptcy courts with all powers and jurisdiction necessary for them to do their jobs, the bill creates the bankruptcy courts as full constitutional courts.

Next, the bill invests the new U.S. bankruptcy courts with full jurisdiction of all cases in bankruptcy, and overall proceedings arising under or related to cases in bankruptcy. This is a much broader grant of jurisdiction than the bankruptcy courts currently have, and is necessitated by the increasingly complex litigation arising in bankruptcy cases. Under present law, with the bankruptcy court's limited jurisdiction, there is often as much litigation over whether the court has jurisdiction over a particular matter as there is over the matter itself. This is extremely wasteful and costly, and is usually used as a delaying tactic by a party against whom the bankrupt estate has a claim. Because the central theme of bankruptcy administration is speed and efficiency, the increased jurisdiction granted to the bankruptcy court to handle all matters related to or arising out of a particular case is vital to the success of the new system.

Finally, the bankruptcy court system is modeled after the district court system. The courts are created in the same judicial districts as the district courts, are entitled to the same personnel as the district courts, and the judges will participate the same as the district judges in the judicial conference and the judicial councils, the administrative arms of the court system.

A concomitant of the establishment of a full judicial court system for bankruptcy cases is to remove from the duties of the bankruptcy judges many of the supervisory functions over individual cases, not involving resolution or decision of any actual dispute, that the bankruptcy judges must perform. In keeping with the thrust of the bill to make the bankruptcy judge a truly judicial officer, performing primarily judicial functions, that is, the resolution of disputes, many of the supervisory functions now performed by bankruptcy judges are transferred to a new officer in the Department of Justice, the U.S. trustee.

The U.S. trustee system is modeled after the U.S. attorney system, and will be under the general supervision of a new Assistant Attorney General for the Bankruptcy Division in the Department of Justice. The primary function of the U.S. trustees, decentralized, and located in every judicial district, will be to establish and maintain panels of private trustees to serve when needed in bankruptcy cases. A U.S. trustee will also be able to offer general support and advice to private trustees serving in cases, and provide a certain limited supervision against overreaching by private trustees. Finally, the U.S. trustee will serve as trustee in cases that today go without trustees, and in very small cases where the assets in the estate are insufficient to compensate a private trustee fully for the work that must be done. When the U.S. trustee serves as trustee in a case, he will be entitled to the same fee as a private trustee, but the fee will be paid into the Treasury to help support the system.

The existence of the U.S. trustee system will relieve the bankruptcy judges of their supervision of trustees in cases today, and will relieve them of the burden of having to appoint trustees in cases as they do today. Both will contribute to a new perception of the bankruptcy court as a fairer forum, with the judges removed from the day-to-day administration of a case, and with the most frequent litigants, the trustees, having been appointed by someone other than the judge that tries the case.

These three features, Mr. Speaker, the independent court system, expanded jurisdiction, and the U.S. trustee system, are what the subcommittee hopes will establish the new bankruptcy system as an equal partner with the other courts in the Federal judiciary, in terms not only of fairness, but of appearance of fairness, and in terms of giving the judges their proper functions and place.

The second major area in which the bill departs from current law is in the provisions for consumer debtors. Since World War II, there has been an unprecedented rise in the availability and use of consumer credit, that is, credit to buy consumer goods. The Report of the Commission on the Bankruptcy Laws, Part I, documents this rise and its consequences for bankruptcy. With so many more consumers buying on credit and borrowing, there has been a corresponding rise in the number of consumers who, through no fault of their own, find themselves in financial difficulty. Perhaps a breadwinner is laid off, or illness strikes the family, or a working wife leaves the job market to raise a family. All of these factors contribute to financial difficulty, and when a family has borrowed extensively, they may not have the reserve necessary to meet the unexpected emergency.

The result is often harassment by creditors, and increased worry and tension within the family. Bankruptcy offers an alternative. Its premise is a fresh start for the overburdened debtor. But present law was written primarily in 1938, before the consumer credit industry's tremendous growth. Today, consumer cases account for nearly 90 percent of all bankruptcy cases. It is time for a reexamination of the benefits that bankruptcy can provide for a debtor.

The bill that Mr. BUTLER and I introduce today takes a new view of the equities in the bankruptcy context. Its most significant feature is that it encourages the use of plans for individuals with regular income, under chapter 13. These plans, currently called wage earner plans under chapter XIII of the Bankruptcy Act, give a debtor court protection from his creditors while he formulates and executes a repayment plan for his debts. Usually, such a repayment plan will contemplate repayment of all of the debtor's debts in full over an extended period, usually around 3 years. During that period, creditors are enjoined from using legal process or any other method against the debtor to obtain favored treatment of their claims.

Present law contains this policy, but this bill provides additional incentives to induce a debtor to choose a repayment plan instead of straight bankruptcy, or liquidation. The bill allows the debtor greater flexibility in formulating a repayment plan, and removes the disincentive in current law that forces debtors to attempt to repay more than they may be able to pay under a plan. Often, debtors attempt full repayment in order to avoid the penalty found in present chapter XIII for less than full repayment, only to fall short, and be in worse straits than before the plan. In addition, the bill allows the debtor more power in dealing with secured creditors—those that may have liens on the debtor's car, household furnishings, clothes, and personal belongings. No longer will the secured creditor be able to extract the full amount of his claim when his security interest is worth far less than his claim. To the extent that the secured creditor does not have security for repayment of his claim, he is treated as other, unsecured creditors.

The bill also gives much needed protection to codebtors—those that cosign the debtor's note with the debtor, usually without any knowledge or understanding of their ultimate liability on the note. Too often, pressure on codebtors, usually friends or relatives of the debtor, make a repayment plan impossible, because the debtor must act to protect his family and friends from overreaching by his creditors. Thus, the bill provides that to the extent that the debtor will ultimately repay a debt on which there is a codebtor, a creditor cannot move against the codebtor. This will relieve the indirect pressure now put on debtors to favor certain creditors under a plan.

To assist the debtor in his formulation of and performance under a plan, the bill establishes a system of advisers to advise the debtor and the court on many issues that arise in a chapter 13 case. The bill directs the U.S. trustee for each district to establish a panel of advisers, in a similar manner to the establishment of panels of private trustees. These advisers, from the private sector, will be appointed in each case by the U.S. trustee. The bill does not contemplate that the advisers will replace the debtor's attorney, an indispensible party in a chapter 13 case, but rather contemplates that they will advise the debtor and the court on financial matters and budgeting, much as a chapter XIII trustee does today.

The bill establishes the adviser system in order to avoid a serious potential conflict of interest that exists in the trustee's position today. The trustee serves as adviser to the debtor, adviser and friend of the court, and representative of creditors. These functions are inherently inconsistent, even though little problem has arisen so far, because those serving as trustees have done so well at keeping their various obligations straight. However, under the new bill, the potential for conflict is heightened because it allows the very small individual entrepreneur to use chapter 13. With the occasional self-employed businessman in chapter 13, the conflict becomes more real than apparent, and the bill responds by vesting the duty of representative of creditors, the trustee, in the U.S. trustee. In most cases, the trustee will have very little function, for in the small consumer case, there is little to do on behalf of creditors. Thus, only in the small business cases will the U.S. trustee have any significant function.

Mr. Speaker, however attractive the bill makes chapter 13, and however much some debtors wish to repay their debts under court supervision, for some it is nearly impossible, or far too burdensome. Thus, the bill also strengthens the provisions for a fresh start for the consumer debtor that must go through straight bankruptcy, or liquidation, in which he surrenders the bulk of his assets to the trustee for liquidation and distribution of the proceeds to his creditors.

Nearly universally recognized as vital to a fresh start for an overburdened debtor is the provision for exemptions—what property the debtor will be allowed to keep in order to start over again once he has gone through bankruptcy. The Bankruptcy Act presently allows a debtor the exemptions to which State law entitled him. Because many States have not rewritten their exemption laws since the 19th century, most are outmoded and hopelessly inadequate to give the urban debtor a fresh start after bankruptcy. Though the subcommittee is hesitant to legislate in an area that is primarily of State concern, it is a necessity if the provisions of this new bankruptcy law are to be effective. However, the bill does not totally preempt the exemption area. The bill provides a set of exemptions, based largely on the Uniform Exemptions Act recently adopted by the National Commissioners on Uniform State Laws, that a debtor may choose in place of State exemptions, but preserves the State exemptions as an alternative.

To strengthen the exemptions available to distressed debtors, the bill also provides certain powers to debtors that have unwittingly pledged property that would otherwise have been exempt. First, the bill allows redemption of exempt property from a lien, if the debtor pays the holder of the lien the fair market value of the property. This amounts to a right of first refusal at a foreclosure sale of the property, and prevents secured creditors from using nearly worthless property to extract high payments on their claims from debtors that pledged the property often without any understanding of the consequences. Second, the provisions of the bill invalidate certain types of security interests—those typically taken by creditors with great leverage over the debtor in property that is most often worthless monetarily, but very valuable to the harassing creditor. And the bill permits the debtor to invalidate a judicial lien on his personal belongings and household goods. Again, this kind of lien is most often a tool of coercion rather than a bona fide means of acquiring something valuable from the debtor to secure repayment of a debt. Because a judicial lien against a debtor is always obtained on the debtor's slide into bankruptcy, it is also fairer to his other creditors that one creditor not be able to take unfair advantage by being the first to move into court.

The bill also gives the debtor a better fresh start by making all reaffirmations of debts discharged in a bankruptcy case unenforceable involuntarily against the debtor. The bill does not attempt to prevent debtors from repaying those debts which they might feel a moral obligation to repay in spite of the bankruptcy discharge. But the bill unequivocally makes the choice the debtor's. The bill prohibits a creditor from taking any action to collect a discharged debt. Too often, this practice has been the subject of abuse, and debtors after bankruptcy

may be back into the same situation they were in before bankruptcy. If bankruptcy is to be made an effective remedy, the bankruptcy laws must prevent private action from undoing the beneficial effects of the law.

The dischargeability provisions of the bill cure another frequent abuse by creditors. Current law excepts from discharge any debt obtained by fraud or false pretenses, and the bill carries over this exception. However, the mere threat of litigation to a consumer debtor, where the alleged fraud has been nothing more than the signing of a boiler plate statement at the creditor's urging, has been enough to force many debtors to reaffirm debts which were in fact not fraudulently incurred. The cost of litigation is the incentive for the debtor to agree to pay a reduced sum back to the creditor if that sum is less than the attorney's fee and court costs of fighting. The bill, therefore, removes this incentives by providing that a debtor that wins in a proceeding to except a consumer debt from discharge on the grounds of fraud may recover attorney's fees, court costs, and damages caused by the litigation. This provision, while protecting the legitimate interests of creditors in recovering fraudulently incurred debts, also restores the balance in the economics of litigation, and should prevent the abuse that has prevailed in spite of the 1970 dischargeability amendments to the Bankruptcy Act.

Finally, the result of Perez against Campbell is expanded and codified. That case, in the Supreme Court in 1971, held that a State may not deny a driver's license to an individual on the grounds that the individual had not paid a tort judgment arising out of an automobile accident, if the reason for nonpayment was a discharge in bankruptcy. The Supreme Court held that such State action would frustrate the fresh start purposes of the Bankruptcy Act. The antidiscrimination provision in the bill applies only to governmental units and licensing boards, and not to private persons or those that might extend credit to the former debtor.

In order to balance the increased protections given to the debtor under the bill, and because those protections will make bankruptcy a more effective remedy for a distressed debtor's ills, the bill increases the time after which an individual may seek bankruptcy relief again from the current 6 years to 7 years. The increase will not work a hardship on the honest debtor, for the statistics show that it is very rare that a person needs bankruptcy relief more than once. But it will serve as an additional deterrent to those who would abuse the system.

Mr. Speaker, an area that has been of great concern to the commercial credit community has been the area of business rehabilitation—arrangements and reorganizations. Currently, there are three chapters in the Bankruptcy Act governing this complex area. Their respective spheres have not always been clear, and the lines between them have begun to blur. In addition, the more widely used chapter, chapter XI, has become too weak a vehicle to be effective in today's credit world, and the more effective chapter, chapter X, is far too rigid and formalized a procedure to be able to provide the quick and inexpensive remedy that is so necessary to a successful reorganization. Thus, the bill takes the better features of the three chapters, and combines them into a flexible procedure for business arrangements and reorganizations.

The premise of the combined chapter is the same as the premise of the securities laws: provide adequate disclosure to all concerned parties, and let informed investors make the appropriate decisions. The combined chapter imposes a financial distribution rule only when the parties are unable to agree on an appropriate distribution of the value of the company undergoing reorganization.

The chapter imposes no presumption about the appropriateness of the appointment of a trustee to run the business during the proceeding. The bill establishes a functional criterion, and lets the court decide, when asked to do so by a party in interest, whether management should be ousted and replaced with an independent and disinterested trustee. Otherwise, the debtor remains in possession and continues to run the business during reorganization.

If the debtor is in possession, the debtor has an exclusive right for 120 days to oppose a reorganization or arrangement plan, and then an additional 60 days to obtain the required number of acceptances of the plan. The court may increase or reduce these time periods, but if the debtor fails to meet them, as modified by the court, then the debtor's creditors have an opportunity to propose a plan. If a trustee is appointed, then any party in interest, including the debtor and creditors, may propose a plan.

After a plan is proposed, acceptances are solicited by the proponent, but only after the court approves a disclosure statement that must accompany the solicitations. The disclosure statement is the key to the new combined reorganization chapter. It is the document that will inform those who may accept or reject the plan of whatever financial information about the debtor is available and relevant to an evaluation of the plan. Of course, disclosure will vary between different classes, depending on the relative sophistication of the members of a class, and their access to information from sources other than disclosure. The disclosure statement is intended to take the place of a section 14 proxy statement for public classes, and to play a similar role for private classes as well. The bill also provides that solicitation after transmission of an approved disclosure statement relieves the solicitor from liability for violation of various disclosure laws and rules governing solicitation of proxies and disclosure in connection with the purchase or sale of securities.

After creditors and equity security holders have received the plan and an appropriate disclosure statement, they may accept or reject the plan. Classes that do not share in the value of the debtor under the plan are deemed to have rejected the plan. For other classes, acceptance is by two-thirds in amount and a majority in number of those actually voting.

The court must hold a hearing on confirmation after the time for accepting or rejecting has expired. The financial standard for confirmation of the plan differs significantly from current law. First the plan must meet the current chapter XI standard, the "best interests of creditors" test. That is, creditors must receive at least what they would on liquidation of the debtor. However, a particular creditor can waive that minimum. In addition to meeting the best interests test, the plan must have been accepted by all classes whose claims are impaired under the plan. A claim is impaired unless it is paid in full in cash or property—other than in securities of the debtor—or if it is not altered under the plan. If a class of claims is unimpaired, their acceptances are not required for confirmation. If all impaired classes accept the plan, it may be confirmed. If less than all impaired classes accept, the court may nevertheless confirm the plan if, with respect to all nonaccepting classes, the plan is fair and equitable, the current chapter X standard. This, Mr. Speaker, is just a sketch of the provisions in the chapter. They are, of course, set out with more detail and precision in the bill itself, and I would urge their careful perusal by all those who are interested.

An additional new feature of this bill is the securities laws exemptions it provides in reorganization cases. Current law is ambiguous and inadequate in protecting those who participate in the offer or sale of securities under a plan with court supervision. The bill defines and strengthens the exemption, while at the same time protecting the public from worthless securities by giving the court power to determine the adequacy of disclosure and to supervise the issuance, offer, and sale of the securities.

Mr. Speaker, this bill provides a workable, flexible reorganization and arrangement chapter, with adequate opportunity for court supervision and protection of creditors and equity security holders.

In addition to the provisions I have already mentioned, title I of the bill contains special chapters and subchapters for the reorganization of railroads, based largely on the general reorganization chapter, with some modifications relating to the jurisdiction of the Interstate Commerce Commission, for the adjustment of debts of a municipality, based on the Municipal Bankruptcy Act amendments enacted into law last year, and for the liquidation of stock brokers and commodity brokers, based on the proposed Securities Investor Protection Act amendments.

Title V of the bill, entitled "Transition," provides the rules for the operation of the bankruptcy system during the period between enactment of the law. and its final effective date, proposed for October 1, 1983. Because the bill establishes a bankruptcy court with judges with life tenure, it is essential that the appropriate number of judgeships be determined before the court system is actually implemented. Thus, the bill provides that

the substantive law of bankruptcy will become effective on October 1, 1978. During the period between October 1, 1978, and October 1, 1983, called the transition period, the current bankruptcy judges will continue to sit, but will administer the new law as it will be administered when the court system is fully implemented. Of course, because bankruptcy judges are not now article III judges, there are some matters that they will be unable to handle. But on the whole, the bill attempts to create as close a duplication of the future system as possible, in order that the Administrative Office of the U.S. Courts and the Judicial Conference will be able to study and determine the needs of the new system, and the number of judges that ultimately will be needed. The 5-year period for study was selected, after consultation with the Administrative Office, as necessary to complete an accurate study, to report to Congress, to authorize the new positions, and to complete the nominations and appointments process.

During the transition period, it is important that the current bankruptcy judges continue to sit. The new law is an uncharted area, and the experience and wisdom of the current bench will be essential to start the new law out on a solid basis. To encourage the judges to stay on during the transition period, the bill provides a retirement incentive in addition to the regular civil service retirement benefits that bankruptcy judges are now entitled to receive. The bill chooses the financial incentive instead of the prospect of reappointment to life-tenure terms, because the Constitution dictates that the appointment power be given to the President. In light of the recent decision in Buckley against Valeo, invalidating congressional designation of members of the Federal Elections Commission, it would be difficult to justify a provision that appointed all sitting judges as judges of the new court. The financial incentive contained in the bill is considered fair, and what is needed to retain the experienced judges now on the bench.

Yet to be completed and included in the bill are certain tax provisions. These include both the amendments to the Internal Revenue Code that will be contained in title III of this bill, and several tax provisions with general applicability both to Federal and State taxes that will be contained in title I of the bill.

Mr. Speaker, that completes my description of the more important provisions of this legislation. It is a long and complex bill, and I invite all interested parties to examine it carefully. There are many additional new features that will be of great interest to various segments of the commercial community, and to various consumer interest organizations. Though the subcommittee does not intend to hold more hearings on the subject of bankruptcy, we continue to welcome written comments from those who have been so helpful in the past in formulation of this bill.

This bill brings bankruptcy into the last quarter of the 20th century with many new concepts, and a thorough rethinking of long established concepts. This bill has been studied for several years now. It is now time for action. Mr. Speaker, the subcommittee plans to move quickly to report this legislation, and to pass a bill into law this year.

INTRODUCTORY REMARKS ON THE JOBS CREATION AND ECONOMIC GROWTH ACT OF 1977

HON. RONALD A. SARASIN

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. SARASIN. Mr. Speaker, we begin with what I hope will be a productive and responsible session of the 95th Congress with a major problem still facing us in terms of unemployment among our Nation's workers. In spite of much debate, much rhetoric, and some useful legislation, such as the Comprehensive Employment and Training Act, and the Public Works Employment Act, we have still not come to grips with the heart of the problem, the fact that the supply of jobs in the private sector of the economy has simply not grown as fast as the number of individuals seeking jobs.

A great deal of time and attention in the 94th Congress was devoted to proposed solutions which did not really address this root problem, but would have masked it with the creation of massive numbers of public sector jobs at tremendous cost to the taxpayers and long-term danger to the entire economy.

In recent weeks there has been a significant change in the approach being suggested by spokesmen identified with the incoming administration of President Carter and even by some key members of the majority in this Chamber.

While these economic themes have been general in nature and have shown considerable variation, I have been delighted by one particular aspect—the underlying theory and the proposed basic mechanisms closely parallel those contained in the Jobs Creation and Economic Growth Act introduced by Congressman JACK KEMP, Congressman Marvin Esch, Congressman AL QUIE, and myself in the 94th Congress.

The stimulation of jobs-creating capital formation, the use of Government reform and reorganization to allow more vigorous expansion in the private sector, the targeting of specific problem areas, such as youth unemployment, for special attention, and similar remedies were all embodied in that bill.

I am pleased that these ideas, which we have espoused for so long, have now caught the attention of the majority, and of the new administration. I am pleased that the sound economic principles embodied in our bill are being included in the "new" economic programs being proposed today.

I am, therefore, reintroducing the Jobs Creation and Economic Growth Act in the 95th Congress, with an open invitation to the members of the majority to work with us to create a sound and workable jobs and economic policy from this very sound base.

THE OMEN IS CLEAR

HON. JAMES ABDNOR

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. ABDNOR. Mr. Speaker, serving their customers or serving the Government is the unhappy choice being faced by small business across the Nation. In reality, it is not much of a choice at all, because serving the Government through compliance with complex, confusing and often conflicting Federal regulations and filling out Federal paperwork is mandated through Federal law backed with the threat of fines, penalties, and imprisonment.

Because they cannot afford to comply—and, too often, cannot afford the time and expense of challenging unfair Federal requirements—business people do their best to cope with an ever-growing burden imposed upon them by the Congress through the executive agencies.

Trade associations, once devoted to helping their membership improve customer services, are now devoting much of their workshop and conference schedules to helping their membership cope with Government. The experience of the South Dakota Automobile Dealers Association was the subject of an editorial in the Watertown, S. Dak., Public Opinion on December 28, 1976. I would like to share its very sobering analysis with my colleagues:

NO ROOM TO TALK ABOUT ANYTHING ELSE

Jerry Wheeler, executive vice president of the S.D. Automobile Dealers Association, recently conducted a series of "how to" workshops for SDADA members devoted entirely to complying with new federal regulations. One of the seven meetings was held here.

The series, beyond providing needed information for the membership, led to some pertinent observations by Wheeler, expressing a concern which businessmen in nearly all fields will share.

Wrote Wheeler in a news story on the workshops:

"We have conducted district workships for our members many times in the past but this is the first time we've had to fill the agenda with instructions on how to comply with new laws. Usually, these conferences are mostly devoted to improving customer services, new ways to serve the public, improving efficiency in dealers' business operations and other related topics.

"The fact that the current proliferation of federal laws left no room to talk about anything else is a serious omen, we think. We believe it shows the degree to which government has begun to strangle private enterprise. And we in the automotive business are not the only ones affected—almost every other form of commercial endeavor is feeling this impact. In fact, some of the laws being imposed on us pertain to virtually all other retail sales enterprises.

"While we recognize that some of the new regulations may be basically beneficial to both our customers and our industry as a whole, there are many others which are of little value to the public and mean more paper work than anything else. More than anything, they are increasing the cost of doing business which, in turn, is passed along to the consumer."

Among laws which Wheeler cites as most significant to the consumer are the Magnu-

son-Moss Warranty Act which specifies that while dealers are not required to provide warranties on used cars, warranties which are issued must specify in detail what is and is not covered; the federal odometer law which provides penalties for tampering with an odometer or falsifying odometer mileage and requires a seller's statement of a vehicle's mileage at the time of sale, and the holder-in-due-course in which financial lenders share with sellers in the responsibility for proved violation of sales contracts.

Laws which actually protect the consumer are one thing. The stifling tide of paperwork and confusion which accompanies the welter of government laws and regulations is quite another. When a complete series of meetings must be devoted to instructions on how to comply with them—when there is, as Wheeler says, no room to talk about anything else—the omen is clear. And, as he says, it is serious.

CUSTOMS PAPERWORK REDUCTION ACT OF 1977

HON. FRANK HORTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. HORTON. Mr. Speaker, I am today introducing legislation entitled the Customs Paperwork Reduction Act of 1977. This bill will substantially relieve paperwork and redtape burdens on international travelers arriving in the United States. Further, it will result in major paperwork reductions, as well as time and cost savings for small businessmen, who import goods. It will not be detrimental to the information and statistics-gathering activities of the Bureau of the Census, nor will it have any adverse effect on business, labor, or the revenues of the United States.

In introducing this legislation, I am implementing a recommendation of the Commission on Federal Paperwork, of which I have the privilege of serving as chairman. As you know, the Commission was created by the Congress to investigate redtape and paperwork excesses and to recommend solutions.

The Commission, as part of its general paperwork education investigation, has looked into current procedures for U.S. entry of travelers, as well as other laws that affect the importation of small quantities of merchandise by small businessmen. It is the Commission's belief that positive action can be taken immediately, with little controversy, that will result in obvious and direct redtape and paperwork reduction benefits.

We have all seen the long lines of travelers awaiting inspection at U.S. ports of entry. Over 17 million of these persons pass through our major airports each year; another 183 million arrive by ship, train, bus, and automobile. The legislation being introduced today proposes a major simplification in procedures for classification of merchandise being imported for the personal use of these travelers. By doing so, the Commission feels that the inordinate amount of processing time now involved in these inspections can be greatly reduced. It is clear that, compared to the amount of duty collected in each instance, this processing time creates an aggravating botleneck; it imposes an undue burden on all travelers.

Thus, the first provision of the bill would apply a 10 percent flat rate of duty on the fair retail value of all goods, within a reasonable limit of $500, brought into the country by international travelers, for their personal or household use. This 10 percent flat rate of duty, based on the retail value of the goods, equates with the average of 15 percent of the wholesale value now assessed. It will result in substantial savings in time to the traveler, for it is calculated that it will allow a threefold increase in processing efficiency. If the new rate allowed each traveler passing through customs to save an average of 5 minutes processing time, both travelers and Government inspectors would share in an estimated 3 million hours time savings.

The second provision of this legislation is also most meaningful from the Commission's viewpoint. It would raise the limit of informal entry of commercial shipments into the United States from $250 to $300. The $250 limit was set by congressional action in 1953. This proposed increase is intended to reflect, in an approximate way, the inflationary changes in value of products from 1953 to 1977—a 24-year span without such adjustment.

This portion of the legislation will result in a major cost savings for businessmen in America who import small quantities of merchandise. Present laws require formal entry documents to be filed for each shipment over $250. This change will reduce, by at least 200,000 filings per year, the more complicated formal documents—thus eliminating large amounts of paperwork. The resulting savings is estimated to be $6 million annually—$5 million in broker's fees and surety bonds, and $1 million to the Government in simplified processing.

I would further indicate that a bill to affect a major modernization of the Customs Service procedures (H.R. 9220) as well as legislation quite similar to the instant bill(H.R. 12931) was introduced in the 94th Congress. Hearings on H.R. 9220—which contained sections similar to H.R. 12931—were held in August 1976, before the Subcommittee on Trade of the Ways and Means Committee, at which I testified. Joining in general support thereof were representatives of industry and trade, as well as the affected Government agencies. Some concern was expressed about the statistics that would be forthcoming for the additional 200,000 shipments that would become informal entries. Unfortunately, due to the pressures of the closing days of the congressional session, neither bill, H.R. 9220 nor H.R. 12931, was acted upon.

The legislation I have introduced has been rewritten with this concern in mind, and section 3 now requires that the same type of statistics be collected for goods valued between $250 and $500, even though imported under informal entry procedures, as is required for goods entered under formal procedures. The Customs Service believes this would be workable.

Thus, I urge my colleagues to take prompt, positive action on the Customs Paperwork Reduction Act of 1977. It is in the public interest, beneficial to the international traveler, the importer of small quantities of commercial goods and to the Government by increased operating efficiency of its customs inspectors, and would not be detrimental to the statistics or revenues of the United States.

IN AFRICA OPPRESSION RULES

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. DERWINSKI. Mr. Speaker, we face continuing complications in foreign affairs. A natural area of concern is the continued demise of democracy on the continent of Africa. James O. Jackson, the Chicago Tribune London correspondent, recently completed an extensive tour of Africa, and an article summing up his observations appeared in the Sunday, December 26, 1976, Tribune which I insert in the RECORD at this point:

IN AFRICA, OPPRESSION RULES—ONE YOKE FOR ANOTHER

(By James O. Jackson)

NAIROBI.—For more than 40 years, Africans have struggled to rid themselves of white colonial rule, to be free to decide their own destinies and to choose their own leaders.

Most succeeded, but all across the rich green continent political freedom has proved to be a fleeting thing. Country after country is surrendering its parliaments, its free elections, and its hopes.

In most of Africa tyranny has become the rule, not the exception, and the indications are that the situation will get worse, not better.

"This is becoming the dark continent again," said a gloomy diplomat who attended the recent conference of the United Nations Educational, Scientific and Cultural Organization [UNESCO] in Nairobi.

"Take a look at the map—nearly every country is retrogressing, not progressing. Their governments are wrecks, and so are their economies. Most of these countries can't even be called 'developing,' because they're doing the exact opposite of that."

Indeed, the diplomat's map of Africa was not encouraging for anyone but Marxists, military dictators, and self-proclaimed kings. Repressive, military regimes are spreading like a malignancy, and more than half of the continent is now under one-party or military rule.

Since 1960, the year that the great "winds of change" began to drive colonialists from Africa, there have been at least 20 successful military coups and scores of failed ones. More than half of the original post-colonial presidents and prime ministers have been ousted from their posts. Some have been killed, most others exiled.

Those who replaced them, in almost every case, have taken the path of one-man or one-party rule and many have allowed themselves to be corrupted by the power at their disposal.

"For too many African elites, independence has meant taking the place of the whites and enjoying the privileges, often exhorbitant, hitherto accorded to colonials," wrote Rene Dumont, a French ecologist.

Dumont had in mind an array of African leaders ranging from the greatly respected and essentially benevolent Jomo Kenyatta of Kenya, to such appalling clowns as Idi Amin

of Uganda. In between are such leaders as President Mobutu of Zaire, reputed to be the richest man in Africa, and the privileged military rulers of Nigeria with their gold braid and limousines.

Uganda is the standard example of an African government gone mad. It is a country ruled by a man whose antics ceased being funny when his soldiers and secret police began random massacres that have cost the lives of tens of thousands of persons.

Amin's regime has also produced economic suffering on a cataclysmic scale. By exiling 40,000 Asians, who constituted Uganda's commercial and technical core, he not only rendered them homeless and bereft but he wrecked the economy. Foreign credits are nearly nonexistent, staples such as sugar are scarce, and the transportation system is in collapse.

But while Amin's Uganda is the worst example of misrule in Africa, it is not the only one.

In the Central Africa Republic there rules the bizarre Jean Bedel Bokassa, who made himself president, then president for life, and finally emperor, casting aside the constitution in the process. He makes public appearances in ludicrous 19-Century cocked-hat uniforms with gigantic epaulettes and grandiose medals that he awarded to himself.

Rules of behavior for his subjects include a dictum that they not be allowed to approach closer than six paces and that they give negative answers to his questions only when unavoidable, and only with great care—rules likely to be observed meticulously since Bokassa is known to order summary executions.

If his regime is harsh, it is not successful. Agriculture, which is the Central African Republic's main source of income, has been in serious decline for five years because of faulty management and senseless government policies. Potentially profitable diamond production has also fallen into chaos because of policy blunders.

But even in more benevolently ruled countries, immense hardship is resulting from mismanagement and from steamroller application of Marxist principles that do not sit well in Africa.

In Tanzania, President Julius Nyerere's highly acclaimed approach to African socialism has begun to crumble at the edges with the failure of his attempt to collectivize agriculture.

In Zambia, the astute and respected president Kenneth Kaunda has imposed one-party rule and has allowed the rich copper industry to slide to the brink of bankruptcy. In Nigeria, potentially the richest country on the continent, inflation is running away at 30 per cent a year because of ill-conceived government pay policies.

This kind of government, as it spreads across Africa, is having a disastrous effect. Economic growth has been running at a paltry one per cent a year for the continent, and in some areas growth has been negative.

Education in many countries is lagging behind population growth so that many black Africans find, to their shame, that their oppressed brethren in Rhodesia and South Africa are getting better educations than they.

An end to Africa's governmental and economic ills is not in sight, and there are even signs that the next plague to strike will be a series of destructive wars between such hostile countries as Kenya and Uganda, Ethiopia and Somalia, Algeria and Morocco.

The professionals of UNESCO, a congenitally optimistic group of individuals, take the view that time is needed to cure Africa's ills.

"Rome wasn't built in a day, and we have to keep in mind that these countries have been governing themselves for less than 12 years in most cases," says an American who has spent most of his career working with African governments.

"That's not a very long time to build up institutions and traditions of democracy, and it's our job to help them do that."

SHELTERBELT DEVELOPMENT NEEDED

HON. LARRY PRESSLER

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. PRESSLER. Mr. Speaker, on this opening day of the 95th Congress, I wish to introduce a measure that I consider of great importance. The planting of trees in the Great Plains States is one of the most important conservation, moisture-saving, and environmentally supportive measures that can be taken.

Coming from a family farm myself, I am intensely aware of the cost of planting trees and of maintaining them. Land is expensive; taxes are high; farm profits are low; and now, above all, much of the upper Midwest is locked in a devastating drought.

The last time we had a national, comprehensive tree-planting program was during the drought of the 1930's. The program of shelterbelt establishment in the 1930's has given us a rich legacy which is becoming endangered. In 1975, the Government Accounting Office recommended that the Department of Agriculture encourage farmers to renovate and preserve existing shelterbelts in order to conserve land and water resources. Existing Federal programs to assist those who plant shelterbelts are ineffective and unable to meet the growing need for intensive reestablishment, rehabilitation, and cultivation of windbreaks throughout the country.

Many States, including South Dakota, are currently experiencing drought conditions. Topsoil erosion and the loss of moisture can be controlled by trees. Some say that out of adversity springs opportunity. I hope that our people will unite on water, environmental, and tree-planting programs as a result of the 1970's drought. It is with this thought in mind that I introduce legislation to ward the establishment of a National Shelterbelt Act providing incentives for the establishment, cultivation, and preservation of shelterbelts.

The purpose of a National Shelterbelt Act would be to provide economic incentives to landowners who plant shelterbelts. These incentives should include:

First. Full tax credits to those farmers who set aside land for the development of shelterbelts by planting new trees or shrubs. The purpose of this credit would be to replace lost income from removing land from production in order to establish a shelterbelt;

Second. Diversion of Federal grants to those States and counties which remove shelterbelt lands from local property tax rolls in order to replace lost tax revenues on the local level; and

Third. Federal grants to county Agriculture Soil Conservation Service offices who choose to participate in a shelterbelt program. These grants would reimburse farmers partially or fully for the cost of purchasing seedlings; cultivating seedlings; and for pest and insect control in shelterbelt areas.

The 95th Congress must act to preserve and perpetuate tree planting in agricultural areas. For if we do not, the attendant loss of water and land resources, agricultural productivity, as well as wildlife habitats as a result of Congress inaction will be a loss of truly national proportions.

Aside from the overwhelming economic, environmental, and soil erosion control reasons for a national tree-planting program, I cannot resist recalling Joyce Kilmer's beautiful poem "Trees:"

TREES

[For Mrs. Henry Mills Alden]

(By Joyce Kilmer)

I think that I shall never see
A poem lovely as a tree.

A tree whose hungry mouth is prest
Against the earth's sweet flowing breast;

A tree that looks at God all day,
And lifts her leafy arms to pray;

A tree that may in Summer wear
A nest of robins in her hair;

Upon whose bosom snow has lain;
Who intimately lives with rain.

Poems are made by fools like me,
But only God can make a tree.

RETIREMENT OF MSGR. DANIEL B. O'ROURKE

HON. FRANK ANNUNZIO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. ANNUNZIO. Mr. Speaker, on Sunday, October 24, I was privileged to attend a Mass in honor of Msgr. Daniel B. O'Rourke, pastor of Saint Mary of the Woods parish, who retired after 45 years of compassionate service to the people of our community.

Monsignor O'Rourke is an outstanding example in our Northwest Side Chicago community of resourceful dedication to high principle for he has been the spiritual guiding light and the driving force in the growth of Saint Mary of the Woods parish.

During his 45-year career of service to the people of Chicago, Father Dan took a strong interest in the young people of our community and provided the leadership in organizing sports activities and other programs to provide wholesome outlets for youthful energy. Ordained into the priesthood in 1931, his first assignment was St. Agatha's parish, where he was supervisor of the parish athletic program.

He was also the founder of St. Bartholomew's first social club for teenagers, and as the founding pastor of the new St. Mary of the Woods parish, he devoted his creative energy and resourceful talent over the years to the education of the parish children. It was

at this time that I first met Msgr. Dan O'Rourke and out of this meeting grew a lifelong friendship which has lasted for over 40 years. He has remained a good friend of my family over all of these years, administering to our personal needs. My wife and I were married in 1935 at St. Agatha's where he performed the marriage ceremony.

I was delighted that on October 24 a special room was set aside for his old parishioners from St. Agatha's, and I had occasion to meet a few of them. It was a tremendously impressive evening with a great turnout of people who manifested their admiration, respect, and love for Monsignor Dan.

Monsignor O'Rourke was recognized by the Pope in 1963, when he was elevated to membership in the official papal household with the rank of Domestic Prelate, and title of right reverend monsignor.

Not only has Daniel B. O'Rourke ministered to the material needs of his flock through the building of a new church, convent, and school in the St. Mary of the Woods parish, he has ministered to his parishioners' spiritual needs as well—through his attention to their joys and to their sorrows and through his untiring efforts to lift their spirits and enthusiasm for both personal and spiritual achievement.

Indeed, the retirement tribute to him is most appropriate and I was delighted to have a part in the occasion. I congratulate Father O'Rourke on his splendid record of achievement and I extend my warmest best wishes for many more years of good health and success in his life of service.

Mr. Speaker, a priestly chronology of the career of The Right Reverend Monsignor Daniel B. O'Rourke follows:

THE RIGHT REVEREND MONSIGNOR DANIEL B. O'ROURKE

PRIESTLY CHRONOLOGY

April 11, 1931—Ordained to the Holy Priesthood by His Eminence, George Cardinal Mundelein at St. Mary of the Lake Seminary.

April 12, 1931—Offered First Mass at St. Sabina, 78th and Throop, under founding pastor, Rt. Rev. Msgr. Thomas F. Egan.

June, 1931—Appointed Curate at St. Agatha parish, Douglas Boulevard and Kedzie. Pastors were Fr. William J. Mockenhaupt and Rt. Rev. Msgr. John B. Sprengel.

January, 1933—Named Regional Director of the Catholic Youth Organization by His Excellency, Archbishop Bernard J. Sheil.

July, 1937—Appointed Curate at St. Odilo parish, Berwyn, under pastor Fr. William Roberts.

July, 1938—Appointed Curate at St. Bartholomew parish, Patterson and Lavergne, under pastor Rt. Rev. Msgr. Jeremiah P. Holley.

June, 1943—Appointed Curate at St. James parish, Maywood, under pastor Fr. James O'Shea.

June, 1944—Appointed Curate at Resurrection parish, Jackson Boulevard and Leamington. Pastors were Rt. Rev. Msgr. Michael J. Sullivan and Rt. Rev. Msgr. William J. Gorman.

July, 1952—Named founding pastor of St. Mary of the Woods; celebrated first parish Mass in temporary store-front church at 6141 Touhy Avenue.

September, 1953—Opening of parish school in present location.

December, 1953—First Mass offered in original "new" church at Midnight on Christmas Eve.

September, 1954—Solemn Dedication of parish buildings by His Eminence, Samuel Cardinal Stritch.

February, 1956—Appointed Moderator, District No. 3, Archdiocesan Council of Catholic Women.

October, 1957—Added three classrooms, music room and gymnasium to parish school.

December, 1963—Named a Domestic Prelate with title of Right Reverend Monsignor by His Holiness, Paul VI.

October, 1965—Newly remodeled St. Mary of the Woods Church opened.

October, 1966—Solemn Dedication of church by His Eminence, John Cardinal Cody.

January, 1967—Named Deputy Vicar, Vicariate No. 2, Archdiocese of Chicago.

August, 1967—Appointed Chairman, Priests' Advisory Council and Moderator of Vicariate No. 2, Archdiocesan Council of Catholic Women.

April, 1971—Parish celebration of Monsignor's 40th anniversary of ordination.

July, 1976—Named by community civic organizations as Grand Marshal of area Bicentennial Parade and festivities on July 4.

A BILL TO REPEAL OSHA—AN UNCONSTITUTIONAL LAW

HON. STEVEN D. SYMMS

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. SYMMS. Mr. Speaker, on this first day of the 95th Congress my colleague from Idaho, Mr. GEORGE HANSEN, myself, Congressman LARRY MCDONALD of Georgia, and Congressman CARLOS MOORHEAD of California are again introducing a bill to repeal the Occupational Safety and Health Act of 1970.

When I first came to Congress in 1973 I raised constitutional arguments against OSHA, but many people, even some conservatives, were of the opinion that the constitutional arguments had no merit and that the law needed to be improved rather than repealed.

But on December 30, 1976, a U.S. three-judge court in Boise, Idaho, ruled OSHA to be unconstitutional declaring that it violated fourth amendment rights. The court also issued an order restraining and enjoining OSHA from carrying out searches and inspections on nonpublic premises pursuant to section 8(a) of the act. This decision was the result of the courageous fight waged against OSHA by Mr. F. G. (Bill) Barlow the owner of a small business in Pocatello, Idaho. It is my hope that the U.S. Supreme Court will uphold the decision of the three-judge court. This may very well be a landmark court decision, upholding the constitutional rights of the individual against the bureaucratic abuses of big government. Let us hope, Mr. Speaker, that this decision will serve as a warning to other Federal Government agencies such as EPA and FDA that the American people do have certain rights guaranteed to them that will be upheld in court.

The Idaho court decision was described as follows in the January 4, 1977, Washington Post:

JOB SAFETY INSPECTION HELD ILLEGAL WITHOUT A WARRANT

A panel of three federal judges in Idaho has declared unconstitutional the 1970 law authorizing the Labor Department to conduct occupational safety and health inspections without a warrant.

The department fears the decision could strip it of all occupational safety and health enforcement power, and plans to appeal.

"We consider the right of inspection to be absolutely vital," Morton Corn, the assistant labor secretary who heads the Occupational Safety and Health Administration, said yesterday. "We will take whatever legal steps are necessary to vindicate that right."

The Idaho ruling, handed down last week, involved an electrical contractor, F. G. Barlow of Pocatello, who refused to let a federal inspector go through his place of business.

He rested his refusal on the Fourth Amendment to the Constitution, which forbids "unreasonable searches and seizures" and says search warrants should only be issued where there is probable cause to suspect a violation of the law.

The 1970 Occupational Safety and Health Act not only authorizes unannounced inspections of workplaces but prohibits advance warnings that inspections are about to occur. It makes no mention of search warrants, and federal inspectors do not obtain them.

In a Texas case earlier last year a three-judge panel said in effect that this failure to mention warrants must have been inadvertent, and ruled that safety inspectors ought to take warrants out in the future. That case is on appeal.

In the Idaho ruling, however, the panel simply said the law is unconstitutional, and left any repairs to Congress.

The Idaho ruling thus left OSHA without any authority to make inspections; the whole authorizing section was struck down as defective.

The Idaho judges then issued an injunction forbidding future inspections of Barlow's place of business and possibly—the panel's meaning is not completely clear—forbidding all further OSHA inspections nationwide.

OSHA lawyers said they would appeal the constitutional finding and seek a stay of the injunction. An appeal would take the issue directly to the Supreme Court, which in the past has upheld some warrantless government health and safety inspections and struck down others.

In conclusion, Mr. Speaker, I think it is noteworthy that all of the court challenges to OSHA so far have been brought by small independent businessmen—not by big corporations. I will close by urging favorable House action on my bill to repeal this unconstitutional law.

FLUSHING MEADOW-CORONA PARK AND THE GATEWAY NATIONAL RECREATION AREA

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. ROSENTHAL. Mr. Speaker, I am today introducing legislation which would expand Gateway National Recreation Area to include Flushing Meadow-Corona Park. The outstanding location and facilities of Flushing Meadow, which served as the site of the first United Na-

tions headquarters and of two World's Fairs, would make it a valuable addition to the Gateway urban park system.

Congress took a monumental step in 1972 toward providing city residents with adequate park facilities when it established the Gateway National Recreation Area. The number of visitors quickly doubled, and Gateway is on its way to becoming the most utilized recreation area in the federal park system.

Gateway is an enormous asset to the New York-New Jersey area, and its unique character gives it national significance. Its beaches, which currently draw 8 million visitors annually, are expected ultimately to draw 30 million. Expansion of the Gateway system would accommodate the recreational and cultural needs of additional city dwellers and expand the extent of facilities available to the public.

Flushing Meadow-Corona Park, the city's largest park, provides 40,000 New Yorkers every weekend with a variety of cultural and recreational opportunities. It is connected geologically to Gateway by a series of terminal moraine links. These could serve as bicycle trails or walking paths between the two areas. It is located in the geographic and population center of New York City. Modern transportation facilities made the site accessible to more than 100 million visitors during the two historic Worlds Fairs.

Inclusion of Flushing Meadow in any Gateway expansion has been called vital to improving access to the national parklands for millions of New Yorkers and has been enforced by the Department of the Interior.

An August 1976 study of urban parks by the National Park Service and the Interior Department's Bureau of Outdoor Recreation found that—

> Population of northern Queens, the Bronx and lower Westchester will never realistically be able to utilize the [existing] facilities of Gateway National Recreation Area because of the lack of adequate transportation.

It declared this problem could be solved only with the addition of other park areas, notably Flushing Meadow. The Interior Department report concluded that Flushing Meadow's accessibility by existing public transportation would enable it to add "potentially very significant recreational resources for millions of inner-city residents as soon as development takes place."

Flushing Meadow, originally a serene basin, had become a refuse dump by the time F. Scott Fitzgerald referred to it in "The Great Gatsby" as "The Valley of Ashes." Fitzgerald described it as—

> A fantastic farm where ashes grow like wheat and ridges and hills and grotesque gardens.

The 1939 World's Fair marked the emergence of the area as a flourishing parkland. The meadow was restored, two lakes and a boat basin were constructed, new approaches to the park were built and trees, grass, and shrubs were planted on what was once a vast urban wasteland. Improvements to the area costing $59 million were viewed by the fair's planners as a long-term investment. The site was selected for its potential as a park. City officials and fair planners kept in mind the permanent contribution which the fair could make to New York City after 1939.

After the fair closed, the city building at Flushing Meadow became the assembly hall for annual United Nations meetings from 1946 through 1950. This historic structure is now the New York City Pavilion and continues to attract thousands of visitors. In the late 1940's city officials improved the grounds and transportation facilities. Its convenient location, colorful history, and outstanding facilities led to its selection as the site for the 1964 World's Fair. During the planning and construction of this fair, pools, fountains, utilities, plantings, and some buildings were included as permanent features of the park. Robert Moses, president of the World's Fair Corp., stated:

> It is my firm conviction that in many ways, Flushing Meadow or Corona-Flushing Meadow, will turn out in time to be the best planned and most patronized park in New York.

Flushing Meadow has since grown into a vital recreational and cultural center for the surrounding community. Its 1,258 acres contain one of the few marinas in the city and two large lakes, one of which is used for boating. In addition to its natural assets, the park includes the Gertrude Ederle Swimming Pool in honor of the first woman to swim the English Channel, soccer fields, baseball/softball diamonds, and playgrounds. New York City is currently in the process of designing a 5-acre playground especially for the handicapped. For passive recreation, the park includes a wildlife refuge, the Queens Zoo, and the Queens Botanical Gardens.

The World's Fair buildings which remain are being utilized for cultural activities. The Singer Bowl, now named the Louis Armstrong Stadium, is the site of many concerts and sporting events. The New York City Pavilion contains the Queens Museum, which is the only art museum in the borough, a giant panorama of the city and an indoor skating rink. The New York State Pavilion is the site of an outdoor skating rink and the Queens Playhouse. The hall of science is the third most heavily-visited science museum in the Nation and a very popular museum in New York. Monuments from the two World's Fairs located throughout the park remind visitors that this area is indeed a landmark, enjoyed by millions over the years.

New York City today lacks sufficient funds to develop the park fully. As a result, Flushing Meadow's potential as a major recreational, cultural, and educational center has not yet been realized.

Flushing Meadow is an essential addition to the Gateway system. While transportation to other Gateway areas has posed real problems for the elderly and the handicapped, for example, Flushing Meadow is easily accessible and provides special facilities for these persons.

The concept of urban recreation areas emerged to fulfill the growing needs of city residents for accessible recreational and cultural facilities. These areas, which represent a departure from the traditional Federal idea of national parks, allow millions of urban dwellers the enjoyment of open spaces in a protected natural environment. Too many of our national parks are remote preserves, inaccessible to Americans of modest means, the handicapped, the elderly, and families without cars.

I am pleased to learn of the National Park Service endorsement for expansion of Gateway National Park to include Flushing Meadow and I look forward to working with the Service and its parent Department of the Interior to turn this dream into reality.

National Park Service expertise and funds would insure continued enjoyment of Flushing Meadow Park's facilities by a diverse urban population. Its multitude of indoor attractions could enable the park to be used year round, and become the central cultural and educational station of the Gateway system.

CONGRESS AND FOREIGN POLICY: LAPDOGS NO MORE

HON. CLEMENT J. ZABLOCKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. ZABLOCKI. Mr. Speaker, now that the country is about to have a Democratic President, to work with a Democratic Congress, there are those who are predicting that Congress will cease to reassert itself in the area of foreign policy.

For example, the former chairman of the Senate Foreign Relations Committee, the Honorable William Fulbright, has been quoted in the press as predicting that the congressional leadership will become "lapdogs" as soon as Jimmy Carter takes office.

I emphatically do not agree. For that reason it was a pleasure to see an article in the New York Times of November 29 by two well-respected political scientists, Thomas Franck and Edward Weisband, refuting the lapdog theory.

Their article points out some of the reasons why the Congress is unlikely to be willing to resume a secondary role in foreign policy, and I commend it to the attention of my colleagues.

To their argument I would add that because of a variety of congressional actions affecting foreign affairs, including the war powers resolution, the Budget Act, the repeal of emergency power provisions, and dozens of other acts and amendments, Jimmy Carter will come into office facing an array of legal constraints on his freedom of action in foreign affairs to an extent unknown by his elected predecessors.

The article follows:

[From the New York Times, Oct. 29, 1976]

LAPDOGS NO MORE

(By Thomas Frank and Edward Weisband)

Since 1973, the Constitution's "invitation to struggle" has turned into a nasty war between Congress and President for control of foreign relations.

The war has consisted chiefly of Congress' undoing Executive initiatives. It is difficult

for foreign nations—friends as well as enemies—to relate to a superpower which fitfully zigzags its way through the course of human events while various aspiring captains are seen to grapple for control of the wheel.

President-elect Carter has stated that a cease-fire with Congress is a top priority. But how?

One veteran of the war, former Senator J. William Fulbright, says that it will happen naturally. "After Carter takes over, the Democratic leadership will all revert to being the President's lapdogs."

We disagree.

During the past four years of Presidential eclipse, Congressmen and Senators have developed a taste for the long-forbidden fruit of foreign relations. They have learned that foreign-policy initiatives—once considered politically unrewarding—now attract media attention and popular recognition.

In particular, any Secretary of State appointed by Mr. Carter will soon encounter Senator Frank Church, slated to chair the Senate Foreign Relations Committee after Senator John Sparkman retires in two years. A recognized foreign-policy virtuoso—and a rejected suitor for Mr. Carter's Vice Presidency—Mr. Church will make an uneasy second fiddler.

Nor should the President-elect count too heavily on party loyalty. The Congress is normally the Presidency's official opposition. There tends to be closer affinity between Republicans and Democrats on the Foreign Relations Committee than between a President and Senators of his own party. Among the most tenacious foreign-policy critics during the Nixon-Ford Administration were the ranking committee Republicans, Senators Clifford Case and Jacob Javits.

Further militating against any slide back into the past is the recent rapid growth of a Congressional foreign policy bureaucracy. Congress, in the last five years, has developed a virtual counter-State Department composed of predominantly young, experienced and aggressive experts who are out to make their own marks on the foreign policy map. Supporting them is a new matrix of laws that institutionalize Congressional activism.

This does not necessarily mean that Congress will be as belligerent to Mr. Carter as to Richard Nixon and Gerald Ford. There will be the traditional "honeymoon" and Mr. Carter will not be cursed with the unoriginal sins of Vietnam, Watergate or the C.I.A.

Most important, Mr. Carter's outlook balances old elitist with newer populist proclivities. Like Henry Kissinger, he may sometimes worry about a Congress where, in Rousseau's words, "all men constantly wish the happiness of each but there is no one who does not take the word 'each' to pertain to himself." But, unlike Mr. Kissinger, he will understand that a foreign policy is more likely to succeed if it is conceived in the cacophony of full Congressional participation.

A new relationship, however, requires more than empathetic proclivities. It must begin with a total restructuring of the Congressional-Executive mesh. During the Nixon and Ford years, relations with Congress proceeded primarily via two channels: Mr. Kissinger and a few liaison professionals. It didn't work well because everyone on the Hill ignored the powerless messengers and demanded the all-powerful Secretary. Denied, they felt insulted rather than consulted.

This time around, the Executive must open more levels of communication.

By recently voting itself a large new foreign policy bureaucracy, Congress has coincidentally opened new entry points. A State Department desk officer can now find foreign relations specialists on the personal staffs of many Senators, the staffs of numerous House and Senate committees and subcommittees, the General Accounting Office and even in the office of the legislative counsel. They wield influence and, unlike most Congressmen, have the attention span to facilitate effective dialogue with midechelon Foggy Bottom counterparts.

Mr. Kissinger expressly vetoed a proposal to encourage midechelon contacts, fearing loss of control if a hundred flowers were to bloom. Yet he failed to stop the malcontents' taking their appeals to Congress; few Secretaries have come closer to losing control over their departments.

Instead of discouraging bureaucratic network-building across the chasm that marks the separation of powers, such activity should now be encouraged and openly conducted, for it can dampen incipient conflicts and make policy choices less intensely adversary.

NATIONAL CALAMITY: BREAKDOWN OF CHILDREN'S FOREMOST EDUCATIONAL INFLUENCE

HON. ALBERT H. QUIE

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. QUIE. Mr. Speaker, 15 years ago Urie Bronfenbrenner, a professor at Cornell University, came before the Education and Labor Committee providing information on research he had conducted on children, youth, and the family. He had some dire predictions on the way this country seemed to be going. Those predictions have come to pass and are articulated in his article in Search and reprinted in the Outlook section of the January 2, 1977, Washington Post. He stated:

> Social and psychological research points to the family as the foremost influence in what . . . we might call "character formation," "cultural education" or "upbringing."

Yet, Professor Bronfenbrenner has found that there has occurred in the last 20 years a "rapid and radical change in American family life" and that "the consequences for the young, and for society as a whole, are approaching the calamitous."

I commend this article to my colleagues and urge them to consider Professor Bronfenbrenner's warnings in their work on legislation in the 95th Congress.

[From the Washington Post, Jan. 2, 1977]

THE CALAMITOUS DECLINE OF THE AMERICAN FAMILY

(By Urie Bronfenbrenner)

Americans like to talk a lot about "progress," "improving the quality of life" and "meeting the challenges of tomorrow." All these depend on our ability to raise today's children well. The future belongs to those countries that make their primary commitment to the cultivation of the minds, character and creative vigor of the young. Therefore, the United States should take the upbringing of its children at least as seriously as it does landing on the moon or Mars.

In the upbringing of today's children numerous factors play a role: their neighborhood or town, schools, friends, religious institutions, games, work, the television and films they watch, the papers, advertising, magazines and books they read, role models and their family. But in the recent years nearly every line of social and psychological research points to the family as the foremost influence in what the Germans call *erziehung*, the Russians *vospitanie*, the French *elevation*, the Greeks, *paideia*, and we might call "character formation," "cultural education" or "upbringing."

That the family is the central institution comes as no surprise to most anthropologists, ethnic patriarchs or social historians because the family is the only social institution that is present in every single village, tribe, people or nation-state we know throughout history. But that the family is the core institution in every society may startle and annoy many contemporary Americans. For most of us it is the *individual* that is the chief social unit. We speak of the individual vs. the state, individual achievement, support for disadvantaged individuals, the rights of individuals, finding ourselves as individuals. It's always the individual, with "the government" a weak second. The family is not currently a social unit we value or support.

This fact is reflected in the scholarly research of the United States. Until recently, there has been only sporadic research on the history, significance or changes in the family. And it is reflected in our national, local and business policies, where a father, mother, son and daughter are usually treated as four individuals rather than as a family.

Thus, we have the following situation. At a time when our nation more than ever needs a public-spirited and enlightened young, and when the best new research is pointed to the critical role of the family, our nation pays little attention to the family as a key social unit, and there are mounting indications that the American family as we know it is falling apart.

I realize that at several times in the past century observers have wailed about the decline of the family. Historian Charles Thwing, for example, wrote in his 1913 book on the family: "The individual has come to be regarded as the crown and center of social and legal order. The family, as an institution of prime importance, has passed away." But what has happened in the United States since the 1950s really adds up to a rapid and radical change in American family life. And the consequences for the young, and for society as a whole, are approaching the calamitous. Let me explain what I mean.

There was a kind of family stability in the late 1940s and early 1950s. The extended family still existed in places; one out of 10 families had another adult relative living under its roof. After the shakeout year of 1946, the divorce rate was quite low, especially among families with young children. Only one mother in four was working outside the home. And fewer than 4 per cent of all children born were illegitimate. Parents fought for a better education for their children, kicking off a school and college-building boom. Television, which became commercially available to households in 1948, was almost unknown. Mass magazines wrote of "togetherness" and radio soap operas featured families. Hollywood made films about young Andy Hardy, Shirley Temple and young Dorothy from Kansas, who went to see the Wizard of Oz but longed to return to her family.

In the past 25 years, however, the change has been dramatic. The dimensions of this change can be illustrated by some data that I and others have gathered about two categories: the number of parents and other adult relatives in the home and the amount of attention that parents devote to genuine relationships with their children.

As for adults in the home, there has been a further decline in the number of grandmothers, uncles or unmarried sisters in the home. From roughly 10 per cent of all homes

having a third or fourth adult in 1950, the percentage has dropped to half that. Compared to 50 years ago, the change is even more considerable. For example, in the 1920s half the households in Massachusetts included at least one adult besides the parents; today the figure is 4 per cent.

That leaves Mom and Dad. But Mom is increasingly not found at home either because she's out working, as well as attending meetings or shopping several nights a week. In 1975, for the first time in American history, a majority of the nation's mothers with school-age children—ages 6 to 17—held jobs outside the home. In fact, women with school-age children show the highest labor force participation rate, 54 per cent, compared with 28 per cent in 1950.

For preschool children the change is more startling. In 1975, 39 per cent of mothers of children under 6 were working, more than three times as many as in 1948. As for mothers with children under 3, nearly one in three is working—an amazing jump from 1950.

Of course, the increase of women in the work force is one of the most significant social and economic facts of our time. While the number of working husbands has risen from 29.8 million to 37.8 million between 1947 and 1975, or 27 per cent, the number of working wives has shot up from 6.5 million to 19.8 million, or 205 per cent—nearly 10 times as much. It began before the so-called women's liberation movement, and has unquestionably brought many new opportunities and greater satisfaction to numerous wives and mothers. But it has also had a major impact on American child-rearing.

ONE-PARENT FAMILIES

The parents not only have been leaving the home to work; they have increasingly been disappearing. The number of children under 18 living with only one of their parents—now one out of six—has almost doubled in the past 25 years. And the change has been most rapid for children under 6. In 1974, 13 per cent of all infants under 3—nearly 1 million babies—lived with only one parent.

Three of the main contributors to the rise of one-parent homes have been divorces, illegitimate births and desertions.

The divorce rate has risen appreciably in the past 25 years, but especially since the early 1960s. Last year, for the first time in U.S. history, the number of divorces exceeded 1 million—twice the number of a decade earlier and almost three times that of 1950. Nearly 40 per cent of all marriages now end in divorce, three out of 10 women separate from their husbands before the age of 30. The number of children from divorced families is twice that of a decade ago.

And a growing number of divorces are now accompanied by a new phenomenon: the unwillingness of either parent to take custody of the children.

Next to divorce, illegitimate births are the fastest growing contributor to one-parent homes. In the past 25 years the rate of illegitimacy has more than doubled, from 4 per 100 live births to 10 per 100 live births. And in addition to the more than 350,000 babies born out of wedlock last year, another 65,000 pregnancies were halted by abortions to teenagers alone. Thus, a growing number of children are being born to unmarried women, 80 per cent of them under 25 years old.

As for desertions, the male has long been a frequent deserter of his wife and children—male desertion accounted for 49 per cent of divorces in the United States in 1900—and males continue to flee. But wives have begun deserting in far greater numbers, too. Police department reports are suddenly full of notices of missing mothers, and detective bureaus indicate a quantum leap in the number of runaway wives.

Single-parenthood is especially common among the poor, although it is becoming more frequent among the lower and upper middle classes. And it is particularly prevalent among black Americans, many of whom are poor. In 1974 only 56 per cent of all black children under 18 lived with both parents, down from 71 per cent in 1965. (Recent research by Herbert Gutmann and others has found that black families have been more stable until recently than many believed.) Specifically, between 1960 and 1970 the percentage of single-parent families among blacks increased at a rate five times that for whites—a baffling fact since it was a period of considerable economic and education gains for blacks. Today, the proportion of single-parent families among blacks is three times that of whites.

Two things are noteworthy, however. White families are being fragmented progressively as well as black families. And middle-class families are now approaching the social disintegration of lower-class families a decade ago.

TIME WITH CHILDREN

The other broad category of change is the amount of attention that one or both parents give to affectionate child-raising when the children and adults are not separated by school or work. Here too there has been a sharp decline.

With demands of a job that sometimes claim the evening hours and weekends, with increasing time spent commuting and caring for automobiles, with entertaining and social visits as well as meetings and community obligations, parents spend less and less time working, playing, reading and talking with their children. More and more children come home to an empty house or apartment.

In some homes a child spends more evenings with a passive, uninterested babysitter than with a participating parent. One study of middle-class fathers of 1-year-old infants found that they spent an average of only 20 minutes a day with their babies. When a recording microphone was attached to each infant's shirt, the data indicated that in terms of true, intimate interaction between father and child the average daily time together was 38 *seconds*. One survey I did of child rearing practices in the United States over the past 25 years reveals a decrease in all spheres of interaction between parents and their children. (The same trend is appearing in Europe, according to cross-cultural studies.)

An increasing number of parents enroll their children in day-care centers—enrollment doubled between 1965 and 1975 alone—and then preschools. And they sit them in front of television. It is estimated by experts that preschool children—under 6—spend an average 50 hours a week watching TV. By the time the average American youngster graduates from high school he has spent more hours watching the television screen than he has spent in school, or in any other activity except sleeping.

Gone increasingly are family picnics, long Sunday dinners, children and parents working together fixing the house, preparing meals, hiking in the woods, singing and dancing with other families or friends. And we are paying a price for this growing inattention, even hostility, to our children.

Accidents among children appear to be increasing. Accidents are now the chief cause of death for persons under 18, and about 15 million days of school are lost annually because of accidental injuries to youngsters.

Child abuse by parents has become a national problem. A 1970 survey projected that at least 2 million battered-child cases a year may be found annually now; nearly 2,000 infants and children a year are being killed by their supposed caretakers. A more gruesome trend shows that the killing of infants under 1 year of age has been increasing since 1957. The infanticide rate has risen from 3.1 per 100,000 in 1957 to 4.7 per 100,000 in 1970. Sadly, 90 per cent of these incidents take place right in the home; the most severe injuries occur in single-parent homes, and many brutalities are inflicted by the frazzled mother herself.

SOCIETY'S NEGLECT

It is not only the parents of children who are neglecting them. Society does so, too. As the 1970 White House Conference on Children reported:

"A host of factors conspire to isolate children from the rest of society. The fragmentation of the extended family, the separation of residential and business areas, the disappearance of neighborhoods, zoning ordinances, occupational mobility, child labor laws, the abolishment of the apprentice system, consolidated schools, television, separate patterns of social life for different age groups, the working mother, the delegation of child care to specialists—all these manifestations of progress operate to decrease opportunity and incentive for meaningful contact between children and persons older or younger than themselves."

James Coleman's fine 1974 study, "Youth: Transition to Adulthood," documented the same new conditions.

Nor should all the blame fall on the heads of the parents themselves. In many ways, the crux of the problem is not the battered child but the battered parent. To quote from the same 1970 Report to the President:

"In today's world parents find themselves at the mercy of a society which imposes pressures and priorities that allow neither time nor place for meaningful activities and relations between children and adults, which downgrade the role of parents and the functions of parenthood and which prevent the parent from doing things he wants to do as a guide, friend and companion to his children. . . . The frustrations are greatest for the family of poverty where the capacity for human response is crippled by hunger, cold, filth, sickness and despair."

What has replaced the parents, relatives, neighbors and other caring adults? Three things primarily: television, peer groups (same-age cliques or gangs) and loneliness.

A recent study found that at every age level, children today show a greater dependency on their age-mates than they did 10 years ago. And, increasing numbers of lonely "latchkey children" are growing up with almost no care at all, often running away—at the rate of more than 1 million a year now—to join colonies of other solitary juveniles and to experiment with drugs, crime, sex, religious cults and the sheer restless busy-ness of Kerouac-like movement over the American landscape. These "latchkey children" contribute far out of proportion to the ranks of young persons who have reading problems, who are dropouts, drug users and juvenile delinquents.

What is not often recognized is that the social fabric which so many feel is tearing around them is to a large extent a result of the deteriorating family life and the conditions that undermine declining care for our children. Look at what has been happening to America's youth.

The first consequence is that many of them die at birth or soon thereafter. America, the richest, most advanced scientific and medical country in the world, stands 17th among nations in combating infant mortality. The offspring of young, black mothers face an especially frightful prospect: Babies of black mothers are today still dying at the rate at which white babies died in the 1940s.

Crime in America is increasingly a youth problem. Crimes by children—those under 18—have been growing at a higher rate than the juvenile population. According to FBI data, arrests of children for serious crimes—murder, assault, robbery and rape—have jumped about 200 per cent in the past 15 years, and arrests for lesser crimes—larceny,

burglary, auto theft, forgery—have doubled. Arrests for juvenile prostitution have increased 236 per cent, those for trafficking and use of drugs 4,600 per cent.

This increase of crime by children is three times that of adults over the same period. In 1973, 1.7 million children were arrested for criminal actions—one-fourth of the total arrests in that year. At the present rate, one of every nine teenagers can be expected to appear in court before 18. And since many criminal offenders tend to be repeaters, the depressing prospect is for an expanded adult criminal population in the years ahead. And crime is already costing Americans an estimated $80 billion a year.

School vandalism has become in some areas as American as apple pie, soft drinks and aspirin. A good deal of the blame put on teachers for failing to instruct our youth adequately belongs with parents and their increasingly resentful and violent children, and on the rest of us for failing to give both our teachers and our families adequate support, especially of the non-monetary kind.

The suicide rate for young people 15 to 19 has more than tripled in less than 20 years, leaping from 2.3 per 100,000 in 1956 to 7.1 in 1974; and in recent years there has been an increase in suicides among younger children, some as young as 10. Suicide is now the third leading cause of death among young American whites; the rate for young blacks is lower but increasing faster. For young American black males, homicide is now the leading cause of death. Death from violence in some form—suicide, homicide, auto and other accidents—now accounts for two out of three deaths of those between 5 and 18. The self-destructiveness of our children has become a truly serious problem.

ACADEMIC DECLINE

Well known by now is the decline in academic capability among the nation's young during the past 15 years or so. According to the College Entrance Examination Board, average scores on the scholastic aptitude tests have dropped in the past 12 years 44 points (from 478 to 434) in the verbal skills and 30 points (from 502 to 472) in math, on a scale of 200 to 800. Teachers and professors have in recent years become alarmed at what they experience as their students' growing inability to write decently, refusal to be rigorous in their work and inability to use common sense reasoning about everyday adult affairs of life.

In a 1976 Gallup Poll conducted for the Phi Delta Kappan, a professional education journal, two-thirds of the Americans sampled blamed parents for these test score declines because they did not provide enough attention, help and supervision for their children. And an impressive series of investigations, most notably by James Coleman and Christopher Jencks, have demonstrated that it is not so much the schools that determine academic achievement or character as a student's family life and the conditions undergirding a strong life within the family: employment, health services, work schedules, child care, neighbors who care and the like.

In addition, the alienation, antisocial behavior and disorientation of the young have made an ever larger minority of them unemployable, without training or self-discipline. Half the unemployment in our country today is among young persons under 25.

What are we as a nation to do?

I conducted a study recently for the National Academy of Sciences that tried to determine how successful all of America's early intervention programs such as Head Start really were. The results, sad to admit, were disappointing—except in places or in programs that involved the *parents* in the effort.

It's transparent now that the family is a critically important institution in shaping our children's minds, values and behavior. But it's equally clear that the American family is disintegrating. That's what I'd call a collision course for our society. It must be reversed. But how?

There is no space here for concrete suggestions, but I would like to offer a few thoughts. I think the main causes of the change in family life are three in number. So perhaps our remedies need to take three paths.

One cause is our attitudes. America has temporarily lost its balance. Today what matters most for many people is their own growth and happiness, their own self-fulfillment, doing their own thing, finding themselves. We seem to be sunk in individualism. We so much want to "make it" for ourselves that we have almost stopped being a society that cares for others. We seem to be hesitant about making a commitment to anyone or anything, including our own flesh and blood.

To be sure, individualism has helped bring about extraordinary solo efforts by many Americans—in art, science, business and other areas. But we have entered a period of history when we need to put other, neglected values on the scale, too.

We have many other traditions in the American past: our social welfare schemes, our great public education system, our way of helping our neighbors—or foreign peoples—in times of catastrophe, our volunteer organizations that Tocqueville found so outstanding, our scholarships and other help for the poor but able, our quickness in extending friendship and care to strangers. Like individualism, they too are American traits, and we should draw upon them also. It's a matter of more balanced attitudes.

The healthy growth of each child requires a commitment of love, care and attention from someone. Neighbors, day-care leaders and school teachers can help, but most of the enduring, irrational involvement and intimate activities must come from parents. No one else can ever care so much or so continually. We need to get out of ourselves and into the lives of our children more than we do.

A second cause is our socio-technical structure—The network of work schemes, social dances, travel patterns, telephones and other social patterns and apparatus that conduce us to separate and fragment rather than come together. We need to reshape parts of this socio-technical structure to meet the new needs of today's parents and children.

MORE PRAGMATISM NEEDED

As a nation we are superb at scientific technology. In this area we are pragmatic. We try new things to see if they work. But when it comes to social technology, we are stuffy, rigid, pessimistic. We often refuse to try little experiments in human affairs to see if our society can be more harmonious and our children happier. Little things, like more part-time work schemes to allow mothers, students and fathers to have more flexible schedules for greater human contact, seem so difficult.

Our welfare system is a disaster, actively abetting the dissolution of our families. It's chaotic and was designed by no one. Do we redesign it? No, we prefer to continue to muddle through, even though the cost in human lives is staggering.

I would suggest that the United States can no longer afford to be so methodical, precise, pragmatic and research-oriented solely in its technological advances, and continue to be so sloppy, neglectful, cautious and fatalistic in its social programs.

Last, our national rules and policy are a cause of family trouble. The United States is now the only industrialized nation that does not insure health care or a minimum income for every family with young children, and the only one that has not yet established a program of child care services for working mothers.

In the controversial gun control legislation we support the rights of each individual to bear arms but not the rights of our people—or our police—against being shot to death more easily each year.

We care more fervently about keeping our wilderness wild, our favorite fishing holes intact and football than we do about the condition of our families or the gradually spreading cancer among our children.

In our taxes, our plane fares or our government welfare policies we pay close attention to each individual's privileges and pay little attention to family rates or policies that would help build more cohesive families. We are not only "far out" in some of our individual behavior, among the advanced nations of the world the United States is "far out" in its national permissiveness toward individuals and its national neglect of the upbringing of its children.

Obviously, we cannot go back to the family life of an earlier age—nor should we wish to do so, given some of the oldtime family's inequalities and authoritarian practices. But we can design and put into practice new attitudes and structures appropriate for our time.

Among all the talk about returning to decency and fundamental values after Vietnam and Watergate, none ought to be more dear than that of a renewed concentration on the proper care, instruction, guidance and values of America's young people and the families in which they are raised.

The bodies, minds and emotional health of our children demand it. And the ability of our country to cope with its awesome future demands it.

BILL TO ADD SECRETARY OF THE TREASURY TO NATIONAL SECURITY COUNCIL

HON. BOB CARR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. CARR. Mr. Speaker, today I introduce a bill that would add the Secretary of the Treasury to the National Security Council, reflecting the growing significance of international economics and domestic fiscal affairs in the development of national security policies.

The National Security Council, under the National Security Act of 1947, has the function "to advise the President with respect to the integration of domestic, foreign, and military policies relating to the national security, so as to enable the military services and the other departments of the Government to cooperate more effectively in matters involving national security." Inasmuch as a sound economy, with a sound dollar, is vital to national security, should there not be concern that our Nation's chief economic officer—the Secretary of the Treasury—has no statutory right to participate in these high level discussions of national security issues, issues which today obviously relate to his area of special knowledge and responsibility and issues about which all responsible citizens are becoming increasingly concerned.

For we all know that true national security is not limited to diplomatic activities or possible military threats, that such security also includes domestic well-being.

Surely economic problems incident to this aspect of national security deserve the attention of members of the National Security Council. In fact, the 1947 statute calls for consideration of domestic problems along with those having to do with diplomacy and the military.

We all know how intimately our domestic economy is related to foreign developments—the Mideast oil boycott and the sales of agricultural products to foreign countries are but two examples. Indeed it would appear that economic issues will loom ever larger as a factor which affects our security. These issues will increasingly determine not only our domestic policy but also our relationships to the rest of the world.

The presence of the Secretary of the Treasury on this Council is predicated upon the need for our vital economic interests to be represented in the formulation of national security.

I might add that this proposal was passed by both the House and the Senate in the 94th Congress only to be vetoed by President Ford. The Senate overrode the veto, but the House failed to consider the override.

SUBMARINE VETERANS OF WORLD WAR II

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. OBERSTAR. Mr. Speaker, on that day of infamy in December, some 35 years ago, when the naval forces of Imperial Japan struck a stunning blow against our fleet at Pearl Harbor, the American people experienced a momentary dread that they were completely defenseless against an implacable foe. Their fears were groundless. Within hours of that historic attack, a message went forth from the Commander, U.S. Submarines, Pacific. The message was addressed to a segment of the fleet already on station and poised for attack—the U.S. Navy's submarine flotilla. The message read: "Conduct unrestricted warfare."

Never in the annals of naval warfare was an order so loyally and so completely carried out. Our submarines, fighting in the lonely depths of the vast oceans, literally cut the fuel lines to the energy-starved Japanese homeland. That accomplished, they began, now aided by our rejuvenated air and surface forces, a war of attrition against the once-mighty Japanese naval and maritime forces. At war's end, while the Japanese Army was virtually intact, its seagoing forces had been annihilated.

As in any human endeavor which results in such total victory, there were costs. Fifty-two of our 252 active submarines were lost at sea. Three thousand five hundred and five officers and men went down with their boats. A tragic price to pay. Indeed, the loss rate of nearly 20 percent of our submarine force was the highest for any comparable unit in the U.S. Navy.

Those who also served and survived have not forgotten their shipmates. They have established an organization to keep alive the memory of those who went down to the sea in submarines in World War II. It is known as the U.S. Submarine Veterans of World War II. It is an elite organization, restricting its active membership to those who actually served on board those dark and solitary defenders of our freedoms. It is a unique organization, dedicated to perpetuating the spirit of loyalty and devotion to America which marked the final sacrifice of their lost shipmates.

Because of the knowledge and experience gained in this volunteer branch of our Navy, these submarine veterans have also recognized the bond between the past and today's nuclear-powered submarine forces—on station now, still protecting these shores against hostile attack. They have done this in numerous ways, but one which reveals this perception of continuity most directly is found in their acceptance as an associate member a colleague and a submariner—the President of the United States, Jimmy Carter.

Mr. Speaker, I am very honored to introduce this bill granting Submarine Veterans of World War II congressional incorporation and hope that the 95th Congress by enacting this legislation will join in paying respect to those few who have done so much for all of us.

FULL EMPLOYMENT BILL REINTRODUCED IN 95TH CONGRESS

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. HAWKINS. Mr. Speaker, Senator HUMPHREY and I today announced the reintroduction of the Full Employment and Balanced Growth Act.

We know that the House will quickly wish to address its attention to such badly needed legislation, so that Congress's response with respect to the economy can be an effective, comprehensive program of national economic policy.

The joint press release follows:

HUMPHREY AND HAWKINS ANNOUNCE REINTRODUCTION OF FULL EMPLOYMENT BILL

Congressman Augustus F. Hawkins (D-Cal.) and Senator Hubert H. Humphrey (D-Minn.) announced today that they were reintroducing the Full Employment and Balanced Growth Act in the new 95th Congress. The actual introduction was accomplished at noon in the House to be followed in the Senate at the earliest permissible date for bill introductions in that upper chamber.

Senator Humphrey stated: "The time is ripe for passage of this legislation.

"Our economy has weathered three terrible years of underproduction, unemployment and inflation. For a while, we witnessed a pretty good recovery, but it was too short-lived. For the last seven months, the economy has been stalled, output has been growing very slowly and the unemployment rate has been going up again.

"This stop and go pattern is the result of poor economic policy making and poor planning on the part of the government, which is what the Full Employment and Balanced Growth Act wants to end."

Congressman Hawkins added: "Little variations in the economy, up as well as down, do not change two basic facts, challenged by none: (1) we still have immense idleness of human resources and plant, and (2) no forecasts today claim that the idleness will not remain intolerably high for many years to come unless we devise new and powerful weapons to achieve a comprehensive and integrated national economic policy and program. H.R. 50 and S. 50 provide the only means thus far proposed to do this. Enactment of this measure was never more needed than now."

Senator Humphrey emphasized: "Our aim is to reduce adult unemployment to 3 percent by 1980, and to continue reducing inflation below its current level. I know there are critics who say this can't be done. But we have done it in the past, and we can do it again. And the Humphrey-Hawkins bill is the best mechanism we have for doing it.

"There is no better time to get started than right now. We have a Democratic Congress and a Democratic President who are committed to jobs and full employment. President-elect Carter wants to get our economy moving again, and Congress should help in this by making all the employment and anti-inflation measures in the Full Employment and Balanced Growth Act available to the new President," Senator Humphrey said.

Congressman Hawkins concluded: "We expect to move as quickly as possible to push for enactment of the Full Employment and Balanced Growth Act of 1977. The people and the Congress urgently need a national legislative framework and commitment to full employment as the cornerstone of the country's economic policy."

CONGRESSIONAL PAY RAISE DEFERRAL ACT

HON. NEWTON I. STEERS, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. STEERS. Mr. Speaker, I am pleased to join my respected colleague from Ohio (Mr. WHALEN) in introducing the Congressional Pay Raise Deferral Act. This legislation would delay any congressional salary increase until a new Congress is seated.

The chief benefit of this proposal is that it will allow the public to properly express its views on any congressional pay raise, because the Members must stand for election before they could receive any benefit from a salary change. And, because we would no longer be making decisions that are to our immediate benefit or detriment, we could hope for a more rational and objective consideration of congressional salaries than that which has been the case these past several years.

This legislation will benefit the entire Nation, but I must confess that my district, most of Montgomery County, Md., has a special interest in seeing this legislation enacted. This is because the salary levels of thousands of Federal employees are dependant upon what Congress pays itself, and I am proud to say that many of these high-level civil servants live in my district. This legislation would not act to delay civil service pay

increases during the congressional deferral period.

These hard-working people have suffered greatly as a result of congressional salaries being enmeshed in political controversy. So, I am pleased to note that they would benefit from any imposition of a rational process on congressional deliberations.

I believe it is time that we begin approaching congressional salary debates from an objective, apolitical perspective. The Congressional Pay Raise Deferral Act, introduced today by Mr. WHALEN, will facilitate this, and I therefore, give my strong support to this legislation.

THE FEDERAL AGENCY CONTROL AND REVIEW ACT

HON. JOSEPH G. MINISH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. MINISH. Mr. Speaker, I am today reintroducing the Federal Agency Control and Review Act, a bill to control the growth of the Federal bureaucracy. Legislation similar to this measure was the subject of hearings by committees in both Houses of Congress last year and had reached the floor of the Senate prior to adjournment. I am hopeful, therefore, of early action in the new Congress.

The bill provides for a mandatory congressional review of each Federal agency at least once every 10 years. Unless an agency, after review, is explicitly approved and extended by law, it would be abolished. In my view, this statute is necessary to provide an effective check on the uncontrolled expansion of the size and the power of the Federal bureaucracy.

In the past 15 years, approximately 250 new Federal agencies, bureaus, departments, and commissions have been created, while only 21 such entities have been terminated. A recent Brookings Institution study found that of 175 governmental organizations existing in 1923, 85 percent were still around in 1974, and 62 percent still existed in virtually the same form. We now have reached the point where the bureaucracy has grown to embrace some 10 executive departments, 80 independent agencies, and hundreds of subagencies which employ over 2 million workers at an annual cost to the taxpayer of over $31 billion—and these figures do not even include the vast military bureaucracies.

Under the bill, the constituting authority for one-tenth of all agencies, except the Congress, the Presidency, and the courts, would expire each year. The appropriate committees of the House and Senate would then be required to evaluate the performance and effectiveness of the agencies and make a public report of recommendations, including legislation for the extension, reorganization, or dismantling of the agency involved. If, for any reason, the Congress failed to act on an agency due to expire, it would be abolished.

It is a natural tendency for bureaucracy to grow bigger and bigger, but as it does, it grows slower, less efficient, less productive, and more expensive. It drifts further and further away from its original purpose and loses touch with other Government agencies which end up duplicating its services.

We must effectively monitor the usefulness and responsiveness of these agencies. My bill seeks to provide the means to fulfill this responsibility.

NATIONAL PARK ON CAMP PENDLETON MARINE CORPS BASE

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. ANDERSON of California. Mr. Speaker, today I submitted a bill which directs the Department of the Interior to study the feasibility of converting some of California's Camp Pendleton Marine Corps Base into a national park.

First introduced by retired Representative Alphonzo Bell this bill affects 18 miles of beach, and 125,000 acres of oak tree lined canyons, three mountain chains and several lakes and streams.

Mr. Speaker, I want to emphasize that this legislation is not a "witch hunt" aimed at the Marines. I believe Camp Pendleton has been and must continue to be a vital training base for our Marine forces. Beach and inland areas must be kept intact for their purposes.

However, close to Pendleton is Twentynine Palms Marine Corps Base with 932 square miles of land. With 932 square miles at Twentynine Palms, and 195 square miles at Camp Pendleton, we are asking the question: Does the Marine Corps need this space, or could some beach and inland property be used for recreation by the taxpayers.

With Yosemite National Park already overcrowded, this idea for a national park within easy driving distance from the Los Angeles-San Diego megalopolis is a good one.

The new park would be named the Santa Margarita National Recreation Area. Originally named Rancho Santa Margarita by the early Spanish settlers; shortly after Pearl Harbor the Marines bought the land, and it was dedicated by President Roosevelt in September 1942.

We are recommending that 13 miles of the beach on the military base be transferred to the national park. The Marines 5 miles of beach would be contiguous with the 25,000 acres inland where the headquarters, supply depot, and main barracks are located. This would constitute the new Camp Pendleton.

Mr. Speaker, I see this proposal as a logical extension of President Ford's proposal to double the size of the national park system. In his August 31, 1976, statement at Yellowstone National Park in California, the President called for a rapid expansion of the national parks to alleviate overcrowding problems in recreation areas.

More than 11.5 million people now live within 2 hours driving time of Camp Pendleton. We believe this idea will alleviate some of that overcrowding.

IN MEMORIAM: DEAN EMERITUS JEREMIAH L. O'SULLIVAN

HON. CLEMENT J. ZABLOCKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. ZABLOCKI. Mr. Speaker, during the Christmas holidays one of Milwaukee's best known and most beloved citizens died at the age of 82. He was Jeremiah L. O'Sullivan, former dean of the College of Journalism at Marquette University.

Known as "the Dean" to generations of students, Jerry O'Sullivan was an educator who combined a fervor for academic excellence with the practicality of a man of action. For many years active in Democratic politics in Wisconsin, he was also a valued counselor to a number of the State's political figures.

Jerry O'Sullivan was my constituent and, upon occasion, my adviser. He could always oe counted on for a clearheaded analysis of problems. His loss is deeply felt.

At this point, I will insert in the RECORD the obituaries of this remarkable man which appeared in the Milwaukee Journal of December 21 and the Milwaukee Sentinel of December 22:

THE DEAN, O'SULLIVAN, IS DEAD

(By William Janz)

The lead on this story isn't long because you know he'd come back and edit it himself if it were.

There are only a few words here and they're not easy to write: Dean O'Sullivan died Tuesday at the age of 82.

Like a thousand other people, you have said that you were 35 years old before you felt comfortable calling him Jerry. Then, like those thousand other people you remembered you had never called him that.

Jeremiah Leo O'Sullivan was always "the dean."

For 34 years, Dean O'Sullivan manufactured journalists in dirty rooms full of broken newspapers at Marquette University. Like vitamins, he fed you active verbs, tight writing and journalistic ethics, and forced them into the paragraphs you wrote.

He gave you your first smell of gluepots and put you in a class where you stained your fingers with ink.

The stain is still there although you work in a computerized newspaper office with a pretty red rug on the floor and expensive drapes on the windows. There's still room here for what O'Sullivan taught, although he came from a time when city rooms were places where dead cigars could feel at home.

If you think hard enough, you can hear him talking to someone in that dark room on the second floor of Marquette's Copus Hall, where he brought plants to die of fright; his voice stopped traffic and his laughter peeled paint.

From 1928 to 1962 he was the dean there, one of the best known journalism educators in the country. He founded the Catholic School Press Association, and received more awards than a Kentucky basketball team.

An excellent reporter, he also was a teacher, scholar, administrator and a religious man. He made the Bible sound like good reporting.

Fifteen years ago, Robert J. Riordan, one of the best reporters in Milwaukee at the time, wrote that the "interaction of J. L. O'Sullivan and the Marquette University College of Journalism is a remarkable phenomenon in the history of men and institutions and it ought to be recorded."

But you won't find it in the history of the college because the dean wrote the history. Despite his humility, for more than 30 years he was the College of Journalism—fading bricks, rundown typewriters and all.

In the years before he retired, the gruff looking old legend lived in Copus Hall, a building that died a few months before he did.

It happened hundreds of times there. A student would say, "Dean, I can't raise $20 for books."

Handing over the money, the dean would say, "Don't be late for class."

Now he's gone. Too bad Copus Hall isn't still there, that dilapidated, ink infested campus monstrosity with the pink door that was an O'Sullivan shrine for the kids who studied at the hall.

He made you want to roll up a newspaper, use it as a pillow and sleep there.

Too bad it's gone, because O'Sullivan could have been buried inside with the empty Coke bottles, decks of cards, filled ashtrays and chewed copy pencils. Drop a newspaper at the front door in place of a headstone and the old man would have been right at home.

"The older I get," he said, laughing at an awards dinner in 1961, "the longer you clap for me."

Although he's been dead for hours now, you can still hear that laughter you heard then. You always will.

O'SULLIVAN RITES SET FOR THURSDAY

Services for Jeremiah L. O'Sullivan will be at 10:30 a.m. Thursday at the F. J. Borgwardt Sons Funeral Home, 7425 Harwood Ave., Wauwatosa, and at 11 a.m. at St. Bernard's Catholic Church, 1500 Wauwatosa Ave., Wauwatosa.

The body will be at the funeral home after 4 p.m. Wednesday, with a vigil at 8 p.m.

He is survived by a son, Quentin, and a daughter, Mrs. Louis (Geraldine) Riepenhoff, both of Wauwatosa, and a brother, Joseph P., Sr., of Hutchinson, Kans.

O'SULLIVAN, EX-DEAN AT MU, DIES

(By Robert W. Wells)

Dean Emeritus Jeremiah L. O'Sullivan, who shepherded generations of Marquette University students through its College of Journalism, died of cancer Tuesday at St. Camillus Health Center, 10100 W. Blue Mound Rd., Wauwatosa. He was 82.

Jerry O'Sullivan joined the college's faculty in 1924 after quitting as head of the Kansas City Bureau of United Press. His telegram of resignation became famous: "Hours too long. Wages too low. Life too short."

GRUFF EXTERIOR

Four years later, O'Sullivan succeeded Father John Danihy as dean, continuing in that job until his retirement in 1962. During those 34 years, Jerry and the journalism school were so closely identified it was difficult to think of one without the other.

Even the least confident freshman quickly learned that under the dean's sometimes gruff exterior was a friendly man who wished them well. Especially during the 1930s, when money was scarce, many students were able to stay in school only through scholarships and loans arranged by O'Sullivan. If such sources were unavailable, Jerry often dipped into his own pocket to help.

BORN IN KANSAS

As a man who loved teaching and continued to conduct classes after becoming dean, O'Sullivan's criticism of poor writing could bruise feelings. One coed whose story about not getting a gift of lilacs from her boy friend did not strike the dean's fancy was hurt by his frankness. The next spring, Jerry picked a bouquet of lilacs from his yard and put it on her desk.

O'Sullivan was born on a farm near Hutchinson, Kan., on April 28, 1894. He was in the second class to graduate from Marquette's journalism school, getting his bachelor's degree in 1914.

During his last two years in college he had worked part time for the Milwaukee Sentinel and after graduation he was hired full time, covering police. In 1915, he joined United Press—now United Press International—as manager of its Wisconsin Bureau.

O'Sullivan rose quickly with UP, becoming, in succession, manager of the Indianapolis, New York and Chicago bureaus before moving to Kansas City where he was in charge of coverage in 30 states.

The year after he became dean in 1928, the journalism college was accredited by the American Association of Schools and Departments of Journalism.

In 1931, O'Sullivan organized the Catholic School Press Association to foster publications in Catholic schools, serving as a director for the next 31 years.

Many honors came his way. Pope John XXIII awarded him the Knight of St. Gregory medal in 1961. In 1966, he received Marquette's Alumnus of the Year Award. Others included a papal medal for work with the Catholic Press, an honorary doctor of letters degree from Boston College, a $500 award for teaching excellence, a medal and $1,000 from the Catholic Press Association and a Pioneer Award medallion from the National Scholastic Press Association.

O'Sullivan was an enthusiastic card player, particularly bridge, gin rummy and poker. His distinctive laugh, delivered while breathing in instead of out, was a familiar sound at such hangouts as the Milwaukee Press Club where it punctuated a particularly enjoyable bit of byplay at the card table.

O'Sullivan and his wife, Evelyn, lived for many years at 1734 N. 83rd St., Wauwatosa. She died last year. Survivors include a son, Quentin J., and a daughter, Mrs. Lou (Geraldine) Riepenhoff, both of Wauwatosa, and a brother, Joseph P. Sr., Hutchinson, Kans.

Funeral services will be held at 11 a.m. Thursday at St. Bernard's Catholic Church, Wauwatosa, with burial at Holy Cross Cemetery. Visiting hours will be from 4 to 9 p.m. Wednesday at the F. J. Borgwardt Sons Funeral Home, 7425 Harwood Ave., Wauwatosa, with a vigil at 8 p.m. The family suggested memorial contributions to Marquette University.

A MORE SECURE RETIREMENT

HON. ROBERT J. CORNELL

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. CORNELL. Mr. Speaker, on behalf of Congressmen EDGAR, MCHUGH, HUGHES, MILFORD, MURPHY of New York, MOAKLEY, and FLOOD, I am today introducing legislation which will permit working men and women to provide for a more secure retirement. This bill will allow employees with low employer-financed pensions to supplement such annuities by establishing individual retirement accounts, IRA's.

Such legislation was given favorable consideration during the 94th Congress and, in fact, was included in the House version of the Tax Reform Act. Unfortunately for all those with inadequate employer-financed annuities, the Senate did not approve such a proposal and it was dropped from the final bill.

I believe that the Employee Retirement Income Security Act, ERISA, should be strengthened to allow all working people the opportunity to have sufficient income for their retirement. This program could help to prevent in the future the far too prevalent poverty among our senior citizens in America today. It will also bring a measure of equity to the law by allowing all workers to benefit from the tax advantages and retirement earnings now permitted only a few.

COLUMBIA RIVER INTERBASIN TRANSFER BILL

HON. ROBERT DUNCAN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. DUNCAN of Oregon. Mr. Speaker, today I introduced a bill to extend the Colorado Basin Project Act study moratorium for an additional 10 years. The bill simply amends the act by striking out "10 years" and inserting in lieu thereof "20 years." All returning Members of the Idaho, Washington, and Oregon delegations, with the exception of the Secretary of Transportation designate, BROCK ADAMS, cosponsored this legislation.

The purpose of the bill is to insure the use of the Columbia River system for the continuing needs of the Pacific Northwest. The quality of life which residents of the Pacific Northwest are so fortunate to have, is due in large measure to the Columbia River. The Columbia River is the economic and recreational life blood of the Pacific Northwest.

This piece of legislation has been introduced, not in malice toward our sister States in the Southwest and Rocky Mountain areas, but rather with a realistic view toward the future. There have been numerous studies conducted by the Corps of Engineers and the Bureau of Reclamation which point out that the Columbia River system is presently being used to its maximum extent for energy, for transportation, for recreation, for irrigation, and for fish and wildlife.

Given the conclusion reached by those studies, it is obvious that any possible interbasin transfer is impractical and unjustifiable given the Pacific Northwest's future needs and no further study is necessary. Without regard to the feasibility of such an interbasin transfer, and there are indeed questions regarding such a proposal, it would be something less than responsible for those who live in the Northwest to ignore the needs of

the region in the future. The Columbia River system has been and will continue to be the source of the region's economic viability and source of its recreational enjoyment.

We in the Pacific Northwest are proud of our management of the river and the blessings which it has provided economically and recreationally. We share now with the Southwest the hydroelectric energy produced by the river system on a mutually beneficial basis. There is no national interest served by stripping the Northwest of its one great advantage and transferring that elsewhere. So solving the problems of the Southwest by creating more in the Northwest is not an acceptable solution.

I hope this bill will receive speedy and favorable consideration, and I pledge my best efforts to help the arid sections of our country with a solution to their water problems that will not adversely affect others.

STREAMLINING OF FEDERAL BUREAUCRACY

HON. JIM LLOYD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. LLOYD of California. Mr. Speaker, today I introduced three bills which establish a mechanism for streamlining the Federal bureaucracy. Zero-base budgeting and sunset legislation received a great deal of support in the last Congress and is a pledged priority of the new administration.

It is clear that we do not have an unlimited income to spend on new Federal programs. It is equally clear that agencies established decades ago may not be meeting today's needs. If we are to make Federal Government responsive to the problems of today and the future, we must be able to discard programs that have outlived their usefulness. A legislative halt to new expenditures without strict oversight, and the automatic abolishment of offices which have not been cost-effective are responsible ways to meet the goals of the congressional budgetary process and provide fiscal and program accountability.

The regulatory agency sunset bill proposes the abolition of 11 Federal agencies within 3 years of enactment unless certain oversight conditions are met. Either a congressional or administrative review may find the agency effective and meeting mandated goals, or suggest reform and reorganization. Then Congress will decide to extend, overhaul, or abolish the agency. A companion bill allows Congress to veto agency regulations within 30 days after they have appeared in the Federal Register. This should help insure responsive and reasonable directives and public representation.

Zero-base budgeting will require congressional evaluation and review of all Federal spending, not just budget increases, every 4 years. Programs, agencies, offices, and departments will be examined according to their purpose, enabling Congress to scrap duplicative or outdated programs. If a program is kept, the budget would be determined from the ground up—with no automatic authorization level.

Taxpayers have watched Federal spending increase and the bureaucracy grow. They are justified in holding Congress accountable. Let us not continue programs just because they existed last year. We can reverse the trend that has created, and then forgotten over 1,200 commissions; the trend that created 85 Government bodies in 1974 alone and abolished only 3; the trend that continues 85 percent of all Federal Government bodies that existed in 1922. I urge my colleagues to join me in cosponsoring these important and necessary bills.

GOODWILL ON CAPITOL HILL

HON. TOM RAILSBACK

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. RAILSBACK. Mr. Speaker, too often we only hear about the problems and disagreements on Capitol Hill. This afternoon I would like to take just a moment to tell about a project which has received the support of Senators and Representatives—committees and members' staffs—Republicans, Democrats, independents.

That project—Project Happy—has been an annual event on Capitol Hill since 1970. It is an effort made by those of us who work on the Hill to assist the Salvation Army in providing some Christmas cheer for the many needy children in Washington who would have no holiday otherwise. People from the private sector, from the business community, from the White House, and various agencies have also contributed significantly. When the project first began 6 years ago, Christmas was provided for 45 children. This year the project took care of a record 227 children—more than double what was done just 1 year ago. In addition, several more young people at the Home for the Retarded Children were taken care of. I now look forward to an even bigger success in 1977.

Senator MCCLURE is to be commended for continuing to push this project, and his staff is to be congratulated for the yeoman's work all of them do on the project. I would particularly like to commend the Senator's secretary, Mrs. Butler, who has organized and promoted this project since 1970. People in other offices contributed gifts, money, their own time for wrapping and buying gifts, food, and several persons "adopted" a family—that is, they purchased all that family's holiday presents. My office alone took care of nearly 2 dozen children.

There were also two very generous, anonymous benefactors—one provided 100 frozen turkeys for the Salvation Army to distribute, the other provided dozens and dozens of toys—from tea sets to drums—for the children. Their kindnesses were deeply appreciated.

Last year I personally had the opportunity to meet with some of the children who were assisted by this project. At that time, instead of going as a Congressman, I appeared as Santa Claus, and found this new role most rewarding.

I am sure the others who have participated in Project Happy also found their efforts rewarding, and I would just like to list the offices from which these good people came:

Congressman ADAMS, Congressman ADDABBO, Congressman ALEXANDER, Congressman GLENN ANDERSON, Congressman ARCHER, Congressman ARMSTRONG, Congressman BAUCUS, Congressman BERGLAND, Congressman BIESTER, Congressman BOLLING, Congressman BROOKS, Congressman BROYHILL, Congressman BUCHANAN, Congressman CLAUSEN, Congressman DENT, Congressman DRINAN, Congressman EDGAR, Congressman FINDLEY, Congressman FORSYTHE, Congressman FRENZEL, Congresswoman KEYS, Congressman HANSEN, Congressman LAGOMARSINO, Congressman LENT, Congressman MCCLORY, Congressman MCDONALD, Congressman MCKAY, Congressman MCKINNEY, Congressman MARKEY, Congressman METCALFE, Congressman MILLS, Congressman MINISH, Congressman MOSHER, Congressman MURPHY, Congressman RODINO, Congressman ROONEY, Congressman ROSTENKOWSKI, Congressman RUSSO, Congressman REUSS, Congressman ST GERMAIN, Congressman STRATTON, Congressman VANDER JAGT, Senator CHILES, Senator CLARK, Senator MCCLURE, Senator SCHWEIKER, Senator THURMOND, Congressional and Senate Staff Clubs, Committees such as House District of Columbia, Judiciary, Ways and Means, and Education and Labor, and Senate Commerce and Public Works Committees; the White House; agencies; the Heritage Foundation; the American Legion; Jack Anderson; and various private individuals.

It is clear that there still is goodwill on Capitol Hill.

PHIL HART'S LEGACY

HON. ROBERT W. KASTENMEIER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. KASTENMEIER. Mr. Speaker, there is a kind of quiet that hangs over these halls today. It is a quiet that tells us something is dramatically different—one that forces us to pause and reflect. It is a quiet created by the absence of a man who deeply touched each of us who knew him; a man who showed us that truth and dignity and principle are still noble virtues that can guide us into the light of a better day.

It has often been said that PHIL HART was the conscience of the Senate. He served that purpose for many of us in the House, as well. For him, principle always ranked above political expediency. And, to me, it seemed that PHIL HART's guiding principle centered around the dignity and nobility of people and the Earth they inhabit.

He expressed it perhaps best himself in a guest column he wrote for the Detroit News of January 25, 1976. He offered some words which he suggested "might be useful guideposts against which to measure proposed actions." The words, as he noted, belong to an Indian youth and go like this:

The part of Indian culture I would like to see restored is the respect for natural resources—an appreciation of the sky, winds and water.

It's an appreciation of your surroundings and the people in it.

The most important thing is your belief in those surroundings and not using them indiscriminately, especially people. It's a good thing to think and not just follow the crowd.

The sentiments expressed in those words are PHIL HART'S legacy to us. If we follow those guideposts, we cannot help but be a better people creating a better world for our children. And that, in the end, is all PHIL HART, in his quiet, gentle way, ever asked of us.

We will miss this good man and his voice of reason and compassion.

My deepest sympathies are extended to his family.

TIME TO REPAY THE NATION'S WORLD WAR I VETERANS

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. ANDERSON of California. Mr. Speaker, I am today introducing legislation, H.R. 55, which will provide a $150 monthly service-based pension to veterans of World War I or their surviving spouses. This bill will not adversely affect any veteran benefit which a World War I veteran might presently be receiving. H.R. 55 is similar to bills which I have introduced in each of the last four Congresses and I am pleased that 35 of our colleagues have already asked to be included as cosponsors of the "World War I Pension Act of 1977." I anticipate that the number of cosponsors will continue to grow, because a pension for these veterans is an idea whose time has come.

This Nation has provided very little to the veterans of World War I. The total benefit is $607.50 which the vast majority of World War I veterans have received. For these veterans, there were no GI educational benefits—now a benefit of up to $13,176 for a veteran with two dependents, nor was there an effort to aid these veterans in finding employment, nor a GI home loan program, nor an extensive system of high-quality veterans hospitals as there are today. In addition, by 1935, when the social security system was created, most of World War I veterans were already too old to build up maximum social security benefits.

Mr. Speaker, I firmly believe that an objective look at our system of veterans benefits will indicate that the veterans of World War I were shortchanged. The pension which I propose today is not a special privilege—far from it—but it will serve to partially recompense the veterans of World War I who were not eligible for the wide range of benefits available to the veterans of later wars.

There are presently 834,000 surviving World War I veterans—94,000 less than at this time last year. We in the Congress have a moral responsibility to act, and to act quickly, on this legislation.

CONSUMER FOOD LABELING ACT

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. ROSENTHAL. Mr. Speaker, more than 80 million Americans must be careful of what they eat because of allergies, dietary problems, religious considerations, and other reasons. Everyone has an undeniable right and need to know what is in the food he eats, who made it, how much it really costs, and more.

That is why I am today introducing the Consumer Food Labeling Act. This bill would require the labels on foods and food products to disclose all ingredients; nutritional content; accurate weight data; storage information; true identity of the manufacturer, packer, and distributor; uniform product grades; unit prices; ingredient changes, and it would bar the use of misleading brand names.

It is aimed at closing the still widening gap between the ability of Government to protect consumers and the ability of some segments of the business community to abuse them.

The following is a title-by-title description of the provisions of this legislation:

CONSUMER FOOD LABELING ACT

TITLE I. TRUTH IN FOOD LABELING

Requires food makers to show on their labels all ingredients by percentage, including all additives and preservatives, and by their common or usual names. As many as 80 million Americans must be aware of the food they are eating because of allergies, dietary problems, religious considerations and other reasons. It is presently impossible, thanks to a maze of regulatory exemptions, to tell from a label what is in a food product. The American consumer has an undeniable right and need to know what is in the food he eats.

TITLE II. NUTRITIONAL LABELING

Requires that any packaged consumer food product be labeled by the producer with the following information: (1) nutritional statements including fat content, vitamin and protein value, fats and fatty acids, calories and other nutritional data; (2) the net weight and drained weight of canned or frozen products packed in a liquid medium; (3) the major ingredients by percentage weight of any combination food item. We have been called "a nation of nutritional illiterates." Food labels currently provide little or no information on the nutritional value of the product although this is vital to the consumer's health. Many of the foods Americans eat do not have the nutritional value expected of them. Moreover, existing food labels fail to show the exact proportion of one ingredient to another. Some brands of combination food items contain more of the major ingredients than others (e.g. some brands of beef stew contain more meat, vegetables, etc. than others).

TITLE III. OPEN DATING PERISHABLE FOOD

Requires that all packaged perishable and semi-perishable foods be prominently labeled to show clearly the date beyond which it should not be sold and the optimum storage conditions at home. It also provides that overage products can be sold but only if they are safe, separated from other items and clearly identified as being beyond the expiration date. There is growing evidence that a significant number of perishable food products offered for sale to the American consumer are overage and may be unwholesome. Open dating information gives consumers personal policing powers over the sale of packaged foods and helps in storing these products at home.

TITLE IV. CONSUMER FOOD GRADING

Requires a uniform system of retail quality grade designations for consumer food products based upon quality, condition and nutritional value. There is currently no consistent and uniform system for determining and labeling the grades of food products. For example, one product may be graded A, B, C, and D, while another is AAAA, AAA and A; hence the two "A" grades are opposites, not equals, but there is no way for the consumer to know.

TITLE V. MARKETING PRACTICES DISCLOSURE

Requires labels on foods, drugs and cosmetics to contain the name and place of business of the true manufacturer, packer and distributor. Its value is two-fold: Most importantly it would aid government, industry and consumers in event of a recall by permitting quick and easy identification. This is now difficult because hundreds of private labels and private brand products on the market do not bear this information. (Bon Vivant vichyssoise was packed under more than 30 different private labels without Bon Vivant's name ever appearing on one of them—a fact which hindered that extensive recall.) Secondly, it would aid consumers in selecting products because they would know who really made the product under the private label. Private label products often tend to be priced lower than their nationally advertised counterparts, although there is frequently no difference between them.

TITLE VI. UNIT PRICING

Requires disclosure by retailers of the unit price of packaged consumer commodities. Individual retail businesses with sales below $250,000 a year are exempted. The myriad of package sizes makes it extremely difficult for consumers to compare the price of two or more package sizes of the identical product to determine the real cost and the best buy. Recent studies indicate that unit pricing provides valuable, objective price data which can save consumers around 8% on their food bills. Some stores now have unit price information but uniformity and comprehensiveness are lacking.

Also requires retailers to mark the actual selling price on the product itself, regardless of the possible presence of computer pricing codes and automated check-out facilities.

TITLE VII. NEW INGREDIENT NOTIFICATION

Requires manufacturers to print notices on all food labels that will alert consumers to ingredient changes.

TITLE VIII. MISLEADING BRAND NAMES

Prohibits the use of misleading product brand names. Advertising such names would violate the Federal Trade Commission Act unless the manufacturer can demonstrate that the product lives up to its name.

HANDICAPPED NEED MEASURE TO IMPROVE QUALITY OF LIFE

HON. HAROLD E. FORD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. FORD of Tennessee. Mr. Speaker, I rise today to introduce a much-needed measure designed to improve the quality of life for over 11 million handicapped Americans. This bill would amend the Internal Revenue Code of 1954 to encourage the employment of handicapped individuals by providing a tax credit for employers for a certain portion of the wages wages paid to such individuals. This measure is patterned after the highly successful work incentive, WIN, tax credit program.

Under the WIN program, employers are allowed to claim up to 20 percent of the wages paid to WIN participants. Eligibility for this tax credit is limited to 1 year for each employee and the credit amount is limited to the first $50,000 of tax plus one-half of the tax liability in excess of $50,000. According to information furnished by the Senate Finance Committee, the WIN program, which is designed to aid the transition of individuals from welfare to work, has been responsible for the employment of some 300,000 welfare recipients and has involved some 91,000 employers.

As you may know the need for meaningful action toward solving the employment problems of the handicapped is indeed great.

According to a 1972 survey of the disabled compiled by the Social Security Administration, the unemployment rate for handicapped individuals is roughly double that of other Americans. Mr. Speaker, as alarming as these figures may appear, they in fact underestimate the problems in the sense that they fail to consider those who have given up hope of ever finding a job. This same survey shows a disparity of pay between the handicapped and the nonhandicapped, for while the working handicapped had a mean weekly rate of pay of $131, the rate for other employed Americans was $36 higher, $167.

Another study entitled "One in Eleven, Handicapped Adults in America," by the President's Committee on Employment of the Handicapped, points out several facts about the 11,264,830—9.3 percent of the total population—handicapped Americans. In general, handicapped Americans received lower pay and less schooling than other citizens. The number of handicapped individuals below the poverty level is twice that of other Americans. Fourteen percent fewer handicapped children made it beyond the eighth grade, and 7 percent fewer handicapped youths got beyond high school. In terms of income, 6 percent more of the handicapped had incomes below $2,000 a year than the nonhandicapped and 7 percent more of the handicapped men had incomes below $7,000 a year than the nonhandicapped men.

As you might expect, the employment problems faced by the handicapped are not new. A 1966 Social Security survey of the disabled points out that:

> One of the most serious consequences of disability is its effect on the disabled person's ability to earn a livelihood.

Further, the report shows that in the spring of 1966, almost one-half of the 4.5 million noninstitutionalized men aged 18 to 34 who were not in the labor force were disabled to some extent.

The Vocational Rehabilitation Act of 1973, Public Law 93-516, states in title III that—

> It is of critical importance to this nation that equality of opportunity, equal access to all aspects of society and equal rights guaranteed by the Constitution of the United States be provided to all individuals with handicaps.

Mr. Speaker, I believe that the facts I have presented demonstrate that handicapped Americans are being deprived of their right to equal opportunity in employment. The Vocational Rehabilitation Act is a good first step but we in Congress are duty bound to go further. Since wages reflect the value of the worker to the employer, the differences in rates of pay between the handicapped and nonhandicapped illustrate the reluctance of most employers to hire the handicapped for good paying jobs. This fact, when combined with the larger unemployment rate among handicapped individuals and the figures which show lower education levels for these citizens, serve to demonstrate the need for an incentive to encourage the cooperation of private industry in solving this difficult problem.

Mr. Speaker, we in Congress have an opportunity and a responsibility to supply this needed incentive by amending our tax laws. If we do this we cannot only aid the handicapped but also aid all of our citizens by bringing the enthusiasm, energy, and expertise of our handicapped to a worthy and productive use. I urge my colleagues to examine the provisions of my proposal carefully, and I hope that you will see fit to support this measure, for only through its enactment can we in Congress truly hope to enable the handicapped to live more independently with the dignity that comes from productive and self-sufficient lives.

THE HEALTH SECURITY ACT

HON. LLOYD MEEDS

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. MEEDS. Mr. Speaker, I wish to support the introduction of the Health Security Act, a measure which I am cosponsoring for the third consecutive session. I strongly believe that we must make decent health care available to all our citizens a national goal, and we need to get a dialog started on how best to achieve that goal.

At the same time I wish to make it clear that I believe a program involving substantial expenditures of funds will have to wait for full implementation until such time as the economy improves and funds are available.

We ought, however, to have something in place when these funds are available. We should be examining our options through hearings, House dialog, and study, and be ready to move on a national health care system when the economy improves.

I prefer this particular bill, because it not only addresses itself to the problem of payment for health care, but also to the question of improved delivery systems and better distribution of health care in what is already a $118 billion industry. Additionally, this bill deals with duplication of services and a better shake for underserved areas.

In cosponsoring the Health Security Act, I expect it to provide an appropriate vehicle for meaningful dialog on the many difficult questions to be worked out before we are ready for a national health care system.

THE NEED FOR THE CONGRESSIONAL PAY RAISE DEFERRAL ACT

HON. EDWARD W. PATTISON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. PATTISON of New York. Mr. Speaker, later this month the President will transmit to us his views on the recommendations of the Quadrennial Commission on top-level Government salaries. The President's budget message is expected to include a $12,000 increase in Congressional salaries.

My purpose today is not to pass judgment on the expected salary increase proposal—although I suspect that there is much to be said on this subject. Rather, I want to comment now on the procedures involved.

Last September, I called our deliberations on the annual cost-of-living salary increase "an embarassing exercise." The same can be said about our pending review of the recommendations of the Federal Salary Commission.

The Constitution places the Members of Congress in a unique and awkward position. We are the only Federal agency that can determine its own salary levels and, ultimately, we cannot delegate that authority to anyone else. Nor should we.

But we are faced with an inherent conflict-of-interest situation when we must vote on a proposal that could be to our immediate and substantial personal advantage. In any other case, the appropriate course would be for the affected individuals to disqualify themselves from the vote, but this is obviously impossible when every Member of Congress is personally affected and there is no way to delegate ultimate responsiiblity.

Is this an unsolvable dilemma? I think not.

Today, I am pleased to join with several distinguished colleagues, Messrs. WHALEN, PEASE, and STEERS, to introduce the Congressional Pay Raise Deferral Act. I believe this simple bill—it is only 3 pages long—is the answer to our complex problem.

The Congressional Pay Raise Deferral Act provides that any increase in congressional salaries shall be deferred until the start of the Congress following the one in which the increase is recommended or approved. Thus, a Representative would have to be elected to the next Congress before he or she could receive the salary increase.

It seems to me that this is the only way in which we can remove ourselves from this conflict of interest. We would no longer be forced to make decisions that are to our immediate and personal benefit or detriment, and the public would be given an opportunity to pass judgment on the decision before it is implemented.

You know, Mr. Speaker, the Founding Fathers foresaw this very problem, almost 200 years ago. When they reviewed the new Constitution, it was decided that several perfecting amendments were needed, and a package of 12 amendments were sent out to the States for ratification.

The second of these 12 proposed amendments would have done just what we are proposing today—it would have delayed any Congressional salary adjustment until the Congress following the one in which it is decided. However, of the 12 amendments proposed only 10 were ratified; they are now know as the Bill of Rights.

For reasons unknown to me, the pay raise amendment was one of the two that were rejected. But I am proud to note that New York State was one of those that voted to ratify all 12 amendments.

Today, I do not think we need to go through the process of amending the Constitution. Instead, all that we need to do to set this matter straight is to enact a simple three-page bill.

I am enthusiastic in my support for the proposed Congressional Pay Raise Deferral Act, and I urge my colleagues to join as cosponsors of this legislation.

Together with CHUCK WHALEN and others, I will press hard for enactment of this bill. I supported similar legislation in the 94th Congress; I hope to see this bill enacted in this new, 95th Congress.

MANDATORY SENTENCING

HON. JIM LLOYD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. LLOYD of California. Mr. Speaker, today I am introducing a bill which would require mandatory sentences for the use of firearms in the commission of Federal crimes.

Mandatory sentencing was included in a gun control bill considered by the Judiciary Committee in the 94th Congress. This is a separate issue and should be considered apart from controversial, and therefore less immediate legislation. Whether we support or oppose gun control, we can all agree that the soaring rate of violent crime in this Nation cannot be ignored. This legislation is a deterrent to the use of guns in crime without compromising the second amendment right to bear arms.

My bill provides penalties of 1 to 10 years for the first offense, and 2 to 25 years for the second conviction for a felony committed while using or carrying a firearm. It is my belief that these required prison terms will be part of the answer to our problem of violent crime.

POLITICAL FREEDOM FOR FEDERAL EMPLOYEES

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 1977

Mr. CLAY. Mr. Speaker, I have today introduced H.R. 10, the Federal Employees' Political Activities Act of 1977.

H.R. 10 updates and modifies the Hatch Act. It permits Federal civilian and postal employees the right to participate voluntarily in political activities so long as those activities do not even appear to compromise the integrity of the merit system or the impartial administration of the functions of Government.

The Hatch Act was precipitously enacted in 1939 with no public hearings and limited debate. It was an overreaction by the Congress to abuses, not of voluntary political activity, but to coercion and kickbacks by employees and recipients in Federal relief programs.
